THE CHRISTIAN SCIENCE PUBLISHING SOCIETY BOSTON · U.S.A

Christian Science Literature

"Science and Health with Key to the Scriptures" and all other published writings of Mary Baker Eddy are listed on the outside back cover page of this Sentinel.

Christian Science Sentinel

Established, 1898, by Mary Baker Eddy. Published weekly, containing articles, editorials, and special current information regarding the Christian Science movement, also testimonies of healing. Subscription price, payable in advance, postpaid, to all countries: One year, \$3.00; six months, \$1.50; three months, 75 cents; single copy, 7 cents.

The Christian Science Journal

Founded, 1883, by Mary Baker Eddy. This monthly magazine is an official organ of The First Church of Christ, Scientist, Boston, Massachusetts. Contains articles, editorials, and testimonies of healing a directory of Christian Science Churches, Societies, and Reading Rooms; also in the January, April, July, and October issues a list of Christian Science Practitioners and Nurses. Subscription price, payable in advance, postpaid to all countries: One year, \$3.00; six months, \$1.50; three months, 75 cents; single copy, 30 cents.

The Christian Science Quarterly

Founded, 1800, by Mary Baker Eddy. Published January, April, July, and October. Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. Printed in English, English-Dutch, and English-German. English edition published also in vest pocket size. Subscription price, payable in advance, postpaid, to all countries: One year, \$1.00; single copy, 25 cents.

The Christian Science Monitor

An International Daily Newspaper. Founded, 1908, by Mary Baker Eddy. Daily, except Sundays. Its own world-wide news service is supplemented by the service of the Associated Press and of the United Press Association. Complete in its departments; unique in its Home Forum page. Full page of editorials dealing truthfully and fearlessly with vital questions of the day. Subscription price, payable in advance, postpaid to all countries: One year, \$9.00; six months, \$4.50; three months, \$2.25; one month, 75 cents; single copy, 3 cents.

Le Héraut de Christian Science

Established, 1918. A periodical published monthly in French, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, postpaid to all countries: One year, \$2.00; six months, \$1.00; three months 50 cents; single copy, 20 cents.

Der Herold der Christian Science

Authorized, 1903, by Mary Baker Eddy. A periodical published monthly in German, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, postpaid to all countries: One year, \$2.00; six months, \$1.00; three months, 50 cents; single copy, 20 cents.

Subscriptions will begin with the next issue after the receipt of the order. Information regarding bound volumes of the weekly and monthly periodicals will be given upon request.

Demonstration

NINA SEYMOUR KEAY

ONE of the meanings given in a dictionary for the verb "demonstrate" is, "Logically prove the truth of." It is plain, therefore, that, since matter is simply a false picture in mortal mind, no material thing can be demonstrated. The only demonstration possible is that of Principle, for Truth alone can stand the test of proof. When a demonstration of Principle is made in human experience, however, the result is often confused with the cause, and the material gain is considered to be the demonstration, instead of being sen as what follows the demonstration. Therefore, it is necessary to maintain very clearly in thought the fact that it is the allness of God which is to be demonstrated, not some much desired material result, though the result will certainly follow if it is the right result. The human mind, however, being "enmity against God," is not able to decide the right outcome and often outlines some human gain and tries to "demonstrate" it; and if it is not "demonstrated" easily, the human will is often called upon to produce, by main force, so to speak, the demonstration that is considered to be the right solution. In this way, under the cloak of mental statements as to God's omniscience and omnipotence, the human mind seeks to twist circumstances to suit itelf, instead of yielding itself in obedience to divine law. It is said sometimes that a house must be "demonstrated," of a bicycle, or a typewriter, or some other need of the moment.

In reality, what needs to be demonstrated is the fact that divine Love supplies every need, but what the exact solution is can only be seen when the demonstration is complete. Hence it is of no avail forcibly to twist circumstances to suit the convenience of the moment, even when it seems possible to do so; for unless the change of circumstances comes about naturally and inevitably, as the "outward and visible sign of an inward and spiritual grace," it is not a demonstration of Principle at all, but merely an expression of the wishes of the human mind, and in the latter case the incrovement cannot possibly continue, since the mental concition is unimproved. So if one finds one's self in uncongenial surroundings, for instance, it is of no use to declare, "Harmony is my right; therefore I shall not stay here in the midst of inharmony." So long as inharmony is believed in, it will turn up in one's surroundings, relentlessly and inraiably, no matter how often one changes one's outward bilitation. Change the thought, however, and heal the bild in inharmony, and then either the previously unconsmial surroundings become congenial or else in a perfectly tatural and harmonious way one is removed to better sur-

Events are merely the outward expression of the beliefs of the human mind, and they change, therefore, in response to mental changes. So it becomes perfectly clear that the cally way to get events to take a consistently improved cars is to establish better mental conditions for one's self,

and then nothing can hinder the manifestation of harmony, since we have the power to work out our own salvation through obedience to the law of God.

Sometimes a demonstration of Principle may remove some material possession instead of adding to it, but in such a case the desire for it would be removed also, displaced by more spiritual desires and hopes; in which case nothing is lost but much is gained. It is very obvious that Jesus of Nazareth, our Way-shower, did not spend much of his time "demonstrating" material possessions; he demonstrated the law of God by destroying false beliefs through his knowledge of the truth, and this process made manifest to human sense such different results as the healing of the sick and sinful, the feeding of the multitude, and the destruction of the barren fig tree and the Gadarene swine. In each case, however, the demonstration of God's law was the same, the proof of the reality of spiritual being and the unreality of matter. As Mrs. Eddy says (Miscellaneous Writings, p. 367): "Matter and evil are subjective states of error or mortal mind. But Mind is immortal; and the fact of there being no mortal mind, exposes the lie of suppositional evil, showing that error is not Mind, substance, or Life. Thus, whatever is wrongfully-minded will disappear in the proportion that Science is understood, and the reality of beinggoodness and harmony-is demonstrated."

Let us, then, know that true demonstration is made by "prayer and fasting," and not by juggling with our outward conditions, and we shall find that "all things work together for good to them that love God."

"Vengeance is mine; I will repay"

HELEN ROTTSCHAEFER

CAN it be that God cherishes a spirit of revenge even as men do,—so great a spirit, indeed, that He holds for Himself the privilege of exercising it? If this be so, then surely mortals are justified in their desire for revenge. But how inconsistent is this with our idea of a God who is Love! The whole solution of the question lies in one's concept of God. If God is a magnified mortal, with the likes and dislikes of men, with hatred tempering His love, then one cannot expect much else than that God will act as mortals do, and revenge for wrongdoing will be one of His very reasonable desires. But, while a man may salve his own conscience because he refrains from deeds of vengeance himself, he has not advanced far morally while he endows God with weaknesses which he likes to believe are no part of himself.

Wherever men have conceived of God as personal this sense of His vengeance seems to have been strong. The Hebrews endowed Jehovah with a goodly capacity for revenge and jealousy. "I will render vengeance to mine enemies, and will reward them that hate me" is the theme of many a song that has a very human sound. While some of the Old Testament writers undoubtedly had a concept of God which very nearly approached Spirit, to most of

Copyright, 1920, by The Christian Science Publishing Society, Falmouth and St. Paul Streets, Boston, Massachusetts. Entered at Boston post office as second-class matter. them God was simply a tribal Deity who was jealous of the gods of other nations. And then turning to other peoples and their religions, we find similar beliefs prevailing. Greeks must have spent a very considerable part of their time in dodging the wrath of the gods. Paris chooses Venus as the most beautiful goddess and as a reward is given Helen for a wife. Juno and Minerva, in jealousy at the choice, take their revenge by helping the Greeks in the Trojan War which follows. Prometheus plays a trick on Jove, who, in his wrath, punishes all mankind by depriving the race of fire. There is constant war and strife and jealousy on Olympus, and mankind reaps the result. The popular notion among modern Christians is that God punishes man for acting contrary to His will, and yet from the apparently arbitrary way in which the punishment often falls, it would seem to be a hard thing to discover just what the will of God is. Leaving this sense of religion for that other field which so nearly approaches it, superstition, the same phenomenon is to be found—fear of God's vengeance. The common custom of knocking on wood is nothing more nor less than a relic of the old heathen desire to appease the gods when one has tempted them by boasting.

It is not until we come to the teaching of Christian Science that we find the purely impersonal interpretation of God's vengeance. Christian Science teaches that God is Principle. If this is so, then God must act always in a wholly impersonal way. Could one imagine the principle of mathematics holding revengeful thoughts over the person who had failed to work out a problem according to the principle's own perfect method? And yet the result is the same in any case—failure to solve the problem because one's understanding of the principle is not sufficiently great. Even so is it in the case of all of a mortal's True Principle is Life; this Principle we call God, and through Christian Science, when we faithfully apply its teachings, we may learn to know and understand God, Principle. This Principle is also Truth and Love. What, then, are a man's problems, and how shall he go about solving them?

Let us first of all remember that the real man, God's idea, has no problems, for he is as perfect as the God he reflects, being made in the image and likeness of Godspiritual, since God is Spirit; but the false and untrue sense of man, the lie about man, tells him that he lives in matter and that he suffers from the ills of matter-sin, sickness, and death. This, then, is the great seeming problem, to overcome not so much sin, sickness, and death themselves as primarily to see in its true light the lie of human sense which tells one that it is possible for him to suffer from these ills. He can solve this problem in but one way, and that is by really understanding Principle, Life, God or good. Just in proportion as he understands this Principle he will grant to it, good, all power; the seeming power that the lie had will vanish and with it will go all the evil in its various forms. Mrs. Eddy says on page 393 of Science and Health: "Man is never sick, for Mind is not sick and matter cannot be. A false belief is both the tempter and the tempted, the sin and the sinner, the disease and its cause."

We have assumed so far that the problem has been worked out. What, then, of God's vengeance? It might be stated, in the simplest way, that God's vengeance is attributed to the fact that effect always follows its cause, and that error is always destroyed. In the perfect working out of the problem, the cause has been the correct application of the understanding of Principle, the man has understood absolutely that only good has power,—and the

correct solution has followed, the error being destroyed through the understanding of the truth. In the opposite case, the man has failed to apply understanding of Principle, has been willing to grant that evil has power, and the effect has followed in the failure to solve the problem. Error still seems to have power, then, but Principle always works according to an unerring law, and so error must be destroyed. On page 240 of Science and Health we read. "Remember that mankind must sooner or later, either by suffering or by Science, be convinced of the error that is to be overcome;" and on page 5, "Sinners flourish 'like a green bay tree;' but, looking farther, the Psalmist could see their end,—the destruction of sin through suffering." Suffering follows inevitably the belief in sin and sickness, and when these false beliefs become distasteful to a man his eyes are opened.

In its truest sense, of course, because good is the only reality, retribution must be the reward for good and not the punishment for evil, which is only suppositional. Therefore, in the correct working out of the problem, true retribution is seen to take place. And when the problem seems to fail of solution, retribution takes the form not of mere punishment for error but of the destruction of the error through that punishment. The vengeance of a human being springs from hatred, and no good can be accomplished by it because it arouses only further hatred in the breast of its victim. What we term the vengeance of God, working according to an ever operative and unerring law, is in reality an activity of Love, and through it man is delivered from the bonds of the flesh.

Loyal Service

LAURA LOUISE GALSWORTHY

A STUDY of the two words, "loyal" and "service" in connection with the way Mrs. Eddy uses them throws a wonderful light on the beauty of their meaning, and reveals their close connection with the very life of the student of Christian Science. First let us hear the demand to go up higher which comes to us as we read the words on page 183 of "Science and Health with Key to the Scriptures": "Divine Mind rightly demands man's entire obedience, affection, and strength. No reservation is made for any lesser loyalty." Now, how can we be loyal to this demand unless we know how to render pure and faithful service to our Father-Mother God?

Following this thought comes another encouraging statement in "Miscellaneous Writings" (p. 12), "The present is ours; the future, big with events. Every man and woman should be to-day a law to himself, herself,-a law of lovalty to Jesus' Sermon on the Mount." Then the question arises, How are these demands on us to be fulfilled? We realize the reply as we read our Leader's beautiful words on page 189 of Miscellany, "The government of divine Love derives its omnipotence from the love it creates in the heart of man; for love is allegiant, and there is no loyalty apart from love." From even a slight study of the passages already quoted, the true meaning of service begins to dawn on our thought, the service that joyously, selflessly, and fearlessly yields all to God, content to wait on His Word, patiently and lovingly going forward, however slowly and sometimes seemingly painfully, firm in the desire to do the Father's will, steadfast and loyal in the understanding of Principle.

It is pathetic if not somewhat humorous to notice how if our judgment over some problem is governed by human will No. 1

in its pride of intellect and certainty of right, not only is fear immediately manifested when we come up against those who hold opposite views from ours, but an intense desire seems to master us to impress upon others how correct we are and how impossible it is to have any other viewpoint. Surely when we get the human self out of the way and wait humbly and patiently for the true answer, knowing that Principle alone governs, only peace and a quiet confidence can fill our thoughts and we shall not feel it necessary violeatly to oppose or endeavor to suppress any expressions of coinions contrary to our own. What greater proof can we render of loyal service to our Maker than watchfully, jealously, and persistently to guard our thinking to see that every thought brings its tithes of love and charity and compassion to the spiritual storehouse of Truth. Surely as brethren bound together by the one indissoluble bond of love for Principle we can extend to each other the widest resible appreciation for the motives that actuate us and ited no need to criticize and cause unloving comments to be made and so to personalize error, but each in proportion to his loval adherence to Principle can well afford to adopt as his watchword the well-known classic saying, "They also serve who only stand and wait," and so rest in the knowledge that divine Love alone unfolds the way.

As students of Christian Science, practicing the truth in daily living, we begin to apprehend with joy the immutability and perfection of God's law, and realizing this even dimly we perceive the inevitable self-destruction of error, however loudly and boastfully it may assert its claims to reality. The love and wisdom that underlie these words of our Leader, on page 303 of "Miscellaneous Writings," should guide us continually: "Let us serve instead of rule, knock instead of push at the door of human hearts, and allow to each and every one the same rights and privileges

that we claim for ourselves."

"The sustaining infinite"

ALICE M. BAUM

TN the Preface to "Science and Health with Key to the I Scriptures" by Mary Baker Eddy, is the introductory tassage (p. vii), "To those leaning on the sustaining infinite, to-day is big with blessings." Perhaps there are no words in this wonderful book that have a greater meaning than the contained in this passage. The dictionary gives us the following definitions for the word "sustain": to support: to keep from falling, to maintain, or support with the needs of life; to relieve. To those who feel the very props of their material foundations slipping from under them, and The are reaching out for something bigger, better, are not the words fraught with a meaning that will fill their hearts with rejoicing? Even before we prove these words by actual demonstration, we know them to be true, for are they not correlative to the assurance which we find in the Bible, "The timal God is thy refuge, and underneath are the everlast-

What has ever been offered to us, along material lines, that has sustained us infinitely? One by one we have seen the props pulled from beneath our foundations just at a time when we thought them most secure. One by one the tracks of materia medica and theology have burst before the eyes, like a bubble when it strikes the air. So do all times that have a material instead of a spiritual basis that have a material instead of a spiritual basis their destruction, because they cannot have a sustaince that will uphold them under any and all conditions. There is only one sustaining influence—God; and what a

feeling of confidence and security infolds us when we begin to realize this great truism. God, the loving Father and Mother of us all; God, our refuge and our shield, our Allin-all. Do we need to look elsewhere for sustenance? Can we find it elsewhere? No; for those who have learned to know who is supporting, upholding, assisting man, who have proved by demonstration that God, and He only, can be relied upon, be the circumstance what it may, have also learned and proved that there is nothing in the material realm, so called, that can sustain one infinitely.

In the dictionary we find that the word "infinite" means without limits, unbounded, and it sets forth as an example, "The infinite wisdom and goodness of God." Is there anything that is sustained by material forces that is unbounded? Could there be, when there is a stream of seemingly new thoughts, new discoveries constantly being introduced? Where one theory or discovery fails, another is sought to supplant it. Can we, therefore, place reliance on such forces? Can we accept them as our foundations when they are continually being replaced by something thought to be better, only in turn to be replaced by other such thoughts again? But with God, the never changing though infinitely unfolding, never failing support, have we not a true foundation, "an house not made with hands, eternal in the heavens"?

We can never be sufficiently grateful to our revered Leader for having pointed out to us, through her own demonstration, that there is a higher, a sure foundation, which can never fail us, a way which is always the right way, where health and happiness abound, and man proves his own heritage, the kingdom of God. Every material prop failed her in her search for health and peace, and it was only when she came to a realization of a higher, an infinite sustaining force, a God who never faileth, that she gained that for which she had sought, and through her untiring efforts gave it out to mankind that all might avail themselves of it and be at peace.

Christ Jesus likened those who heard his sayings, and put them into practice, to a wise man who built his house not upon the sands, which were washed away when the winds and rain came, but upon a firm foundation, a rock, which neither wind nor rain could remove. And so we are again demonstrating, as did Jesus nineteen centuries ago, that, as our material props are forced from beneath us by the winds of sin, sickness, and all accompanying materialistic woes, because, through lack of understanding, we put our faith in matter instead of Spirit, we can and must replace these props by the one and only sustaining influence, whose foundation cannot be shaken because we know it to be infinite.

"The dearest idol"

HELEN S. DEAN

WHO among us, before we began making the study of Christian Science our guide to right thinking and living, would have pleaded guilty to the continual breaking of the First Commandment? Most of us, perhaps, may have had to guard against the temptation to break some of the other nine,—the keeping not altogether holy the Sabbath day, the occasional dishonoring of our parents, the falsehood in act if not in word, envying our neighbor's possessions, or bearing false witness against him; but as to having other gods,—the First Commandment was written and intended, we believed, only for the heathen!

The writer had not taken many steps along the pathway of Truth, before she realized, to her amazement, that she was daily worshiping false gods, and was reminded of this verse of an old hymn.

The dearest idol I have known,
Whate'er that idol be,
Help me to tear it from its throne,
And worship only Thee!

To some of us, it may have been money, houses, or other material possessions that had become gods; to others, the means and methods of healing by material medicine, or ecclesiastical forms and rituals; but sometimes the searchlight of Truth reveals the fact that personal relationshipthe human sense of family and friends—is the idol seemingly most difficult to wrest from the place in affection and devotion which should be occupied only and always by the one God, omnipotent Spirit. In the twenty-third chapter of Matthew, Jesus thus admonishes us: "Call no man your father upon the earth: for one is your Father, which is in heaven." And in Isaiah we read, "Thy Maker is thy husband." It may seem difficult to accept such teaching as applicable to one's specific case, if one has, so to speak, drawn a circle around "one's own," and rather prided one's self upon devotion to family and friends.

Easy it is to see why many of Jesus' followers turned back and "walked no more with him" when they found it so hard to accept and apply his radical teaching; but if we, like the twelve disciples, have had a real glimpse of the truth our Master taught, we must say with them, if the temptation comes to turn away also, "Lord, to whom shall we go? Thou hast the words of eternal life." No, we cannot go back, we cannot stand still, for one is thinking every conscious moment, and the command is as imperative now as it was centuries ago, "Speak unto the children of Israel, that they go forward," and if one is obedient to that command, is humbly desiring to get rid of the false gods, the waters will divide, making possible the journey to the promised land, the land where one can be at peace because the burdens of wrong thinking have been purposely left behind.

It is not, as appears to us at first in this reversed thought process, that one must cease to love these dear ones; on the contrary, one must love them *more*, but differently—unselfishly making no autocratic demands upon their attention, their time, affection, and devotion. One must not dominate or be dominated by them, but must realize more and more that man is the child of our heavenly Father; consequently one must prove the brotherhood of man and what the true neighbor is in the broadest sense of the term.

In the twelfth chapter of Matthew we read that when Jesus was told that his mother and his brethren were without, desiring to speak to him, he said, "Who is my mother? and who are my brethren?" And we read that "he stretched forth his hand toward his disciples, and said, Behold my mother and my brethren! For whosoever shall do the will of my Father which is in heaven, the same is my brother, and sister, and mother." We do not believe that Jesus was repudiating the members of his human family, but that he realized the difference between the human and divine relationship, had realized it even at the age of twelve years, when his mother had reproved him for the anxiety he had caused by lingering in the temple after the family had started on their homeward journey: for even then the boy with the spiritual vision had replied, "Wist ye not that I must be about my Father's business?"

But when his final demonstration was made, when he had been able to say "Put up thy sword" to the disciple who wished to defend him against his persecutors, when

he had prayed on the cross, "Father, forgive them; for they know not what they do," had proved his love for those who hated him as well as for those who loved him,—then it was that he could make loving provision for the devoted mother who had followed him in his ministry, keeping all his sayings in her heart, by committing her to the care of John, the beloved disciple, telling him, "Behold thy mother!" and saying to the mother, "Behold thy son!" It was his last earthly act, for almost immediately afterwards he cried, "It is finished."

It is comforting to remember that Jesus "was in all points tempted like as we are, yet without sin," and that he claimed no power or ability of his own, or any that was the result of a special dispensation in his individual case. On the contrary, he repeatedly declared that his victory over sin, disease, and even over the last enemy, death, was the direct outcome of his unity with God. "I and my Father are one," he said; and, "I do always those things that please him." Again he said, "The Father that dwelleth in me, he doeth the works," and, "He that believeth on me, the works that I do shall he do also." one who is faithful in following both the precept and the example of our blessed Master, is able to keep as sacredly as he did, the first and great commandment, "Thou shalt have no other gods before me." Thus one proves what Mrs. Eddy says on page 151 of "Miscellaneous Writings," "God is our Father and our Mother, our Minister and the great Physician: He is man's only real relative on earth and in heaven."

Praying to Principle

LESTER D. EHMKE

PERHAPS the greatest inspiration to one taking up the study of Christian Science is the revelation that God is infinite divine Principle. In fact, one cannot understand or demonstrate the Science of Christianity without acknowledging God as such. Whenever a man has grasped this interpretation of the infinite Being and sincerely applied himself to it, the unfailing law of God has made itself manifest, whether in Moses' time, Jesus' time, or Paul's. It was only when men began to doubt God's infinitude that agnosticism or nescience set in.

Just about this time, however, we find Paul earnestly rebuking the Athenians for dedicating an altar "to the unknown God." The unbelievers argued that even if God were infinite, still man was finite; therefore it was impossible for man to know God or God to know man, on account of their opposite natures. Yet to-day Christian Science is repeating the ancient demonstrations of the prophets and apostles through the understanding of God as infinite Principle. Nevertheless, as in Paul's time so to-day the agnostic supports his passive position with the self-satisfied declaration that if there is an infinite, all-knowing God, then prayer is needless and useless; and "prayer," he is told, "is the Christian's vital breath" (Hymnal, p. 91). Just here, however, where the agnostic in apparent triumph draws his conclusion, Mrs. Eddy, on page 2 of "Science and Health with Key to the Scriptures" dispels the sophistry: "Prayer cannot change the Science of being, but it tends to bring us into harmony with it." On the following page she aptly adds: "Who would stand before a blackboard, and pray the principle of mathematics to solve the problem? The rule is already established, and it is our task to work out the solution. Shall we ask the divine Principle of all goodness to do His own work? His work is done, and we have only to avai ourselves of God's rule in order to receive His blessing

which enables us to work out our own salvation." To do this one must constantly live in harmony with Principle.

Believing in a finite man of the flesh instead of man made in God's infinite likeness, the agnostic through loose thinking and faulty reasoning has been tricked by the carnal mind to have no trust in a divine Being, and as a result he has been missing the blessings which the all-loving Father has been constantly bestowing upon understanding hearts; for demonstration and revelation are coincident. When Christ Jesus said, "The Son can do nothing of himself, but what he seeth the Father do," he certainly meant that nothing real is ever done except that which is in accordance with divine Principle; and that saying is assurance enough that man is spiritual and reflects the infinite qualities of his Maker.

It can readily be seen, then, that God is Principle. One's heart must be right, must be in harmony with and understand the unerring law of God in order to demonstrate divine Principle; and Christian Science makes divine law so vital to a man's daily life that he feels no security while living in disobedience to it. This is why the wicked king in Hamlet felt so keenly his wretchedness as he, striving to get in touch with God, despairingly muttered to himself,

My words fly up, my thoughts remain below: Words without thoughts never to heaven go.

What had happened? Just this, a guilty, unrepentant conscience withheld him from any hope of being heard, as such a conscience ever must do; the Cainitic thought excludes itself from knowing Principle, and of this the king was quite well aware. He had alienated himself from God. Principle knows nothing foreign to itself, for Principle is God and God is All.

One thing, however, mortal man seems quite reluctant to understand, and that is that divine Principle is never tricked by the craftiness of man no matter how clever he may believe himself to be. If peradventure he seems to gain the outward physical possession of place and power, as did the king, he discovers that they have only made him more wretched than before. When once a man understands something of the law of mathematics he can never believe it possible to outwit that law. As with mathematics so with the law of God; man cannot escape it though he "take the wings of the morning, and dwell in the uttermost parts of the sea."

In giving to the world a demonstrable understanding of the unerring law of divine Principle, Mary Baker Eddy, the Discoverer and Founder of Christian Science, has lifted religion to the celestial heights of scientific demonstration, and forever secured it against every attempt at nullification; but to understand and practice this Science man must inevitably atknowledge God as divine Principle. Such understanding makes him a happy, loving, and trustworthy citizen. He finds biaself constantly praying to Principle, and such prayer must of necessity be positive and spontaneous in its results, for Principle forever has been and forever will be positive and spontaneous.

Words

KATHERINE R. FRANCKE

WORDS, words, words; multiplicity of words and nothing said: In vain we strive to voice the woes o'er which our hearts have

h paint the scenes of beauty on which our eyes have fed.

Writs, words, words; multiplicity of words, and nothing said.

Exthou a watch, O Lord, before my lips and silence strife;

H thou my mouth with words that speak but Love and Truth

Selected Articles

["True Expression"—The Christian Science Monitor, Boston, U. S. A., July 2, 1920]

THE study of Christian Science at once emphasizes the fact that Mind and its idea is in reality all there is, that this idea is nothing less than the exact and perfect expression of the infinite, reflected in illimitable variety of harmonious experience. This true image of God is forever untouched by the seeming suggestions of false belief. By insistently replacing erroneous belief with the declaration and understanding that man is the complete expression of consciousness, of the one Mind, the discordant lie will give place to the acknowledgment of man as the altogether harmonious representation of Principle. Intelligence expressed is the hereditary right of man. To manifest this intelligence expressed in every detail of living requires constant watchfulness and persistent effort, and necessitates the continual recognition of Principle as the source of all activity.

In the art of etching, one of the most exacting of all the arts, owing to the care and accuracy the etcher must use to insure a perfect impression, the analyst finds that the process is not unlike the effect on his life of a man's thinking. Beginning with a smooth copper plate, the artist etches thereon his interpretation of life, which results, in conformity to his standards, in a cold, unlovely print or in a faultless and beautiful representation. Take for example Rembrandt's famous etching, "The Three Trees" and the copy by Captain Baillie; both men started with the same copper plates, the same tools, but Rembrandt's genius originated one of the greatest of all landscapes, exquisite in tenderness, perfect in composition. The magnificent impressions are the exact reproduction of the etched lines. So it is with the experiences of a man's life; they are the true expression of his thinking. Of the light or shadow, the happiness or sorrow, each one is the master, delineating exactly the result of his own lines of thought. Any one, by conforming his reasoning to the ideal of Christian Science, can manifest perfection. In reality another can never control one's thinking; if such a condition seems present, one is not thinking, he is but accepting a belief of thinking, which in turn will make of his life a barren counterfeit. Even after a faulty and inartistic print, painstaking effort will eradicate false lines from the copper plate and replace them with true and perfect lines, so that the impressions of different "states" are as dissimilar as differing states of consciousness that manifest in experience aspects totally

On page 261 of "Science and Health with Key to the Scriptures," Mrs. Eddy admonishes us, "Hold thought steadfastly to the enduring, the good, and the true, and you will bring these into your experience proportionably to their occupancy of your thoughts." If the student, through the apprehension of Truth, humbly, honestly, and resolutely seeks to put Principle foremost in his thinking, his resultant understanding of Truth so purifies him that seeming manifestations of disease and sin spontaneously disappear and he will find man expressing what in reality man always has expressed, the perfectibility of idea. One can no more think both good and evil at the same instant than one can believe two times two equals five at the same moment in which he reasons that two times two equals four; therefore, to continue the parallel of the etchings, it is a question for the artist of constantly choosing whether he shall accept as models the suggestions of fear, envy, jealousy, and hate that present themselves or whether Spirit and its attributes, goodness, mercy, kindness, and the like shall have dominion. One can and should accept as consciousness only that which is true consciousness, infinite good, God.

It is far more comfortable to reproach others for the seeming inharmonies of existence than to acknowledge one's own thinking at fault. The individual rarely actually remembers that he is a law to himself, not a law of self-will, self-seeking, and human desire, but the law that is the will of God. Mrs. Eddy reveals this fact when she states on page 129 of Science and Health, "If you wish to know the spiritual fact, you can discover it by reversing the material fable, be the fable pro or con,-be it in accord with your preconceptions or utterly contrary to them." A friend once remarked that skating exercised a great fascination for him because while skating he completely forgot his troubles. However pleasant the mere "forgetting" of problems may be, that is never their solution, for they constantly present themselves until, through line upon line of right knowing and right endeavor, they give place to the actuality of good manifested.

The elimination of seeming evil is clearly depicted in the book of Exodus where, under the leadership of Moses, the Israelites eliminated their finite concept of God sufficiently to free themselves from the darkness of Egyptian bondage. Moses warned them that they should diligently heed the voice of the Lord, and in his promise that they should have none of the diseases pertaining to the Egyptians he permitted no thought of condonation or excuse. Moses showed it to be perfectly possible to keep the law of God which, as revealed by him in the Decalogue, became the foundation of the Anglo-Saxon law of to-day. On page 10 of "Christian Healing," Mrs. Eddy says: "God is All, and in all: that finishes the question of a good and a bad side to existence. Truth is the real; error is the unreal. You will gather the importance of this saying, when sorrow seems to come, if you will look on the bright side; for sorrow endureth but for the night, and joy cometh with the light. Then will your sorrow be a dream, and your waking the reality, even the triumph of Soul over sense. If you wish to be happy, argue with yourself on the side of happiness; take the side you wish to carry, and be careful not to talk on both sides, or to argue stronger for sorrow than for joy. You are the attorney for the case, and will win or lose according to your plea." Mrs. Eddy unmistakably points out that perfect models, tenaciously adhered to, reveal the harmonious reflection of limitless Mind, so proving the nothingness of false belief by the joyous knowledge that the true expression is always the whole manifestation of Deity.

[Joseph Coffer in Oklahoma News, Oklahoma City, Okla.]

Christian Scientists have in no way lost their equilibrium as a result of the unwarranted and unchristian attacks upon their religion by a visiting evangelist, since the opening of his campaign in Oklahoma City. Aside from desultory reference to Christian Science, carrying a certain amount of odium, his remarks lacked weight and conviction. It is apparent he is preaching for certain denominations and against others; it is inconceivable that the evangelist—whose mission is to save souls—who cheapens religion by vulgar references, can hope to win favor in the world of Christian endeavor. Such tactics fail to draw people from the Christian Science faith. The fact is that Christian Science is assailed by its clerical opponents mainly for the reason that it has been and is to-day furnishing a satisfying gospel to

seekers for true religion, many of whom are members of other churches.

This evangelist has somewhat modernized his method of attack on Christian Science by the introduction of the Bible study class. After the close of his regular sermon the congregation is addressed by his assistant, who introduces her subject, "Christian Science compared with the Bible," running the usual gamut of misstatements and inaccurate quotations alleged to have been taken from Mrs. Eddy's book, "Science and Health with Key to the Scriptures." These quotations are presented in a distorted, unrecognizable manner, and called "Christian Science."

This assistant has given expression to one thing in her book, "Three Studies," which deserves special attention by all seekers for truth. Its luster sparkles like a gem of the purest ray. She says, "If you want to know what Christian Science is, you must go direct to the textbook of Christian Science, Science and Health." Excellent advice, and if you want to know what Christian Science is not, go hear this assistant. She is not at all different from other would-be professional critics of Christian Science, who invariably adopt methods of mutilating the text of Science and Health. destroying the meaning of complete sentences, thereby confusing the hearer. It is regrettable that every one who heard her, or who bought her book, will not take the trouble to verify her citations, and see just what she has done. That would be difficult, however, because she has taken quotations from an 1893 edition of Science and Health, which is no longer in general use. The Bible itself has not escaped revision, and the same can be said of many valuable books; all authors exercise this privilege. After 1893, Mrs. Eddy made many revisions in the diction, not the statement, of Science and Health. This 1893 edition will not be found outside the reference section of the great libraries. A possible conclusion is that the author of "Three Studies" is fully aware of this, and as a matter of fact perhaps does not wish her citations verified and her unfair methods exposed.

The inconsistencies are apparent, alleging that Christian Scientists are a prayerless people, and Godless—still she commended to her hearers to pattern after Scientists as Bible students, that they were not ashamed of their Bible and textbook; this fact had been brought home to her in her travels. She said: "I was riding on the train one day, reading my Bible; the conductor stopped and asked me if I were a Christian Scientist. I said, 'No, why?' He said, 'I see you are reading your Bible.'"

Jesus of Nazareth, the most scientific man who ever lived, and who possessed a clearer understanding of God and His perfect creation than has any other person the world has ever known, is accepted by all Christian Scientists as highest authority on questions relating to spiritual or real being. Accepting him as authority, they also accept his statement, "He that believeth on me, the works that I do shall he do also," and in order to be worthy of the name. Christians must in a measure at least repeat the works which he did. And to repeat these works all should learr to pray as he prayed.

Christian Scientists accept the inspired word of the Bible and apply its teachings in their daily lives, knowing tha "all scripture is given by inspiration of God, and is profita ble for doctrine, for reproof, for correction, for instruction in righteousness."

Our critic has taken full advantage of the flexibility of Scriptural texts to contradict quotations from Science and Health. The method is both interesting and ingenious. The Bible has furnished texts to prove and disprove many things No :

and within its pages are references to contradict every text she uses in her attempt to discredit the teachings of Christian Science. "Which will you accept, the word of God or the word of a woman?" This question finds prominent place throughout her lesson on Christian Science. It is no doubt intended to convey to the reader the thought that her interpretation of the Scriptures is a true interpretation of the word of God.

There are more than two hundred different denominations in the United States; they exist because of different interpretations of the Scripture. It is possible, therefore, that Christian Scientists would not stand alone in refusing tacit admission of her interpretation as "the word of God." It would be far more reasonable to inquire which of these two women's word will you accept, Mrs. Eddy's or hers.

Mrs. Eddy in Miscellany on page 191 admonishes her followers to prove rather by works than by words; that is, it is by their fruits they shall be known. She adds these pertinent words: "Be patient towards persecution. Injustice has not a tithe of the power of justice. Your enemies will advertise for you. Christian Science is spreading steadily throughout the world. Persecution is the weakness of tyrants." Jesus said, "Blessed are ye, when men shall revile you, and persecute you, and shall say all manner of evil against you falsely, for my sake."

[C. W. Hale in Zion's Watchman, Butler, Ind.]

In a recent issue under the caption of "Healing League," statements are made relative to Christian Science, which give an erroneous impression of what it teaches, and how the healing of the sick is accomplished through Christian Science treatments.

Evidently your contributor knows little if anything about the subject, and it is difficult to understand why he or any other Christian should criticize and condemn that which is sacred to another Christian, and desire to make misleading statements pertaining to that man's beliefs. If the churches included in the league he refers to are desirous of healing the sick, it is certainly their right unequivocally bestowed by Christ Jesus, and it is not necessary for them or any one in sympathy with their work to condemn another organization which is conscientiously striving to do its duty in following the Master's command after the manner in which he taught. Christian Scientists will rejoice if all churches will succeed in proving the power of God in healing the sick as well as in saving the sinner, for that will be one more step toward bringing to mankind the realization of the ner presence of God and His kingdom. It is an incontrovertible fact, however, that the healing and saving power of the Christ, Truth, cannot be demonstrated by criticism, condemnation, and misrepresentation, but only by that wonderhi love and compassion that was so marvelously shown in the life and works of Christ Jesus.

The intimation given, in the article referred to, that Christian Science treatment is based upon "suggestion" is a mistake, as Christian Science teaches that suggestion, will power, hypnotism, mesmerism, or the "carnal mind" are not healing agencies and their use brings nothing but disord and confusion. In fact, human will, let loose upon utsuspecting people who do not understand how they can patted themselves, is not of God, and consequently is a utrace. Unless met and mastered by the power of infinite blind, it will bring evil and suffering to its victims. Christian Science treatment is based wholly, unreservedly, and displutely upon the power of God, divine Mind, and no piece of human will enters into it. Christian Science recog-

nizes and proves that sin and sickness are results of wrong thinking,-the claim of mortal belief that there is a power apart from God,-and that the one and only way to correct and heal such conditions is to bring into consciousness the absolute fact of the allness and completeness of God and His creation, and man's actual relation to God as His child. Thus Christian Science proves the presence and power of "the kingdom of God and his righteousness," right thinking, in displacing and consequently overcoming all phases of evil, wrong thinking. Paul recognized the evil of depending upon human will instead of the Mind "which was also in Christ Jesus" when he said in Romans, "For to be carnally minded is death, but to be spiritually minded is life and peace. Because the carnal mind is enmity against God: for it is not subject to the law of God, neither indeed can be." And in Corinthians he said, "For the weapons of our warfare are not carnal, but mighty through God to the pulling down of strong holds."

Mrs. Eddy, the Discoverer and Founder of Christian Science, says on page 20 of her 1901 Message to The Mother Church: "Christian Scientists are not hypnotists, they are not mortal mind-curists, nor faith-curists; they have faith, but they have Science, understanding, and works as well. They are not the addenda, the et ceteras, or new editions of old errors; but they are what they are, namely, students of a demonstrable Science leading the ages." And in her book, "Miscellaneous Writings," on page 254, she says: "Envy, the great red dragon of this hour, would obscure the light of Science, take away a third part of the stars from the spiritual heavens, and cast them to the earth. This is not Science. Per contra, it is the mortal mind sense-mental healing on a material basis—hurling its so-called healing at random, filling with hate its deluded victims, or resting in silly peace upon the laurels of headlong human will. 'What shall, therefore, the Lord of the vineyard do? He will come and destroy the husbandmen, and will give the vineyard unto others."

[Written for the Sentinel]

Usefulness

GERTRUDE GOODING MC CLOUD

CAN I help my neighbor any,
While I'm thinking thoughts of fear?
Can I blessings bring to many,
While forgetting God is here?
Can a thought with worry fretted
Ease the pain in some one's heart?
Can a mind to sin indebted
Joy and happiness impart?

I must put aside complaining,
I must bring rejoicing in,
While I know that Love is gaining
Certain victory o'er sin;
When my thought is filled with gladness
In the knowledge of God's care,
There is no room left for sadness,
For I find Him everywhere.

Then I find that all my brothers
Feel my thoughts of joy and peace,
And my hope of helping others
Coming true, with great increase;
All the world is growing brighter,
Error's doom is drawing near,
Every burden has grown lighter
Since I've known that good is here.

Editorial

True Unionism

The world is particularly concerned to-day over the question of unions. It is perfectly true that the subject is not a new one, and it is equally true that it has not been a new one for some decades, nevertheless at no time since the matter became one of primary political importance has it loomed so large in the calculations of statesmen as to-day. Yet the truth of the matter is that unionism is probably, from one point of view, at its zenith. The decline, it is true, may not show for years. All the same the very success of the union is tending to the passing of the union, for the simple reason that that which began as the organ of a party, is fulfilling its destiny in becoming the organ of mankind.

All of which, expressed a little more plainly, comes to this: that the union, which was originally started to protect the interests of Labor against the interests of Capital, has so widened its limits that it is threatening to represent nations instead of a class, and so to reach the point where its original sectional intent is lost in a clearer perception of the interests of humanity. Now if the idea of unionism were ever practically to be accepted by the world, the very change which has taken place was bound to take place, for the strength of the idea lies in two things, rightness and numbers, with the result that as the first of these was maintained and the second increased, the antithesis of Goldsmith's famous epigram upon Burke was sure to be manifested, the epigram, already referred to, that he "for party gave up what was meant for mankind."

The truth of the matter is that, in spite of all the supposedly terrifying signs of the times, mankind is steadily working to a clearer sense of Truth. This approach to Truth is, naturally, heralded by what Mrs. Eddy terms "a moral chemicalization," when writing on page 540 of Science and Health she says: "The muddy river-bed must be stirred in order to purify the stream. In moral chemicalization, when the symptoms of evil, illusion, are aggravated, we may think in our ignorance that the Lord hath wrought an evil; but we ought to know that God's law uncovers so-called sin and its effects, only that Truth may annihilate all sense of evil and all power to sin." It is obvious that it is just such a chemicalization which is taking place in the world to-day; and chemicalization Mrs. Eddy defines on page 168 of Science and Health as follows: "Here let a word be noticed which will be better understood hereafter,—chemicalization. By chemicalization I mean the process which mortal mind and body undergo in the change of belief from a material to a spiritual basis." The great war has stirred the human mind as it has probably not been stirred since the Renaissance and the Reformation produced the Thirty Years' War, and what is happening is what always happens on such occasions; namely, that as Mrs. Eddy says, the muddy river bed is being stirred, and the waters are thick and poisonous,

whilst the evil of mankind is being attenuated by the descending torrents of Principle.

There is not the slightest reason to believe that this process of chemicalization will grow less: rather, as human beliefs pass through a period of attrition, before they are finally destroyed, the manifestations of evil will necessarily abound. At the same time, however, the influence of Truth will become more and more dominant; and it is just this influence of Truth which, acting upon unionism, as upon every other counterfeit of Principle in the material universe, is beginning gradually to bring to light the true unionism, which is the unity of mankind. Centuries ago the psalmist declared that it was good for the brethren to dwell together in unity. It might be objected that the observation is a commonplace, and certainly the use of the word brethren, in the practical organizations of the world, has united brethren in opposition to brethren. But this is entirely because the human mind has failed to grasp the true meaning of unity, and has imagined that union could be formed in opposition to union, a scientific anomaly of the most pronounced description. The apostle to the Gentiles, that Pharisee of the Pharisees and Hebrew of the Hebrews, who had broken away from the belief that the children of Israel were a nation and seen in them all the acceptors of the Christ, was, naturally enough, the man of all others to grasp the fact that unity was not a question of material interests or physical organization, but a mental unity based on a common understanding of Principle. Thus it was that he could write to the Ephesians how the work of the church might, for the time being, be expressed here in one way and there in another way, "till we all come in the unity of the faith, and of the knowledge of the Son of God, unto a perfect man, unto the measure of the stature of the fulness of Christ."

This unity of the faith is, of course, the true sense of the doctrine of the atonement. For the atonement is not the vicarious sacrifice of one or of a hundred for the world, but is the individual understanding of Principle, which brings all men unto an at-one-ment or unity with the Christ, Truth. The ordinary idea of union is, it is obvious, the veriest counterfeit and antithesis of such an idea. The world's idea of union is the congregating of opposing masses, which are to fight out their want of unity in a steadfast reliance on the powers of matter. So long as the world believes in the reality of matter, its unity must necessarily be delayed, for matter comprises in itself all the elements of dis-union which prevent the realization of the at-one-ment. Now it is obvious that the broader the sense of union becomes in the world's material organizations, the further it departs from its original sectional significance, and the more it becomes permeated with an understanding of true unionism. The work of mankind, then, is to produce a true unionism, which in itself will be the destruction of a selfish ideal of unionism. In order to bring this about, however, mankind must begin to sacrifice its selfishness all round; and in the struggle of selfishness against this self-destruction, there is bound to be seen that moral chemicalization which, in stirring up all the animality of the human mind, will produce that fermentation of evil to which Mrs. Eddy refers, on page 96 of Science and Health, when she says: "The breaking up of material beliefs may seem to be famine and pestilence, want and woe, sin, sickness, and death, which assume new phases until their nothingness appears. These disturbances will continue until the end of error, when all discord will be swallowed up in spiritual Truth." FREDERICK DIXON.

Three Centuries

To be of enduring value, the celebration of the Pilgrim Tercentenary needs to be based on the true idea expressing divine Principle. Activity in accord with Principle is the reality of the pilgrim, whether of the time of Abraham or of the period of the Mayflower. This activity must always be, first of all, the acceptance of God, divine intelligence, as the one Supreme Being, causing, guiding, and sustaining all true existence. In that this activity requires no human intermediaries between man and God, it is genuinely democratic, since democracy, in its highest sense, must be the free dependence of man on Principle. Because the Mayflower Pilgrims sought freedom to rely together on Principle, rather than merely on persons, they were, so far as they comprehended what this freedom is, essentially democratic. Thus they went to work from the first to establish a democracy in America. Really to celebrate the achievement of the Pilgrims is, therefore, to prove to-day the unfolding permanence of spiritual democracy.

The idea which the Pilgrims faintly discerned has, of course, unfolded throughout the centuries. This eternal idea Mrs. Eddy fully discovered and clearly stated to the world as idea expressing infinite Mind, quite apart from any suppositions of materiality. Not merely for the specific work of the Pilgrims but for all the true Puritan activity, Mrs. Eddy had a sincere respect. As she says in "No and Yes" (p. 46), "The author's ancestors were among the first settlers of New Hampshire. They reared there the Puritan standard of undefiled religion. As dutiful descendants of Puritans, let us lift their standard higher, rejoicing, as Paul did, that we are free born." The consideration of spiritual history, which is the constant unfoldment of infinite divine consciousness, is always what is important, rather than any suppositionally material sense of things.

From the suppositional standpoint of mortal mind, a century may seem a long time. The psalmist, however, knew that to the divine Mind a thousand years "are but as yesterday:" and Peter, amplifying the statement, declared that "one day is with the Lord as a thousand years, and a thousand years as one day." Spiritually considered, the word 'century," like the word "day" or the word "year," must be simply a term for the divine eternity of inexhaustible unfoldment. Thus, since the eternity which God knows is always here and now as Mind manifest, never as mortality, the true century of unfoldment is the continuous present experience of the spiritual man. Just to measure the time since the landing of the Pilgrims at Plymouth Rock as three mortal centuries is, therefore, to think in the false terms of mortality. In the correct celebration, the three centuries must stand as an indication of the eternity of real achievement. Only when one understands that divine Principle is inever completely manifesting itself, is one comprehending the significance of the veritable century as idea, which is immensely more than any so-called division of earthly time.

"The twentieth century in the ebb and flow of thought," Mrs. Eddy says in her Message for 1900, "will challenge the thinkers, speakers, and workers to do their best. Whoso-cer attempts to ostracize Christian Science will signally fall; for no one can fight against God, and win." The sturdy work of the Pilgrims will be rightly celebrated in the twen-teth century exactly in proportion as each one does his best. The best is, of course, the thorough expression of Principle in all activity. This thorough expression of Principle constitutes the real man in the image and likeness of God. Whatever is not of Principle necessarily becomes null and

void in the presence of the divine Mind and its manifestation. In other words, the celebration of the true activity of the Pilgrims must be the patient but ever energetic continuance in well-doing which replaces the human sense of things with the divine idea. This process of spiritual unfoldment and replacement is irresistible. It does not depend on people. As persons recognize this fact, just so much of human personality, paradoxically enough, disappears and in its stead the individuality which the divine Mind knows stands forth as the eternal reality.

Throughout the centuries the leaven of the divine Mind and its idea is thus at work. The student of Christian Science to-day has the benefit of all the good there ever has been. True good is infinite intelligence expressed. What is divine intelligence to-day always has been divine intelligence and always will be divine intelligence. The infinite, however, is actually infinite. So divine intelligence is infinitely unfolding as exactly right activity for man. Living in accord with divine intelligence, one proves the joy of spiritual healing. The only freedom that ever has been desirable is the freedom of Principle which shows itself in continuous spiritual vigor taking the place of any sense of limitation, whether of health or of any other sense of things. Through Christian Science the spiritual democracy of complete understanding of Principle is made possible for all. In the words of Jeremiah: "After those days, saith the Lord, I will put my law in their inward parts, and write it in their hearts; and will be their God, and they shall be my people. And they shall teach no more every man his neighbour, and every man his brother, saying, Know the Lord: for they shall all know me, from the least of them unto the greatest of them, saith the Lord." Mrs. Eddy declares on page 22 of "Pulpit and Press": "If the lives of Christian Scientists attest their fidelity to Truth, I predict that in the twentieth century every Christian church in our land, and a few in far-off lands, will approximate the understanding of Christian Science sufficiently to heal the sick in his name. Christ will give to Christianity his new name, and Christendom will be classified as Christian Scientists." The achievement of this inspiring ideal is thoroughly practicable. Nothing less than such an achievement can adequately celebrate, three centuries afterwards, the fundamental achievements of the Pilgrims. GUSTAVUS S. PAINE.

Among the Churches

Current Notes

Boston, Mass.—The First Church of Christ, Scientist. Sunday services, 10:45 a.m. and 7:30 p.m.; Sunday school, 10.45 a.m.; Wednesday evening meeting, 7:30 p.m., in the church edifice, Norway, Falmouth, and St. Paul Streets. The church is open to visitors Wednesdays and Fridays from 10 a.m. to 5 p.m.

Reading rooms: Little Building, corner of Tremont and Boylston Streets (fourth floor); open daily, except Sunday and Wednesday, from 9 a.m. to 9 p.m., and on Wednesday from 9 a.m. to 5 p.m. International Trust Company Building (second floor), 45 Milk Street, near Devonshire, opposite post office; open daily, except Sunday, from 9 a.m. to 5:30 p.m. Coolidge Corner Building, 1316 Beacon Street, Brookline; open daily, except Sunday, from 9 a.m. to 6 p.m.

San Francisco, Calif.—Sixth Church of Christ, Scientist, has completed the purchase of five pieces of property on the southeast corner of Divisadero and Clay Streets

upon which to erect a suitable church edifice. The old improvements will be removed and a structure in keeping with the dignity and custom of the organization erected. property is admirably situated for a church, having elevation, yet easily approached and with a level street in front. San Francisco Call.

Admission to Membership in The Mother Church

The next admission of candidates will take place on November 5, 1920, as provided in Article XIII, Section 2, of the By-laws of The Mother Church. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before Friday, October 22, 1920. Consideration of any applications received after that date will be deferred until the June 3, 1921, admission.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to June 5, 1920, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application. CHARLES E. JARVIS, Clerk,

236 Huntington Avenue, Back Bay, Boston 17, Mass.

The Lectures

ARNHEM, HOLLAND (Society) .- Lecturer introduced by Major General F. van Hasselt, who said in part:-

I welcome you in this church edifice, in which we can receive you as guests of the Christian Science Society at Arnhem, through the kindness of the consistory of the Baptist community.

It is the first time in this city that a lecture on Christian Science will be delivered here, and some of you will perhaps ask, Why this lecture? Well, the aim thereof is to give more publicity to the fact that in the teaching of Christian Science there is nothing strange nor mysterious, but that it is the simple teaching of Christ Jesus applied to human needs, spiritual as well as material. The Founder of Christian Science, Mary Baker Eddy, had no other purpose than to restore the preaching of the whole gospel of Jesus, who before his ascension said: "And these signs shall follow them that believe; In my name shall they cast out devils; ... they shall take up serpents; and if they drink any deadly thing, it shall not hurt them; they shall lay hands on the sick, and they shall recover." First, the spiritual purification, the casting out of devils; that is, of all that is wrong in human consciousness; then the reliance on our always being under God's protection; and finally the healing of our body and the supplying of all our needs-this is what Christian Science means to give.

PLATTEVILLE, WIS. (Society).—Lecturer introduced by Mrs. Euretta K. Davis, who said in part:-

For many months the great desire of mankind has been for peace, a true and lasting peace, a peace which, we have been promised, "passeth all understanding." But we seem to be as far from peace as ever, and to have passed from the great upheaval into an unending round of strife and turmoil, times of "men's hearts failing them for fear."

Probably in this as in every time of need, has come to every man the earnest desire to know more of the Principle of the universe, which we name God, that through this knowledge he might find his way out of his troubles. He would gladly "search the Scriptures" if thereby he could

gain the happiness, health, and contentment his heart craves. God has seemed all too far-away and intangible to him, and the Bible something to consider only for a few moments on Sunday morning, if at all, while he has sought his pleasure, his work, his success, in material things. These alone have concerned his daily thinking. That these very habits of thinking have failed to satisfy, most of us are willing to admit and our dissatisfaction has helped to cause the present day unrest.

How may a man be reborn and thereafter know more of God? How may he use this knowledge to attain a measure of freedom and peace? The answer to these and certain like questions many honest seekers have found in Christian Science.

WASHINGTON, D. C. (Second Church).—Lecturer introduced by Miss Edith S. Fries, who said in part:-

I suppose that all of us gathered here this evening love and adore that meek but mighty demonstrator of Truth, Christ Jesus. You may recall that in preparing his disciples for his departure from this world Jesus used these words: "But the Comforter, which is the Holy Ghost, whom the Father will send in my name, he shall teach you all things, and bring all things to your remembrance, whatsoever I have said unto you." Christian Science has come bearing aloft the standard of Christ Jesus. It brings into remembrance the words and works of Jesus, explaining them so clearly that any one who will may begin to learn here and now how to repeat those works. Christian Science comes supporting and expounding all Scriptural truth; and so how inevitable that the first tenet of the faith, as given by Mrs. Eddy on page 497 of the textbook, "Science and Health with Key to the Scriptures," should read thus: "As adherents of Truth, we take the inspired Word of the Bible as our sufficient guide to eternal Life." It is the Bible we need to understand better in order to solve the problems of daily life, and Christian Science meets the need by giving this understanding.

WHEELING, W. VA. (First Church).-Lecturer introduced by William K. Frederick, who said in part:-

The speaker is with us to explain something of the teachings of Christian Science as it affects the great problems of life. We are not here to advertise, not here for converts, but simply for testimony, to tell a little about what Christian Science means and then to leave it to you to do with as you please. You need not be afraid of the speaker, because you do not have to believe anything he says. We simply ask you to put your thought in the way of analysis, simply to investigate, simply to examine,—that is all.

PICHER, OKLA. (auspices Joplin, Mo.; Galena, Kan.; Miami, Okla.; for Picher and Commerce, Okla., and Baxter Springs, Kan.).—Lecturer introduced by Clyde Morsey, who said in part:-

Those of you who are receiving your first introduction to Christian Science may wonder what there is in it that causes men and women to take a renewed interest in the Bible that may have been closed for many years, and at the same time regain physical strength and vigor. The Discoverer and Founder of Christian Science in "Rudimental Divine Science" on page 1 defines it "as the law of God, the law of good, interpreting and demonstrating the divine Principle and rule of universal harmony." One who has never been conscious of spiritual healing may think it strange that healing should take place according to law. Perhaps our thought of law has been of something cold, pulseless, inanimate; but if such is

the case we may feel sure that we have not understood the law of Love.

Do you know that there is a law of healing operative today and ever available, which if taken advantage of will heal every sin and sickness to which flesh is heir, even to the overcoming of death? This panacea is being presented to you in such form that you can take it with you into the mills, the mines, the offices, and the workshops. It not only heals disease and relieves of pain and sorrow but it is the greatest preventive of such untoward conditions ever known to mankind. When the Master walked the shores of Galilee nineteen hundred years ago, he taught his followers to heal by knowing and declaring the omnipotence of God. He urged his disciples to declare that the kingdom of heaven is at hand. A world freed from sin, disease, and death would truly present the kingdom of heaven on earth. And this is the very thing that the demonstration of God's law makes possible, yea, inevitable.

Woonsocket, R. I. (Society).—Lecturer introduced by Kenneth R. Wood, who said in part:—

Christian Science as set forth in its textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy, offers mankind a better understanding of God. The students of Christian Science soon find it possible to demonstrate its teachings in making themselves more useful, and their better understanding of God gives them courage in place of fear, health instead of the slavery of disease, prosperity because they are no longer unable or afraid to work, happiness because they have found their real source of supply to be in Mind, God.

Muskegon, Mich. (First Church).—Lecturer introduced by Mrs. Ethel I. Howden, who said in part:—

We have with us this evening one who has for us a message of "good tidings of great joy," a message which tells us something of the Principle and rule of Christian Science revealing God's invariable goodness. I can say from experience that whenever and wherever I have applied the tachings of Christian Science, there has come into my life peace of mind, happiness, and joy—in short, the healing that follows an understanding of Christian Science.

In the ninth chapter of John we read that Jesus healed the man which was born blind. His disciples asked him, "Who did sin, this man, or his parents, that he was hom blind?" In the light of Christian Science Jesus' answer meant that sin was not real either in the case of the man or in that of his parents, but that that which was real, the get; of God, might "be made manifest in him."

Now Christian Science is doing for humanity to-day just what Jesus did practically nineteen hundred years ago—revaling, manifesting, the glory of God by proving the unrelity of both sin and sickness. The present is bright with primise to those "who have eyes to see and ears to hear"—ya. full of joy in the prospect of an inevitable victory over all that opposes complete spiritual healing.

Ознкозн, Wis. (First Church).—Lecturer introduced by Joseph P. Fitch, who said in part:—

The people of this country have never before been required to solve so many complex problems as those with which they are faced at the present time. The war awakened domant thought in this as well as in other nations, jointed us not to our accustomed ruts of thinking and living, gave us the viewpoints of life, and fostered a tolerance of the belief and creeds of our fellow men. A nonsectarian weekly receive of national reputation recently said editorially:

"War is a state of mind. If all the people who are going up and down the world declaring that there always will be wars and that we must get ready for the next war, would maintain that another war was unthinkable and impossible, we should soon be headed up the road toward universal peace." And it is, after all, this universal peace of mind that we all seek, a state of thought which banishes fear and hate and that unrest which menaces our national life. Christian Science has brought health, happiness, and peace to people all over the world, and to earnest seekers of truth it is a practical, demonstrable religion.

NEW YORK, N. Y. (Fifth Church).—Lecturer introduced by Miss Minnie C. Vesey, who said in part:—

Probably never before in all its history has the world found itself in such a state of gigantic upheaval and unrest as at the present time. Men are looking in every direction to find ways to solve problems that seem well-nigh insurmountable. The world's wisdom, in its most crucial hour, is playing it false. Its rulers are seeing their little gods of clay topple before their very eyes and crumble in dust at their feet. The uprising of the masses throughout the entire world shows that, through the process of the melting pot, each individual is being forced to cast about and find for himself a way out of his anguish and despair.

There is a way out, and it is open to every man. It is the same way that was offered by the gentle Nazarene when he said, "Come unto me, all ye that labour and are heavy laden, and I will give you rest." The Discoverer and Founder of Christian Science, Mary Baker Eddy, has shown how this invitation of the beloved Master can be accepted now, and its full promise realized. This result is brought about by the understanding and application of that same Christspirit, that love which was lived and demonstrated by Jesus and his disciples over nineteen hundred years ago.

Kansas City, Mo. (First Church).—Lecturer introduced by John R. Roland, who said in part:—

It is to-day very widely acknowledged that the phenomenal growth and the healing ministry of Christian Science have been unparalleled since the early centuries of the Christian era. This just acknowledgment should certainly be followed by an understanding of the means by which this work has been accomplished. It is plain to Christian Scientists that the reason for this growth and the explanation of the healing are that Christian Science is based upon a demonstrable understanding of God as omnipotent, ever available good; that this understanding operates according to unerring law, destroying whatever is unlike good; and, therefore, that it is now within the power of every individual, in all of his affairs, to demonstrate the supremacy of good in proportion to his understanding of God.

Lectures to be delivered

By Members of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, U.S.A.

England—Birmingham (First Church): Town Hall, 8 p.m., Sept. 23.

Whitley Bay, Northumberland: The Kursaal, 3 p.m., Sept. 25. INDIANA—Wabash: Eagles Theater, 3 p.m., Sept. 12. MINNESOTA—Winona: Masonic Temple, 8 p.m., Sept. 10. NORTH DAKOTA—Jamestown: Library Hall, 8:30 p.m., Sept. 13.

Notice

Notices of lectures to be delivered can be printed in a particular number of the Sentinel when they reach the editorial department twelve days preceding its date of publication.

Testimonies of Healing

Through the teachings of Christian Science I have gained a better understanding of the true nature of God, man, and the universe, and of the divine relationship they bear to one another. Spiritualization of my thought, brought about through the study of Mrs. Eddy's works, has enabled me to get an insight into the spiritual truth of the Bible. Through this gracious provision of Love, I am able to translate God's' Word into the activities of my everyday life, making each undertaking beautiful. The practicality of Holy Writ has been convincingly demonstrated in our home for twelve years, during which time it has been our only Physician. We have had some wonderful physical healings, including my husband's complete recovery from a nervous breakdown and my own healing from neurasthenia. Our children turn to the truth for help and apply it naturally to their needs, fully trusting in God's willingness and power to heal them. All problems have been rightly solved when we earnestly sought the truth concerning them, through the way in Christian Science. The working out of these problems has helped us to form new concepts of home, ownership, business, and other things.

I have many reasons for being grateful, one of which is the help received from the literature, especially *The Christian Science Monitor*, that daily visitor with refreshing news, which has clarified my sense of all things. I appreciate the privilege of membership in The Mother Church and a branch church, together with the opportunity of teaching a class in the Sunday school. This work is a helpful channel for my spiritual growth. It is with exceeding gratitude that I find Christian Science to be indeed the perfect, ideal religion, meeting all needs, restoring Christian healing and bestowing the priceless treasures of peace and spiritual joy. (Mrs.) Ethel E. Chase, Chicago, Ill.

I am indeed very grateful for what Christian Science has done for me. It has brought health and happiness to me through the study of that wonderful book, "Science and Health with Key to the Scriptures," by Mary Baker Eddy. Not only am I grateful for the physical healing, but I am especially grateful for the spiritual uplift that I have gained through the reading of all the authorized literature. Before Christian Science came to my attention, I was helpless and hopeless. For a period of eighteen months I suffered severely from a complication of diseases, and so after I had tried materia medica, osteopathy, hygiene, and also a great water resort, I finally began to believe that I was helpless and hopeless. Then came Christian Science to my attention. While I was in a hopeless condition, a kind neighbor came in to see me and, as I was unable even to sit up and talk to her, she came to my bedside and presented me with a copy of "Science and Health with Key to the Scriptures," and requested me to read it. I took the book from her gladly and opened it and began to read at the Preface, and after reading three chapters of this remarkable book I suddenly came to a realization that the pain which I seemed to experience before had entirely disappeared. How wonderful that was! I was overjoyed. I asked mother to hand me my clothes, telling her that I wished to dress and go outdoors. It was indeed surprising to her. She was so glad to hear those words.

After this wonderful experience, all my time was spent in reading Science and Health, and I was very thankful that I was able to read, even though I failed to understand those divine teachings. During the following months I read constantly, although I suffered severely from stomach trouble and other minor ailments. The testimonials contained in our periodicals impressed me so much that I consulted a practitioner, hoping that I would be healed instantaneously, as others have been. When the treatment was over I felt a great improvement. During the conversation the practitioner asked me if I had ever read the New Testament. I replied that I had not, and in fact never cared to. In relating my story to her, I told her that I was brought up in the Jewish faith. She replied that it would benefit me greatly to read the New Testament. Upon returning home that afternoon, I borrowed a Bible from my kind neighbor. While reading the narratives of our great Teacher, I began to marvel. Instantly I came to the conclusion that he was the Savior or the Messiah who my Jewish brethren still hope will appear. In reading the gospel of John, I came to one of the great Teacher's sayings, and there I stopped. This is what I read: "Then said Jesus to those Jews which believed on him, If ye continue in my word, then are ye my disciples indeed; and ye shall know the truth, and the truth shall make you free." This passage greatly appealed to me. The truth would make me free indeed. While I could not understand the meaning of that wonderful word, "truth," nevertheless I knew that through the constant study of Science and Health and the Bible it would be revealed to me. It has been two years since I took up the study of Christian Science. During this time I have, through my own understanding, been healed of a number of diseases. My heart is filled with gratitude and joy, for I have found the pearl of great price, the wonderful, beautiful truth that Jesus taught and demonstrated nineteen hundred years ago, which is made practical to-day through the study of Christian Words are inadequate to express my gratitude Science. and appreciation for the many blessings that have come to me through its study and application.

In conclusion I wish to say that I am grateful to God, to Christ Jesus, to our beloved Leader, Mary Baker Eddy, who through her pure consciousness was enabled to write that great spiritual masterpiece, which is so practical that it will ultimately lift the world out of all sin, sickness, and death; and I am also grateful for the kind and loving practitioners who have helped me on the journey toward spiritual understanding.—Morris Gersham, Kansas City, Mo.

*

I wish to express gratitude for the blessings I have received since taking up the study of Christian Science. Previous to coming into Science I had spent many years in sickness and pain, having undergone three very serious operations. I had always been a sufferer from severe nervous sick headaches, sometimes being laid up three or four days, but after taking up the study of Christian Science I was freed from this bondage, although the healing was not realized for some time. It has been years since I have suffered from a headache.

The healing that I desired when taking up Christian Science was very slow in coming,—in fact, several years passed before it was accomplished, and oftentimes I would become discouraged, but the thought that God was no respecter of persons, and that all things were possible to Him, would always give me new courage, and I am happy to say that the healing is now perfect and absolute, and has been for some two years. If we are only faithful and patient, adhering at all times to the truth, we are always rewarded. I trust this will be of some help to those whose healing has been slow, as the giving of a testimony where

the healing had been slow always helped me to work the harder to overcome the difficulties that seemed to stand in the way. During the years I have been studying this truth I have been healed of many discordant conditions. Financial needs have also been met when I realized fully that God is the source of my supply.

I am very grateful for the physical healings I have experienced but far more grateful for the light Christian Science has thrown on the Bible, as before commencing the study of Science the Bible was a book that was very seldom opened by me. I am very grateful for what understanding I have of the truth, to all who have helped me on the way, and thankful to God for all the blessings I have received, also to Mrs. Eddy for having worked so faithfully to give this great truth to mankind. I do not think I realized the many difficulties and obstacles that seemed to stand in her way and that were overcome until after reading the story of her life. I am very grateful.

(Miss) ELIZABETH A. KING, Los Angeles, Calif.

Words cannot express my gratitude to God for Christian Science. I had been a great sufferer all my life and had undergone two operations prior to hearing of Christian Science. It came as a great blessing to me while on a visit to a friend. I met a lady there who had been healed, and that day I knew that the same God that had healed her was my God and that I was also His child and that He would heal me. I found the reading rooms, had a talk with the librarian, and borrowed "Science and Health with Key to the Scriptures" by Mary Baker Eddy. I attended the Wednesday evening and Sunday services, and soon began to feel the benefit of doing so. I have had many beautiful demonstrations, but the one I will give here is the healing of what the doctor diagnosed as dangerous kidney trouble and dropsy, from which he gave no hope of my recovery. I then asked for help in Science and shall never forget the words of the practitioner who so lovingly read for me these words from the Psalms, "I shall not die, but live, and dethe the works of the Lord." I began to feel better and the abnormal accumulation of fluid subsided and came away quite naturally under Christian Science treatments. I thank God for the life of Jesus the Way-shower and for that of Mrs. Eddy, who brought to a waiting world this glorious truth. My desire is to know more of the truth, and to have more of that Mind which was also in Christ Jesus. I am striving to overcome more of self each day and am ever grateful to the practitioners for all their faithful work in helping suffering humanity to find Love's way to health and holiness. I also thank all the kind friends who have belped me in any way.

MRS. N. CROWTHER, Halifax, Yorkshire, England.

With a heart overflowing with gratitude for the knowledge of Christian Science and for all the loving help I have received, I wish to testify to a few of the many blessings I have experienced during the last seven years. In December, 1912, when suffering from a very severe attack of gallstones, and other so-called incurable and chronic discess. I decided to abandon all medical treatment and to turn to Christian Science for physical healing. I sent for Science and Health with Key to the Scriptures," and after a few days' earnest study I was healed of many of the discordant conditions; only a bronchial cough which had troubled me continually for years proved obstinate, but that, too, yielded to the truth after a few days' absent

treatment. I cannot sufficiently express my gratitude for all the loving help I have received from practitioners, who always respond so quickly and unselfishly to all calls on them. I am also deeply thankful for all our literature, especially for Mrs. Eddy's works, which, if studied with an honest desire to learn the truth, will cure the student of anything that troubles him, whether it is a mental or a physical ailment.

In 1914 my daughter, when away from home, was so severely burned that the doctors at the hospital to which she was taken, expressed the opinion that she would not recover. As soon as I heard of the accident I telegraphed for treatment for her and strove to overcome all fear and anxiety in myself, so that I could clearly realize God's loving care for all His children. To the doctors' amazement there was no fever and none of the usual complications, but the child's memory was affected and for many months she suffered mentally. She believed that God was punishing her for some great unknown sin, and refused to pray to a "God of wrath" or even listen to my explanation of Science. Finally all these discordant conditions disappeared, and she is gradually learning that "God is our refuge and strength, a very present help in trouble." Hernia, inflammation, blood poisoning, and influenza in its worst form have disappeared into their native nothingness when the light of Truth was brought to bear on them, and words cannot express the gratitude I feel to God and to all who have lovingly helped me with advice and treatment during these periods of trial.-(Countess) CATHERINE PIPER, Finnhult, Snogeröd, Sweden.

4

Many times I have searched our periodicals for testimonies covering healings of disease similar to the one I was laboring under. I found so many helpful ones that I am now thankful to add my own. Six years ago, wrapped up in my household duties and my husband's business, I was suddenly stricken with what the many doctors and specialists whom we called pronounced hopeless leakage of the heart. From that hour forward I was unable to leave my bed. It was a terrible catastrophe to my little family, for they stood helpless. Although I had been a member of a denominational church for eight years I had found it lacking and my children were being raised without adequate religious training. My husband had always been a social drinker, and now, discouraged and dismayed, he began to indulge heavily. Our two children, then about four and seven years old respectively, grew sickly and ill cared for. These conditions continued for four years. I had heard of Christian Science during my working years, but like many misinformed ones classed it with psychic phenomena, of which I had been a student since I had finished high school. But when it seemed that mortal mind had more than done its worst, a dear friend of my mother's-a practitioner from another town-called on me. Before her in that hour it was proved that muscles have no power to lose, for though to sense I was worn and frail and my muscles years ago had wasted and gone, I arose and walked, not only across the room but around and around the house, and because it seemed too good to be true I refused to lie down but continued walking through the rooms and over the yard. that I had not seen for so long a period. Finally my mother remembered seeing some old Sentinels that a cousin had left, and hurried to get them. On her return I followed her into the house and sat and read through the night. It was as though I were starved for the truth.

To those who are striving to meet the disease called

leakage of the heart, with its many attendant discords, and who may feel that they are making no progress, or perhaps losing that already gained, let me state that there were times during which it seemed the old claim must certainly again conquer, but through diligent study of all the authorized literature my understanding grew clearer until I knew that God's child, made in His image and likeness, was complete and perfect. It has been over two years since the completion of my demonstration; I am perfectly well, weighing more than I ever did, and am doing all the housework in our five-room cottage, including all our sewing and the laundry for the entire family. At the time of my healing, my husband, who was in Europe, was healed of all desire for liquor, another proof that divine Love knows neither time nor space.

Our daughter was instantaneously healed of a rapidly growing goiter. Our son, playing in the gymnasium, had a finger mashed flat, but the following day a new nail appeared under the macerated one that he had washed offthis all in nineteen hours. Perhaps I had better add that from the time he reached home he felt absolutely no pain in the injured finger; he attended school the day after the accident and took part in all the games. In fact, were I to write of all our demonstrations that have been made during the two years that we have studied Science I feel that there would be one for every hour, for from sickness unto death, drunkenness, and poverty, we have come to a realization of health and plenty with a God who is a loving Father. During the winter we were thirty-six miles from church, but it was possible to make the trip. This summer it is necessary for us to leave at one o'clock in the morning to make the proper connections. We are very happy that we can attend. My husband is interested in Christian Science, and when it is possible for him to leave his work -that of a station agent-he attends with us. At first on reading our periodicals, I used to marvel at the great gratitude in which all spoke of our Leader. I now realize why. MRS. W. H. McMILLEN, La Plata, Mo.

I am glad to corroborate the above testimony of my wife.
W. H. McMilen.

I wish to express my gratitude for what Christian Science has done for me. For about twenty-five years before I became interested in Christian Science I had not been to church more than ten or twelve times, but now I seldom miss the Sunday services, the Wednesday evening meetings, or the lectures, and enjoy them very much. I was healed in one treatment two years ago of the liquor habit, through the understanding of a practitioner. Thank God, the healing has been permanent. Even with my own slight understanding of Christian Science, many discordant conditions have been met and overcome-such as accidents, a bruised foot, colds, and Spanish influenza. In April, 1918, my dear wife passed on, but through the study and application of the truth, and the understanding of man's relation to God, as taught in Christian Science, I have proved that there is no separation in divine Mind, and words cannot express my gratitude to God and to our dear Leader, Mrs. Eddy, for all that Christian Science is to me.

GEORGE J. RYAN, Saratoga, Calif.

On account of the illness of one of the family I became interested in Christian Science. I knew nothing at all about it, but had seen a friend who had been healed. The simplicity of the church services appealed to me, although

I could not believe a text on the wall of the church I attended, which was "God is Love." When I spoke to a practitioner about it she said, "Some day you will prove it." A short time afterwards, while lifting a pan of scalding water off the stove, I upset the contents, scalding my limbs from my waist to my knees. Though very young in Science I never thought of a material remedy. I tried to remember a telephone number to ask for help, while taking off my sodden garments, when the words "God is Love" seemed to stand out before me. Taking no notice I still tried to remember the number, when again the words came clearly, "God is Love." I stood for a moment, then turning to the table picked up Science and Health and read; where and what I read I do not remember, but in a short time all pain ceased and I acknowledged with deep gratitude that indeed "God is Love."

There was no mark or soreness left; the healing was perfect. If we could only remember that all our aches and pains, troubles and disappointments, are self-sown tares we would be saved much suffering. I am very grateful to Mrs. Eddy for the love she has shown to humanity.

(Mrs.) LAURA PEAKE, Troy, Johnston Co., Okla.

4

I became interested in Christian Science about seven years ago, because of a growth in my side. At that time I was also suffering from varicose veins and a small growth in my nose. These were not mentioned to the practitioner, as I wished her to give her whole attention to my side, which was causing me great suffering. To my astonishment after one treatment I found I could breathe freely through both nostrils-the first time for many years. After five treatments I was completely healed of all the above-mentioned This seemed wonderful to me, but the little knowledge of Christian Science I had gained during those visits to the patient and loving practitioner had changed my whole outlook on life. Since that time my husband and I have learned to rely on this truth for everything, and it never fails. Health, happiness, and harmony reign supreme in our home.

Business and financial problems, which loomed up as mountains and seemed impossible of solution, have been met most beautifully. We have been blessed in so many ways that words are inadequate to express our gratitude to our Leader for her noble, unselfish life, which made this great discovery possible. Our daily lives must attest our sincerity.—(Mrs.) MILDRED DIXON, New York, N. Y.

So much of real joy and perfect health have come to me since I have been depending entirely on Christian Science, that I send this testimony with deepest gratitude to God, to Mrs. Eddy, to the practitioners for all the loving help received, and for the literature, which is indeed food for the hungry, for which wise provision Christian Scientists can never be grateful enough to our Leader.

For many years I had suffered from anæmia with all the attendant miseries, such as headaches, depression, weakness, and constipation. For three years I was treated by specialists, and for months at a time I had injections of various medicines but without any lasting benefit. I had been, to a certain extent, interested in Christian Science for four years, but I was foolishly trying to serve both God and mammon and would not make a choice. The day came two years ago, however, when I was in bed and too ill to go to the specialist, so I made up my mind to put all my faith in Christian Science, and asked for help from a prac-

titioner. I received two treatments and from that day I count myself free and healed from all the discordant conditions that seemed so real to me—free, both mentally and physically, but the spiritual uplift is by far the greater healing.

I would also like to tell how Christian Science helped. in healing a favorite little dog. The animal was one day apparently in great pain, which the veterinary surgeon said was caused by an abscess, which would need to be lanced the next day. Suddenly I remembered that he could, of course, be helped at once in Christian Science. I was not advanced enough in understanding myself to treat him but telephoned for help from a practitioner, who immediately and lovingly gave the treatment. At once the dog was quiet, and in less than an hour I knew the demonstration was made. The veterinary surgeon came the next morning to take the dog away, but I told him there was nothing to do; the dog was well. He examined him and exclaimed, "What a remarkable thing! there is nothing to be seen; the place is quite healed." I mention this case, as it may interest and help others who own animals.

MRS. L. K. CANNON, Epsom, Surrey, England.

With my whole heart I wish to give thanks for my healing, and the many blessings which I have received through Christian Science. I had a severe bowel complaint of ten years' standing, which had become chronic. Having heard of Christian Science I turned to it, and was immediately given treatment, with beautiful results. After a few treatments I was healed through God's love. Several years later I was afflicted with a trouble in my head, and again turned to a practitioner for help and was freed within a short time. I thank Mrs. Eddy for showing to mankind the way of Truth.—(Mrs.) Berta Rabe, Hannover, Germany.

I am very grateful for Christian Science and for what it has done for me. I have been healed of many discordant conditions, one of which a physician said would require an operation; also bowel trouble of about twenty-five years' standing, headaches, lumbago, grippe, burns, and many other troubles have been overcome.

While I am very grateful for the physical help; the spiritual uplift has meant more to me than all else. All my life I have longed for a better spiritual understanding of God, but it was never realized until it began gradually to unfold to me through the study of Christian Science. My desire is to know more of this wonderful truth that I may be able to help others. I am thankful to God for His love, and grateful to Mrs. Eddy for the discovery of the truth that makes us free.

(Mrs.) LILLIE B. STILLINGER, Iron Mountain, Mont.

Jesus said, "Except ye be converted, and become as little children, ye shall not enter into the kingdom of heaven." When I first visited a practitioner for a healing, which was about six years ago, I was told that I must relax. The meaning of this was not made clear to me until five years had elapsed. Last year I was stricken with severe pains in my back, and my work required constant standing upon my feet. I asked my little girl of seven to perform some slight duty for me. She demurred, as she had been playing all day and was tired. Discouragement crept into my thought at her refusal, and I was willing to give in and let the seeming error take its course, and suggested that she and I go far away into the woods, away from people and civilization, to

live alone. She quickly answered: "If you go away you are going with error. You can go alone; I will not go with you; I will stay here and get Science." Instantly I thought, Would I dare to speak to my parents in that manner? Even though my sisters and brothers should be corrected unjustly, we would not dare voice a protest to our autocratic parents. I lifted up my heart in thankfulness to God that my little girl dared to point out the error to me. As she watched me, questioningly, I humbly told her that she was quite right to want to stay with Science, and that mother was wrong. The meaning of relaxation was illumined, and I had become as a little child. I was instantly healed. That small child had taught me a great lesson,—that God is the parent of all. These children are in our care not to be ruled by any autocratic will of ours, but to listen attentively to the voice of our heavenly, and only, Father-Mother, God, for guidance in right paths.

(Mrs.) ALICE M. DEY, Boston, Mass.

I am indeed grateful for what Christian Science has done for me and mine. I had what, to mortal sense, was called a leaky heart; after being treated by some of the best doctors in several cities I was finally told that I could not be helped and it would be a question of a very short time before I would pass on. I had to give up my work and could not walk without assistance. After material means had failed I was persuaded by my wife and other dear relatives to try Christian Science, but at first I was bitterly opposed to it. Finally I decided to go to see a practitioner, and with the help of my wife and aunt I went to one, and she explained Christian Science so beautifully to me that after my first treatment I was a different man, and after one week's treatment, I was a well man.

I had worn glasses constantly for years, sometimes having my eyes examined four or five times a year with a change of glasses each time, yet immediately after the week's treatment I laid my glasses aside and have never used them since. In seven months' time I gave up the use of tobacco, tea, and coffee, for which I thank God. I am so very thankful to God for our dearly beloved Leader, Mary Baker Eddy, and for our literature. We have been able to overcome colds, mumps, measles, chicken pox, boils, and influenza. I am sending in my testimony with the earnest desire that it may help others.

CULBRETH B. COOK, Cincinnati, Ohio.

Learning love is learning to understand God, for "God is love." In "Science and Health with Key to the Scriptures," Mrs. Eddy says (p. 84), "All we correctly know of Spirit comes from God, divine Principle, and is learned through Christ and Christian Science," and on page 203 she says, "If God were understood instead of being merely believed, this understanding would establish health." I have seen this demonstrated in my family many times. One case I would like to mention. One of our children, a little boy. had whooping cough, measles, and pneumonia at the same time. The child's father had no hope for him and accordingly informed our neighbors and friends that the child could not live until night, but through the understanding of God as Love, as Mrs. Eddy has taught in Christian Science, health was restored and on the day he was thought to be dying he sat up in bed and asked for something to eat.

I am most grateful to Mrs. Eddy for this beautiful truth, which teaches us what divine Love is.

(Mrs.) ELIZABETH CARR, Memphis, Tenn.

Signs of the Times

[E. Albert Cook, Ph. D., in The Biblical World]

Is it possible to hold a real religious faith in the brotherhood of man, as undoubtedly many are inclined to do to-day, without any faith in the fatherhood of God? For our present purpose I believe that we can say positively that the brotherhood of man implies something equivalent to the fatherhood of God; that is, faith in the brotherhood of man means faith that each man will attain his highest good, the largest measure of life, by methods which are promotive of the highest welfare of all; that humanity is therefore constituted by a power which is benevolent toward every member of it, whether that power be thought of as prior to and transcending humanity or as merely immanent in humanity. Faith in the brotherhood of man is therefore per se faith in a universe which, at least as far as men in their mutual relations are concerned, is built on the principle of mutual love and cooperation.

[History of The Hebrew Commonwealth-Bailey and Kent]

The great glory of this reformation [of Josiah] and of the book that caused it rests in the elevation of love as the cardinal principle of both religion and morals. The Hebrew was commanded to love Jehovah as the only God whose character could command respect, and to love man because only so could justice be done. All the heavenward-soaring fervor of Hosea and Isaiah and all the humane outreachings of Amos and Micah here found expression. Indeed, so wonderfully did these early thinkers of Israel penetrate to the heart of the universe that Jesus himself was able in the words and spirit of this book to sum up the whole of religion: "Thou shalt love the Lord thy God with all thy heart and with all thy soul and with all thy mind and with all thy strength; and thou shalt love thy neighbor as thyself."

[United States District Judge John C. Rose]

Extravagance has ever been our national weakness, and it has never run wilder than to-day. We have always acted as if we were ashamed of being suspected of practicing small economies. We all like to affect a lordly disdain for little savings. Ruin lies that way—national as well as individual. I wonder how many hundreds or thousands of millions would annually be added to the capital of this country if every one of us formed the habit of watching always against that willful waste which brings woeful want.

[Harold J. Laski in The Yale Review]

No one can doubt that the industrial tendency of the present time is to make men something more than the tenders of machines. No one can doubt, further, that the result of this tendency upon business life will be the complete reversal of its present chaotic autocracy. Industrial organization will, in the coming time, be the main instrument through which the political impulse of the worker will be trained. His economic subserviency to a process of which he is to-day so largely ignorant will be replaced by an intelligent cooperation in the varied details of the productive process.

We gain hints on every side of how this tendency is being transformed to institutional form. The shop stewards in England, the workers' council in Germany, in a less degree the Whitley committees, are all of them an effort to transform the present hierarchical structure into one of coordination. To the more farsighted observers it has become clear that the modern business man, amid many high qualities, has thought so much in terms of money that the numer-

ous and interwoven social interests upon which the equilibrium that supports him so largely depends, have in great part escaped his notice. . . .

No man can look over the surface of the world to-day and doubt the possibility of change in the inmost substance of social constitution. No man must therefore seek to confound the discoveries of the past with the certain hopes of the future. We have entered upon a period in which the primary effort will be research into the meaning of equality.

Announcements

From The Christian Science Publishing Society

New Pamphlets

Advance information will in future be given two weeks before each new pamphlet is placed on sale. This will replace the former system of standing orders.

New Pamphlet in Italian

There is now on sale a new Italian pamphlet entitled, "The Omnipresent Kingdom," containing the following articles, reprinted from *The Christian Science Monitor*, with alternate pages in English: "Cause and Effect," "'The secret place of the most High," "Power," "Never Too Late for Healing." Price 5 cents a copy. Reading room discount 20 per cent.

"Rudimental Divine Science" for the Blind In English Braille

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U.S.A.

New Leather Case

The "Large" open leather case, described on Page "e" of the Current Catalogue in the back of *The Christian Science Journal*, and listed at \$3.50, has been discontinued. In its place there is now available a "Large" open case which holds Bible, Science and Health, Miscellaneous Writings, Unity of Good and Other Writings, Christian Healing and Other Writings, The First Church of Christ, Scientist, and Miscellany, Christ and Christmas, Poems, Hymnal (all in pocket edition), and *Quarterly*. Price \$5.00. Reading room discount 10 per cent.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U.S.A.

From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to Charles E. Jarvis, Clerk, 236 Huntington Avenue, Boston 17, Massachusetts.

From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered. Please advise promptly of any change in name or address.

Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to EDWARD L. RIPLEY, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

Letters of Appreciation

Many letters of appreciation of THE CHRISTIAN SCIENCE MONITOR and other Christian Science activities are constantly being received. These letters express what these activities mean to different individuals in various occupations and pursuits. The favorable comment that has been received on those already published indicates that they are welcome and helpful; therefore others will be published under the above heading. One such letter follows:

FOR several years I have read The Christian Science Monitor, and my appreciation becomes greater daily. I have hesitated in writing you my tribute to its excellence, because it is difficult to express adequately its great value to me, and its general perfection. I have never found a fault in it, and am daily enchanted and edified by its spiritual, intellectual, and general news articles, while the editorials seem particularly timely, and show a broad outlook unsurpassed by any other papers. The Literary and Art departments really teach, and the "Economics of Prohibition" have been illuminating. I am a subscriber to a large number of magazines and I would part with all before the Monitor! I might continue praise in speaking of your attitude on the labor and political situations, and of course not forgetting the international news. Your staff is so able that the paper is of the utmost value to the subscribers in It is undoubtedly the Newspaperall countries. of the World.

Merocco, one to five copies inclusive, each \$5.50; six or more, each \$5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, French, and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in The Christian Science Journal from 1883 to 1896, with revisions and additions. Cloth, single copy \$2.25; twelve or more, each, \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; twelve or more, each 83.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy \$5.00; twelve or more, each \$4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings,

The First Church of Christ, Scientist, and Miscellany. A book of 366 pages, containing articles published in The Christian Science Journal and Sentinel, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy \$2.25; six or more, each \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; six or more, each \$3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy \$5.00; six or more, each \$4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy \$6.00; six or more, each \$5.50.

Christ and Christmas. An illustrated poem. Cloth, single copy \$3.00; six or more, each \$2.50. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Unity of Good and Other Writings. One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science versus Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco. limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy \$1.00; six or more, each 75 cents. Porket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy \$2.00; six or more, each \$1.75.

GERMAN TRANSLATION. Alternate pages of English and German.

Cloth, single copy \$1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy \$1.00; six or more, each 75 cents.

Unity of Good. This book lays the ax at the root of error. elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy \$1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the mes are or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy \$1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, alias Christian Science, in the form of questions and answers. Pebbled cloth covers, cilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents,

PRINTED in the New York point, American Braille, and English Braille systems of type for the use of the blind, single copy 50 cents; six

or more, each 40 cents

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Rudimental Divine Science and No and Yes. In one volume, French translation, with alternate pages of English, vest pocket size. Blue cloth, gray edges, single copy \$1.25; six or more, \$1.10; blue leather, gray edges, single copy \$2.00; six or more, \$1.75 each.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science versus Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy \$1.50; six or more, each \$1.15.

Christian Science versus Pantheism. Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more,

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more,

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

Poems. This volume of 70 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy \$1.50; six or more, each \$1.25. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign. Address orders and make checks payable to THE CHRISTIAN SCIENCE PUBLISHING SOCIETY, BOSTON 17, U.S.A.

Miscellaneous

THE LIFE OF MARY BAKER EDDY-By Sibyl Wilbur. Cloth, \$2.50; edition de luxe, \$5.00.

EDITORIAL COMMENTS ON THE LIFE AND WORK OF MARY BAKER EDDY. Paper, 15 cents; cloth, \$1.00. PERSONAL CONTAGION, also WHAT OUR LEADER SAYS-By Mary Baker Eddy. Special pamphet, 10

WHAT OUR LEADER SAYS-By Mary Baker Eddy. Vest pocket folder, 5 cents.

REPRINTS (not printed in English). Two-page leaflets, 17 subjects in German, 14 in Swedish, 9 in French. Ten copies, 10 cents.

THE MOTHER CHURCH—By Joseph Armstrong. A history of the building of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Illustrated. Cloth, \$1.50.

CHRISTIAN SCIENCE: ITS LEGAL STATUS—By Judge Clifford P. Smith. Paper, 15 cents.

LAW AND WORK for the blind. Printed in New York point, American Braille or English Braille, \$1.00.

SHEET MUSIC. Poems written by Mary Baker Eddy and used by special permission have been set to music as follows:

"The Mother's Evening Prayer," 75 cents.

"Christ, My Refuge," 75 cents. "Love," 50 cents.

Communion Hymn-"Saw Ye My Saviour?" (Johnson), 50 cents.
"Blest Christmas Morn," 37 cents.

"O'er Waiting Harpstrings of the Mind," 37 cents, "Shepherd, Show Me How to Go," 37 cents.

"Saw Ye my Saviour?" (Root), 37 cents.
"Saw Ye my Saviour?" (Root), 37 cents.
The first three hymns are arranged for high and low voice in the same copy. The last five hymns are published separately in high and low keys. When ordering state key desired.

THE CHRISTIAN SCIENCE HYMNAL half morocco, \$1.40; full morocco, \$4.50; levant, \$5.50; pocket edition, size 45x565x, \$3.50.

PHOTOGRAVURE OF MRS. EDDY, printed in three sizes on India paper and mounted on heavy plate paper ready for framing, 8-inch (mount 12x16), \$1; 12-inch (mount 15x20), \$2; 16-inch (mount 21x29), \$3.50.

PICTURE OF THE FIRST CHURCHI OF CHRIST, SCH-NTIST, IN BOSTON, MASS., AND THE FUB-LISHING HOUSE. Artist's proof with remarque on Javanese vellum, size 18x24 inches, \$5; on India paper without remarque, \$3.50. Smaller reproduction, size 11x14 inches, on Japanese vellum, \$1.25. Photogravure postcards of the Church Edifice and Publishing House, 5 cents.

RLES, 01483x. Clarendon Brevier, heavy-faced, distinct type; Turkey morocco, corresponding in size and binding to pocket edition of Science and Health, \$7.50.

Brevier, light-faced type, self-pronouncing, Turkey morocco, corresponding in size and pocket edition of Science and Health, \$7.25. and binding to

01683x. Large type Bible, 1034x8 inches, bound in a-ka seal. Specially selapted for use of second readers, \$16.50.

The improved index will be added to any Bible listed in our catalogue for an additional charge of 35 cents.

Price List of Bible Concordances and Dictionaries of the English Language supplied on request.

Items such as leather covers for the QUARTERLY, and cases, either closed or open, for books, Sunday school supplies and other accessories, will be found in the current catalogue in The Christian Science Journal.

"What I say unto you I say unto all, WATCH." Jesus

VOLUME XXIII

SEPTEMBER 11, 1920

NUMBER 2

"What is truth?"

ANNE H. THOMAS

PILATE'S question, "What is truth?" has come down through the centuries, and the Pilates of to-day, immersed in materiality, are asking the same question, all unconscious that, as in the experience of Jesus, it is to-day being answered practically through demonstration,—through the reformation of the sinner, the healing of the sick, yes, and the raising of the dead. Many have expressed the wish that Pilate had waited for Jesus to answer his momentous question, but what other answer could Jesus give than the one he had given on so many occasions to those who had ears to hear and eyes to see,—the one Christian Science is giving to-day in the solution of problems of every name and nature? Jesus said, "To this end was I born, and for this cause came I into the world, that I should bear witness unto the truth." When he multiplied the loaves and fishes he bore witness unto the truth about lack; namely, that supply is infinite and Mind is its source. Again, when he raised Jairus' daughter and Lazarus from the dead, did he not bear witness unto the truth that Life is omnipresent, is spiritual, is God, and that death is the suppositional opposite, a lie to be destroyed? Jesus was hourly answering Pilate's question, not with words, but with works. Did he not answer John's question, "Art thou he that should come? or look we for another?" by recounting his works, as recorded in Luke's gospel? To John's disciples he said, "Go your way, and tell John what things ye have seen and heard; how that the blind see, the lame walk, the lepers are cleansed, the deaf hear, the dead are raised, to the poor the gospel is preached."

Mary Baker Eddy, the revelator of Christian Science, was for years, and is to-day answering, through the written word, Pilate's question for this age, but few comprehend her answer, and comparatively few to-day are on every occasion, as did Jesus, exchanging false beliefs for spiritual ideas and thereby answering practically hungering humanity's question, "What is truth?"—what is the truth about this specific lie? Is not the temptation rather first to admit the lie and then to ask some one, "What thought shall I hold?" when on the contrary we should be so at one with Truth, the divine Mind, God, as to reflect instantly the true or spiritual idea about which the carnal mind is endeavoring to deceive us with its lying arguments and suggestions?

Truth being omnipresent, the true or saving idea must necessarily be ever present, capable of perception and demonstration. Christian Science teaches that the truth or true idea about any erroneous condition or circumstance is the savior from it. The true, or saving, idea active in individual consciousness destroys the false belief. What is the truth about two times two equals five? Is it not four? What is the truth about death? Is it not Life? Then follows, What is Life? What is the truth about Life? Is it not that God is Life and that God is the Life of man? There is but one Life, one God. There is but one truth about every lie.

Then in every instance of evil belief we can ask ourselves the same question,—What is the truth about it?—and if honest, earnest, sincere students of Christian Science we can always answer with scientific certainty, for there is never more than one right or true answer, and we do not have to create it, for it is the truth and already exists in Mind. All we need to do is to purify our thinking and listen for the still, small voice of Truth, and God, Truth, will-does-supply the answer whenever we need to know it in any and every specific instance. This is what is meant when in our Wednesday evening meetings we hear a testifier say, "I declared the truth." Truth is God; the truth is that which is true about God, spiritual man, and the spiritual universe. Truth being infinite is expressed in an infinity of ideas. The truth is continually unfolding to individual consciousness and will continue to unfold throughout all eternity as idea, and in the degree that individual or human consciousness is purified will it be receptive of the Christ-idea.

Each individual student of Christian Science may ask himself to-day regarding each world problem presenting itself to his thought, What is the truth about it? Not a problem can arise about which the truth, or true answer, does not exist, and the answer which is of Mind, God, is the only true answer, the only and final solution of every problem, individual or universal. What is the truth about our periodicals, and did Mrs. Eddy create them? truth about our periodicals is that they are ideas of Mind and Mrs. Eddy was spiritually minded enough to perceive these ideas, and to give them to the world. These messengers of God's appointing are carrying a healing message to all mankind, even to the remotest corners of the earth, and are one of God's means of enabling their readers to answer for themselves, practically, through demonstration, the question, "What is truth?"

In the words of our Leader in "Science and Health with Key to the Scriptures" (p. 255): "Eternal Truth is changing the universe. As mortals drop off their mental swaddling-clothes, thought expands into expression. 'Let there be light,' is the perpetual demand of Truth and Love, changing chaos into order and discord into the music of the spheres."

Separation

ROSE N. SUTRO

JUST as language has come to be used in a new way to express spiritual truth, so the thinking of the Christian Scientist has changed in regard to the use of words. Take "separation" as an example. From the material standpoint, there has always been something painful connected with the thought of separation. To the Christian Scientist, however, there is the realization that the only separation there can be is the separation of evil from good, the separation that has always existed in the divine Mind, which knows no evil. In the Scriptures the words of the prophet Habakkuk, "Thou art of purer eyes than to behold evil, and canst not look on iniquity," give the student of Christian Science

Copyright, 1920, by The Christian Science Publishing Society, Falmouth and St. Paul Streets, Boston, Massachusetts. Entered at Boston post office as second-class matter. Acceptance for mailing at a special rate of postage provided for in section 1103, Act of October 3, 1917, authorized on July 11, 1918.

cause for rejoicing. He knows that all good is God, and since man is God's reflection he cannot be separated from good, for in that case he would cease to reflect, which would leave God unreflected,—the creator without a creation,—which on the face of it would be an impossibility. He has still further cause for rejoicing in knowing that Life is God, and that death, the suppositious opposite of Life, is not a reality, and that he therefore cannot be separated from his brother by a belief called death, for his brother is the image and likeness of God, who like himself is dwelling in the one infinite Mind, and is likewise being governed by Principle. With this knowledge comes the realization that all that he can really know of man is that which is spiritual and imperishable, and from this there is and can be no separation.

In the fifty-ninth chapter of Isaiah is the averment, "But your iniquities have separated between you and your God, and your sins have hid his face from you, that he will not hear;" so that the metaphysician has authority for his claim that the only seeming separation there is between a man and God, good, is caused by what he entertains as his thinking of evil as real. He therefore lives up to the apostolic command, "Come out from among them, and be ye separate," as fast as he can,—separate from the false concepts of all the human relationships, separate from the evil, erroneous beliefs of life in matter, retaining that only which is pure and good, and in so doing drawing nearer to God, which brings him into heaven, harmony.

Mary Baker Eddy says in "Science and Health with Key to the Scriptures" (p. 489): "The corporeal senses are the only source of evil or error. Christian Science shows them to be false, because matter has no sensation, and no organic construction can give it hearing and sight nor make it the medium of Mind. Outside the material sense of things, all is harmony." Then it must be that by separation from the material sense of things harmony is found. In order to accomplish this end there must be a spiritual replacement, as nature knows no vacuum, and there is no void in Mind. Following this argument we reach the logical conclusion that wherever a material seeming would appear to be, it is just to infer that there is the spiritual fact already established. For example, when the inrushing tide stirs up the muddy bottom of the bay, the material sense of sight would argue that the condition is most inharmonious, but experience has taught that the pure water from the ocean stirs up in order to purify. In Science and Health (p. 574) Mrs. Eddy plainly states, "The very circumstance, which your suffering sense deems wrathful and afflictive, Love can make an angel entertained unawares." The stir caused by the inrushing truth often brings to the surface many of the ugly human passions, such as selfishness, jealousy, envy, hate, resentment; in fact, the whole gamut of self-inflicted wounds would argue that evil is a part of man and would thereby separate him from God, who is good. At other times the arguments of evil might try to influence one through beliefs of physical ills presenting themselves as reality, so as to convince him that imperfect so-called man is real, thus separating him from his creator, whom he is told to glorify in his body. Let the student be earnest enough to confront these lies with the ever available truth, let him immediately separate the falsity from the real man and he will manifest the complete harmony which Mind and its inseparable idea is forever expressing.

True separation is true activity when real attraction is thoroughly understood. All things material are apart from God, good, and are therefore unreal. Mrs. Eddy points out this fact in Science and Health (p. 102) when she says: "There is but one real attraction, that of Spirit. The pointing of the needle to the pole symbolizes this all-embracing power or the attraction of God, divine Mind." Mind being Spirit, God, the only attraction there is for the real man, who is spiritual, is good. Like begets like, the old adage has it. As an illustration of attraction, there is a process called mineral separation which applies most aptly. The crushed ore is put into water that is kept thoroughly agitated, while one per cent of oil is put on the surface of the water. The dirt goes to the bottom and the mineral is attracted to the oil bubbles and separated in this way. Experts can offer no explanation for this breaking of a so-called law of matter, which claims that heavy bodies, such as minerals, sink to the bottom. The stirring up in the purifying stream separates the pure metal, and it is instantly attracted by another mineral substance like itself.

Even so a grain of truth may be brought to bear upon a situation; the appearance may be of turmoil and stirring up, but the result is bound to be the disappearance of error or evil. Since opposites such as Life and death, good and evil, Truth and error, cannot exist together, the reality will hold the ground, while in the very nature of things the supposititious opposite will be separated and disappear. Stagnation, which is the reverse of activity, conveys the thought of death, whereas activity expresses life. A flowing stream that has been fouled will purify itself by its own action in one hundred yards. The metaphysician rejoices when he sees activity being expressed, knowing, as he does, that what he is beholding is the unfolding of good. It presents itself at times to the human senses as separation, but as the truth about separation grows clearer and clearer to him, he knows that he as the image and likeness of God cannot be separated from anything good, for nothing that is good can be separated from God, since it is the expression of Principle and is inseparable from the Mind from which it emanates.

"Be ye therefore perfect"

HOWARD H. CARROLL

THE full significance of these words of Jesus, "Be ye therefore perfect, even as your Father which is in heaven is perfect," has been almost entirely lost for many centuries and their meaning will remain obscured so long as we cling to that great error of mortal mind, the belief in the reality of matter. Most religious doctrines, confused by materiality, have reversed the idea which Jesus meant to convey. Though the perfection of our "Father which is in heaven" has not been denied in theory, the imperfection, or sinfulness, of man has been almost universally proclaimed. This is the natural result of accepting contradictory premises. Nominally, God has been called only spiritual and perfect in quality and completeness. The human being has endeavored to hold to this premise and to realize the spirituality of God and His wholeness, or allness. Yet he has indorsed the premise that his own so-called ego, created by God, is in most ways detached from God, Spirit, and, during earthly life, is inseparably bound to and limited by a material body, nonspirit. Moreover, though the average thinker might not acknowledge it, the body is given the dominant place in the daily aims of living on earth; comforts and luxury in food, clothing, and housing being the objects of a great proportion of our activity. This seemingly dominant factor, material body, is universally accepted as something not spiritual, something subject to change and deterioration, or sickness and death, material conditions, which are manifestly imper-

門下山田田

ئىرى: ئىرى: ئىرى: fect. The three concepts—God, a separate entity man, and a material body—involve the extremes of perfection and imperfection. The reasoning is evidently illogical, for if Spirit is all and perfect, the thing which is detached from Spirit is something more than all. Therefore man has not an entity separate from God manifest. Moreover if Spirit is all and perfect, matter and imperfection are properly thrust out of existence, must be nothing—a dream. God is All.

"The fall of man" and all the doctrines based upon it were the religious errors which accompanied such confusion of thought, and sickness and death became inevitable images in the material dream. Only spiritual man can be perfect as the image and likeness of God—the purely spiritual. The acceptance of materialism reverses the teachings of Jesus in every respect. Think how some of the churches were driven by illogical reasoning, based on a false concept of man, to attribute to their God unloving, unforgiving, and unfatherly characteristics! Only the faithful members of these churches, no matter how inharmonious their daily life, were considered to be the children of God and forever blessed. To those who have awakened to some of the great spiritual truths, it seems almost incomprehensible that such confusion of thought should not have revealed its own erroneousness. Yet here again the result was natural, for mortal man reasons from man to God and inevitably makes God manlike. In the words of Mrs. Eddy (Science and Health, p. 269): "Human philosophy has made God manlike. Christian Science makes man Godlike. The first is error; the latter is truth."

Until one casts off this error of materiality, he is filled with confusion and doubt, faith in universal good is impossible, discord is rampant, and one seems subject to every illusion. The mortal mind becomes dazed with a medley of good and evil. Once acknowledge the spirituality of man, and step by step one reverses the erroneous thinking processes. Then sickness and death, imagined conditions of an unreal body, inevitably are rejected. They are no more real than a vivid dream is real to the dreamer. They are the product of a lack of spiritual understanding. Just as surely as the realities of a dream soon fade from memory, so will sickness, sin, and death vanish when one awakes from materialism to the understanding that man reflects nothing except the great spiritual realities,—Truth, Life, and Love,—the perfect Father.

Fortunately for mankind, Mrs. Eddy has revealed to us the meaning of the teachings of Jesus, and we know that neither God nor the real man is imperfect. On page 587 of "Science and Health with Key to the Scriptures," she says, "God is one God, infinite and perfect, and cannot become finite and imperfect;" and on page 69 she says, "Spiritually to understand that there is but one creator, God, unfolds all creation, confirms the Scriptures, brings the sweet assurance of no parting, no pain, and of man deathless and perfect and eternal." The Scriptures give us the same promise. John reports Jesus as saying, "And now, O Father, glorify thou me with thine own self with the glory which I had with thee before the world was. . . . And the glory which thou gavest me I have given them; that they may be one, even as we are one: I in them, and thou in me, that they may be made perfect in one."

There are several possible interpretations of Christ's demand that his disciples be perfect. One of these is that he was presenting to them merely an uplifting ideal, similar to that of Emerson's when he proclaimed that we must hitch our wagon to a star. Emerson's words imply the ideal. Nothing in Jesus' forceful directness suggests that he be-

lieved that the goal of perfection was unattainable on earth because of mortal limitations. Christ Jesus spoke "as one having authority." He came to reveal divine truths to mankind and the least insincerity would have rendered such revelation ineffective and undemonstrable. He knew and demonstrated that mortality and imperfection cannot coexist with immortality and perfection. The one must be recognized as untrue, and the other as true.

A second possible interpretation of his words is that they were a promise for conditions which exist after death. If matter is real and nonspiritual, and the material body is the earthly home of man's spirit, the body and spirit must part company before man can have the spiritual perfection of God. Death is thus supposed to be the birth of the true life of man, a conclusion incompatible with the words of Jesus. Nothing in the account of his Sermon on the Mount justifies this. His entire attitude toward death is against the assumption that death is necessary for immortality and perfection. His healings, and those of Christian Scientists, demonstrate that the more completely we recognize the error of materialism with its accompanying errors of sickness and death, the more certainly will they play no part in our experience. Mrs. Eddy says (Miscellaneous Writings, p. 101): "The Science of omnipotence demonstrates but one power, and this power is good, not evil; not matter, but Mind. This virtually destroys matter and evil, including sin and disease." Life is immortal, eternal, perfect.

Then a third possibility becomes the only correct one. We at last recognize the incomparable value of the words as a statement of an ever existing truth. Those who know that man is wholly spiritual, that he is the idea of Godgood—that he is made in the image and likeness of a perfect Father, also know that the perfection of man is an eternal truth capable of demonstration through humble obedience to the laws of the perfect Father. Each daily act, no matter how apparently insignificant, may manifest some characteristic-law, order, beauty, love-which reflects divine Truth, Life, and Love-immortal Mind, God. It is our duty and our joy to be faithful in all things that we may finally attain and demonstrate perfect harmony with God. One will find, as the dream of materiality and imperfection vanishes, that he becomes conscious of the reality of the Christ. Indeed the words of Christ Jesus are an eternal truth: "Be ye therefore perfect, even as your Father which is in heaven is perfect."

Practice versus Theory

NATHANIEL J. BUSKIRK

HRISTIAN SCIENTISTS do well to bear always in C mind the essential fact that the writings of our revered Leader are the immediate fruits of the practical application of her understanding of divine Principle in her life experience. She knew whereof she wrote, for the verity of her statements had been proved to her beyond all cavil. In relating her personal experience, in regard to her discovery of Christian Science, Mrs. Eddy writes on page 109 of Science and Health, "I knew the Principle of all harmonious Mind-action to be God, and that cures were produced in primitive Christian healing by holy, uplifting faith; but I must know the Science of this healing, and I won my way to absolute conclusions through divine revelation, reason, and demonstration." It is especially noteworthy in connection with the foregoing statement, that Mrs. Eddy was not content to stop with a merely theoretical explanation of the healing recorded in the Scriptures, but

she was impelled to seek the Science of it. So it is that each student of Christian Science must make the truth his or her own in life experience before thorough practice thereof can result.

For instance, we may utter the expression to the suffering invalid, "God is your Life;" yet if we do not have some approximate understanding of the meaning of this at the time we utter the words, they are indeed "vain repetitions." In discussing the tendency toward a superficial utterance of scientific truths, we read on page 460 of Science and Health: "If Christian healing is abused by mere smatterers in Science, it becomes a tedious mischief-maker. Instead of scientifically effecting a cure, it starts a petty crossfire over every cripple and invalid, buffeting them with the superficial and cold assertion, 'Nothing ails you.'" The more experienced student of Christian Science is learning the advisability of becoming more careful in his statements of Truth, especially when talking with the uninitiated on the subject, for ofttimes only antagonism is produced by unexplained statements of Truth, uttered with no regard for the mentality of the person addressed.

Certain it is that the more earnestly each student of Christian Science strives to have that Mind "which was also in Christ Jesus," the more he will find that his understanding and consequently his individual ability to help others in a metaphysical way is increasing. It is the still, small voice of Truth which heals and saves. The great need for all time is more for rightly reasoning students of Christian Science than merely talking students. It is well to be able to write and talk intelligently on the subject, but the acid test to be applied in all cases to ascertain the real Scientist is. How much of the truth are we able to bring out in our experience by the healing of all untoward conditions? The passing of this test is the only efficient proof which may be given as to whether we are practical Scientists, for a Christian Scientist may be properly defined as a person who knows God, who knows, and does not merely believe.

"Where your treasure is"

LELA M. DARLINGTON

"W HERE your treasure is, there will your heart be also." How limited is our comprehension of these words of Jesus before they are illuminated by the light of spiritual understanding, and how inspiring and comforting it is when through the study of Christian Science we learn the real nature of treasure or riches! The human heart forever clings to its treasure, its sense of substance, and the measure and permanence of a man's happiness depends upon his answer to the question, Where is your treasure?

Since God, Spirit, Mind, is the only substance, man's treasure is always spiritual and must exist in Mind. On page 70 of "Science and Health with Key to the Scriptures," Mrs. Eddy says, "The testimony of the corporeal senses cannot inform us what is real and what is delusive, but the revelations of Christian Science unlock the treasures of Truth." The human mind, however, claims another substance, saying. "My treasures are not spiritual; my wealth and health, my friends and family, all the beauties of nature, are material. They need no revelation, for the testimony of the senses concerning them is plain to all. I have bestowed my affections upon them, though how to keep them I have never been able to learn." Poor, ignorant human mind! It sees only its own thoughts. Its dearly loved treasures are but shadows cast by its own false belief that it can obstruct the light of infinite Truth.

Through the revelation of Christian Science a man learns that his true treasure, his wealth, his friendship, and all that is really good is spiritual idea, indestructible and eternal, and he joyfully acknowledges that true affection is in the spiritual realm also. Here affection is safe, for this is the real sanctuary, a sure defense against the arguments of fear and suffering which constantly assailed one when, because of his belief in material treasures, subject to change and decay, his affections were in the material realm. How grateful, then, is the student of Christian Science for his deliverance from belief in the human mind, which through its false concepts of treasure or substance robs affection of its joy-giving elements of freedom, fearlessness, and universality. Because he knew his treasure or substance to be eternal, the psalmist sang, "My heart is fixed, O God, my heart is fixed: I will sing and give praise."

Veritas

LINDA GERMOND BAKER

WE are taught the value of education through all of Mrs. Eddy's writings. "Academics of the right sort are requisite," she says on page 195 of "Science and Health with Key to the Scriptures" and then she defines what the right sort is. "Observation, invention, study, and original thought are expansive and should promote the growth of mortal mind out of itself, out of all that is mortal." Already she has declared that "whatever furnishes the semblance of an idea governed by its Principle, furnishes food for thought. Through astronomy, natural history, chemistry, music, mathematics, thought passes naturally from effect back to cause." Whatever teaches us to know our fellow creatures better, whatever helps us to think logically and clearly, whatever makes us see new beauties in everything about us-to enjoy all true good-is education of the right sort, and how very grateful we should be if it has been our privilege to have received its advantages. Just the other day the opportunity for being one of two thousand alumni at a great public college was the writer's. Years before, she had glimpsed the value of education and had been impelled to seek with all her heart to know, and thus she was led with thousands of others to the educational institution where she began to get larger views. The class motto had been Veritas, and now at the reunion she pondered upon the word; for Truth had been wonderfully revealed to her in Christian Science. She was disturbed, however, by the noise and confusion about her. The chairman of the meeting was trying in vain to be heard. At last there was a semblance of order and the program began, but a few hours of it was enough for the one who knew somewhat of the peace and the bigness of Vcritas as the divine Mind comprehends it. A few blocks away, in the ballroom of a large hotel, there was to be another gathering and it was to that the writer betook herself.

Although it was early when she arrived she was glad to enjoy the interval of quiet before the time appointed for the lecturer to appear. Silently the immense room filled until there were as many in it as had been in the college chapel, and yet there was no noise, only the soft hum of many happy voices until the speaker of the day and the gentleman who was to introduce him stepped to the platform. Not a word was spoken audibly by either of them but there must have been an utterance of the "peace, be still" of Truth, for almost immediately there was silence. These people had come to be educated; they were seeking a knowledge of God, the only, the All, the absolute truth of all things, and they could not afford to lose one word. Why? Because the education they were to receive promised to be most practical for

them. They had been told that it would solve all kinds of human problems, it would heal heartaches, it would cure the sick, it would free the sinner, and give rest to the weary, it would enlarge one's capacity for real accomplishment; in fact, it would begin to make all things new, even their old sense of education. And that audience wanted to hear the lecturer. Why should they not? They wanted to know about the Science of living, or Christian Science.

How indeed has Veritas been revealed to the waiting thousands of the twentieth century? Years ago Plato, Socrates, Luther, Wesley, Shelley, Eliot, John Fox, Tennyson, Lincoln, and every other earnest seeker caught visions of Veritas or Truth, but it was for us of the present day to behold its radiance, and what do we intend to do with it? That is the question. Are we going to use its fullness as our fathers used its first beams? Shall we remake the world with its power or are the centuries-old wrongs to continue? Shall not each one of us answer this question for himself, and if the reply is as God would have it will there be "wars and rumours of wars," or famines, or sorrow and pain in the twenty-first century?

What do we intend to do with Veritas? Shall we use it to make ourselves comfortable in matter or will Veritas make us rich in Spirit? How would we answer Jesus of Nazareth if he were on earth to-day? Out of the fullness of our lives shall the world deduce the fact that good is Veritas, or Truth? Shall men see that Spirit is reality; that Love is power, that Life is harmony? Shall we be living demonstrations of the fact that Truth does make free from every lie of discord? Shall we convince mankind by the glory of our living that the promised Comforter is here in their midst? What a responsibility we students of Christian Science have. To us much has been given and indeed of us much is required. May none of us fall short of the divine requirements, and may all of us each day wear the crown of rejoicing that comes when the truth is lived, not just believed. How our hearts go out in gratitude to our Leader, Mary Baker Eddy, for the scientific statement of being found on page 468 of Science and Health. How simple it all is: the truth that man is made after the image and likeness of God, hence is spiritual and good; and yet what a leaven is in the statement. Only now do we begin to see. What will the future show?

[Written for the Sentinel]

The Fields of Bow

MARY BEECHER LONGYEAR

BROAD, rock-terraced fields of Bow, Spread with rugs of springlike hue, Held close in heaven's arch of blue, No fairer place dear God doth show To all earth's wondering pilgrim eyes That, weeping, search for hidden good On breezy crag, in forest's wood; Heaven's own path within you lies.

Here walked in childhood's lonely hour A little girl with wind-swept hair, Whose thoughts, like pearls so pure and rare, Enriched old earth with priceless dower.

O fields of Bow beneath the skies,
This lesson sinks into my heart:
There is no place in marge or mart
Where thoughts from God may not arise
If we, like Mary of these hills,
In faith seek why we should not die,
But live forever, like the flowers
On fields of Bow beneath the sky.

Selected Articles

["More and Less"—The Christian Science Monitor, Boston, U.S.A., June 28, 1920]

The human mind is much concerned about the words "more" and "less." It is continually reaching out for more health, wealth, pleasure, or peace; in fact, for more of everything of which it can conceive as being something that will add to its store of good. It is equally persistent in its striving for less pain, poverty, sorrow, or turmoil; that is, less of everything of which it conceives as being something that will decrease its store of evil. This endeavor of the human mind to acquire more good and less evil might well be commended if we could only rely on its conception of what is good and what is evil, and if the manner of attaining or avoiding these were always unquestionable. But only a casual glance at our past experiences shows us that these conceptions are often erroneous, that the manner of obtaining our desires is as often wrong. The pleasure we honestly accept to-day as adding to our store of good may add but tenfold to our seeming store of evil. The discipline, perhaps, which seems to increase our already inharmonious condition, may but multiply our apparent good. Since the object or objective sought is often so radically different from that which is won, the most natural conclusion is that the human mind which has passed judgment on our affairs is untrustworthy.

Now this is not difficult to understand when we learn in Christian Science that the human mind is but a different stratum of matter, so that these ideas of "more" and "less" enter into our human experience because of the materiality of the human mind. Materiality, because of its very nature, is limited. In its grosser form its limitation is very evident. Length, breadth, and thickness are its concomitants. If there can be one material world they can be numberless. In dealing with these thoughts of limitation acres are added to acres, dollars to dollars, and in this process of adding is the idea of "more." The process of addition may be changed to the process of subtraction and the idea of "less" enters into the transaction. The subtler forms of materiality are apparent in the human mind itself, always engaged in adding joys and subtracting sorrows. So if mankind is to escape from this thought of "more and less" it must be liberated from materiality, or, in other words, the mentality in which these things seem to exist. It must in all humility and sincerity turn to the only Mind, which is the divine.

Now the divine Mind is not in the least concerned with the words "more" and "less," nor with the word "good" in a comparative sense, and with the word "evil" not one iota. It in itself is All. It is perfection and completeness. It is infinity. To conceive of more or less in connection with Being is unthinkable. It is like speaking of a circle as more or less round. Such words do not enter into divine Mind. The classification "good" or "evil" is as equally unknown, since all-good cannot partake of evil, which would be the case had evil any reality, any existence which Mind could know.

In the Christian Science textbook, "Science and Health with Key to the Scriptures" (p. 469), Mrs. Eddy expresses it thus, "We bury the sense of infinitude, when we admit that, although God is infinite, evil has a place in this infinity, for evil can have no place, where all space is filled with God." Divine Mind, already having all, cannot acquire more health, wealth, pleasure, or peace. Likewise, God cannot have less pain or any other inharmony. He has none to begin with. More than all and less than nothing are impossible. The divine Mind and the human mind are the

Digitized by Google

very antipodes of each other in this and in every other respect.

The true statement of the fact is that the divine Mind alone is, and the human mind is not. The first has everything to recommend it, the second, a suppositional opposite, a counterfeit, or belief, has nothing. It is as we accept the fact and recognize still further that the one Mind is eternally manifested that there comes into our lives a decreasing consciousness of the need of "more good" and "less evil." For all good, being in the infinite, is here now, and evil, being finite, is not a reality.

Approaching two thousand years ago Paul laid upon us the injunction, "Let this mind be in you, which was also in Christ Jesus," but obdurate mankind has clung to the old, old thought of Mind, or God, as one who could bestow both good and evil, and in any degree. On this basis men have besought God to add more to their present good and lessen their supposed evil. The futility of this was unrecognized by practically the entire world until Mary Baker Eddy, the Discoverer of Christian Science, pointed out the nature of the Mind to which Paul referred. On page 2 of Science and Health she says, "God is not moved by the breath of praise to do more than He has already done, nor can the infinite do less than bestow all good, since He is unchanging wisdom and Love." God can do neither more nor less, because His work is complete.

It rests then with man to do his part. He begins by conforming to Paul's admonition, and one of his first efforts is to eliminate the thoughts "more" and "less," which, it has been pointed out, the infinite does not know. Only in a false belief can a man have "more" or "less." The perfect man is God's image and likeness and as such he has all that is good and none that is bad, so that the question of how to attain the divine Mind and manifest a normal state becomes not a question of attaining but one of recognizing the fact that the perfect man must express or reflect that Mind, and that he cannot express anything else. As mortal man gets a clearer understanding of divine Mind and a firmer grasp on the fact that the perfect man is his true self, the idea of this Mind, he begins to see the seemingly ever present problem of "more" and "less" dissolve until it finally disappears from his consciousness.

[John M. Dean in The News Scimitar, Memphis, Tenn.]

Christian Scientists have only an academic interest in the methods of healing employed by the gentleman referred to in a recent editorial, but they must kindly take issue with your conclusions in the same connection concerning "laws of health." Christian Science consistently contends that health is natural and normal, while disease is abnormal. It also maintains that as God is the supreme lawmaker of the universe, His laws properly applied must inevitably operate to annul every asserted law of discord. God, being omnipotent in His goodness, could not and would not make a law of inharmony. Man suffers as a consequence of his own sins, and not because of any act of God. As men gradually learn their real origin and nature, they will "put off the old man" and "put on the new man" described by Paul. This "new man" is the man made in God's "image,"-the Godlike man of the first chapter of Genesis. As a proper understanding of this man is gained, it will be seen that what men call "natural law" is not a law and only seems to be such because of popular acquiescence in its false claims.

To question the all-power of divine laws is to impugn the authenticity of the Bible. Impossibilities never occur. The work of Jesus was termed miraculous because it was unusual. His work consisted merely in the establishment of law, for no fundamental law could ever be annulled in the slightest degree. A "law" that could be suspended even momentarily was never a law. What has been done once can be done again by the employment of the same methods. Mrs. Eddy claimed merely to have rediscovered the spiritual process used by Christ Jesus, and this method logically and demonstrably contradicts every assumed law of matter. Hundreds of thousands of intelligent people are measurably proving this, and let us hope that the day is not far distant when the whole Christian world will recognize and begin the practice of the law of Spirit as made operative by Jesus in every direction.

Jesus turned water into wine, thus setting aside the law of chemistry; he walked on the water, thus overcoming the law of gravitation; he fed the multitude with a handful of bread and fishes, thus annulling the accepted law of production; he passed through closed doors, thus disproving the law regarding the substantiality of matter; he quieted the storm, thus putting to naught the law of the elements; when he so desired, "immediately the ship was at the land," thus overcoming the law of time and space; and finally he healed the sick and raised the dead, including himself, in direct contradiction of all human law and experience. Either Jesus did these things or he did not. If he did them, certainly the impotence of material "laws of nature" is forever established. If he did not do them, then the Bible is filled with fables, and we are left to grope in the darkness of materiality and are forever shut out from the employment of the only method by which man can ever expect to be wholly saved. If the only office of religion is to offer superficial "consolation" to the victims of evils which religion is powerless to prevent or remove, the world is indeed in a hopeless condition and Christianity is a failure.

[I. deR. Miller in Tucson (Ariz.) Citizen]

I note that in a recent issue of the Citizen there is a statement by a Roman Catholic prelate of London, England, in which he brackets Christian Science with theosophy and spiritualism. Christian Science has nothing in common with these beliefs. Regarding spiritualism, Mrs. Eddy has said on page 71 of "Science and Health with Key to the Scriptures," "When the Science of Mind is understood, spiritualism will be found mainly erroneous, having no scientific basis nor origin, no proof nor power outside of human testimony." And again on page 139 of the same book she says, "Atheism, pantheism, theosophy, and agnosticism are opposed to Christian Science, as they are to ordinary religion." She declares on page 99, "Those individuals, who adopt theosophy, spiritualism, or hypnotism, may possess natures above some others who eschew their false beliefs. fore my contest is not with the individual, but with the false system."

Now the teachings of Christian Science are simple. They are the same teachings which centuries ago Jesus imparted to the humble fisher folk of Galilee, who were able to understand and practice them to the extent of casting out devils and healing the sick as did their Master. These teachings are understandable by children and by the wayfaring man, and in support of their efficacy and their identification with Jesus' instructions, is offered the same proof,—sickness healed, sin overcome, and devils, or evils, cast out.

Christian Science takes for its basis the allness of God and His manifestation and unswervingly draws all its conclusions from that premise. Human theories and creeds may suffer now in the light of these deductions as they did in

Jesus' time, but the world is beginning to demand reasonableness in religion and is refusing to recognize God, the creator and giver of all good, as the author of the sorrowful conditions of evil and disease we see about us. Christian Science is revealing these as the apparent result of that erroneous thinking about God and His creation, which constitutes the human mind, and shows us that the way of escape or salvation from these conditions is to replace the wrong or mortal thinking with those true thoughts about God and man which Jesus was cognizant of; in other words, to "let this mind be in you, which was also in Christ Jesus." It must be evident to any one that the prayerful endeavor to bring "into captivity every thought to the obedience of Christ" is not a dangerous system of religion or method of living.

[Samuel J. Macdonald in Jersey Journal, Jersey City, N. J.]

In a recent issue of the Journal the sermon of a Jersey City clergyman against Christian Science was reported. Our friend, seeking for a telling catch phrase to hurl at Christian Science, falls back upon the overworked and overworn banal jingle, "ostrich philosophy." Strangely enough, this clergyman's first gun is fired at "Mrs. Eddy's contention that the five senses cannot be trusted and that impressions gained through them are synonymous with error." This, he says, is "playing the ostrich to get away from trouble." Evidently, then, our clerical friend constitutes himself a champion of the trustworthiness of the five senses and the testimony they offer, and we are therefore perforce left to wonder if he understands the task he has undertaken. Surely he cannot be entirely unaware that human education is principally directed toward the correcting and overcoming of sense testimony, and that human progress has been largely based upon the demonstration of the fact that "the five senses cannot be trusted." Perhaps the most notable instance of this is the Copernican theory, which is the completest triumph over sense testimony, and it might be well to recall the fact that it is less than three centuries since ecclesiastical ignorance and narrow-mindedness, relying upon sense testimony, condemned the aged Galileo to incarceration and prolonged penance, even after he had been forced, under menace of torture, to recant his belief in the Copernican theory. Since the days of Copernicus and Galileo, almost every triumph of science and invention has been won in the face of all sense testimony to the contrary, and often in spite of bitter clerical antagonism. To-day technical schools and chemical laboratories are equipped with many appliances and instruments designed expressly to cortect and overcome the evidence of the five senses. Mrs. Eddy only went a step beyond the physicist and natural scientist in this respect, and since the publication of her great textbook, those scholarly scientists have been hastening to reach her advanced standpoint.

Our clerical friend should agree with us that Jesus is good authority for any Christian, but he has evidently overlooked what Jesus said upon the subject of sense testimony. He said, "Judge not according to the appearance, but judge righteous judgment." And St. Paul wrote, "For the things which are seen are temporal; but the things which are not seen are eternal." Moreover, in Hebrews faith is expressly defined as "the evidence of things not seen."

It is clear, then, that although our Jersey City friend may not agree with her, Mrs. Eddy has the best authority, both religious and scientific, for the position taken by her in relation to sense testimony.

Our clerical friend declared next, "The belief that there

should be no treatment of disease is unwillingness to face the facts," implying that such a belief is taught in Christian Science. This is a curious error for any one to fall into, and has no basis whatever in Christian Science. Our friend should acquaint himself with the subject upon which he attempts to preach. If, for example, he had read what Mrs. Eddy says on this point, he need not have fallen into this error. On page 460 of "Science and Health with Key to the Scriptures," she writes clearly and unmistakably: "Sickness is neither imaginary nor unreal,—that is, to the frightened, false sense of the patient. Sickness is more than fancy; it is solid conviction. It is therefore to be dealt with through right apprehension of the truth of being. If Christian healing is abused by mere smatterers in Science, it becomes a tedious mischief-maker. Instead of scientifically effecting a cure, it starts a petty crossfire over every cripple and invalid, buffeting them with the superficial and cold assertion, 'Nothing ails you.'"

The authority for what Christian Science teaches is the textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy, and no statement made by any person has any authority unless strictly and wholly in accord with the textbook.

[F. W. Reed in The Idaho Republican, Blackfoot, Idaho]

The article in the Republican entitled "Fine Scientist" calls forth the following comment:

Is it not, indeed, a strange law that makes a man a criminal if his child dies of diphtheria under Christian Science treatment, but would hold him guiltless if the child dies of the same disease under the care of a physician? It would seem that it would be necessary before arriving at a verdict of guilty in such a case to determine beyond question of a doubt that an absolutely sure cure for diphtheria was available by employing a physician. Yet to assume the possibility of such a decision is ridiculous in the extreme, for it is a well-known fact that deaths from this disease in large numbers have occurred in the past and are still occurring under medical treatment.

The father who has been branded a criminal because of relying upon a spiritual method of healing had just as much love for his daughter as the fathers of thousands of other children who have departed under the care of physicians. He procured the help which he believed to be the best, and yet he has been prosecuted, convicted of manslaughter, and fined for exercising his best judgment. It would seem from this that the crime, if such, was not in permitting the death of the child, but because the same took place under a system of healing not accepted by those responsible for the conviction. Such travesties on justice seldom occur in a free country, and it is to be hoped that the higher court to which the case has been appealed will not allow the conviction and sentence to stand.

The Constancy of Christ

MARTIN BRETHERTON

LO, life goes on. Amid the vague disposals
Of jarring sense, of ignorance, and sin,
Thy constancy grows daily surer founded,—
Upholding those affrighted at the din.
And, feeling it, the swaying earth seems steadier,
The toil less vain, and circumstance less odd,
The day grows brighter, and the night less fearful,—
And we believe in thee, O Son of God.

Editorial

Profiteering and Its Cause

THE apostle to the Gentiles, writing to Timothy of those things which should be absent from the character of a bishop of the church, enumerated amongst them the love of filthy lucre. There is a directness of phrase in Paul's language which makes it perfectly clear that he fully understood the words of the wise man before his day who declared that the love of money was the root of all evil. Now this love of money is fundamental in the human character, inasmuch as it is the expression of that fear which constitutes the belief of life in matter. There is, of course, a covetous side of man's love of money, just as there is a sensuous element in his indulgence of it. But nevertheless it is not these things that have so enmeshed the human mind, as the human mind's fear of the consequences of the absence of money. On the day when money became the symbol of human possession, the possession of money became a necessity of man's very existence. He could not feed himself, or clothe himself, or house himself without money, and therefore the absence of money meant something more to him even than poverty or privation,-it meant existence its very self.

Now fear is the belief that life exists in matter. If a man did not believe that life was inherent in matter, he would not fear for the absence of those necessities which money purchases for him. As a consequence, his love of money is inherent in his very belief of being, and therefore greed becomes the expression of the fostering of this belief just as avarice is the ultimate result of an unbalanced belief in the necessity of possession. In dealing, then, with such things as avarice and greed, it has to be remembered that there is something more than the mere love of possession included in these things, since this love of possession is not only the possession of fields, and houses, and stocks, and shares, but the possession of life itself. Jesus recognized this perfectly when he related the parable of the rich man who determined to build greater barns for the bestowal of his possessions. These possessions might be expressed in cattle, and corn, and the fruits of the vine, but all these things were the mere externalized conditions of the mental beliefs of avarice, or sensuality, and so of fear in every one of its myriad forms. Consequently, when Jesus thundered out the moral of his story, "Thou fool, this night thy soul shall be required of thee: then whose shall those things be, which thou hast provided?" he challenged the human belief in fear as life itself, for a man's soul was his sensuality, his materiality, and so his very existence.

In considering the modern phase of greed, in a guise such as profiteering, all this strange underwold of the human character has to be taken into consideration. The rough and ready modes of overcoming a specific manifestation are not cures, but are mostly the human mind's way of temporarily protecting itself against a fear, which in its very exaggeration has become a danger to it. It looks into itself without understanding what it sees, or knowing how to overcome what

it suspects. As Mrs. Eddy so truly says, on page 186 of Science and Health: "Mortal mind is ignorant of self, or it could never be self-deceived. If mortal mind knew how to be better, it would be better. Since it must believe in something besides itself, it enthrones matter as deity." It is a counterfeit, in other words, this mortal mind, which attempts to heal itself by means of a counterfeit. And instead of recognizing its own nothingness, and the allness of divine Mind, it sets to work to build barns to safeguard itself against its own lying beliefs, or attempts to regulate its own shortcomings by enactments which are as far removed from law as its own emotions.

Within the past few months the human mind has delivered itself up to a perfect orgy of profiteering, in other words, of greed. The legislatures of the world stand helpless before a condition of things they believe to be real. A thousand indignant denouncers of the existing conditions produce a thousand contrary panaceas. Mortal mind is endeavoring herein to be better, but only demonstrating that it does not know how. The simple fact, of course, is that you cannot overcome evil by a surrender to a belief in the reality of evil. This does not mean that mankind is not better engaged in trying to curb the animal propensities of the world than in giving rein to them, but it does mean that all such efforts must be in the shape of palliatives, and that trying to reduce outrageous prices by Overall Clubs is perilously near attempting to abolish war by peace leagues. Again, this does not mean that the effort to prevent or to reduce war through peace leagues is not a good thing, any more than it means that it is not better to reduce prices by means of Overall Clubs than to let dishonesty run its unchecked course. But it does mean that all such methods are in the nature of doctoring effects whilst leaving the causes unaffected. This is why sickness, after generations of doctoring, even doctoring of the most devoted description, has never been overcome. The doctor of to-day, like the priest of Cos, imagines that his symptom is his disease, so that the disease with which he is grappling is merely a phenomenon produced by a mental cause. In every case, whether of bodily sickness or morals, whether of economic or political evil, the cause is mental, and the cure must be a mental one also.

The only way, then, in which it is ultimately possible to overcome profiteering is by overcoming the belief that life is inherent in matter. In the exact proportion in which this realization is gained by mankind, mankind will lose its desire for money, because it will realize that supply is mental, just as Jesus proved it to be mental when he fed the multitude and paid the tribute money. Of what avail, then, are possessions to the man who realizes that Spirit is an unfailing source of supply? The bank, the real estate office, the stock exchange, must cease to have any attraction. The china orange of proverbial fame becomes to him just as valuable as all Lombard Street. Then the desire to profiteer must pass away, for he will realize that this desire is itself founded in his own fears, and that even if successful, it can only leave him in the position of the man who, having gained the whole world, has lost his own soul. FREDERICK DIXON.

The Franchise for Women

EQUAL franchise means, of course, equal freedom. Because of its derivation and connotation, the term is in some ways even more expressive than the phrase "equal suffrage," which has to do distinctly with the voting power. Since divine Principle, which is the source of all real freedom, is infinite, it can be infinitely stated. It is always possible to

reason anew on the relation of the elective franchise, or of anything else, to Principle. With the extension of the franchise to women in the United States, Great Britain, and other countries, the great need is understanding of this basic relationship. There can be no settling down into a complacent apathy after the first accomplishment. Attainment of one goal is just an opportunity for still further unfoldment, which is always simply the infinity of Principle expressed. Intelligently reasoned activity is what constitutes the practice or demonstration of Principle throughout experience.

The work of the citizen is to be governed wholly by divine intelligence, not by human opinions of any sort. In this understanding of divine government lies the only eternal freedom. The true franchise consists, therefore, in the acceptance of Principle as the sole governing power. There could not possibly be any freedom in the attempted acceptance of any supposed opposite to Principle as power or influence. By knowing that the divine Mind expressed is all there is to any activity or election, one unerringly chooses the right, for the divine Mind is always right. Firmness in this understanding of Mind, not persons, as the one truly executive power requires oftentimes a giving up of false preconceptions, since the limited always has to give way to the infinite. That is why the progress of suffrage is real progress. It is the surrender of fancied limitations in the voting function to the understanding that the true man is unlimited in his reliance on Principle.

Now the word "man," properly used, does not refer to merely masculine gender. The real man in the image and likeness of God is the complete expression of the divine Mind, whether that expression be called masculine, feminine, or neuter. As Mrs. Eddy says in "Science and Health with Key to the Scriptures" (p. 516): "To emphasize this momentous thought, it is repeated that God made man in His own image, to reflect the divine Spirit. It follows that man is a generic term. Masculine, feminine, and neuter genders are human concepts." As one comprehends the meaning of man as a generic term, one necessarily sees the truth of the equal franchise. The real man, generically expressing Principle, has infinite franchise, or freedom, in the orderly unfoldment of the divine government. Thus understood, the whole problem of suffrage is not as to whether one division of human beings shall extend the voting function to another group of human beings, but simply the turning of all together to the one Principle and its generic idea. In this way, what has hitherto seemed to be incompleteness gives way to the entirety of the divine action.

Christian Science alone reveals that the true man's relationship to Principle is the fundamental reason for equality of the franchise. This reason is not one of mere political expediency. It is not aided by methods of mortal force, nor by intrigues of selfishness. Reasoning that is based on Principle depends wholly on Principle for its fulfillment. The requirement of Principle is inescapable, no matter how long mortal artifices may try to "kick against the pricks." Just as the qualities called Saul, giving way to the eternal qualities named Paul, could not avoid the demand of divine intelligence, so any sense of human prejudice has to succumb to the inevitable victory of right. Through Christian Science, every narrow human belief is healed by being replaced with the infinite breadth of Truth manifested. Perfect franchise is the insuppressible right of man, for the true man is freeborn here and now for the purpose of expressing the divine Mind. This expression of divine intelligence is the spiritual truth of franchise, of suffrage, and of voting, if one wishes to use those terms simply as names for the divine idea. The

divine Mind produces and sustains right action as this idea, a fact which is proved by all who turn to Principle for guidance. Just in proportion as one demonstrates this fact is one experiencing the infinity of the true spiritual franchise. This is the turning to and reliance on divine Love that is necessary in all circumstances.

In what other direction could it be possible to turn for the solution of any seeming perplexities? In the readjustment of the world to the true standard, infinite Principle remains the one sure and ever loving foundation on which to depend. As Mrs. Eddy says in her poem "Whither?" in "The First Church of Christ, Scientist, and Miscellany" on page 350:—

Oft mortal sense is darkened unto death (The Stygian shadow of a world of glee); The old foundations of an early faith Sunk from beneath man, whither shall he flee?

To Love divine, whose kindling mighty rays Brighten the horoscope of crumbling creeds, Dawn Truth delightful, crowned with endless days, And Science ripe in prayer, in word, and deeds.

The creed which involved the subjection of women is indeed crumbling away before the Science of Christianity, which actually demonstrates with continuous joy what the genuinely equal franchise is.

Gustavus S. Paine.

Among the Churches

Current Notes

OKLAHOMA, OKLA.—The corner stone was laid in the new Christian Science church at the corner of Robinson Avenue and Eleventh Street at 7:15 o'clock yesterday morning [July 17].—Daily Oklahoman.

MALDEN, Mass.—The corner stone of First Church of Christ, Scientist, at Main and Spring Streets, was laid at six o'clock this morning [July 16] before a number of the members, the readers, and the building committee.

Malden News.

Admission to Membership in The Mother Church

The next admission of candidates will take place on November 5, 1920, as provided in Article XIII, Section 2, of the By-laws of The Mother Church. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before Friday, October 22, 1920. Consideration of any applications received after that date will be deferred until the June 3, 1921, admission.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to June 5, 1920, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

Charles E. Jarvis, Clerk,

236 Huntington Avenue, Back Bay, Boston 17, Mass.

Christian Science had not been named. Presently she became conscious of the fact that God is Life, and the results of this conviction have been heard around the world. Her physical condition responded to her illumined thought, and she has since reestablished hope in the hearts of suffering humanity.

Jesus healed sin and disease and said, "He that believeth on me, the works that I do shall he do also; and greater works than these shall he do; because I go unto my Father." He also said, "These signs shall follow them that believe . . . they shall lay hands on the sick, and they shall recover." For about three centuries after Jesus taught on the hillsides and at the seashore many persons took him at his word and healed the sick in the name of the Christ. Then came the time when darkness seemed more real than the light; materiality meant more to the people than spirituality; the church confined itself to the healing of sin, while it stood calmly by and took the diagnosis of materia medica as final in the case of bodily disease. Such was the condition of the thought of the world when Mary Baker Eddy began to search for all causation outside of matter. We frequently hear of pious persons, students of the Scriptures, who have occasionally healed themselves or others through the medium of prayer. These indications have always been hopeful. They demonstrate the fact that spiritual healing has been available to every one throughout all ages. The great difference, however, between those occasional demonstrations and the healing that raised Mrs. Eddy from her couch of pain was the fact that Mrs. Eddy alone, of all such persons, followed up her vision of the Christ with years of diligent spiritual search and gave to the world Christian Science.

Even though Jesus enjoined his followers to do the works that he did, yet he left no definite rule which would enable humanity to accomplish these results. Through her understanding and demonstration Mrs. Eddy has given us "Science and Health with Key to the Scriptures," which serves not only as a textbook but is truly a key to the Bible, revealing the hidden meaning of this sacred volume. Even the reading of this wonderful book has been known to heal the sick. Christian Science is a religion that fulfills the law of God; that is not baffled by any so-called incurable disease.

LOGANSPORT, IND. (First Church).—Lecturer introduced by Mrs. Lillian Stough, who said in part:—

In the gospel of John, Jesus says, "If ye continue in my word, then are ye my disciples indeed; and ye shall know the truth, and the truth shall make you free." Like Pilate, the world is still asking, "What is truth?" To-day Christian Science, as discovered and founded by Mary Baker Eddy, is answering this question and mankind is being freed from the woeful decrees of sin, sickness, sorrow, and want,—is finding its freedom as a child of God.

MORRISON, ILL. (First Church).—Lecturer introduced by Miss Helen S. Green, who said in part:—

One thing all men have in common; that is faith, "the substance of things hoped for, the evidence of things not seen." In some men faith exists in embryo. In other men, blindly clinging to a God of dual personality who apparently permits both good and evil to struggle through eternity for ascendancy in the experience of mortal man, faith sure of one thing only, its own existence, vainly endeavors to understand this contradictory God, and feebly comforts itself with the promise of future joys beyond the grave. In still a third class of men, faith exists intelligently and confidently, with joy and strength. Why? Because these people have not only found a God who is always good, never inconsistent,

vacillating, or far-off, a God who always has been, is now, and ever shall be, near at hand, but they have continually proved His presence and His power to guide and sustain them in good.

Of such faith throughout many ages we find repeated record in the Bible. Inspired by similar faith in our own age a brave, spiritually minded woman patiently searched the Scriptures for the scientific reason for this faith, and finally after years of loving labor found and proved her answer in what she named Christian Science.

THE HAGUE, HOLLAND (First Church).—Lecturer introduced by Miss Marie Hartman, who said in part:—

In his last talks with his disciples Jesus the Christ often spoke of the Comforter which the Father would send, and we Christian Scientists believe that Jesus' promise was being fulfilled when in the latter half of the nineteenth century Mrs. Eddy was privileged to give to humanity Christian Science. For all those who earnestly and faithfully apply its teachings, Christian Science has indeed become the Comforter which awakens them from wrong thinking and gives them the blessed consciousness of God's allness. If we are struggling with sin or sickness, Christian Science acquaints us with the Father, "who forgiveth all thine iniquities; who healeth all thy diseases." In sorrow and trouble it supports, strengthens, and comforts us by revealing something of God's glorious actuality. Then we begin to see that man in his true being is pure and free, healthy and happy, because he is the image and likeness of God, and Christian Science shows us that by forsaking false beliefs we more and more give place to the Comforter, to the spirit of Truth, which will guide us into all truth and already here and now ushers us into God's kingdom.

ENGLEWOOD, N. J. (First Church).—Lecturer introduced by Reginald Schenck, who said in part:—

I well remember my first Christian Science lecture. I thought I knew something of the teaching at the time, but that was my first experience with the genuine article, and I want to tell you, my friends, that I have never been quite the same since that lecture. Something to me was born that lived and grew, and I can wish you nothing better than that you might have a like experience here this evening.

Speaking of the genuine article, Christian Science teaches us to know the genuine. The genuine man in Christian Science is the man created and forever existing as the image and likeness of God, Spirit, as distinguished from the human, sick, sinning, and dying man of the Adam variety. And the genuine Christian Scientist is the individual who is seeing this man aright, and is thus proving his existence and presence—proving this, however, not through the physical senses, but through Principle, and the Principle of Christian Science is Love, because God is Love.

The textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, states that "the vital part, the heart and soul of Christian Science, is Love" (p. 113), so if you have occasion at any time to test the genuineness of that which may come to you in the name of Christian Science, you have but to inquire into the quality and quantity of the love that is manifested. If it is genuine, the quality will be the God quality, the consciousness of good, and the quantity will be infinite.

PEEKSKILL, N. Y. (First Church).—Lecturer introduced by Dr. E. M. Quittmeyer, who said in part:—

In her textbook on Christian Science Mrs. Eddy makes the statement that "Christian Science and Christianity are

one" (Science and Health, p. 372). Students of her writings the world over, on the basis of their study and practice of Christian Science, stand back of that statement and vouch for its accuracy without qualification. They find through Christian Science that in our day the teachings of the Master are just as serviceable and potent as they were in his day. And that is the message of Christian Science. Jesus was in earnest when he said, "Come unto me, all ye that labour and are heavy laden, and I will give you rest." Christian Science is repeating that invitation to-day. Multitudes laboring and heavy laden are learning through Christian Science how to lessen their labors and get rid of their burdens, how to "rejoice in the Lord," how to realize the life more abundant which Jesus came to reveal.

KLAMATH FALLS, ORE. (Society).—Lecturer introduced by R. E. Smith, who said in part:—

The conditions under which we are living to-day call for a practical and definite religious thought. They call for the presentation of a religious truth which will appeal to our enlightened sense and explain to us the many apparently inexplainable things in our everyday life. What thoughtful men and women everywhere are wanting is something that will fill an unsatisfied longing for peace, comfort, and health right here and now. Christian Science reveals the truth about God and man's relationship to Him, so bringing into the lives of its followers infinite blessings.—Klamath Falls Record.

GOODLAND, KAN. (Society).—Lecturer introduced by Mrs. Alice E. Eaton, who said in part:—

Christian Science is the greatest blessing ever bestowed won mankind. Its teaching is simple, direct, and comprehensive; its method without compromise; its basis never changes, for its foundation is God, Principle; its manifestation is complete because of law. Law is the activity of Principle, and can never fail of demonstration, for Love is the fulfilling of the law, and "love never faileth." Mrs. Eddy says in "Science and Health with Key to the Scriptures," on page 113, "The vital part, the heart and soul of Christian Science, is Love." Again on page 454 she says, "Love inspires, illumines, designates, and leads the way." Love teaches us to understand Life as it is, not as we have believed it to be; Love teaches us to appreciate the so-called common things; Love so stirs the gift that is within us that we look intelligently upon the glory of the sunset, the beauty of sky and sea, the wonder of the mountains, the loveliness of the fields and woods and flowers, the majesty of the stars, and know that there is the presence of God. This is the birthright of each one, and is with us every day, aye, every hour.

DRESDEN, GERMANY (First Church).—Lecturer introduced by Professor Fleischer, who said in part:—

I have been given the honorable task of opening this meeting with a few words of introduction. Although I am not a Christian Scientist, I take pleasure in fulfilling this duty, as I know how much the wounded heart of humanity needs the comforting balm just now, and how Christian Science, with its wonderful message of love, can give this comfort and bring peace and joy to the heart, because it is the religion of pure, absolute faith in God.

Formerly it was customary to send a messenger to Europe from The Mother Church in Boston each year to explain and strengthen faith in the service of Truth, and to awaken afresh the sense of unity with the great movement in America among the believers in Christian Science, which has spread all over the world. This custom was interrupted for about six years through the world war. Thank God, the

war is over. But still we must witness how error and materialism lift their heads, worse than ever. No wonder that in the souls of earnestly thinking men just now the longing for truth is burning and they make stronger efforts than ever to find God's nearness.

MAQUOKETA, IOWA (First Church).—Lecturer introduced by Mrs. Nellie M. Keeney, who said in part:—

Christian Science is helping a great many people to get a clearer, better, more practical knowledge of God. It is doing this because it adheres strictly to the teachings of Jesus of Nazareth, not just by word or profession, but by application and demonstration in every experience of life. Christian Science declares that to understand spiritually that God, Christ, the spiritual man, and the universe is the truth of being, is the remedy for all ills, because it reveals the nothingness of sin, sickness and death, and the allness of God and His manifestation. If there ever was a time in the history of the world when we needed to realize, to understand, and to make use of this demonstrable Christ, Truth, that time is now.—Jackson Sentinel.

NASHUA, N. H. (First Church).—Lecturer introduced by Mrs. Clara K. Ferrier, who said in part:—

Many years ago Jesus said, "If ye continue in my word . . . ye shall know the truth, and the truth shall make you free," and all down through the ages men have been hungering and searching for this truth. Christian Scientists believe they have found the truth in Christian Science, because its teachings are enabling them, in an ever increasing degree, to bring forth the fruits promised by the Master, the healing of sickness as well as sin.

Wellesley, Mass. (Organization of Wellesley College).

—Lecturer introduced by Miss Rachel M. Pratt, who said in part:—

Our very presence here to-night in a college community indicates that we are seeking knowledge, and knowledge is defined by Webster as a "clear perception of truth." Accordingly we are all studying science, literature, the fine arts, philosophy, in order that we may obtain this knowledge. And yet I wonder how many of us have been entirely satisfied with the evolutionary theories presented by science. Have we not felt a gap at the beginning-something unexplained coming before the first hypothesis of the one cell organism? In philosophy we find every system based upon two assumptions: first, that God exists and, secondly, that man exists. Those of us who are Christian Scientists feel that we are indeed fortunate in not having to make these assumptions-for Christian Science gives us truth without a single hypothesis but what can be proved and demonstrated. Every Christian Scientist has experienced God's presence and power in the destruction of sin and of sickness, in the solving of every sort of problem and in spiritual joy and

Lectures to be delivered

By Members of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, U.S.A.

INDIANA—Greenfield: Why Not Theater, South East Street, 8:15 p.m., Sept. 19.

Оню-Dayton (First Church): Memorial Hall, 8 p.m., Sept. 17.

Notice

Notices of lectures to be delivered can be printed in a particular number of the Sentinel when they reach the editorial department twelve days preceding its date of publication.

Testimonies of Healing

Christian Science came to me when I seemed without hope or God in the world. I had repudiated denominational religion when very young, for it seemed to me illogical and unreasonable. As the years went on, confusion, failure, and finally disaster seemed to beset me everywhere. My health became seriously impaired through chronic inflammation of the intestines, and one nervous breakdown after another followed. I searched very thoroughly for health, both in Europe and America, through materia medica, osteopathy, and various other means offered to suffering humanity. Search after search ended in disappointment and finally in despair. Meantime I had studied various religions and philosophies, none of them giving me the slightest satisfaction, but seeming to increase my hopelessness. I was overburdened with the care of a business, which I had entered into to support myself and my only child, delicate from her birth and requiring constant care, and this business was crumbling away.

In this condition I was invited by the head of a great theological seminary, to whom I had expressed my bitterness, to attend an all-day session of sermons from different preachers. I eagerly accepted, hoping to find something to help me. At the end of the day, I was heartsick with disappointment. These men, I clearly saw, were both good and intelligent, but they had nothing I could take hold of. If they had nothing for me, it seemed to me I had nothing more to hope for, but surely "man's extremity is God's opportunity." It was only a few days after this that the textbook of Christian Science was placed in my hands. I knew nothing of Christian Science, and looked at the book more with interest than with the idea of getting any help from it. My interest arose from what I had read of it in an article in a magazine, which purported to give the life of what, even then, seemed to me its remarkable author. I read the first chapter, on "Prayer." What words can convey the amazement, wonder, and trembling hope that thrilled me at every word? I could not grasp all of it, but here at last was a God I could understand and love and-wonder of wonders-prove. Such a sense of thankfulness, of conviction of the truth of the statements I read welled up within me that I arose from my bed instantaneously healed. I at once went downstairs and ate, hungrily and heartily, of all that was on the table, something I had not done for many years. All ill effects from food disappeared and have never recurred. This was in 1907. From that day to this, Christian Science has been all-in-all to me. One by one my problems found a solution that blessed me and all connected with me. An entirely new life opened for me. Anxiety was replaced by surety and I indeed found that, as Mrs. Eddy says on page 265 of Science and Health, "This scientific sense of being, forsaking matter for Spirit, by no means suggests man's absorption into Deity and the loss of his identity, but confers upon man enlarged individuality, a wider sphere of thought and action, a more expansive love, a higher and more permanent peace."

Words fail me to express adequately my thankfulness to God for His gift to mankind—Christian Science—or my gratitude to Mrs. Eddy for her unceasing, loving labor to bring this gift within our comprehension, and I am deeply grateful for that wonderful experience, class instruction, and for membership in The Mother Church, and to the dear friends who have helped me so lovingly and patiently to put away old things and to see the new. I cannot close this

testimony without grateful acknowledgment of the inestimable help received from the periodicals established by divine wisdom, through our Leader. The Sentinel, the Journal, the Herald have been to me a "cloud of witnesses" to help and hearten me through all these years, and the Monitor has ennobled for me every aspect of human life and its activities.

(Mrs.) SARA FULLER KELLOGG, Morgan Hill, Calif.

For some degree of understanding of Christian Science which has come to me, and for the help received, both mental and physical, I am truly grateful. When I took up the study of Science it was not because of any physical ailment. I had an unsatisfied longing to know the truth of being. That there was a supreme, omnipotent power seemed reasonable, but no explanation of the creator or creation had ever satisfied me. Through Mrs. Eddy's wonderful discovery my perception has been entirely transformed, and that all causation is mental is becoming clearer to me daily.

After being in Science for about two months I was healed in a few days of a very severe sore throat. The condition was so aggravated that my voice was practically gone and the pain was intense. When I felt that my healing was complete I attempted to resume smoking, which I had stopped while the throat condition was acute. To my great delight and surprise I found that I was healed of the tobacco habit and that smoking was repulsive to me. My hands were covered with an eruption commonly known as ivy poisoning and I am happy to say that this condition was also overcome very quickly. I most gratefully add my testimony to the many that have gone before, in the hope that my experiences may help others to know the truth. I am very grateful to say that the healings mentioned have been permanent.—Sidney C. Kraus, New York, N. Y.

That Christian Science heals sin, sickness, and death I have had ample proofs in the past four years. I have been beautifully healed of nervous prostration, mental depression, and a dreadful nameless fear that would haunt my every waking moment, also of chronic bowel trouble. All these evils were seemingly due to insomnia from which I had suffered since early childhood. I had tried many doctors both in this country and in Europe, and all any of them was able to do for me was to give me a different kind of drug to produce sleep. For ten years prior to my taking up Science I had relied entirely on drugs, and nearly every night of those ten years I would have to take from one to three drops of some opiate. All this resulted as might have been expected in a mental and physical collapse, from which there seemed to be no more help possible, so I was sent to a hospital to see what could be done for me there. The last two days I was there the physician attending me was taken sick and did not make his usual calls, and in this time I was taking mental note of the progress I had not made, so when the doctor made his next call I asked him what hope there was for me, as I had become more fearful than usual. He then told me that he had done all that he could do for me and knew, too, that I was no better but rather in a more pitiable condition, as I used to have lapses of memory and could not remember clearly who I was or where I was, so he said to me: "If I were you I would go home and try Christian Science. I have had several women patients that went from me to Christian Science and were cured." So arrangements were made for me that day to be taken home.

For several months previous to this, the thought of

Christian Science had come to me almost every day, with a conviction that it would heal me, but I thought I did not want it, as several years ago "Science and Health with Key to the Scriptures" was given to me to read, and from the first line of that book I loved it, but I thought its teaching was too beautiful ever to be lived by a human being; in fact, that it was too good to be true, but the real reason why I did not want this truth was that I was afraid that it would take away my material pleasures, and it seems I had "gods many and lords many" that I did not want to give up, and so all those miserable sick and unhappy years followed, and I was indeed far from my Father's house. So for three days after my return from the hospital, I resisted the truth, and those days were full of suffering inconceivable, for to mortal sense I was losing my mind, and when it seemed that I was slipping into mental darkness I went to the telephone and called a practitioner. She soon came, and treatments were commenced, and never will I forget the beautiful rest and peace she brought with her. When she had gone away I thought to myself, "Surely that woman was one of God's angels."

Before she went away she told me to come to her house the next day for treatment, but I told her that would be impossible as I had not been out alone for a long time because I could not always remember the way home; but she told me God would guide me, and He surely did, for I was at her house the next day at the appointed hour, and this day she told me to come to the next Wednesday evening testimony meeting at the church, and again I told her I could not, as I never went out in public on account of my emaciated appearance; but needless to say I went, and have missed but few church services since that time.

My healing seemed slow at first, but I clung steadfastly to the truth and I cannot now say when the healing came, but I know that now I am perfectly free and like a new being. Six months after taking up treatments I had regained normal weight. That is four years ago, and during this time regeneration and a turning away from material things has been taking place. Many a battle with temptation had to be fought, and like Jacob of old I would struggle till the morning light would break, and when a victory over error had been won I found that there had not been a loss, but that I had gained God's dear peace and more of the Christ-mind. The spiritual awakening that came with this healing, and the untold joy and harmony that have been mine since, mean far more to me than all else. In no words can I express the profound gratitude I feel to God and to our dear Leader for giving Christian Science to a hungry, weary world. I am also grateful to all those who helped me when the day seemed dark, also for the literature, especially the Sentinel, and for membership in a branch church. I strive each day to let my light so shine that I may glorify my Father which is in heaven.

(Mrs.) GERTRUDE McHale, Salt Lake City, Utah.

4

I have delayed my testimony some time, because I felt I wanted to tell of some great healing, but as I read the testimodes of others, in the Journal and Sentinel, I receive so much benefit from them, they are such spiritual food for me, that I wish to tell of some of my own experiences and healings with a desire to help others. My first healing was of constipation in its worst form. I remember saying when I first began to study Christian Science, that if it could cure my bowel trouble it could cure anything, as medicine did not help me any more. This was my first healing, and I was

encouraged right away. The healing of my eyes came next, also sick headaches, backache, and many other ills. Every year I would have a severe cold that would stay with me nearly all winter. I am now able to prevent this, having at hand my remedy, the knowledge of the truth, and have never had a bad cold since coming into Science. So many ills and inharmonious conditions have been prevented that I feel more thankful for this than for any healing, as of course it prevents one having to be healed, and also proves that we put all our trust in God. I'do not feel that I can say enough for Christian Science, it is such a great help. I cannot count my blessings received from it. I hope my testimony will help others as those of others have helped me. I would beg of beginners not to give up Christian Science if it does not help them as soon as they feel that it should. It will if they are patient and wait, because God is very near and God is Love. I love our Leader, Mrs. Eddy, for giving this wonderful help to mankind, and I want to love God above all. I cannot begin to tell all the benefits received, but I am more thankful than words can express for them all.

(Miss) LETITIA KLEIN, Kimball, Neb.

٠

Christian Science is indeed a revelation to me. Each day brings greater blessings and proofs of God's allness. Being a teacher of expression and vocal arts, I have had to overcome such so-called laws of bondage as hoarseness, throat trouble, envy, jealousy, vainglory, arrogance, and false pride. These have been beautifully overcome with divine Science by just knowing I was a true child of God and that being a child of God I could express only good. About four years ago I awakened one morning very hoarse, not able to speak above a whisper and, as I had to sing that night, I knew that the only thing for me to do was to leave it with God, for He gives man strength to do all that is necessary to be done. Though my speaking voice was hoarse even when I went on the stage, I never sang with clearer, purer tones, and have been able to talk naturally ever since.

Every February I seemed to have nervous breakdowns from overwork, but that has all been conquered and my daily life is very smooth and harmonious, for I realize the truth of what Mrs. Eddy says on page 519 of the Christian Science textbook, "God rests in action." For these and many other blessings, too numerous to mention, I am very grateful. I can truly say Christian Science has helped me mentally, physically, financially, and most of all, spiritually.

(Miss) Sarah Marie Kimbrough, Huntsville, Ala.

.

For many benefits received through Christian Science I am very grateful. At one time ptomaine poisoning, accompanied by very distressing conditions, was overcome quickly. A case of foot poisoning which threatened to prevent my walking was healed almost instantaneously with the realization that man's footing is indeed on the rock, Principle. Eczema was healed in a short time. Another person in the same house where I was living had the same physical manifestations, and used material remedies. Two years were required to eradicate the trouble in that case. A burned hand resulting from the explosion of a gas furnace was so quickly relieved of pain that it was used for three hours' work in typewriting in a newspaper office the same night as the accident.

Experiences in automobile driving over desert and isolated mountain roads have proved the protecting power of Christian Science. At one time while going down a steep mountain grade at a rapid pace, the machine skidded half around on a sheet of ice. Although the road was barely wide enough to allow the length of the automobile to turn in it, neither the car nor passengers were injured. On another occasion the automobile had backed into a ditch by the side of the road on a steep grade after the engine had stopped. A member of the party who was not interested in Christian Science said the car could not be driven out of the ditch, and prepared to spend the night on the mountain, many miles from any habitation; but within one hour the machine was extricated unimpaired. Later every member of the party gave credit for this demonstration to Christian Science.—James C. Thomas, Boston, Mass.

4

In the Bible we read, "It is more blessed to give than to receive." "Freely ye have received, freely give." I have received so much help through the study of "Science and Health with Key to the Scriptures" by Mrs. Eddy that I want to share my blessings with others. It is about sixteen years since I first learned of Christian Science, and although my husband was healed of sciatic rheumatism I paid very little attention, but seven years later became suddenly ill with gallstones and was taken to a hospital in Florida. The doctor said I could never get well unless I submitted to an operation. Neither my husband nor I would consent to it so I was sent home. A neighbor lent me a copy of Science and Health. I read it, but although I could not understand much I was finally healed. Later I was able to lay aside glasses, and during the five years since then I have not had to resort to them again, although I use my eyes constantly.

I have had many beautiful demonstrations with our children in overcoming tonsillitis, toothache, sore eyes, influenza, cough, colds, headaches, and many, many times I have been able even with my little understanding of the truth that makes free to disperse the seeming black clouds of error. I shall be satisfied when I get a perfect understanding of the Christ-science as taught and demonstrated by Jesus on the shores of Galilee over nineteen centuries ago, and revived and given to the world in the present century by our revered Leader, Mary Baker Eddy, through Science and Health. The study of the Bible, together with Science and Health, enables one to get the spiritual understanding of the Bible, a blessing which surpasses all that is material.

I am grateful for the privilege of membership in The Mother Church. We have no church here and no Scientists in our little town aside from my own family. We have Sunday school and read the Lesson-Sermons as outlined by the Manual, so far as we can. I am grateful for the literature. We subscribe for The Christian Science Monitor, Sentinel, and Der Herold der Christian Science, and pass them on to others wandering in the wilderness of belief in sin, sickness, and death, and thus sow the seed of Truth, health, and holiness, knowing that God—divine Mind—will give the increase.

(Mrs.) VETA C. KERR, Morris, Tioga County, Pa.

It is nearly two years since I started to study Christian Science. I did not come to it for physical healing, but because I could not find elsewhere the truth for which I was seeking. I have found it abundantly in Christian Science. I have had healings of minor ailments, for which I am very grateful. I am thankful to say I have not had any serious ones, the most severe was an attack of influenza which recently came upon me very suddenly and which I found my understanding of Christian Science was not sufficient to overcome. I asked a friend who is a practitioner to help

me, and in three days all trace of the disease was gone, though I have not suffered so much or felt so ill since I was a child. I am most thankful for Christian Science and to Mrs. Eddy for her book, "Science and Health with Key to the Scriptures." It truly is a key to the Bible and has unlocked it for me. I used to find it impossible to understand, it seemed just words, full of contradictions, but with Mrs. Eddy's interpretation it is full of blessings and promises of good to them that love God and keep His commandments. I am only a beginner in Science and know I have a great deal of study and work to do, and I feel the only way I can really express my love and gratitude to God for revealing the truth to us through Christ Jesus. the Way-shower, and in our day through Mrs. Eddy, the Discoverer and Founder of Christian Science, is by endeavoring to keep to the straight and narrow path and studying to become a true Christian Scientist. I should like to express my gratitude for the loving help given me by Scientists and also to say how much I appreciate, and am grateful for, the literature, especially the Sentinel.—(Miss) ANNE E. Cowie, Lydbury North, Shropshire, England.

Since coming into Christian Science two years ago I have received many blessings. I suffered from nervous exhaustion in one of the worst forms for three years, also from trouble with the ears, which threatened deafness and caused constant earache for the same period of time; but I have been completely healed, after the doctors' saying I would never be well again.

About two years ago I, with my family, was camping about seven miles from the heart of a small city in New York state. The weather was quite cold and my brother was attacked by a cold and neuralgia. The pain continued to grow worse until about one in the morning, when he could no longer bear it. It was impossible to get medical help, in the country at that hour in the morning, so my brother asked me to treat him. I did so, but seemingly without results. Discouragement began to assail me and I said, "I cannot heal him; I have not enough understanding." Instantly the thought came: "Of course you can't heal him, but God can, and is both ready and willing to do so," and he was healed instantly; the pain ceased and in a few moments he slept and did not awaken once during the remainder of the night, and he has not had a return of the trouble since. I am profoundly grateful for Christian Science and for the assurance that "God is a very present help" always and in all ways.

(Miss) REINA LAZAR, New York, N. Y.

It is with the deepest sense of love to God and gratitude to our Leader, Mrs. Eddy, that this testimony is written. In May, 1916, I had a wonderful proof of the power of Christian Science to destroy fear and pain. It was necessary to have five teeth and four roots extracted for future dental work. I called at the dentist's office to make arrangements for extractions. He said, "You had better go to a specialist and take gas, as these teeth will come out very hard." I replied, "I want you to extract them and I will call for absent treatment by a practitioner. I know divine Love is ever present, and no harm can come to me." I thought he was a little fearful for me on account of my age; however, all was in readiness in a little while and it was certainly a most wonderful demonstration of divine Love's ever presence-no fear, no pain, no nervousness. Oh, how I thank God for the Christ, Truth, that makes us free; and we can all enjoy this freedom if we

really trust our Father-Mother God, and seek at all times that Mind which was in Christ Jesus.

In many other ways have I proved the truth of Christian Science. I want to add my appreciation for all of Mrs. Eddy's writings, also for all the literature, which is so spiritual, helpful, and refreshing. I have also "The Life of Mary Baker Eddy" by Sibyl Wilbur, which when read makes us appreciate Mrs. Eddy all the more. I am also happy to state that I am a member of The Mother Church. I am grateful to the many friends who have so lovingly helped me in the journey from materiality to spirituality. (Mrs.) CAROLINE L. WILLIAMS, Chicago, Ill.

4

I have indeed great cause to be thankful for what Christian Science has done and is doing for me since I took up the study seven years ago. Divine Love has met my every need, and I find that no matter what the condition may seem to be, Love will heal it. I have been healed of a very serious stomach trouble, also of throat trouble and a very severe cough which I had had for ten years. This trouble was overcome last winter. I am grateful for the literature, for the services, for all of Mrs. Eddy's writings, and especially for the Hymnal, and I am more than grateful to every one who has helped me to the understanding of this truth which makes us free.

(Mrs.) KATHRYN B. RANKIN, Indianapolis, Ind.

Words cannot express my gratitude, neither could money buy the happiness I now have, since my healing through Christian Science. I had been a sufferer from internal troubles for nine years, having had many doctors of every school known to the profession, and two operations by, to us, the best known surgeon, with only temporary relief.

us, the best known surgeon, with only temporary relief. After the second operation I was told that my bowels would need constant attention, as they were in a very bad condition. For three weeks I had been confined, too weak to be on my feet and really feeling resigned to my fate—that of passing on—when Christian Science was brought to me. I immediately felt this was what I needed and accepted it as one does a spark of light when all seems dark, and my healing was instantaneous. The bowel trouble or adhesion of the bowels was met at once, the other troubles were all met later on, but I shall never forget my first treatment, for I experienced such a wonderful sense of

peace and security. Within a few days I was able to be

downstairs with the family for my meals. I felt stronger, freer, happier than I ever thought to be again.

It has been almost a year since I had my healing in Christian Science. I am able to eat what I want, do all the housework I want to, and I know God is my help in everything. I have had no drugs, pills, or medicine of any kind in this time. God is my only Physician. The Bible has been made clearer by the teaching contained in Mrs. Eddy's beautiful works, which are a constant joy to me. The many healings in our family are a proof that "the Lord God omnipotent reigneth."

MRS. C. H. MARKLEY, York, Pa.

4

I wish to add my testimony to those of others. About sitteen years ago I began to suffer with my stomach and could eat only foods that did not have any acid in them. I kept getting worse all the time, and about eight or nine years ago was so sore I could neither walk nor ride anywhere.

I had a growth in my left shoulder and the doctor said I was full of cancers. I tried doctors and many so-called

remedies, but all in vain. I grew worse and worse every day. In July, 1919, I had become so much worse I could not take anything but dry crackers and cocoa, and could not turn myself over in bed. The doctor told my husband he could do no more for me, and to send for my children and friends. Just about that time a daughter of one of my friends came to see me and asked me why I did not try Christian Science, saying that she had been healed by it. I told her I had an incurable disease. She laughed at me and asked me if I did not know that with God there was not anything incurable, and asked me if I would try Christian Science. I told her I would do anything to get relief. About three nights after taking up Christian Science I awakened with a nervous spell and prayed God to help me. In a little while I went to sleep and rested better than any time since I had been sick. After that I began to recover. I am now doing my own work, and I am well and strong. My heart goes out in gratitude to my dear friends and to Mrs. Eddy.

(Mrs.) Mary Ross, Garrettsville, Ohio.

٠

I do not know how to put into words the inestimable help which Christian Science is to me in my life. Besides having been my only remedy for physical ills for more than thirteen years, it has brought into my experience those wholesome mental qualities which little by little crowd out timidity, fear, worry, self-pity, and grief. It is bringing me peace, trust, fearless reliance on God's adjustment of even the smallest details of each day, and the assurance necessary to go forward. The last great temptation to timidity which presented itself to me was in the form of the fear of taking a teaching position nearly a thousand miles from home, far into the mountains and many miles from a railroad, among absolute strangers. The only straw which kept me above the roaring waves of sickening fear was the knowledge that God had led me to follow that profession, for I had done so in the hope of the better serving Him through the opportunities it would afford to be helpful to many. I had trusted Him for a position and knew I had been divinely led. I remembered the lines in the Christian Science Hymnal (p. 168):-

> Wherever He may guide me, No want shall turn me back,

and I relied on this when changing trains and taking a stage, when delayed in a strange lumber camp over night, and when arriving at my destination at midnight, cold, lonely, and strange, among people of a type so new to me.

It is easy for me, now, to see why God led me to this place and how much I have gained through my year's activity, and trust in Him in every problem presented. This also helps me to trust when I cannot see His reasons. I am so grateful for the health and courage which Christian Science gave me and which alone enabled me to go forward. Though the little mountain town was not blessed with Christian Scientists, and consequently was without a Christian Science church or reading room, I found the library of our Leader's works, which it is my privilege to possess, and the Christian Science periodicals, the very best companions and comforters. I owe the success and pleasure of my work to the knowledge I have gained, through the study of Christian Science, of God's nearness and allness and of my close relation to Him. Therefore my heart is full of gratitude to God for giving to us, through Mrs. Eddy, the wonderful key to the Scriptures, and to her for her life of sacrifice and love for mankind.

(Mrs.) LILLIAN E. DAVIS, Las Plumas, Calif.

Signs of the Times

[Craig S. Thoms, Ph. D., in The Biblical World]

Thousands of our soldier boys lie buried on the hills of France, having freely and proudly given their lives to render a service to humanity. In the world war the very soul of our nation was enlarged by our consciousness of international brotherhood. But in the United States Senate we witnessed the League of Nations opposed for months on an utterly selfish and materialistic basis. There was on the part of its opponents not an utterance of idealism, not a note of altruism, no sense of the responsibility of a strong, virile nation to promote brotherhood in the family of nations, no sense of national obligation to serve, no willingness to sacrifice any selfish material interest for the larger good for which our boys died. Is the time for noble deeds, for brotherly spirit, for sacrificing helpfulness, over because we are no longer in arms? Are we a Christian nation?

[Guy Emerson in "The New Frontier"]

What does labor want? . . . A fair statement of their position would seem to embody the following line of thought: It is not wages and hours which underlie the present restlessness. It is a growing self-consciousness, an increasing desire for a part in the really glorious achievement of America, a wish, possibly only half realized, to be more consciously active and self-reliant participants in the building up of the nearest approach the world has yet seen to a land of human freedom.

[John Galsworthy in The Atlantic Monthly]

The great war was not a thunderbolt from the blue launched at an unoffending mankind: it was a stealing fate carefully nurtured within the bosom of modern civilization; the natural and gradually reached result of a crude competitive system pursued almost to its limits—the climax, in fact, of the individual, political, and national rivalries which have been speeding to this end since the Middle Ages.

[Rev. James E. Freeman, D. D., in The Living Church]

Just now, in a very peculiar sense, the whole Christian church needs to be rendered more democratic, its atmosphere needs to be made more utterly congenial to the people of every class and kind that seek its ministry. Indeed, beyond this, it needs by every means within its power, through pulpit and pew, to make it known to all men that its gates stand open wide to those who seek them and who ask for the refreshment, comfort, and assurance which its teachings afford. Anything that in any wise militates against this spirit of true democracy in the house of God is a menace and must be banned. Blessed will that day be when from every lip shall be heard the words, "I was glad when they said unto me, Let us go into the house of the Lord."

[T. B. Kilpatrick, D. D., in The Constructive Quarterly]

The bitterest criticism of the church turns, not so much on questions of creed or polity, not even upon the cost of its maintenance, but on the lack of sacrificial spirit on the part of its leading representatives. From the days when popes were blamed for their extravagance and pride, to the present hour, when the wealth of its prominent members is hurled at the church in bitter reproach, the real nerve of the criticism is nothing more obscure than the charge of self-ishness. No doubt it is often recklessly and unjustly made. Yet the church cannot afford to make petulant reply. The sacrifice from which it originates, abides as its standard;

and that has not been reached. Nay, in spite of the sacrifice and service of faith which multitudes have rendered, the goal still shines afar. In proportion as the church strives to reach it, will it have power with this generation, which will not otherwise believe in its sincerity.

Announcements

From The Christian Science Publishing Society

New Pamphlets

Advance information will in future be given two weeks before each new pamphlet is placed on sale. This will replace the former system of standing orders.

New Pamphlet in German

There will be placed on sale September 18, 1920, a new German pamphlet entitled Läuterung (Purification) containing the following articles reprinted from *The Christian Science Monitor* with alternate pages in English: "Lusting Against Lust," "The Lust of Money," "The Lust of Power," "Looking Ahead," "Sincerity." Price 5 cents a copy. Reading room discount 20 per cent.

"Rudimental Divine Science" for the Blind In English Braille

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U.S.A.

New Leather Case

The "Large" open leather case, described on Page "e" of the Current Catalogue in the back of The Christian Science Journal, and listed at \$3.50, has been discontinued. In its place there is now available a "Large" open case which holds Bible, Science and Health, Miscellaneous Writings, Unity of Good and Other Writings, Christian Healing and Other Writings, The First Church of Christ, Scientist, and Miscellany, Christ and Christmas, Poems, Hymnal (all in pocket edition), and Quarterly. Price \$5.00. Reading room discount 10 per cent.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U.S.A.

From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to CHARLES E. JARVIS, Clerk, 236 Huntington Avenue, Boston 17, Massachusetts.

From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered. Please advise promptly of any change in name or address.

Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to EDWARD L. RIPLEY, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

Letters of Appreciation

Many letters of appreciation of THE CHRISTIAN SCIENCE MONITOR and other Christian Science activities are constantly being received. These letters express what these activities mean to different individuals in various occupations and pursuits. The favorable comment that has been received on those already published indicates that they are welcome and helpful; therefore others will be published under the above heading. Extracts from such letters follow:

THERE is great need for accurate, satisfying news and it is to be regretted that there is but one daily paper which goes out into all the world with clean, truthful, hopeful, helpful messages, and that is THE CHRISTIAN SCIENCE MONITOR, published in Boston. I greatly enjoy and appreciate the reliable, hence valuable, information I gather from its columns.

I CONSIDER THE CHRISTIAN SCIENCE MONITOR the best newspaper published, and have never missed reading an issue since it was first published. The combined desires of all the evil which the Monitor has uncovered can have no power to overthrow the Monitor through whatever agency they may attempt to work.

FEEL at present that I cannot afford to miss one issue of The Christian Science Monitor. I am taking your paper for its fair dealing with all subjects. I want the real news, and have forsaken the other papers of the daily kind for the reason that they have not the proper support to enable them to be fair. I believe that many editors would give better service if the public would stand back of them, but until they do I feel that it is both a waste of money and time to take their papers and read them.

Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book), single copy \$0.00; twelve or more, each \$5.75. Large Type Edition, designed especially for the use of First Readers. Large type (18-point) on Oxford India Bible paper, bound in leather. Size 8 by 1034 inches. Single copy \$7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

FRENCH TRANSLATION. Alternate pages of English and French. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, \$5.50; six or more, each \$5.25. Orders for the French translation in lots of six or more may include both bindings.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each \$5.50; six or more, each \$5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, French, and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy \$2.25; twelve or more, each, \$200. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; twelve or more, each \$3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy \$5.00; twelve or more, each \$4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 366 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy \$2.25; six or more, each \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; six or more, each \$3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy \$5.00; six or more, each \$4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy \$6.00; six or more, each \$5.50.

Christ and Christmas. An illustrated poem. Cloth, single copy \$3.00; six or more, each \$2.50. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Unity of Good and Other Writings. One volume, containing Unity of Good. Rudimental Divine Science, No and Yes. Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science versus Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy \$1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy \$2.00; six or more, each \$1.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, single copy \$1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy \$1.00; six or more, each 75 cents.

Unity of Good. This book lays the ax at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy \$1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermion written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy \$1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, alias Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point, American Braille, and English Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Rudimental Divine Science and No and Yes. In one volume, French translation, with alternate pages of English vest pocket size. Blue cloth, gray edges, single copy \$1.25; six or more, \$1.10; blue leather, gray edges, single copy \$2.00; six or more, \$1.75 each.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science versus Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy \$1.50; six or more, each \$1.15.

Christian Science versus Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy \$1.50; six or more, each \$1.25. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign. Address orders and make checks payable to

THE LIFE OF MARY BAKER EDDY-By Sibyl Wilbur. Cloth, \$2.50; edition de luxe, \$5.00.

EDITORIAL COMMENTS ON THE LIFE AND WORK OF MARY BAKER EDDY. Paper, 15 cents; cloth, \$1.00. PERSONAL CONTAGION, also WHAT OUR LEADER SAYS—By Mary Baker Eddy. Special pamphlet, 13 cents.

WHAT OUR LEADER SAYS-By Mary Baker Eddy. Vest pocket folder, 5 cents.

REPRINTS (not printed in English). Two-page leaflets, 17 subjects in German, 14 in Swedish, 9 in French. Ten copies, 10 cents.

THE MOTHER CHURCH—By Joseph Armstrong. A history of the building of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass. Illustrated. Cloth, \$1.50.

CHRISTIAN SCIENCE: ITS LEGAL STATUS—By Judge Clifford P. Smith. Paper, 15 cents.

LAW AND WORK for the blind. Printed in New York point, American Braille or English Braille, \$1.00.

SHEFT MUSIC. Poems written by Mary Baker Eddy and used by special permission have been set to music as follows:

"The Mother's Evening Prayer," 75 cents.

"Christ, My Refuge," 75 cents. "Love," 50 cents.

Communion Hymn-"Saw Ye My Saviour?" (Johnson), 50 cents.

"Blest Christmas Morn," 37 cents.

"O'er Waiting Harpstrings of the Mind," 37 cents, "O'er Waiting Harpstrings of the Mind," 37 cents, "Shepherd, Show Me How to Go," 37 cents, "Saw Ye my Saviour?" (Root), 37 cents.

The first three hymns are arranged for high and low voice in the same copy. The last five hymns are published separately in high and low keys. When ordering state key desired.

THE CHRISTIAN SCIENCE HYMNAL. Cloth, \$1.15; half morocco, \$1.40; full morocco, \$4.50; levant, \$5.50; pocket edition, size 454x654, \$3.50.

PHOTOGRAVURE OF MRS. EDDY, printed in three sizes on India paper and mounted on heavy plate paper ready for framing, 8-inch (mount 12x16); \$1; 12-inch (mount 15x20), \$2; 16-inch (mount 21x29), \$3 50.

PICTURE OF THE FIRST CHURCH OF CHRIST, SCIENTIST, IN BOSTON, MASS., AND THE PUBLISHING HOUSE. Artist's proof with remarque on Japanese vellum, size 18x24 inches, 55; on India paper without remarque, \$3.50. Smaller reproduction, size 11x14 inches, on Japanese vellum, \$1.25. Photogravure postcards of the Church Edifice and Publishing House, 5 cents.

BIBLES. 01483x. Clarendon Brevier, heavy-faced, dis-tinct type; Turkey morocco, corresponding in size and binding to pocket edition of Science and Health, \$7.50.

01440x. Brevier, light-faced type, self-pronouncing, Turkey morocco, corresponding in size and binding to pocket edition of Science and Health, \$7.25.

01683x. Large type Bible, 1044x8 inches, bound in Alaska scal. Specially adapted for use of second readers, \$16.50.

The improved index will be added to any Bible listed in our catalogue for an additional charge of 35 cents.

Price List of Bible Concordances and Dictionaries of the English Language supplied on request.

Items such as leather covers for the QUARTERLY, and cases, either closed or open, for books, Sunday school supplies and other accessories, will be found in the current catalogue in The Christian Science Journal.

SEPTEMBER 18, 1920

"Go forward"

JOHN M. DEAN

WE are told in Exodus that when the hosts of Israel were pressed in the rear by the armies of Pharaoh, while their further progress was barred by the Red Sea, the voice of God told Moses to "speak unto the children of Israel, that they go forward." In spite of the seemingly overwhelming obstacles before them this command was obeyed, with the result that the waters were parted, the Israelites passed over on dry ground, and the pursuing Egyptians were overcome because of their eager and vindictive desire to persecute good. This experience should have been a sufficient lesson to those who were so wonderfully preserved, but almost immediately we find them forgetful of their obligations to God and murmuring for the fleshpots of Egypt. Even after manna from heaven was furnished for their daily needs, they still sighed for the old days of sensual gratification and bondage to the things of the flesh.

In the light of metaphysical interpretation, this narrative furnishes a vital lesson to all who are ready to understand it. It emphasizes the truism that the forward look is essential to true progress. Students of Christian Science have turned their backs on the shadowy land of Egypt (materialism), and, as in the case of Lot and his family who escaped the destruction of Sodom, the command is, "Look not behind thee." Mrs. Eddy says in "Science and Health with Key to the Scriptures" (p. 324), "Gladness to leave the false landmarks and joy to see them disappear,—this disposition helps to precipitate the ultimate harmony." Jesus drove home this lesson in the three words, "Remember Lot's wife," and at another time he said, "No man, having put his hand to the plough, and looking back, is fit for the kingdom of God."

Sighing for or brooding over the past is as reprehensible as dreading the future. Past days should be regarded with neither regret nor longing. All the good they held is still with us, for good is immortal. The "good old days" often seem good only from the far-off perspective of the present, and, until better instructed, those who are thus deceived by distance are apt in future days to speak of the present in the same endearing terms. It is legitimate to profit by past experiences, but to dwell in the past not only distorts one's views of the present but invites dire apprehension of the future. If it were really possible for, the best part of a man's life to be behind him, there could then be no possible incentive to endeavor. To do the good at hand is all that is demanded of us, and what men call the future must be cognized only as it unfolds in the present.

What if, to mortal sense, the result of past errors seems to be manifested physically, morally, or in any other way? It is never too late for God to do His perfect work, and when errors are repented of and forsaken in the light of Christian Science all their seeming effects disappear with the removal of the alleged cause. Thus Christian Science, in the degree of its proper reception and application, completely eradicates every seeming result of heredity, or past

environment, or past sins and mistakes. To God there is no such thing as lost opportunity, for the opportunity to serve Him understandingly is ever with us. The pages of every individual's future history are pure and white, and each one writes his own record.

In our demonstration of Christian Science it is necessary to take a definite stand. Christian Scientists have burned the bridges behind them because they have left nothing to which they should wish to return. What attraction can material medicine or scholastic theology or social glamour or material riches offer to one who has taken the forward step? Who that has once lived in the even faintly perceived light of Spirit would care to go back to the darkness of Actually to return to conditions outgrown is as impossible as it is undesirable. As a man advances along the line of spiritual consciousness, he may sometimes be tempted to believe that he has left something worth while behind. He may even have a momentary desire to shirk the responsibilities which attend an enlarged understanding, temporarily forgetful of the fact that this very understanding is his sure defense against every error it may uncover. And so each successive stage of progress unfolds to him more and more the fact that in the process of growth he loses nothing but gains everything.

Right is less than right if it is less than radical, and reason, as well as Scripture, shows clearly that we cannot at the same time serve matter and Spirit. To insure growth our efforts must be constant and consistent. Spasmodic efforts can avail but little. In Science there is no such thing as standing still. There is constant movement either forward or backward. What if we are confronted by the sea of error? If we press on in the name of immutable Principle the waters will part. Suppose there are lions crouching by our path? Fearlessly approaching them we shall find them chained. James tells us that "a double minded man is unstable in all his ways," so to be in the world, yet not of it, is a secret we all must master. Only by doing this can the leaven of Truth be made to transform the entire mass of human thinking. If one has apparently grown beyond the need for certain associations, his duty is more than ever to remain in touch with his fellows in order to help them by precept and example. Moses could never have aided his brethren by keeping out of touch with them, nor could the Israelites have reached the promised land through dependence on the personality of Moses.

The genuine Christian Scientist has not volunteered for a limited time. He has not enlisted merely for the war. He is neither a fair weather nor a foul weather soldier, but is ready for service under all conditions. Prosperity and adversity are alike powerless to make him indifferent or negligent. In storm or shine he remains serene and confident, and above all he does not follow the line of least resistance by drifting with the popular tide. In the words of Paul, he is engaged in the business of "forgetting those things which are behind, and reaching forth unto those things which are before." He knows that a "rich man"—he that is cumbered with material beliefs—

can no more enter heaven than a camel can go through the eye of a needle. And so he gladly leaves all for Christ.

Those who are merely seeking to be "at ease in Zion" have no place in the Christian Science movement. Spiritual activity always proceeds along direct lines and therefore demands direct and positive methods. It is an irresistible force which moves inexorably,—even though to mortal sense it may appear to move slowly,-sweeping out of its path all the chaff of mortal thinking and making a highway whereon all may travel in their passage from the material to the spiritual. Its demonstrations are never forced, for force and human will are no part of Christian Science. Spiritual progress necessarily demands consecration of thought and subordination of human opinions. "Progress," says Mrs. Eddy on page 256 of Science and Health, "takes off human shackles." This means that activity must be spiritualized in every direction; that the true idea of man and the universe must be increasingly perceived, and that the right concept of Church must be brought to light through an understanding of Mrs. Eddy's definition of that institution as "the structure of Truth and Love; whatever rests upon and proceeds from divine Principle" (Science and Health, p. 583). This uplifted ideal is necessary for the unfolding of spiritual creation and must compel the progressive elimination of every human impediment to its operation, Now as of old the command of Spirit is, "Go forward."

Now

EDITH ALLEN WATTS

O'N page 39 of Science and Health Mrs. Eddy writes: "Now," cried the apostle, 'is the accepted time; behold, now is the day of salvation,"—meaning, not that now men must prepare for a future-world salvation, or safety, but that now is the time in which to experience that salvation in spirit and in life. Now is the time for so-called material pains and material pleasures to pass away, for both are unreal, because impossible in Science." Isaiah voices the word of the Lord thus: "In an acceptable time have I heard thee, and in a day of salvation have I helped thee: and I will preserve thee." Now stands for all time and eternity; so all time is the accepted time and is acceptable to God. Therefore, leaning on the infinite willingness of the Father to accept us now, to hear and save us now, let us avail ourselves of the promise in its magnitude, and, as Mrs. Eddy says, "experience that salvation in spirit and in life."

In the Glossary of Science and Health we find the following definition (p. 593): "SALVATION. Life, Truth, and Love understood and demonstrated as supreme over all; sin, sickness, and death destroyed." Now, then, is the day in which Life, Truth, and Love are to be understood and demonstrated as supreme over all, with the inevitable result that sin, sickness, and death are destroyed. Who believes this to the point of practical demonstration? Who is living in this day of now, of salvation? Not for one moment are the earnest and fruitful efforts of the consecrated Christian Scientist disparaged. On the contrary, the deepest gratitude wells from the heart as hourly evidences of healing and saving through Christian Science practice are manifested. But a greater awakening must come as to the possibility of immediate salvation, a clear and clean-cut step in this direction, in order to follow accurately the way of the Master. His ascension was a definite example of salvation-"Life, Truth, and Love understood and demonstrated as supreme over all; sin, sickness, and death destroyed."

While doing the works that are the necessary supplement

to the teachings of Christian Science, let us hasten the day of salvation, in its complete sense, by mentally accepting no intermediate or halfway position in the demonstration of Life as supreme over all. Mrs. Eddy's wisdom directs in these words (Science and Health, p. 39): "To break this earthly spell, mortals must get the true idea and divine Principle of all that really exists and governs the universe harmoniously." One must know that this accepted time, this day of salvation, is not only possible, but is now for whosoever will.

Christians are prone to accept Jesus' demonstration of salvation with complacency, easily giving him first and only place in this field of action, for one of two reasons: either they have connected him with the supernatural, or have totally disassociated their lives from his. His life was divinely natural to the Son of God, not supernatural. His one thought and action was of God. Midnight and early dawn found him consecrated to self-forgetful prayer, and the day's activity witnessed the blessed fruitage of the nightly vigil.

If the living of one to-day is not sufficiently linked with that of the Christ in self-abnegation, an unselfed love, unceasing consecration, and the whole activity attendant upon the procuring of salvation, then one does not comprehend Jesus' lonely agony in winning salvation for himself and others. Such a one has little conception of it as his individual experience. This is why the day of salvation to such a one seems indefinitely deferred. If one is following the Master whole-heartedly, one sees the necessity of overcoming in our lifetime, as did he, and not accepting with easy resignation the probable "second death" before arriving at the "day of salvation." As his consistent follower one must have the Master's viewpoint, the same Mind that caused him to perceive the necessity of so shaping his spiritual course that every thought and act expressed complete consecration to the winning of one definite goal, the overcoming of sin, sickness, and death now. Only thus can one prove that this is the acceptable time, and that the day of salvation is now.

Hazy conjectures must give place to direct action, every thought must converge toward the one idea, and the conservation of energy must be toward the truly successful issue. So long as one delays the accepted time until the "second death," there will be nothing but hazy conjectures, but when one accepts the now, and directs all his energies toward the accomplishment of the divine purpose, he is working as the Master worked, and must surely prove the day of salvation, as did Christ Jesus, to be now.

The Destruction of Sin

RUTHERFORD H. COX

RECENTLY the workhouse in one of the largest cities of the United States was closed. Within a short distance of the workhouse referred to—almost in sight of it—there was established last year a new Christian Science church. The people attending it have increased in numbers until they are now filling the meeting place and a new church edifice is to be built. Sin filled the one building that is now empty; divine Love has filled the other that is overflowing. Is not this a beautiful realization of Truth displacing error?

At a Wednesday evening meeting, in the church referred to, a testimony was given of the healing of sin through the knowledge of divine Love learned in a Christian Science Sunday school. One little boy told another one that it was not loving to beat a dog as he was doing and that he ought to go to a Christian Science Sunday school to learn about co the factorization of the state of the sta

Love. An intoxicated man overheard the conversation. His sin was uncovered. He went to his home thinking of the way he had beaten his wife and children when under the influence of liquor. He told his wife of the remark he had overheard, and said that he would never again return home in the condition in which he had appeared in the past. He and his family went to a Christian Science church and are now ardent workers in the cause. That is another beautiful case of Love displacing sin.

We are all conscious of the disappearing of some sins which, not many years ago, seemed prevalent. The first edition of "Science and Health with Key to the Scriptures" was published by Mary Baker Eddy in 1875. The understanding of the truth made manifest by Christian Science has been growing wonderfully during the past forty-five years—with increasing strength yearly and daily—until now we are beginning to realize that sin is disappearing. Who is there who is not aware that drunkenness is very considerably lessened? Who does not know that many correlated sins connected with drinking are disappearing? Who does not know that workhouses and prisons are being closed for want of tenants? These institutions were just recently thought to be absolutely necessary to house those who gave expression to their belief in the reality of sin.

The municipal court which was busy each day committing many for penal terms at the workhouse now sends the few to whom it metes out civil justice to the county jail. In the city referred to, saloons have disappeared; there are no more flop rooms where liquor-soaked and poverty-stricken victims of sin sleep on hard boards. In their places there now flourish prosperous bakery shops, lunch rooms, and other commercial enterprises. To one who has seen long lines of unfortunates before bars of criminal courts, and long rows of sleeping bodies on flop room floors, this is indeed a cause for rejoicing.

We are all beginning to see clearly that there can be an end of sinning-that sin can be, and is being, destroyed. Every one can now understand that when there is no more drinking there will be no more drunkenness; when there is no more hatred there will be no more murder; and so on through the phases of beliefs called sins. If we stop and think, we can see how possible it is to conceive of there being no more drunkenness, no more envy and jealousy, no more sinning of any kind. It then becomes clear that every one can quit sinning, and that then there will be no more sin. That is, the knowledge of the unreality of sin is becoming generally understandable, and the reality of truth, honesty, sobriety, and love is being recognized. It is seen that as light destroys darkness, so sobriety destroys drunkenness, truth destroys falsehood, honesty destroys dishonesty, and divine Love destroys hate.

In the same way in which we gain an understanding of the overcoming of sin, we shall see how want, woe, and sickness will be conquered and destroyed. As we begin to know the truth declared by Christ Jesus and the law of Spirit demonstrated by him and rediscovered by Mrs. Eddy, we understand clearly that it is possible for hunger to disappear before true sustenance; for ignorance to disappear before true understanding; for sorrow to disappear before happiness, and for sickness to disappear before true health. And we know that the opposites of these statements can never be true. It is impossible to conceive of there being no well, happy, or prosperous people in the world. It is inconceivable to any one who knows anything of the Christ, Truth, that every one in the world should be a drunkard or a thief; or that every one in the world should be hungry,

or that every one in the world should be sick. So it becomes manifest that health, happiness, and righteousness are real and cannot be utterly destroyed; and that sin, sorrow, and sickness are unreal and that there will come a time when they will be known no more. The destruction of sin and sickness is becoming evident. As Mrs. Eddy says in "Science and Health with Key to the Scriptures," on page 472, "Therefore, the only reality of sin, sickness, or death is the awful fact that unrealities seem real to human, erring belief, until God strips off their disguise."

We can all do our part to help in the destruction of sin by substituting, wherever we have an opportunity to do so, the right, the real, for the wrong, the unreal. "Refrain from public controversy; correct the false with the true-then leave the latter to propagate," Mrs. Eddy says in "The First Church of Christ, Scientist, and Miscellany," beginning on page 129. While we rejoice in the bright outlook and in the signs of the morning light that is dawning, we must not be deluded and misled into the mistake of saying "peace, peace; when there is no peace." We must remember that, in reference to his mission to destroy sin, Jesus said, "Think not that I am come to send peace on earth: I came not to send peace, but a sword." Constantly on guard, and watching against the belief of sin in the new forms in which it may appear as it is driven out of its old strongholds, we shall be protected from malicious mental malpractice and, as Mrs. Eddy says (Miscellany, p. 130), "this hidden method of committing crime—socially, physically, and morally—will ere long be unearthed and punished as it deserves."

The Imperishable Glory

ZELOTUS WESLEY COMMERFORD

THE devout student of Christian Science has discovered I that existence is spiritual; that there is in reality but one existence and that existence is God and His idea. He has found not only the truth about God but the truth about man. He is also proving the truth about God and man that has been made clear to his understanding through his study for himself and others. He is demonstrating through his healing work what Jesus manifested and expressed when he said, "Man shall not live by bread alone, but by every word that proceedeth out of the mouth of God," which is the truth of his atonement with the divine Principle of all being. Perfect God and perfect man is all there is. They are coexistent and eternal. As Mrs. Eddy says in "Science and Health with Key to the Scriptures" (p. 465), "Principle and its idea is one, and this one is God, omnipotent, omniscient, and omnipresent Being, and His reflection is man and the universe."

It is evident from the foregoing statement that God is the source of all existence; that anything that is not in accord with the one perfect cause is not real and is simply a false sense of good claiming to be man. Man, being coexistent with God, is as definite and as eternal as God, and is never for an instant separated from God. The discovery of the fact that God is, and that man is the reflection of spiritual existence, becomes to the student of Christian Science not merely a theory but the basis of thought and action. He can no longer serve God and mammon; he must choose good all the time. He has a definite, practical rule of life; his rule is demonstrable. As one presses on in the application of his understanding of what God is and what man is, he is unfolding the imperishable glory in his own moral make-up, for on page 122 of "The First Church of Christ, Scientist, and Miscellany," Mrs. Eddy says, "That glory only is imperishable which is fixed in one's own moral make-up." Now what is

the imperishable glory? First, it is to be conscious of what God is and what is true about man. It is to be awake to the spiritual fact of existence,—that man is coexistent with God, that he is the eternal idea of God, that he is not flesh and blood, that he is not corporeal but is the image and likeness of infinite Mind. The false belief attempts to becloud a man's true vision of himself, hide from his sight the glory that it is his privilege to enjoy; but if he is truly desirous of knowing the truth, the conscious realization of what God and man really are, the light can no more be hid from his experience than the sunshine can be suppressed.

Some years ago the writer had occasion to call on a Christian Science practitioner and during the interview was asked if he believed in God, if he conceived of man as created in the image and likeness of God. These questions were answered in the affirmative. Then the practitioner asked, "Now, if God is, and man is His reflection, what is man's work?" For a moment the writer could not answer, but suddenly the first question and answer of the Westminster Catechism came to him: "What is the chief end of man? The chief end of man is to glorify God and to enjoy him forever." "That is the answer," replied the practitioner. "Man's work is to glorify God. You do not need a position -you have one; you have the greatest work to do that any man ever had; you have but to think rightly about God and yourself and that right mental activity will supply your needs." To be conscious of what one's work is and of who man is, and what God is, is the imperishable glory.

Second, the imperishable glory is to prove by word and deed that one is conscious of the truth about man. It is to demonstrate the spiritual facts of being, by healing the sick and reforming the sinner. It is to show forth the understanding of God as cause and man as the effect of cause; and as one grows in the conscious understanding of man as God's reflection, one shines as a candle lighted on a candlestick because one is proving the truth about man. To know what man is, and to prove that we know, is the imperishable glory.

"Where is the place of understanding?"

WHEN one begins to realize that the word substance means infinitely more than has ever been defined in the lexicons of mortal mind, that its significance must be fathomed in order to find its full valuation, and that the comprehension of it brings continuous blessings; then the inquirer turns gladly to that inspired book that is given to the world, "Science and Health with Key to the Scriptures" by Mary Baker Eddy, to study its deep import; for the illusive and perishable manifestation of what is supposed to be substance as seen by humanity to-day offers small satisfaction to those who seem to know mostly of its lack. To such, and in fact to all, this book explains substance and the means of acquiring so valuable a treasure. On page 468 is found a concise definition of the word: "Substance is that which is eternal and incapable of discord and decay." This explanation is so different from that which even professors of political economy could give with all their erudition, that study must begin on a new course in order to apprehend it.

The argument may perhaps present itself that this is a spiritual and Scriptural description but wholly impracticable for everyday necessities; but such reasoning cannot hold in face of facts. The world is weary of opinions; it cries out for proofs, and that without waste of words. To the general trend of thought, substance is greatly to be desired, for it represents, according to its quantity, both comfort and pros-

perity; but many also believe that it is confined to the favored few upon whom fortune has smiled. Our highest teacher and demonstrator of an applicable, operative law, Christ Jesus, gauged these two qualities by a totally different measurement, albeit his life work proved that he had solved the secret of supply as he had likewise interpreted the whole mystery of life. By many and clearly defined parables he explained to his disciples where and how their quest should be directed, and his "mighty works" gave indisputable proof that his understanding was infinitely beyond that of any earthly instructor. This substance of which he spoke and which he could use on the instant of his need was spiritual, it is true, and for that very reason it was not speculative nor chimerical. His public undoubtedly felt, as do many of the present day, that the abundance and contentment of which poets have sung and philosophers have dreamed were so utterly transcendental that they could only be enjoyed by those who, having reached a certain attitude of selfforgetfulness, could be able to satisfy their better nature by prophecies which even they knew could not imply present realization. As for the struggle of the great mass of mankind through all ages for this attainment, the results have appeared more often in disappointment than success.

Christ Jesus, who was not a dreamer, a Stoic, nor a materialist, used on one occasion the simile of a treasure hid in a field, to teach a lesson of the kingdom of heaven or substance, which, he said, "when a man hath found, he hideth, and for joy thereof goeth and selleth all that he hath, and buyeth that field." He urged upon his hearers who had ears to hear, that to abandon their previous method of strain and competition and human will and to turn unreservedly to the divine Mind for counsel would be of immediate value to them, and that earnestly and continuously to prove this Mind as omnipresent demonstrates substance of the most genuine and enduring description.

Notice to what instant demonstration he applied this lesson, for he did not require of his students a blind faith with only hope of reward at some indefinite future. The record goes on to relate in the following chapter, that when he met with the hungry thousands who had been listening to him, he could give them unfaltering evidence of the truth of his statements, that no one could refute, for he fed them all and there were basketfuls left over. Here was no waste of words, for it was spiritual substance, made manifest to their understanding. Not in the least did it represent the currency of the period, but it was of vastly more direct worth, as his disciple Philip showed when he said, "Two hundred pennyworth of bread is not sufficient for them, that every one of them may take a little." Also this substance was found by completely reversing all trust in financial accumulation. It was the gospel of the Science of being, the gift to all men for all time, which Christ Jesus offered with outstretched hands, while he told them that all things were delivered unto him of his Father. "Learn of me," he cried. This same teaching is presented us to-day, for Christian Science in the spirit of Christ calls, Learn of me. Mrs. Eddy says on page 559 of Science and Health: "Take divine Science. Read this book from beginning to end. Study it, ponder it." All through its pages logic, reason, explanation offer a clear and straightforward chart to guide the traveler to this treasure house of thoughts, divine Mind, where true substance is found. Selfish purposes can never grasp it; its call is to those only who are ready and willing to receive in humility its instruction; and thus unfolds the glorious revelation that the place of understanding is found in Christian Science. The student can start at once in confidence to

put his learning to immediate service and test its availability. A complete revolution has taken place in his whole outlook, which is not the turning of fortune's wheel but is the obliteration of the counterfeit man with his so-called fears, needs, and desires, and he sees man in his real nature like Truth and Love. By reading in our periodicals the many authentic testimonies that gratitude sends forth, he can undertake this all-inclusive study in full assurance that proofs of good will come to him in greater abundance as he wipes out the mistakes of old-time education and whole-heartedly commits himself to this heavenly teaching, and he realizes that at last he has found the answer to Job's query, "Where shall wisdom be found? and where is the place of understanding?"

"It is truth"

FRANK A. UPDEGRAFF

To those desiring to progress in Christian Science it may I be said that no more helpful course can be pursued than a faithful, systematic, and prayerful study of The Christian Science Quarterly Bible Lessons. The Bible contains the word of Truth that makes man free. But a searcher for the truth who is uninstructed in Christian Science and without the light of spiritual understanding finds himself groping in darkness at the portal of salvation. "Science and Health with Key to the Scriptures" by Mrs. Eddy opens the door, revealing to mortals the light of Truth which casts out the sense of darkness and fear that seems to separate man, made in God's likeness, from the presence of his Father, wherein is eternal Life.

The Christian Science Quarterly Bible Lessons, as the title page explains, comprise "selected references from the Bible with correlative passages from the Christian Science textbook." In the "Explanatory Note" which follows, we read further: "The canonical writings, together with the word of our textbook, corroborating and explaining the Bible texts in their spiritual import and application to all ages, past, present, and future, constitute a sermon undivorced from truth, uncontaminated and unfettered by human hypotheses, and divinely authorized." That these Lesson-Sermons are divinely authorized is proved by the healing influence, both spiritual and physical, experienced by every one who, obedient to the purpose of Mrs. Eddy, the Discoverer and Founder of Christian Science, devotes a portion of each day to their study, as well as by those who with open heart listen to the reading of the Lesson from the desk on Sunday, uniting their own right reasoning with the word of Truth as it is voiced by the Readers; that is to say, who bear witness. In the words of Isaiah: "Let them hear, and say, it is truth."

Not only is one who studies the Lesson-Sermon from day to day and one who listens to the reading on Sunday the recipient of blessings beyond the apprehension of mortals, but all mankind is thereby benefited. Thus one has a part in the saving of the world from disease, sin, and death. For, as our Leader says, on page 559 of the textbook: "The 'still, small voice' of scientific thought reaches over continent and ocean to the globe's remotest bound. The inaudible voice of Truth is, to the human mind, 'as when a lion roareth.' It is heard in the desert and in dark places of fear. It arouses the 'seven thunders' of evil, and stirs their latent forces to utter the full diapason of secret tones. Then is the power of Truth demonstrated,-made manifest in the destruction of error."

When one in Science contemplates the irresistible spiritual force of the children of Israel as they encompassed

the city of Jericho and how, as they all shouted as of one voice the wall of the city "fell down flat;" or, as Gideon with his band of three hundred men surrounded the camp of Midian and blew their trumpets and shouted, "The sword of the Lord, and of Gideon," it becomes apparent that it was not the tramp, tramp of the hosts of Israel, the blare of the trumpets, nor the shouting that brought about the destruction of the seemingly insurmountable obstruction in the one case, nor caused the host of Midian to flee in the other, as "they [Gideon and his band] stood every man in his place."

A more remarkable demonstration of the power of righteous thinking and unity of testimony is related in the second chapter of Acts, wherein is described how some of the disciples, about one hundred and twenty in number, on the day of Pentecost, "were all with one accord in one place,"where they had continued "with one accord in prayer and supplication,"-"and there appeared unto them cloven tongues like as of fire, and it sat upon each of them. And they were all filled with the Holy Ghost, and began to speak with other tongues, as the Spirit gave them utterance." There were devout men there from all over the then known world who, being unfamiliar with the Galilean tongue in which the disciples spoke, heard in their own tongue "the wonderful works of God"-"and the same day there were added unto them about three thousand souls."

Through the teaching and operation of Christian Science the world is being healed and is to-day more awake than ever before to the power of spiritually right reasoning. That the world is awakening to this still, small voice of Truth is apparent to those having eyes to see and ears to hear, in the chemicalization through which it is passing, as was foreseen by Mrs. Eddy and described by her on page 96 of Science and Health and elsewhere in her writings.

That it is being healed, one may find abundant evidence by attending a Wednesday evening meeting in any one of the Christian Science churches or societies to be found in almost every section of the globe, and listening to the testimonies of those who have experienced the healing influence of Christian Science in their lives; or by reading the testimonies that appear in the Christian Science periodicals published by The Christian Science Publishing Society.

That this consummation is being brought about by the understanding of Principle must be apparent to those who are keeping abreast of the times. Also, be it known that encouragement of the study of the Lesson-Sermons is no mere form of propaganda or phase of mental suggestion or mesmerism, for these Lessons are the voice of Truth. "mighty through God to the pulling down of strong holds." "Could ye not watch with me one hour?"

[Written for the Sentinel]

"What hast thou in the house?"

MABEL GORDON-INGLIS

WHAT hast thou in the house?" Dear Lord, I seek in vain; All seems so poor and mean, All looks so sparse and lean, For fear was always seen Within my house.

"What hast thou in the house?" Dear Lord, I look again; Thy likeness is not mean, Fear never came between, For boundless Love has been Within Thy house.

Selected Articles

[" 'Be ye therefore perfect' "—The Christian Science Monitor, Boston, U. S. A., April 5, 1920]

Christians are not Christians simply because they believe the Bible to be true. They are Christians only as they realize for themselves the truth contained in the Bible. It may even be said that one is not actually a Christian until he realizes that the Bible is simply corroboratory evidence of what has been revealed to himself. This by no means belittles the Bible. Quite the reverse; it actually establishes it as the inspired and holy work that it is, one universally reverenced by thinking people.

Of course the vision of Truth which comes to an individual and thereafter justifies his claim to be called a Christian, was first presented to him in the Bible record of other men who had received the same revelation, but the mere presence of the record in the Bible does not make it true. It is in the Bible because it is true and not true because it is in the Bible. These Biblical narratives are presentations to the human consciousness of metaphysical truth through the medium of the written word. Now a word is but the invitation to entertain a definite idea. This invitation may be addressed to the human mind through the medium of sound or through the organs of sight, and we speak of it as either the spoken or the written word but the actual process in either case is wholly spiritual, for the obvious reason that idea can originate only in Mind,-in fact, is the action of Mind. So the only way in which true idea can be entertained or presented is through a spiritual process. What is ordinarily termed a conversation between persons, or an exchange of true ideas between a person and a book, is of course Mind being expressed, or if we call it the awareness of ideas we have said the same thing precisely. Obviously neither party to a conversation or to an exchange of right ideas-and there are in fact no others—creates the idea; he merely acknowledges it and by some token understood by all directs attention thereto.

Everybody concedes this in the realm of mathematics, which is the most nearly metaphysical of all human mental processes. No one believes himself to be the originator of an arithmetical fact. Even the most abstruse mathematical reasoning is seen to be merely consistent acknowledgment of what already exists and needs only to be apprehended, not something to be created by the mental effort of the individual. A person reciting the multiplication table, for instance, is not creating ideas; he is merely a witness to them. Nor is a person discoursing upon the beauties of a sunset creating ideas; he is being a witness to their existence. Now suppose, for a moment, that the multiplication table were being incorrectly recited; it would still be the effort to present mathematical ideas, but the statement of them would be erroneous. On page 277 of "Science and Health with Key to the Scriptures," Mrs. Eddy says, "Matter is an error of statement." May we not rightfully conclude that it is the erroneous statement about a sunset that makes it appear to be matter? Is it not obviously an erroneous statement to say that it has an origin in some power other than the one infinite cause, God? But never could there be the justifiable conclusion that there was no actual phenomenon of which the erroneous concept is the counterfeit! As well say that there is no multiplication table because it has been mistakenly recited! On page 87 of "Miscellaneous Writings," Mrs. Eddy is very explicit in this regard. She says: "To take all earth's beauty into one gulp of vacuity and label beauty nothing, is ignorantly to caricature God's creation, which is unjust to

human sense and to the divine realism. In our immature sense of spiritual things, let us say of the beauties of the sensuous universe: 'I love your promise; and shall know, some time, the spiritual reality and substance of form, light, and color, of what I now through you discern dimly; and knowing this, I shall be satisfied.'"

This is exactly what John is saying in his first general epistle in the passage read at the close of every Sunday service in Christian Science churches, "Beloved, now are we the sons of God, and it doth not yet appear what we shall be: but we know that, when he shall appear, we shall be like him; for we shall see him as he is." This is sometimes read with such emphasis on the word "shall" as to suggest that we shall at some time be something different from what we are at present, a meaning that cannot be intended by the writer. Emphasis properly belongs upon the "be," making the passage read, "and it doth not yet appear what we shall bc," that is to say, what, exactly, we shall be like, but "we know that when he shall appear we shall be like him." That this is the true meaning follows from God's statement that He made man in His own image and likeness.

Of course man is a synonym of "the created," "the creation," "the universe," which must include multiplication tables and sunsets as well as all phenomena, for as Mrs. Eddy avers on page 26 of "Miscellaneous Writings," "The only logical conclusion is that all is Mind and its manifestation, from the rolling of worlds, in the most subtle ether, to a potato-patch." Man will appear in his true likeness when he "purifieth himself, even as he is pure." Here, too, the emphasis properly belongs on the word "is," for is it not self-evident that unless man is already pure he could not of himself change his own nature, unless he were endowed with a power superior to that power which first formed him? When Christ Jesus, that master logician, commanded that man should be perfect even as his Father in heaven is perfect he was not setting up a task impossible of accomplishment, nor, as is sometimes imagined, was he admonishing us to attempt a wholesale reformation of ourselves. On the contrary he was emphasizing the necessity of being pure or perfect in logic, a perfection that never allows a statement about the effect that is untrue of the cause. Man, the effect, is perfect; and acknowledging it, is glorifying God, the one and only cause. This is being a Christian.

[Joseph Coffer in Frederick (Okla.) Leader]

The difference existing between so-called orthodox religion and Christian Science is easily understood. One attempts to interpret Scripture from both spiritual and material bases, while Christian Science squares everything from the spiritual basis only. Our critic, using an excerpt from "Science and Health with Key to the Scriptures," edition of 1902, takes exception to Mrs. Eddy's declaration that "man is incapable of sin" (p. 475). This, like all else that he has said, is unwarranted. Mrs. Eddy had reference, as every Christian Scientist knows, to the spiritual man, the real image of God, that must necessarily reflect God, and therefore cannot sin. The revivalist's apparent acceptance of the statement that the "soul that sinneth, it shall die," if taken to mean that the spiritual, the divine man, perishes, does away not only with the doctrine of future punishment but also with the doctrine of immortality.

Christian Science lays great emphasis on the Bible teaching that "God is light." Because God is omnipresent, we are always in the light and at no time deviating from the inspired word of the Bible. To believe in God as a person, in the ordinary sense of the word, is to limit His power, cir-

The Christian

and a personal devil has been the bane of Christianity, in

which fable and superstition have flourished throughout the

ages. These false beliefs are being rapidly cast aside as

Science God is the God of the Bible; and Mrs. Eddy, in

Science and Health (p. 587), in a definition says: God is

"the great I AM; the all-knowing, all-seeing, all-acting, all-

wise, all-loving, and eternal; Principle; Mind; Soul; Spirit;

Life; Truth; Love; all substance; intelligence." And on

page 332, in referring to Jesus, she says: "Jesus demon-

strated Christ; he proved that Christ is the divine idea of

God-the Holy Ghost, or Comforter, revealing the divine

Principle, Love, and leading into all truth . . . Jesus was

the son of a virgin;" and on page 333 she says further: "Jesus

was a human name, which belonged to him in common with

other Hebrew boys and men, for it is identical with the name

Joshua, the renowned Hebrew leader. On the other hand.

Christ is not a name so much as the divine title of Jesus. Christ expresses God's spiritual, eternal nature. The name

is synonymous with Messiah, and alludes to the spirituality

which is taught, illustrated, and demonstrated in the life of which Christ Jesus was the embodiment. The proper name

of our Master in the Greek was Jesus the Christ; but Christ

The Bible record clearly shows that Jesus did not claim

to be God. On the contrary he iterated and reiterated the

fact that he was not God but the "Son of God." He con-

stantly admonished his disciples to desist from personal

worship, saying, "The Father that dwelleth in me, he doeth

the works," and, "I can of mine own self do nothing: as I

hear, I judge: and my judgment is just; because I seek not

Christian Science is a religion of love, self-immolation,

and prayerful solicitude for the regeneration of all mankind.

The appeal that Christian Science makes is that the world

may grow into a complete spiritual understanding of true

prayer. The vision of the Christ that brought about the

conversion of Paul while engaged in the destruction of those

who would serve God, is applicable to-day in reconciling

seeming differences in religion. A charitable attitude re-

veals the persecutor and persecuted standing on common

De: 72

me: E

The Telegram reports a sermon, one of a series delivered to Superior by a speaker who discusses "Spiritual versus

Mental Healing," in which some statements are made regarding Christian Science which indicate a great misappre-

hension of that very vital subject. It is a well-known fact that no one really opposes Chris-

ly, the Discoverer and Founder of Christian Science,

in "Science and Health with Key to the Scriptures" 319 and 241): "The divine Science taught in the originguage of the Bible came through inspiration, and

inspiration to be understood. Hence the misappreof the spiritual meaning of the Bible, and the mis-

who only wrote down what an inspired teacher had

tation of the Word in some instances by uninspired

[49]

said." "Take away the spiritual signification of Scripture, and that compilation can do no more for mortals than can moonbeams to melt a river of ice."

The speaker's assertion that Christian Scientists say Jesus was not God is true, and we need no other authority for that statement than the Master's own words when he rebuked the young ruler and said, "Why callest thou me good? there is none good but one, that is, God." Christian Science teaches that there is but one God and Father of all, as taught in the First Commandment, and does not accept the theory that Christ Jesus was God, but accepts his own statement that he is the Son of God. Paul says, "There is one God, and one mediator between God and men, the man Christ Jesus." Christian Science reconciles reason and revelation.

[Samuel J. Macdonald in Newark (N. J.) News]

Our East Orange friend really makes only two points clear: First, that Christian Science differs from Methodism, and, second, that he has failed to understand what Christian Science teaches; but neither of these justifies his assault upon Christian Science and its honored Discoverer and Founder, Mary Baker Eddy. So far as his attack upon Mrs. Eddy is concerned it is sufficient to refer to "The Life of Mary Baker Eddy" by Sibyl Wilbur, which may be procured in any free public library. The author of this biography made an independent, thorough research into original documents and records, after which she wrote the facts concerning Mrs. Eddy's life and works fully and fairly. I shall not debate with our friend the respective merits of Methodist and Christian Science theology-newspaper columns are narrow and space is precious in the editorial eye. Let me say, however, that the mere fact that our respective religions differ, though never so widely, does not justify either of us in assailing the faith of the other. On the contrary, let us rather say, as Abram said to Lot, "Let there be no strife, I pray thee, between me and thee, and between my herdmen and thy herdmen; for we be brethren."

I should like, in conclusion, to remind my friend of one thing which apparently he has overlooked. He objects to Mrs. Eddy's use of the name "Principle," as applied to God, but evidently has forgotten that God is referred to in the Bible more than a score of times as a rock. The apostle John says, "God is light," and the apostle James calls Him "Father of lights, with whom is no variableness, neither shadow of turning." All these conceptions of God are summed up in the one word "Principle," which thus has the fullest Scriptural authority.

[Written for the Sentinel] A Well of Water

MARY LLOYD MC CONNEL

SOME poet long ago has likened life Unto a saddened soul forever "Dipping buckets into empty wells And growing old with drawing nothing up." Let not such deadening creed be mine! But rather may I prove that Life itself A crystal fountain is, forever Yielding up its waters sweet, In draughts so deep our human Hearts too shallow seem to plumb Its depths; yet even with our narrow cup We lift a sparkling tide unto Our thirsty lips-and drinking Thus, are satisfied!

Leadership

THE world has frequently been told, or perhaps it would be more accurate to say that it is perpetually assuring itself, that what it needs is real leadership. So far as the statement goes, it is a truism. The world, that is to say, can stand everything that is real. At the same time before a leader can be born it is necessary that there should be something to lead. Therefore it is a logical conclusion that real leadership demands, as a primary condition, an appreciation of such leadership. The Romans of the fifth century who quarreled among themselves, and lent themselves to every extremity of vice, while the Goths and the Vandals were, so to speak, at their very gates, were, by reason of their own conduct, incapable of appreciating real leadership. They deserved what they got, and what they were predestined to get, at the hands of sensual boys and upstart soldiers. The story of Rome is the story of the whole world. Given a degraded type of public opinion, and leaders of a like type will be called upon to rule over it. The same fountain can never bring forth sweet water and bitter. The people who had Commodus for a Cæsar deserved, precisely, a Honorius.

The simple truth is that the sweet fountain sends forth sweet water alone. In other words, that which is necessary to produce a true leader is national character of a high type. It is character which makes the nation, like the individual, what it is; and leadership is as bound to reflect the character of its following, as the water from a fountain to be sweet or bitter. This is much more exactly true than history, superficially read, might seem to justify. Nations have by no means necessarily found their leaders in their kings: often their leaders have seemed better or worse than themselves. But it took a willingness to worship the "Little Father" to produce a czar, whether he were a Peter, or an Anne, just as the Anglo-Saxon devotion to freedom found its expression in a Washington or a Lincoln.

Now character is bred upon ideals. "The sculptor," Mrs. Eddy writes, on page 248 of Science and Health, "turns from the marble to his model in order to perfect his conception. We are all sculptors, working at various forms, moulding and chiseling thought. What is the model before mortal mind?" There is the alpha and omega of the whole business. It is thinking that makes the individual, just as it is the individuals who make the nation. A nation's leaders, therefore, will be evolved out of its thinking. And whether success or whether failure attends the national effort, will depend not so much on the leader as on his followers, in short, on the character of the nation.

The models, then, of the people of the United States who called a Washington or a Lincoln to their service, were very different from those of the people of Russia, over whom a Peter or an Anne was born to rule. The result is manifest to everybody in the conditions of society to-day. Both nations have grown at a tremendous pace, the one by con-

quest of neighboring peoples, the other by conquest of itself. But let the rôles ever be reversed, and what people are wont to call the destinies of the nation will be reversed with them. As a matter of fact the destiny of a nation is the end to which it is predestined, as the result of following its own ideals. If its ideals should find expression in the worship of personality, then a czar becomes inevitable; but if its ideals take the shape of the repudiation of unjust oppression, as did those of the Pilgrim fathers, as did those of the army of Washington, or the supporters of Lincoln, then it is clear that national character is being molded in the highest type of citizenship the age permits of, and a great and virile nationality must result from the process.

The history of the world points to the fact that this reliance upon great models has not usually been adhered to. It was because of this that Greece fell, and because of this that the Roman Empire crumbled. It was because of this that Venice sank to the level portrayed in the curse of Marino Falieri, and because of this that the sun learned to set over the dominions of the kings of Spain. Now the way to avoid the fate of Greece and Rome, of Venice and Spain, is for a nation to be obedient to Principle. As Mrs. Eddy writes of the individual, on the page of Science and Health just quoted from, "We must form perfect models in thought and look at them continually, or we shall never carve them out in grand and noble lives." The secret of success is so simple that it is never a secret, but the difficulty of living up to it was made perfectly clear by Paul when he wrote, "For the good that I would I do not: but the evil which I would not, that I do." Even to the man who desires to deny the senses, Principle is a terrific model to have set before him. Yet in his obedience to Principle lies his only hope of demonstrating the powerlessness of evil, and so becoming equal to, and appreciative of, real leadership.

Ultimately, of course, the only leader is Principle. Everybody, sooner or later, will be forced to realize this for himself. No man can accept the opinion of another without being guilty of idolatry. The real leader points the way to obedience, not to himself but to Principle; whilst the loyal follower follows his leader only so far as he realizes that that leader has been himself obedient to Principle. Mrs. Eddy made this perfectly clear, on page 34 of the Message to The Mother Church for 1901: "Finally, brethren, wait patiently on God; return blessing for cursing; be not overcome of evil, but overcome evil with good; be steadfast, abide and abound in faith, understanding, and good works; study the Bible and the textbook of our denomination; obey strictly the laws that be, and follow your Leader only so far as she follows Christ." Great leadership, then, is one and the same thing as that true appreciation of it which produces loyal following. Both are identical, an understanding of Principle; and the very moment that a leader imagines that there is anything in himself to follow, or a follower mistakes a person for Principle, that moment the blind leads the blind, and both fall into the ditch.

Thus, in the question of leadership, as of everything else, the problem resolves itself into the one problem of obedience to Principle. The fact of the unity of good must inevitably make this the case. Every legitimate effort has this question for its touchstone: Is the effort in accordance with Principle? But in order to answer the question accurately, a metaphysical understanding of Principle must first be gained. Otherwise the solution will become impossible, because the man who seeks it will be unable to judge righteous judgment, that is, to separate error from Principle.

Credible Evidence

THE world at large demands not only well reasoned explanations of the Principle of Christian Science but authentic testimony as to the practical efficacy of this Principle. In other words, each one considering Christian Science in any way is entitled to understand its revelation of both cause and effect. That Principle is but a name for the true God, infinite Mind, needs to be clear to all. That practice is the necessary activity of the divine Mind, manifest as the whole living of the true man, it is equally important to prove. Principle and practice are interdependent. The tree must be known by its fruit. The actual relationship between genuine evidence and the Principle to which it testifies must be demonstrated. Mere human appearances alone are never reliable. The true phenomenon can always be shown to proceed from eternal Principle. Only as this is so is any evidence credible.

If a man five hundred years ago recovered from a disease after submitting to the ordinary medical treatment of the time, the mere fact of his recovery was not proof of the value of the medical method. Had the drug that was administered been really efficacious, it would still have the same therapeutic value. Any result that seems to come about through a fallacious means is but a temporary belief. As Mrs. Eddy says on page 155 of Science and Health, "When the sick recover by the use of drugs, it is the law of a general belief, culminating in individual faith, which heals; and according to this faith will the effect be." As the general belief changes, the seeming effect of various drugs or serums changes. That is why the discarded medicines and systems of treatment have been discarded. Their use rested entirely on a believed theory and not on Principle. "Even when you take away the individual confidence in the drug," Mrs. Eddy continues, "you have not yet divorced the drug from the general faith. The chemist, the botanist, the druggist, the doctor, and the nurse equip the medicine with their faith, and the beliefs which are in the majority rule. When the general belief endorses the inanimate drug as doing this or that, individual dissent or faith, unless it rests on Science, is but a belief held by a minority, and such a belief is governed by the majority." All such mere belief, no matter how general it may have ever seemed, must necessarily subside before the understanding and practice of absolute Principle.

The evidence of Christian Science is not just of evanescent results. The real result is always entirely coordinate with its divine cause. It can be thoroughly demonstrated that the veritable healing is the only logical result of infinite intelligence. Thus both the tree and its fruit must be provably good, or there is no actual goodness. The student of Christian Science, as he goes forward, finds not only that he is healed but that he is comprehending more and more why healing is inevitable in the divine order. One turning to Christian Science must look conscientiously to Principle and its idea as the real cause and effect. The harmonious activity of divine intelligence is the true demonstration, and it is altogether spiritual and apart from any material sense of things. Before it, the very belief in materiality inevitably disappears.

Testimony which shows the vanishing of supposed mortal limitations before the infinity of the divine Mind and its idea is essentially dignified. The statement of it need not, of course, be mingled with metaphysical discussion. As the basis for every statement, however, whether or not this basis be phrased in so many words, there must be the metaphysi-

cal fact that Principle and its wholly spiritual idea is the only reality. Every genuine healing through Christian Science is founded on this fact. That is why the true healing is complete and permanent. Evidence of healing in Christian Science is, therefore, testimony to the omnipotence of Principle as available in all circumstances. This is what differentiates it forever from so-called testimonials of any other sort, which deal with material ways and means. The healing which can never be reversed is the manifestation of the divine Mind. Each one is entitled to know and experience the fullness of such healing, in proportion as he seeks not merely seeming human results but omniactive Principle expressed as spiritually satisfactory effect. The right kind of seeking is, thus, not a desire for the loaves and the fishes but a complete turning to Principle and its effect as allsufficient. Healing which comes about through such turning in the right direction is dignified as no human sense of things could ever be.

Those who understand this are never reluctant to give the reason for their reliance on the divine Mind. They know that correct testimony is continuously essential. They are not afraid, moreover, that they will offer any supposedly wrong sort of testimony, for they are consciously rejoicing in the unfoldment of demonstrable cause and effect. Knowing that the real evidence is the evidence of Principle, which can never be denied, one is bound to be fearless. The expression of Principle is fully protected by Principle. On page 380 of Science and Health Mrs. Eddy says: "Many years ago the author made a spiritual discovery, the scientific evidence of which has accumulated to prove that the divine Mind produces in man health, harmony, and immortality. Gradually this evidence will gather momentum and clearness, until it reaches its culmination of scientific statement and proof." It is the privilege of each one who is interested in Christian Science to share in the accumulation of all this evidence, both in giving and in receiving. Giving expression to what actually is of Principle is boundlessly good. The calm joy of it is a guarantee of ceaseless progress. GUSTAVUS S. PAINE.

Among the Churches

Current Notes

Washington, D. C.—Second Church of Christ, Scientist, has just purchased the property at the southeast corner of First and C Streets, Northeast, opposite the Senate Office Building, preparatory to erecting a temple for the church, similar to that of First Church at Eighteenth Street and Columbia Road. The property was purchased for approximately \$53,000. The total cost of the structure and ground will aggregate nearly \$200,000. Work on razing the two houses on the lots will begin as soon as possible. The temple will seat one thousand persons in the church room and five hundred in the Sunday school room. The lots have a frontage of 151 feet on C Street and 91 feet on First Street. Second Church is now located in the Northeast Masonic Temple.—Washington Star.

Admission to Membership in The Mother Church

The next admission of candidates will take place on November 5, 1920, as provided in Article XIII, Section 2, of the By-laws of The Mother Church. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before Friday, October 22, 1920. Consideration of any applications received after that date will be deferred until the June 3, 1921, admission.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to June 5, 1920, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

CHARLES E. JARVIS, Clerk,

236 Huntington Avenue, Back Bay, Boston 17, Mass.

The Lectures

WHITE PLAINS, N. Y. (First Church).—Lecturer introduced by Mrs. Eva F. Hovey, who said in part:—

Every one here in one way or another is interested in the subject of peace. We all would like to see some oil of understanding poured upon the troubled waters of unrest so that the world would settle down to a normal, healthful activity, the outcome of which would be rest and prosperity for one and all. Webster gives, as one meaning for peace, "Harmony between persons or nations." It will be admitted that the latter part of the definition is the natural result of the first part.

When Job was in great distress, mentally and physically, his friend advised, "Acquaint now thyself with him, and be at peace." And all through the Scriptures runs the same thread,—knowledge of God brings peace. And it is just here that the Christian Scientist has cause to be grateful for the practical, workable knowledge of God, which comes to every sincere student.

The man who was most intimately acquainted with God was Jesus the Christ, and his acquaintance was so close that he said, "I and my Father are one." And so confident of this oneness was he that he healed every inharmonious condition of mind and body, and said to the raging winds and waves, "Peace, be still . . . and there was a great calm." And it is as we acquire that Mind that was also in Christ Jesus that we gain the dominion that God gave to man created in His own image.

UPPER SANDUSKY, OHIO (Society).—Lecturer introduced by G. A. Ritter, who said in part:—

It has been said that a Christian Science lecture is a happy occasion. A Christian Science lecturer comes with a message of love. He knows and understands that God is an ever present help here and now. This understanding of divine Love brings cheer to the sorrowing, hope to the discouraged, and is an awakening to those in bondage to sin and sickness. So it does prove to be a happy occasion. Jesus said, "If ye continue in my word . . . ye shall know the truth, and the truth shall make you free."—The Daily Chief.

MOUNTAIN LAKES, NEW JERSEY (First Church).—Lecturer introduced by Samuel W. Winn, who said in part:—

Who can understand a fact or relate a fact or the reason for a fact but those who have stood face to face with demonstration of that fact? I wonder why any one honestly or from sincere motives disposed to call in question the teachings and practice of Christian Science should not first of all seek the facts from one who has realized a demonstration of Science. Ask one who has been weighed down under crushing burdens; who has faced utmost despair; who has lain on the verge of the grave, helpless and doomed so far as

mortal help or as human eye could see, when God's idea as a ministering angel came with rescue and healing in his wings. We all know the story of Jesus, who comforted the sorrowing, healed the sick and sinful, restored sight to the blind, and even raised the dead. The multitudes came to him. He left this healing power with his followers.

It was twenty-eight years ago a demonstration of this healing came under my own observation in a case very near to me. One was dying,—the last of a family all dead of the same incurable and painful malady. The doctors had frankly surrendered all hope, but into the gloom and doom came God's idea in Christian Science; the torturing pains were immediately relieved and that one was completely healed and is in this audience now. Experiences like that fill up the Christian Science church. Men and women are living, vibrant monuments to its demonstrations and on these Christian Science stands securely.

ROCKLAND, Mass. (First Church).—Lecturer introduced by Miss Alice G. Smith, who said in part:—

All the world seems to be hungering and thirsting to-day for something to satisfy its needs and longings. It is looking to the church for the healing of its sorrow and sin, and to physicians for the healing of its sickness. In one of her works, "No and Yes" (p. 1), Mrs. Eddy says, "The theology and medicine of Jesus were one." Christian Science has come to this age to reveal anew this great truth and to lead mankind to the fountain which will cure all its sickness, sorrow, and sin.

SAN DIEGO, CALIF. (First Church).—Lecturer introduced by Paul A. Kirschmaier, who said in part:—

Christian Science is to-day teaching people how to know God, and how to know they know Him; for it is teaching them to follow the example of Christ Jesus, who said of himself, "I am the way, the truth, and the life: no man cometh unto the Father, but by me." And to follow him we are instructed to heal the sick, raise the dead, cleanse the lepers, and cast out demons.

Mary Baker Eddy, the author of our textbook, "Science and Health with Key to the Scriptures," saw this pathway clearly enough to heal herself after her doctor and her friends had given her up to die as the result of an accident.

After this proof of the Christ healing power, she started to give to the world her discovery, first by teaching some of her friends by her Scriptural notes, and later, having proved this great truth, she wrote Science and Health and gave it to the world, and as the need arose for broader fields of activity The Mother Church was organized, literature was published and sent out, and a Christian Science Board of Lectureship was formed.—San Diego Union.

UTRECHT, HOLLAND (Society).—Lecturer introduced by Mrs. L. Leopold, who said in part:—

When eating the Passover with his disciples, Jesus left a promise to all mankind, when he said, "Verily, verily, I say unto you, He that believeth on me, the works that I do shall he do also; and greater works than these shall he do; because I go unto my Father." These instructions had already been given to them before, when he said, "Heal the sick, cleanse the lepers, raise the dead, cast out devils." Our hearts go out in gratitude to Mary Baker Eddy, the Discoverer and Founder of Christian Science, for having revealed to us that Jesus' words were not spoken for a certain period, nor for a select group of people, but for all time and for all people. That God is Love and that man is made in His image and likeness has been revealed to mankind

through her book, "Science and Health with Key to the Scriptures." She has taught us to know that we can be freed from sin and sorrow, fear and sickness, if only we are willing to follow Jesus' commands and know that God's will can "be done in earth, as it is in heaven."

SALAMANCA, N. Y. (First Church).—Lecturer introduced by Mrs. Anna S. Larsen, who said in part:-

Our Master, in one of his parables, tells us of a woman who had ten pieces of silver and who, when she had lost one of them, lighted a candle and swept her house and searched diligently until she found it. When she had found it, she called her neighbors and friends together and said to them, "Rejoice with me; for I have found the piece which I had lost." The experience of this woman is a familiar one to most Christian Scientists. At one time or another in our lives we have awakened to the realization that we had lost one or more of our precious possessions; it may have been our health, our happiness, or our integrity. Then, like the woman of the Bible, we looked for a light that might help us find our lost treasure, we swept our house, cleared our mental abode of much thought-rubbish, and continued to search diligently until we found it.

The teaching of Christian Science, revealing God as Love, was the light that shone into the dark corners of our bearts, it was the broom that swept out the accumulation of false beliefs regarding God and man, which had been hiding our treasure so that we thought it lost.

To-night we also, like the woman, have called together you, our friends and neighbors, and are saying to you, Rejoice with us, for we have found that which was lost. And not that only, but if any of you are conscious of having lost something you value, we are lovingly giving you the opportunity to avail yourselves of the light which helped us in our search.

AUCKLAND, NEW ZEALAND (First Church).—Lecturer introduced by H. E. Carter, who said in part:-

It is impossible in one short discourse to go fully into the vast subject of Christian Science, which covers every problem in the realm of human experience. Christian Science is the Science of Christianity, and every science must be studied to be acquired. An unbiased study of the authorized works on Christian Science will bring invaluable reward in peace and the understanding of God, who is "a very present help in trouble."

New Bern, N. C. (First Church).—Lecturer introduced by Mrs. Lydia Engstrum, who said in part:-

To-day thousands are grateful to Christian Science for having taught them to read the Bible, -not only to read the Bible, but to read it understandingly and demonstrate the trackings and promises contained therein. Christian Science is not a new religion. It is the same system Jesus taught nearly two thousand years ago, by which he healed all manner of disease and destroyed sin. The study and practice of Christian Science enables us to-day to demonstrate his promise, "He that believeth on me, the works that I do shall he do also."

CHICAGO, ILL. (Tenth Church).—Lecturer introduced by Mrs. Maude W. McCormick, who said in part:—

We are all here to-night because we need something. Human existence is made up of forever unsatisfied longings. Job certainly spoke truly when he said, "Man that is born of a woman is of few days, and full of trouble." He is like a caged bird, longing to soar and be free, but forever beating his wings against imprisoning bars; buffeted about by

what he calls fate, one moment on the mountain top of ecstasy, the next plunged into the depths of despair; yearning desperately for good, but always cheated by his fear of evil, even his purest joys being tinged with the dread of coming sorrows. This seems to describe what we call life, and our only remedy has been to die out of it. Christian Science, the "pearl of great price," the light which "shineth in darkness; and the darkness comprehended it not," is teaching us how to live out of it, and we have asked you here to-night to offer you this blessed gospel of peace on earth, the peace "which passeth all understanding," within our reach here and now.

STAMFORD, CONN. (First Church).—Lecturer introduced by Miss May Lounsbury, who said in part:-

When I was a child, I was a member of an orthodox church and Sunday school, and we used to sing, "I love to tell the story . . . of Jesus and his love." But I was not satisfied with telling the story, for we were commanded to do more. Then I found Christian Science was teaching how to do the works the Master did. Jesus accomplished his works through the understanding of God,-through the understanding of spiritual law, which annuls material law. This understanding of spiritual law enabled Jesus to walk on the waves, to still the tempest, to heal the sick, and to raise the dead. And Jesus said of every follower, "And greater works than these shall he do."

Los GATOS, CALIF. (First Church).—Lecturer introduced by Mrs. Carra L. Thoreson, who said in part:-

Jesus said, "By this shall all men know that ye are my disciples, if ye have love one to another." Christian Science is a religion of love. It is a realization of man's oneness with God, whose loving ever presence is a fixity. Into this presence sin, disease, and discord are powerless to force an entrance. It is a great spiritual illumination into which the darkness of human distress cannot possibly enter. And, in proportion as one becomes conscious of this gentle, loving presence, in that proportion does the seeming reality of human discord vanish. True Christian Scientists are humbly and earnestly striving to attain to a perpetual realization of God's presence as consciousness, which manifests itself in improved material conditions and peace of mind.

It is reasonable to suppose that some of you have come here to-night hoping to hear something that will help you in solving your individual problems. There is no monopoly of God's law of divine healing and harmony, a demonstrable understanding of which may be gained by any earnest, honest student of Christian Science. Our Leader, Mary Baker Eddy, declares in "The First Church of Christ, Scientist, and Miscellany" (p. 238), "God is understandable, knowable,

and applicable to every human need."

Lectures to be delivered

By Members of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, U.S.A.

INDIANA-Indianapolis (joint lecture): Murat Theater, 3 p.m., Sept. 26.

Seymour: Chamber of Commerce Rooms, 8 p.m., Sept. 24.

Notice

Notices of lectures to be delivered can be printed in a particular number of the Sentinel when they reach the editorial department twelve days preceding its date of publication.

Testimonies of Healing

For several years previous to my coming into Christian Science I was a member of a denominational church and for several of the earlier years of this membership took an active part in the church work and was trusted with the responsibility of several of its important offices, being for two years superintendent of the Sunday school; but during all these years there had been appearing in my path disease and discords of various natures and it seemed at times that God was punishing me for trying to be good, for I really was trying to live up to all the light I had. When I was forced to call a physician to overcome some sickness in my family I would earnestly ponder the question, "Is that physician greater than God, that his medicine will heal and God cannot, or at least will not?"

I had always been taught that the healings performed by Christ Jesus, the disciples, and apostles, were only for the purpose of establishing the faith and that we were not to expect such miracles now, for men had been taught the healing properties of herbs; but being unable to find this verified in my Bible, I finally began to lose interest in church work and to think that after all there is "nothing to" this religion anyway, and so gradually gave up all pretense of living a religious life. Still I was not satisfied. I was as a vessel cast adrift on an endless sea of storms without rudder or sail, and only one who has had a similar experience can know the utter uselessness and agony of such a life. While I was in this desperate state my wife passed on, in October of 1918. This seemed the last straw, and in my deep gloom I thought it was a punishment or at least an attempt on God's part to draw me back to Him and I prayed most earnestly for light and understanding. Immediately I decided to return to my old home in Indiana, where a dear brother and his wife induced me to attend the Christian Science church. I shall never forget the serene peace and joy that flooded my consciousness on that Wednesday evening, for after hearing the lesson, noting in particular the rapt attention, and then the testimonies of healing, the scales forever fell from my eyes, for I had indeed found at last that which satisfied my longing.

I at once secured a copy of "Science and Health with Key to the Scriptures" by Mary Baker Eddy, and read and reread it every moment I could spare, and, as will be the result with all who will lay aside all prejudice and study this inspired volume, found it just what the human heart is incessantly longing for, a satisfying, demonstrable knowledge of God. I had been seeking just this, and having found it, God was now to me a God of love only, whom I could turn to in every time of trouble; for did not Christ Jesus say, "Lo, I am with you alway"?

At the beginning of my study of Christian Science I was suffering with a very obstinate physical discord which had for several years caused untold agony, and not being able to secure relief through material remedies, which I had used for several years, I called a practitioner on the telephone, and the healing was accomplished overnight. For this healing I am thankful beyond expression to the loving practitioner, for it is permanent. As a result of my faithful study of Christian Science I have overcome a diseased condition of the kidneys which usually proves serious. Another healing was of chronic tonsillitis for my daughter. The school physician notified me that it was necessary to remove the tonsils, but through the knowledge that not the knife but God as Love is the author and sustainer of harmony, the seemingly diseased tonsils were quickly restored. The tobacco habit,

which had held me in utter bondage for years and for which I had tried will power and many of the advertised cures, left me as easily as darkness disappears when the light comes. Absolutely no desire for tobacco remained. An abscess of the ear, toothache, earache, and many other discordant conditions have been overcome, some instantly through the knowledge gained from reading Science and Health in conjunction with the Bible. I have also been the witness of several demonstrations of truth outside of my own home. I consider the fitness for the successful impartation of truth to suffering humanity the highest attainment that can be reached in this present existence.

As I look back over the short time since I took up the study of Christian Science, I am made to "rejoice, and be exceeding glad," and can now understand the reason for Scientists being such happy, optimistic people, for, thanks to our dear Leader, Mrs. Eddy, we have something the world can neither give nor take away, at least a slight knowledge of an ever present healing and saving God. For the physical healings and especially for the new understanding, the spiritual light and the confidence in good it begets, I can only say, as any Scientist will bear me out, that gratitude for this new enlightenment can only be felt, for the English language is deficient in words to express it.

EMERY O. McCool, Mangum, Okla.

4

Since we began the study of Christian Science there have been many healings in our family of seven persons. Varicose veins, rheumatism, constipation, eczema, enlarged tonsils, headache, and a sense of lack have been overcome. The daughter who had eczema on her head used to have her hair cut frequently on account of it. Since the healing, her hair has grown beautifully long and thick.

I am especially grateful for a healing of bronchial catarrh which I had had for a few weeks, sometimes feeling very ill, at others nearly well. One Sunday I felt I could not bear it any longer, so after service I asked for help and began to speak of my symptoms as we used to do to a doctor. Putting my hand on the place where the pain seemed to be, I said, "It is right here." The practitioner very lovingly said, "My dear, we don't treat a sick body but the sick thought." She then pointed out some passages in "Science and Health with Key to the Scriptures" by Mary Baker Eddy, and asked me to study them. As I was walking home with a friend, who told me of a discordant condition which was worrying her, I told her to be very loving and try not to be resentful, when suddenly I had to stand still, for it seemed as if a heavy cloak had been taken off me. I was healed. How grateful and uplifted I felt.

During the Lesson-Sermon a few weeks ago I suddenly felt very ill. I thought I must go out; then I looked around and saw every one so interested in the Lesson and thought, "How I will disturb every one if I do." I just realized the omnipresence of God and I was instantly healed. We have had many other healings, for all of which I am deeply grateful.

(Mrs.) EMILY A. LANGTHORNE, Leeds, England.

In gratitude for all the blessings received through Christian Science I wish to give my testimony. Some time ago I was stricken with an abdominal trouble. The pain was so severe that I was obliged to lie down. High fever and severe cramps became manifest. My husband observed my condition for several days, and, seeing no improvement, urged me to go to a doctor, who examined me and diagnosed the

:

trouble as pertinacious catarrh, prescribing morphine as a means of relief. I went to the doctor three times a week, but the pains became more severe and the prescribed morphine afforded but temporary relief. I was desperate, walked with difficulty, had no appetite, and was afraid to eat anything, as my bowels had not functioned properly for several days. In my great extremity God sent me His angel. On my way home I met an acquaintance, a Christian Scientist. After I told her how miserable I was she stated that a short time ago she was in the same condition, but with the help of a Christian Science practitioner was healed in a comparatively short time. I requested the address of this practitioner, and the next day went to her and asked for treatment, which was given, with the result that the following day my bowels functioned properly. This, however, was followed by pains in the right side, extending to the leg, so that I was tempted to resort again to morphine. I resisted this desire, and read diligently the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, and went to the practitioner again the following day. Gradually one error after another disappeared, and through this I learned to be obedient to Principle even in the smallest matters. Until recently I had applied a material remedy, thinking nothing of it, and wondered why the error did not vanish more quickly. Finally, while in conversation with the practitioner, I mentioned it to her, and she informed me that the truth requires no material aid. I then stopped using it. The next day the error disappeared, and now I enjoy perfect

I thank God for permitting me to recognize this great truth, which Mrs. Eddy has made understandable to all who seek it, and that we are given an opportunity to partake of this teaching here and now.

(Mrs.) ILSE BOSCHAN, Altona/Elbe, Germany.

Christian Science frees mortals from sin and disease. Mrs. Eddy says, on page 109 of Science and Health, "This great fact is not, however, seen to be supported by sensible evidence, until its divine Principle is demonstrated by healing the sick and thus proved absolute and divine." Christian Science had been offered to me and I had read some but had been unable to accept that which was so contrary to the material senses. One day the well-known and dreaded symptoms of the grippe presented themselves. Time had heretofore proved the only remedy. I decided to see if Christian Science could do anything for me and asked a practitioner to work for me. By night every symptom was manifested, especially a very sore throat. Again I called on the practitioner and was given the comforting assurance that my night's rest would be peaceful. I awoke in the morning healed. During the years following, the memory of this healing was ever with me and I knew that Christian Science does heal, although I was not yet ready to accept it. I have never had a return of this disease although before this healing I had suffered every winter.

My next healing was of goiter. Several doctors had declared that this particular kind of goiter was incurable. Although this healing was more prolonged, it is complete. Another healing was experienced when I had some dental work done. The tooth to be filled was so sensitive that it could not be touched without causing intense pain. The next day it was filled and almost no pain was felt. The dentist remarked, after he had been working for some time, that it did not seem to be causing me any pain and that he could not understand it because it was a very sensitive tooth. For just a second it did hurt but the realization that

the work had been painless until then was enough to destroy the pain instantly.

These healings mean much because of the greater physical freedom that they bring and also because they are the means of proving the truth of Christian Science. Christian Science gives us a practical religion which can be used each day, and it opens up an entirely new way of attacking every problem that confronts one. The joy and satisfaction that come from the study and application of the understanding of God that is gained through Christian Science make one daily grateful to Mary Baker Eddy for all that she has done in pointing out to us the example of Jesus.

(Miss) Laura I. Nagel, Los Altos, California.

-

As in the case of many others, Christian Science was brought to my notice after everything materia medica had to offer had failed. Even after submitting to an operation I was nothing bettered, but grew steadily worse. For eighteen years I was never free from pain and the doctors told me I need no longer look for a cure. Twelve years ago when it seemed all I could do was to await God's time, I received a letter from a distant relative telling me to purchase a book called "Science and Health with Key to the Scriptures" by Mary Baker Eddy, which I did. I did not grasp its meaning at first, but all at once a light dawned in my consciousness while reading on page 1, "Thoughts unspoken are not unknown to the divine Mind." Then I started to study. Since then I have laid aside glasses, have been healed of chronic constipation, almost constant headaches, stomach trouble, heart trouble, badly frosted feet, chronic catarrh, and many other discordant conditions. There have also been many other wonderful healings in my home, such as of ptomaine poisoning, influenza, and pneumonia.

I am grateful for class instruction, for membership in The Mother Church, also in a branch church, and for the Sunday school. I seldom ever miss a meeting although I live five miles away. I am more grateful every day for the literature, and I am grateful that there was one found ready to give this wonderful truth to a waiting world. It is my earnest prayer that I may know more of this truth that does heal and save.

(Mrs.) EDITH ANDERSON, Kansas City, Kansas.

4

I had been studying the Bible more or less for many years and had attended churches of all denominations in an effort to find some one who could heal sin and disease as did Christ Jesus and his apostles, but their teaching and my little understanding of the Bible did not correspond. Then came a day when I stumbled on a man who was a Christian Scientist. He talked Science every chance he had, and 1 and my partner used to make fun of him, between ourselves; but the Christian Scientist had a habit of saying a few words to me once in a while and finally I resented it and said to him, "See here, I have investigated all the churches, and I want nothing to do with them." Then he said, "Why don't you investigate Christian Science; you can't lose anything." I said, "I am through." But somehow I could not forget what he had said, and I said to myself, He is right, I can't lose anything and I will try once more. So I went to a Christian Science church one Sunday morning, and as soon as I stepped inside of that church a feeling came over me which I cannot describe, it was so joyful and happy, and I said to myself, Here is what I have been looking for. first thing I saw was Mrs. Eddy's words, "Divine Love always has met and always will meet every human need" (Science and Health, p. 494). I went to work at once to procure Christian Science literature, and the more I read, the hungrier I got for it.

I was of a roving nature and for about three years I had the benefit of the churches and reading rooms; sometimes I had neither one. Then I had a desire to go to a place where I could go to church regularly and get all the Christian Science literature. I walked into that place before I knew it and without any effort on my part. I studied and learned fast but not to my satisfaction; then I had a chance to hear a lecture. The lecturer said in part, "You say you know and understand all these things, but do you do these things?" I did not hear any more of the lecture, for I could not forget these few words and they have been the bright star leading me onward and upward. Then I had a desire to find some one who was in prison as I had been, for I wanted to prove that I could be a worthy servant, and to my surprise the opportunity came very unexpectedly and I have been interested in that kind of work mostly since taking up

I have lost many false beliefs. I thought my shoes or the sidewalk hurt my feet. The doctor said I must have an operation performed in the hospital to cure the bleeding piles. I suffered from pain in my back and was always tired. I had formed the liquor and tobacco habits and had a discontented disposition. I lost all of these and many more discordant beliefs by simply reading and studying the Bible and "Science and Health with Key to the Scriptures" by Mary Baker Eddy. The real joy and happiness I have gained is beyond measure. Money could not produce it; material loss is surely spiritual gain, and it is simple when one is willing to understand. I talk from experience. I thank God with all my heart, also Jesus the Christ, and Mary Baker Eddy, who has explained his teachings to us in the Christian Science textbook, so every one can easily understand it who will try. I am also very grateful to Mrs. Eddy for sacrificing her earthly all to serve mankind.

ERNEST C. SCHAUFFELE, Chicago, Ill.

4

I would like to express my gratitude for what God has done for me through Christian Science. I have been healed of throat trouble, nervous sick headaches, and rheumatism. I also suffered for several years from severe heart trouble, but through the understanding of God as infinite Life I am now perfectly free from it.

I am grateful for all the Christian Science literature, to the practitioners who have so lovingly helped me, and to our beloved Leader, Mary Baker Eddy. But I am more grateful for the spiritual understanding of God, as omnipotent and omnipresent Being.

(Miss) OPHA McHolland, Los Angeles, Calif.

I wish to testify to some of the many blessings which have come to us through Christian Science. Over two years ago our little son was very ill with bowel trouble. He could not retain his food and looked very thin and frail. We were away from home at that time and not near a Christian Science practitioner. Help was telegraphed for and lovingly given. I know it was through this help that the child was able to live through a long journey to New York. My fear for him was very great. Christian Science treatment was continued for a month and his rapid improvement was wonderful to all who saw him. From birth the boy was thought to be delicate, but since his healing he has been

entirely well. Now every one who knows him remarks upon his sturdiness.

I have been healed of bowel trouble. These attacks were very severe at times and usually left me very weak. I was not treated by a practitioner for the healing of this disease in particular, but found after being in Science for some time that I was free from it. Nervous headaches have been healed and the fear of heredity overcome through Christian Science. The belief of lack has been overcome through learning to look to God as the source of supply. As I look about me and see how very much I have to be grateful for, and see in some measure what Christian Science means to all of us, my heart fills with gratitude to God and to Mrs. Eddy for the truth which is giving freedom and peace to mankind.

(Mrs.) OLGA L. SERTON, Utrecht, Holland.

It was through reading the testimonies in Science and Health that I received my first healing, and in turn I am glad to bear witness to the power of Spirit. After reading the textbook for about one week I was instantaneously healed of astigmatism, and was able to lay aside glasses which I had worn for nine years. This condition had reached the point where I was unable to distinguish faces until they were within a few feet of me. Now I am able to read at a great distance and have perfectly normal sight; also I can truly say there is never a sense of pain in the eyes-a constant condition before this healing took place. For the past three years it has been necessary for us to live in a city at a great distance from home and our loved ones; and all through this time Science has been a great help to me in realizing there is no separation in Mind. By the proper application of the truth, all sense of loneliness or homesickness has been quickly overcome. This to me is a wonderful demonstration, as I was always greatly attached to my home and had never been away before.

I am also thankful that our entire family have come into this wonderful, practical religion, and I praise God every day for Christian Science and for Mrs. Eddy, who through her untiring efforts, was able to give us this truth. I am indeed grateful for the many healings, but the spiritual uplift and outlook on life which I have gained through this study are profoundly greater to me. These are only a few of the blessings which have come to me through Christian Science; there are many, many more.

(Mrs.) NORMA BROWNE, Brooklyn, New York.

٥

Christian Science was first brought to my notice some fifteen years ago by one of my neighbors. She had come in to see me and told me of a lady who was taking treatment at that time, and I remember I said to her that if it was faith in God, I would think it all right; if otherwise, I could not accept it. So as time went on, one after another came in to call on me,—for I was then in bed and had been for nearly eight years, with spinal trouble, also a complication of other diseases,—and would ask, "Why do you not try Christian Science?"

I finally decided to try it, as we had about exhausted all material means. We sent for a Christian Scientist. She came and talked with me, and said on going away that she would do what she could for me, and that I might be up before she came back again. I believed she intended coming again in a few weeks, as she did not live in the city. I remember how I looked at her when she said to me that I might be up before she came back, I suppose feeling that

C.

such a thing could not be, as I had been in bed so long and had tried so many times to be up and could not. I had to be carried out after dressing myself, or taken out in a chair for a while, perhaps half an hour or so, and then had to lie down again. What dark hours those were. I cannot state just the exact length of time it was from the beginning of the treatments until I was healed, but I do know that it was before the practitioner made her second visit, for before she came the next time I had made the effort to arise and walk and I was healed immediately. I was up, clothed, and in my right mind.

Oh, what a blessing, and such a spiritual uplifting came with the healing. My healing has been tested again and again in ways which I formerly never dared think of, and its permanency has been repeatedly proved, and as the work of healing, physical and moral, goes on day by day my debt of gratitude to our Leader grows. This debt can be paid in but one way, by loving obedience, remembering the Master's words, "If ye love me, keep my commandments."

(Mrs.) NANCY J. HERRING, Mansfield, Ohio.

Christian Science is the greatest gift presented to mankind since Jesus dwelt on earth, preaching and practicing the healing gospel, which we are striving to live to-day. About seven years ago a friend invited me to go to a Christian Science testimony meeting with him. I accepted his invitation merely for curiosity's sake, but the service appealed to me so much that I became a regular attendant and later united with this church. I have received so much good through this teaching that I wish to relate some of my experiences, hoping thereby to help some one as I have been helped by reading the testimonies.

From early childhood I was afflicted with very severe headaches which would last from five to six days, and recurred very frequently. Physicians and so-called "wonder doctors" were consulted in Europe and America, drugs and home remedies were applied, but none gave satisfactory results. For many months I was treated by a staff of specialists in the eastern part of the United States, at which time I had some very alarming attacks which nearly bordered on insanity, and my people feared the worst, as my mother had passed on with the same trouble. I received some relief, but it was only of short duration and finally I came to believe that, as one professor had said, "What can't be cured must be endured." It was not until I began the study of "Science and Health with Key to the Scriptures" by Mary Baker Eddy, in connection with the Bible, and with the help of some very loving practitioners, that I was freed from bondage to this false belief. I was also freed from the liquor and tobacco habit, profanity, quick temper, and many physical ailments.

While serving in the Swiss army some twenty years ago I was heat struck, and picked up for dead. I was rushed to the nearest house, where some of the ambulance corps worked over me until life was manifested. From there I was taken to the field lazaret, where, later in the night, I regained consciousness. The following day I was forwarded to a hospital for convalescents, whence I rejoined my regiment, seemingly well, although a difficulty in breathing did not leave me until about two years ago, when I received treatment from a practitioner for an attack of the lungs, and was healed of both troubles. Very recently a badly sprained foot was quickly healed with the aid of a practitioner. I was able to work on, although mortal mind, so called, tried to dictate severe pain for a while. The children also have

been helped very much in their trials, and right here we have had some very beautiful demonstrations.

I am indeed very grateful for all the blessings I have received through the application and study of this wonderful truth. I have not words with which to express myself. I am thankful to God, our heavenly Father, to Christ Jesus the Way-shower, to Mrs. Eddy our beloved Leader, and to all who have assisted me on the way.

J. J. BEERLI, Burlingame, Calif.

4

I wish to express my gratitude for Christian Science and all it has done and is doing for me. Pains, bruises, ulcerated teeth, and stings of insects have been overcome through the understanding I have of Christian Science. The diseases which seemed more real to me were met by the loving help of other Christian Scientists. I have been healed of a sprained knee, a bad cough, also colds. Help was lovingly given when I got something into one of my eyes. After trying to meet it for a day or so it did not feel so bad as at first, but bothered me enough so that I asked for help. It was all met in a day or so after and I could feel the good effects with the very first treatment.

In studying Christian Science I have found that by applying and living what we understand of it, even if it is only a line or two a day, we gain just so much more of heaven, harmony. I am grateful to God for revealing Himself to our Leader, Mrs. Eddy, so that she could be used as a channel to give Christian Science—the new yet old truth about God and man—to the world. It gives all who seek it a closer communion with God, who meets all our needs. My one desire is so to live that my life will express more of the love which was in Christ Jesus and our Leader, Mrs. Eddy.

(Miss) ETHEL W. PARKER, Leominster, Mass.

4

It is a joy to write of my deep gratitude to God, to Mrs. Eddy, and to all the loving Christian Scientists who have helped to lift me out of the darkest depths of human depression, into the glorious light of spiritual understanding. Intense suffering, both physical and mental, was my lot for many years and now that I see the unreality of all discord, because God is ever present harmony, my whole outlook is one of unspeakable happiness. I have, however, learned that we can only demonstrate Christian Science through our practical understanding of its Principle. When this Principle is applied, the problem, however impossible of solution it may seem to human sense, is immediately solved. It is as simple as two and two make four.

To know that we all have the ever present help and loving protection of the one supreme power, God, is to enjoy a freedom that is one of the most precious gifts our heavenly Father has bestowed upon us. God should always be first in our thoughts because He is the only creator and all good comes from Him. When we turn to God, trust and love Him with all our hearts, our every need will be met. Love, confidence, health, happiness, success, harmony, friendship, and prosperity are the sure rewards of obeying the command, "Seek ye first the kingdom of God, and his right-eousness."

To those who have not yet proved the power of Christian Science in their daily life I would say, Study in all earnestness the Bible and "Science and Health with Key to the Scriptures" by Mary Baker Eddy, and these books will prove to be the most precious volumes it is possible to have in our homes.

AUBREY HERBERT GRANGER, Stourbridge, England.

Signs of the Times

[John Merle Coulter, Ph. D., in The Biblical World]

A little over twenty years ago, Andrew D. White published a work, entitled "History of the Warfare of Science against Theology." This title suggests the fact that the representatives of science and of religion once occupied hostile camps. . . .

There were sharp conflicts now and then between the representatives of science and of theology, with the usual result that each party was more firmly convinced of its own opinion. This situation has changed completely, and the hostile camps have become allies in a great cause. Religion has discovered that science is honestly searching for the truth, and science has discovered that the Christian religion has a scientific basis. It seems strange to us now that two groups, each searching for the truth in its own way, should have come into conflict. It was certainly unscientific to deny religious truth, just as it was irreligious to deny scientific truth. Truths are not contradictory. If claimed truths are contradictory, then the truth is not clear.

[Stanley A. Cook, M. A., in The Hibbert Journal]

It is unfortunately unnecessary to refer at length to the prevailing bewilderment, disillusion, unrest, suspicion, and despair, the indications of moral, ethical, and spiritual ill health, and the many bizarre, fantastic, and often veritably pathological features of the age. . . . How far may this ill health not be due to erroneous ideas of life and reality, to imperfect or misleading conceptions of God and of the reality for which this name stands? The answer will depend upon our conceptions of the meaning of God for man, and the relationship in which a man, consciously or unconsciously, stands to Him.

[Rev. Worth M. Tippy, D. D., in Zion's Herald]

Our industrial life has been built on wrong and unchristian foundations, and one great task which lies immediately before us is a work of education, which shall change our beliefs as well as our practices, and put our six working days on the principles which we revere and which are taught us from the words of the Master on Sunday. Is not our problem to substitute the Golden Rule as a controlling motive for our doctrine of competitive struggle? . . .

The Golden Rule applied to a factory must mean certain great ideas out of which can grow Christian practices. It means, first, that management and men shall work out some effective and sincere form of organization mutually satisfactory, which shall give the men self-expression, recognition of their manhood, self-protection, and a chance to put their thought and power into action productively, and which shall give to capital and management equally just and self-respecting recognition.

[Rev. Arthur E. Holt, Ph. D., in The Congregationalist and Advance]

No religion will ever light up the dark pathways of modern industry which does not know how to teach men the moral and spiritual significance of the ways in which they earn their daily bread.

We need to take our boys and girls and allow them to see the grains of wheat which are placed in the ground by human labor. We need to let them see the growth of this wheat into the harvest; to help them follow it after the harvest into the channels of distribution, and from the channels of distribution into the avenues of consumption. And we need to teach them that this whole process of production,

distribution, and consumption in any field is as sacred as human life itself, and whoever lays unholy hands upon it in selfish action is an enemy of mankind. In some realms we already recognize that selfish action is intolerable. We have yet to teach that it is intolerable everywhere. There is not one law of service for the minister and another law for the farmer. There is not one law of service for the soldier and an opposite law for the merchant. There is but one law of associated living and that is the law of service....

Amid all the confusing cries of the present, one detects the deep human cry, not for more pay and shorter hours, but for work with more meaning, work with more spiritual challenge, work in which men shall feel that it gives them an opportunity to make a living, to make a life, to serve their fellow man, and to do the will of God.

Announcements

From The Christian Science Publishing Society

New Pamphlets

Advance information will in future be given two weeks before each new pamphlet is placed on sale. This will replace the former system of standing orders.

New Pamphlet in German

There is now on sale a new German pamphlet entitled Läuterung (Purification) containing the following articles reprinted from *The Christian Science Monitor* with alternate pages in English: "Lusting Against Lust," "The Lust of Money," "The Lust of Power," "Looking Ahead," "Sincerity." Price 5 cents a copy. Reading room discount 20 per cent.

"Rudimental Divine Science" for the Blind In English Braille

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U.S.A.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U.S.A.

From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to Charles E. Jarvis, Clerk, 236 Huntington Avenue, Boston 17, Massachusetts.

From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address.

Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to EDWARD L. RIPLEY, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

Letters of Appreciation

Many letters of appreciation of THE CHRISTIAN SCIENCE MONITOR and other Christian Science activities are constantly being received. These letters express what these activities mean to different individuals in various occupations and pursuits. The favorable comment that has been received on those already published indicates that they are welcome and helpful; therefore others will be published under the above heading. Extracts from such letters follow:

THE MONITOR comes as a real friend every day telling us of the world's doings in a manner which widens the outlook in every direction.

I am deeply grateful for an awakening interest in humanity that has come about in my consciousness through the reading of our daily newspaper, The Christian Science Monitor.

I AM delighted with your paper (THE CHRISTIAN SCIENCE MONITOR). It is, excepting the ————, the first real honest newspaper that I have met in my nineteen years on this continent.

I have taken the Monitor from the very first issue, which I still have. To my mind the Monitor is the greatest daily newspaper that has ever been published, and I get much valuable information from reading it.

1

150

[i].

ALLOW me to say a word in praise of your paper. I am not a Scientist, and so my opinion is not prejudiced on account of faith. Of all the papers I have ever seen in this country, the Monitor has the finest and most complete world news, and gives the highest class service of general interest in the United States.

PERMIT me to take this opportunity to say a few words as to the wonderful help this daily newspaper, The Christian Science Monitor, is to me. Aside from the news in general, the Home Forum page with its most helpful metaphysical article is daily food. I am most grateful to be able to subscribe for and read this our splendid paper.

Morocco, one to five copies inclusive, \$5.50; six or more, each \$5.25. Orders for the French translation in lots of six or more may include both bindings.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each \$5.50; six or more, each \$5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, French, and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy \$2.25; twelve or more, each, \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; twelve or more, each \$3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy \$5.00; twelve or more, each \$4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 366 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy \$2.25; six or more, each \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; six or more, each \$3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy \$5.00; six or more, each \$4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy \$6.00; six or more, each \$5.50.

Christ and Christmas. An illustrated poem. Cloth, single copy \$3.00; six or more, each \$2.50. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Unity of Good and Other Writings. One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science versus Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy \$1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy \$2.00; six or more, each \$1.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, single copy \$1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy \$1.00; six or more, each 75 cents.

Unity of Good. This book lays the ax at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy \$1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy \$1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, alias Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point, American Braille, and English Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Rudimental Divine Science and No and Yes. In one volume, French translation, with alternate pages of English, vest pocket size. Blue cloth, gray edges, single copy \$1.25; six or more, \$1.10; blue leather, gray edges, single copy \$2.00; six or more, \$1.75 each.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science versus Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy \$1.50; six or more, each \$1.15.

Christian Science versus Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers. 14 pages, single copy 20 cents; six or more, each 17 cents.

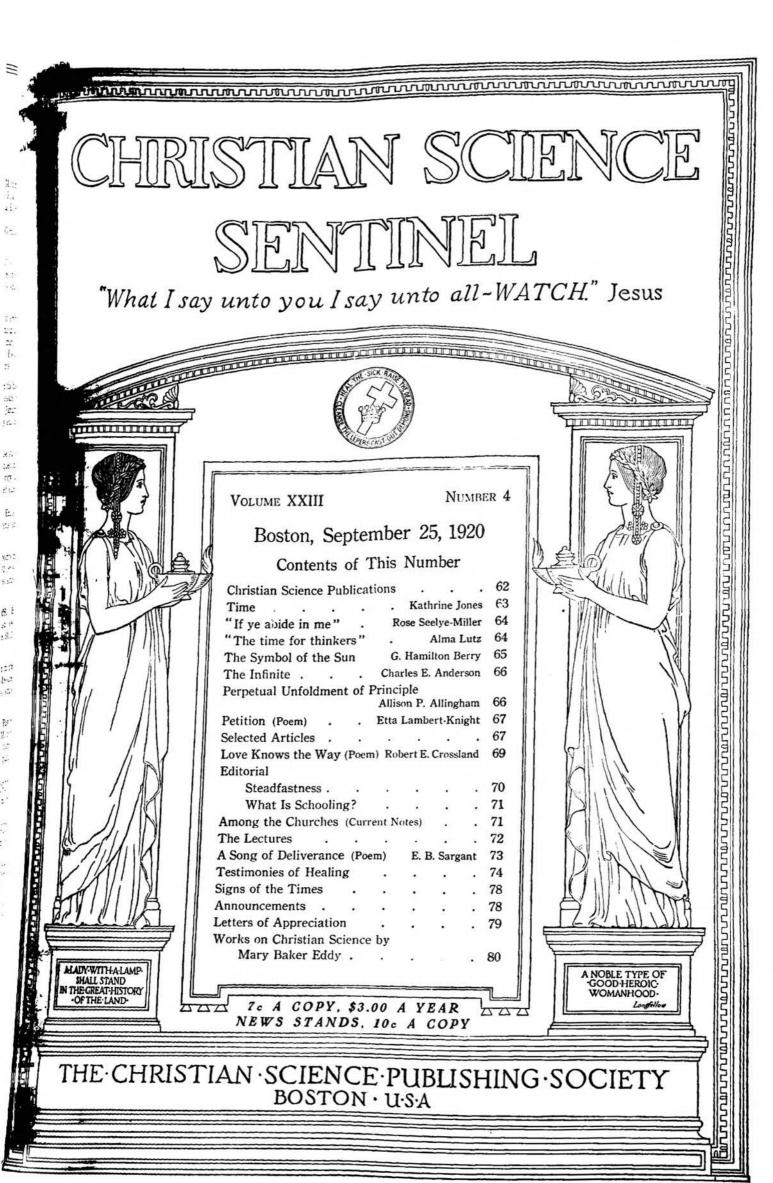

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy \$1.50; six or more, each \$1.25. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign. Address orders and make checks payable to

NUMBER

Time

KATHRINE JONES

If time, as a human concept, is unknown to divine Mind, it is unknown to that man whose only Ego is the divine Mind, and human beings, laying off their mortality, must turn to divine consciousness that realizes infinity and immortality. The apprehension of infinity does not, however, come through the study of human philosophy, but rather dawns gradually and calmly, as one is prepared to receive revelation through prayer, consecration, and spiritual activity.

The fitful, purposeless, restless movement of mortal mind is healed by the divine Mind. Exchanging sensuous dreaming for God-directed thinking, the student of Christian Science finds himself more and more thinking in the present tense. He rests in the consciousness of ever present Love, and so is constantly endeavoring to realize that divine Love heals and protects, that good is, and that man is in heaven, harmonious, at peace. If thought reverts to the past he realizes that the past is healed; if he considers the future, it is only to know that Love will take care of it; but it is in the present that he really lives. Hour by hour, moment by moment, such a one depends on divine Love for guidance and inspiration. Instead of looking forward with apprehension to some dreaded circumstance, he realizes to the full the protection of the present moment, knowing that by so doing his future hours will unfold normally as an expression of God's government,-concordant, secure.

The wonderful moments of illumination that come thus when it is clearly seen that evil is unreal, are sometimes allowed to be overcast and lost by the student's becoming troubled about the past ages' belief in evil. "Even if evil is being proved daily in Christian Science to be unreal," the tempter argues, "there have been countless ages when men believed in the reality of evil. Does not that age-long belief have a depressing, hypnotic influence on the present?" Here let the student consider the comparative effects of a lie believed for one day by one person, and of one believed a million years by a million persons. When the one believed for so long a time is discovered to be a lie, it exerts no more power in the present than the lie believed for a day. Mrs. Eddy urges us not to honor error in any way. It is only the bowing down to error, the fearing and indulging it, that gives it its suppositional power. Time, however ancient, cannot invest it with what it cannot possess.

Existence is simplified and healed in proportion as it is tegarded as the expression of Mind, unconfined by time limitations. Excessive human planning, with its willfulness, its weariness, its darkness and rigidity, is comprised in the material concept of life as a thing fettered by time. The identification of man with the immortal Christ, the seeing that man is the expression of Life, reduces and moderates the human estimate of the importance of time. Working from the basis that man is spiritual and imperishable, one finds that he has more time, more peace, more repose,

keener spiritual intuitions as to when to act, and what to do. Working out one's salvation with the help of "Science and Health with Key to the Scriptures," each laborer may, with a song in his heart, heal the mortal concept of time with the spiritual understanding of "Day," which Mrs. Eddy defines (Science and Health, p. 584) as "the irradiance of Life; light, the spiritual idea of Truth and Love."

In our work as Christian Scientists, do we not often find ourselves harboring the illusion that at some future date, when all our material affairs are attended to and in good order, we shall devote ourselves more completely to spiritual work, that we shall have much more time to give to higher things? But we already have all the time there is, and the one needful requirement is purified thought-more ardent desire for spiritual growth. The working out of our salvation must begin in just whatever state we find ourselves today, it matters not how material that state may seem to be. So long as we seem to live in the flesh, so-called material things may have to be attended to, but it is possible to begin to demonstrate spiritual life while we are yet seemingly encumbered with physicality. What we call material occupations and affairs cannot be relegated to an illusory future, nor can they be ignored, nor is there any need, in fact, to do anything with them. The reformatory work of Christian Science is with the thinking, always our thinking, that must be regenerated. As this is done, human affairs are purified as material living becomes less insistently material.

One of the temptations that beset the spiritual worker is the temptation that tests workers in all pursuits,—that of getting tired. The beginning of any new venture is usually pleasant, but in spiritual work, as in all undertakings that are worth much, there are, between the novelty of beginning and the joy of achievement, long stretches of plodding that must be covered, if the worker is to arrive at the other end where victory and accomplishment await him. A certain staying power and tenacity of right purpose are needed to tide one over these periods of apparent unproductiveness. By trusting God, regardless of what the material senses testify, one can gain this equilibrium which will enable him to continue steadily in the right course. When one is prepared to give his whole energy to making his demonstration, any difficult period, however long, loses its power to dishearten. Impatience, ephemeral enthusiasm, shiftiness, are overcome, and the power to work more steadily and for longer periods is unfolded to him who importunately prays for strengthened purposes and deeper convictions.

The sting of the mortal concept of time is healed as we begin to turn our thought toward God and immortality. Old age, inactivity, weariness, loss, separation, death,—all proceeding from the false belief that life is in matter and is doomed to destruction after a certain number of years,—are unknown to divine consciousness. But is it not presumptuous to say that we to-day may prove this divine consciousness? No. Our dear Leader, who taught us to claim, meekly yet boldly, our birthright as the children of God, writes in "Unity of Good" (p. 41), "The sweet and

Cognicht, 1920, by The Christian Science Publishing Society, Falmouth and St. Paul Streets, Boston, Massachusetts. Entered at Boston post office as second-class matter. Acceptance for mailing at a special rate of postage provided for in section 1103, Act of October 3, 1917, authorized on July 11, 1918.

sacred sense of the permanence of man's unity with his Maker can illumine our present being with a continual presence and power of good, opening wide the portal from death into Life; and when this Life shall appear 'we shall be like Him,' and we shall go to the Father, not through death, but through Life; not through error, but through Truth."

"If ye abide in me"

ROSE SEELYE-MILLER

"TF ye abide in me, and my words abide in you, ye shall ask what ye will, and it shall be done unto you." Doubtless there are few Scriptural passages which have elicited more prayers than the above. Likewise, many disappointments have come from lack of answers to unwise prayers. The eager, grasping human mind sees the promise, "Ask what ye will, and it shall be done unto you," and rushes into a mad prayer for material advancement, material blessings, material good, possibly with a supposed faith that these prayers will be granted, and a supreme wonder and dismay that they are not, but without considering the condition imposed by the promise. All Bible promises have conditions, and without these they simply cannot be fulfilled. "Therefore if thou bring thy gift to the altar, and there rememberest that thy brother hath ought against thee; leave there thy gift before the altar, and go thy way; first be reconciled to thy brother, and then come and offer thy gift." In this case of asking what we will, we may bring our gift of prayer to the altar, but we must leave it there until we are reconciled to our brother. In this case "our brother" is divine Principle, the creator of man's spiritual being. When one is reconciled to this brother, one may depend fully upon the promises, and they will all be fulfilled. One may ask fully and freely and receive more than he can ask or think. "Hitherto have ye asked nothing in my name," said the Master: "ask, and ye shall receive, that your joy may be full."

Hitherto what we thought we asked was really nothing and allied to nothing, being merely requests for material things, which in themselves are "nothing" and have no satisfying power or possibility. This seems a little abstruse and difficult, but when we consider that all material things, because they are material, must eventually pass away, for they have no stability, no lasting power, no real substance, we may catch a glimpse of the substantiality of Spirit, the reality which can never be taken from us. And how, we ask, can one receive of this better and spiritual gift? The answer is given us in the first quotation of this article, "If ye abide in me." There is a mighty and potential "if," for when one truly abides in divine Spirit one cannot ask anything amiss or fail to receive according to one's needs, but away beyond anything one has ever asked, or thought, or hoped, or prayed for, because the gifts of Spirit are far beyond anything mere mortal praying can compass. "If ye abide in me"-if one abides in spiritual selfhood, recognizes the true self as the child of Spirit and not of matter, the channel is opened to receive all there is, because "all things are your's; and ye are Christ's; and Christ is God's."

One must live in Spirit and in Truth, and it is a much more simple thing to do than most of us begin to realize. A constant denial of materialism; a constant doing of the right things, the loving things, the true things; a steadfast desire to do all these and to leave nothing we should do undone,—this attitude will manifest that Mind "which was also in Christ Jesus." That Mind accomplished all things; that Mind never wavered over any demand, it matters not

what a crucifixion of the flesh it required; that Mind of Christ met and conquered every adverse belief in materialism by which it was assailed.

Mrs. Eddy says in Science and Health, beginning on page 349: "In Christian Science, substance is understood to be Spirit, while the opponents of Christian Science believe substance to be matter. They think of matter as something and almost the only thing, and of the things which pertain to Spirit as next to nothing, or as very far removed from daily experience." She also says on page 288, "Science reveals the glorious possibilities of immortal man, forever unlimited by the mortal senses."

We must, however, "abide" in this knowledge of the great truth of being, that true man is God's expression. Then shall be fulfilled to us the fullness of the promise, "If ye abide in me, and my words abide in you, ye shall ask what ye will, and it shall be done unto you." It is the logical conclusion that if we abide we shall receive whatever we ask. And there is another point: One must ask not as though one could tell the great Giver anything, but in a really receptive attitude, knowing that God gives willingly to all, but until we know we have needs-spiritual needs-we cannot receive. If we are not hungry we do not care for food, it matters not how plentiful it is, and if we are hungry and food is before us, it can give us no sense of satisfaction unless we partake of it. In Psalms we read, "Open thy mouth wide, and I will fill it," and when we have done so and have been filled, then shall we cry in the words of the prophet Hosea, "My God, we know thee."

"The time for thinkers"

ALMA LUTZ

"THE time for thinkers has come" is the dynamic statement of Mrs. Eddy on the first page of the Preface to "Science and Health with Key to the Scriptures" and we do well if we consider whether we as individuals can be counted among the thinkers. The human mind is disinclined to exert itself, and, with its belief of minds many, would rather gather in predigested thought, or fashion its thinking after that of another human mind more active or greater than itself. In this day and age, however, when the opportunities for intellectual development are so extensive, one would expect active exercise of the thinking faculty. We have progressed somewhat, to be sure, but at the same time there is a tendency toward "a little folding of the hands to sleep," while newspapers, magazines, lecturers, or our respected neighbors do our thinking for us, and we parrotlike voice their opinions.

Christian Scientists of all people should be thinkers. Most of them had to do a great deal of thinking before they accepted Christian Science. It meant leaving the religion of their fathers, or turning from agnosticism or skepticism to an understanding of God. It meant relying upon God for healing instead of upon more generally accepted material methods. It often meant estrangement from friends and relatives. Such steps as these could not be taken without deep thought or without turning to the Mind which is God for help and guidance.

Christian Science reveals religion not as something to be believed and accepted without reasoning or questioning, but as reasonable, understandable, and capable of proof. Christian Science when accepted and understood develops mental activity, broadens and uplifts thought. It teaches us not to look to human opinions for guidance or to material knowledge for wisdom, but above and beyond to the one Mind. .III:

If Abraham had been content to sink into apathy and 15 2000 accept the religious opinions of those about him, he would never have left the country of his fathers so that he might better serve the one God. Later, when he was tempted to sacrifice Isaac, as it was the custom among the neighboring tribes to offer child sacrifices to Moloch, he had to exercise a great deal of clear reasoning to be sure what his God required of him. God had blessed him bountifully and in return he was ready to express his gratitude. Surely his God was worthy of as great a sacrifice as Moloch. Ought he not be willing to offer his God the best that he had, his dearest possession, Isaac? We can well imagine his mental struggle as he journeyed to the mountain in the land of Moriah to sacrifice Isaac. He was willing to do what was right. Yet he must have questioned what kind of god would demand such a sacrifice. He knew that his God was not a cruel God. He had found that God protected His people, provided for them, and directed them. Thus, as he was seeking to know God, it was clearly shown him that it was not the divine will that Isaac be slain. He learned that God did not desire a dead but a living sacrifice, and thereupon he took Isaac home and brought him up a living sacrifice to God.

Throughout the Bible we find thinkers. Joseph stands out and Moses, and later the prophets. Amos, Hosea, Isaiah, and Jeremiah fearlessly denounced the idolatry. luxury, dishonesty, and decadence of their day. They would have been asleep to these evils had they not been thinkers. No one can read the writings of Paul without being impressed with the depth, clarity, comprehensiveness and fearlessness of his thinking. Where did these men lock for wisdom and understanding? To human beings about them? No. To the ever active, all-wise Mind. It was this which enabled them not to lose faith in humanity, but to rise above discouragement, above all the suggestion and anathy of their day.

Absolutely speaking, there is but one thinker, God, the source of all right thoughts, and these thoughts are continually passing to man. A man's receptivity to God's thoughts determines his capacity as a thinker. True thinking is not a process of the brain or of the so-called human mind, but is wholly spiritual and therefore ever active and indestructible. To be a thinker one must at least in a degree understand God; he must comprehend the true facts of being and acknowledge spiritual law. The thinker naturally rises above the suggestion and mesmerism of material living because he is dwelling in the consciousness of good.

Every day Christian Scientists are confronted with problems which demand active right reasoning. "For right reasoning there should be but one fact before the thought, namely, spiritual existence" (Science and Health, p. 492). Apathy and indifference will never work out problems. Dogma will never solve them, nor will vain disputations or mere words. Another cannot tell us how to solve our problem, nor can he do our thinking for us. When we are looking to persons for our opinions, we cannot be receptive to the divine idea. Each one of us must work out his problem with God. Another can help us only as he leads us to divine law.

When David volunteered to fight Goliath, Saul offered him his armor. In so doing he was urging upon David his out personal, material methods of defense. David refused the armor because he had not proved it. The armor that he had proved was the protecting power of God, and he turned to it again in the hour of need, saying, "The Lord that delivered me out of the paw of the lion, and out of

the paw of the bear, he will deliver me out of the hand of this Philistine." We, too, have a tried armor - spiritual understanding. We have as guides the Ten Commandments, the life of Jesus, and the Sermon on the Mount. Can we afford to substitute human opinions for these divine standards? We know that God will direct all right desires, that his angels will correct, vitalize, and govern our thinking, for on page 581 of Science and Health Mrs. Eddy tells us that angels are "God's thoughts passing to man; spiritual intuitions, pure and perfect; the inspiration of goodness, purity, and immortality, counteracting all evil, sensuality, and mortality."

The Symbol of the Sun

G. HAMILTON BERRY

N page 575 of "Science and Health with Key to the Scriptures" Mrs. Eddy tells us, "Spiritual teaching must always be by symbols," and in this connection it is helpful to review the wealth of instruction contained in the symbol or idea of the sun. To the unillumined human mind, before the advent of the light of Christian Science, the sun typifies the source of energy and wellspring of material existence. Anciently, sun worship was a common religion, and while the twentieth century mortal prides himself on being superior to a benighted heathen, it is found on examination that belief in the reality of matter and material existence is tantamount to worshiping the sun.

Now in the Bible it is plainly stated, "Thou shalt have no other gods before me," and this me is Spirit; and again, "Thou shalt worship the Lord thy God, and him only shalt thou serve." Nevertheless the majority of mankind have refused to obey the voice of Principle and give up their belief in material pleasure and pain. As the revelator of Truth to this age, Mrs. Eddy has taken the idea of the sun and translated it back into its original spiritual signification. Thus we read in the Glossary of Science and Health (p. 595): "Sun. The symbol of Soul governing man,-of Truth, Life, and Love."

Just as the sun's rays shining out clearly cause the ice to melt and the mist to vanish, so the glorious light of Soul, Love, Principle, is ceaselessly streaming forth, utterly vanquishing the frozen adamant of self-love and the clinging mist of subtlety. Nothing that is unlike God, good, can be truly real, and when once the sunlight of Truth is turned upon the false belief, it matters not what it claims to be, it simply and necessarily has to vanish into its native nothingness. The only thing necessary is that we turn to the light, get human selfhood out of the way, and let the light do its work, unhindered by the darkness of our material fears and fallacies. This turning constitutes the right way in Christian Science.

One of the great joys this sunlight of Truth brings is that it obliterates the sense of personal responsibility. Whatever the problem may be that presents itself for solution, we have the reassuring conviction, based upon personal experience, that the sun is still shining; that is to say, that Soul, Principle, is governing and always will continue to govern its idea, man; hence anything which claims to interfere with this government, be the belief sickness, lack, sin, discord, or contention of any sort, cannot continue even as a claim, but must be melted into nothingness by the radiant glow of divine Love. Our work is to prove, by denying false selfhood and following the Christ so far as we apprehend the teachings embodied in our Leader's writings, that Principle governs.

Sometimes the claim is made that time is required to demonstrate healing, and while this may seem relatively so to our present understanding, yet what encouragement to look for rapid healing is contained in the sentence found on page 504 of Science and Health, "The rays of infinite Truth, when gathered into the focus of ideas, bring light instantaneously, whereas a thousand years of human doctrines, hypotheses, and vague conjectures emit no such effulgence." While the demonstrations of our great Way-shower, Jesus the Christ, reveal an orderly state of progression from the simple to the greatest of all, one quality shines through all, -that of instantaneous results. The claim of animal magnetism in all its varied forms can be summed up as the hopeless attempt to focus darkness, and when once the futility of such an attempt is recognized, all fear of any possible ill effects from such a claim vanishes also.

The Infinite

CHARLES E. ANDERSON

ON page vii of the Preface to "Science and Health with Key to the Scriptures" Mrs. Eddy writes, "To those leaning on the sustaining infinite, to-day is big with blessings." To thousands of aching hearts these words have brought relief and comfort. The skeptic, to be sure, is likely to catch up the phrase, "sustaining infinite," and maintain stoutly that to lean on the infinite is to lean on the unknown and unknowable, and hence on mere superstition; but when one reaches a certain point of physical or mental suffering, he catches a glimpse of something beyond the cold reasoning of the philosopher; and then he does find himself leaning on the "sustaining infinite."

The word "infinite," which means boundless, has also had occasionally the popular meaning "vague" or "obscure." The vague limits everything. In the outward universe it confines everything within the narrow boundaries of time and space. What is going to happen to-morrow? What lies hidden within the past? What is taking place now beyond yonder hill? These are questions which the vague human mind can scarcely answer. Within, also, the dark abysses of intangible thought would supposedly bar expansion on every side. This so-called mind doubts, fears, errs, lies, and contradicts itself; it works general confusion and destruction.

The boundless, on the contrary, needless to say, is not vague; it is consciousness expressed—boundless consciousness. It is here and now. "To-day is big with blessings;" no false and self-contradictory standpoints of time and space are permitted to stand in its way. It knows all because it knows itself. Likewise, it knows naught but absolute harmony. It is self-existent and it is self-complete.

What, we may ask, is the essential difference between the vague and the boundless? It is simply the difference between the unreal and the real. The former is total unconsciousness; the latter is consciousness, perfect, pure, and clear. Consciousness is not only the key to existence; it is existence. The infinite is consciously expressed as man. It is the Ego, or real self, of every man and woman. Moses perceived it as the great I AM. Christ Jesus spoke of it as his Father. Mrs. Eddy explained it as both Father and Mother, Principle, Mind, Life, Truth, Love. Although sometimes couched in different terms, inspired thought of all ages has expressed something of the same idea.

It is, however, only as the real nature of the infinite is perceived, that it becomes practicable. This is in accord with common experience. No truth is practical until known. Just as the reality of every man is the image and likeness of

God, so the reality of every man's wants is the desire for good. We can see this fundamental desire at every turn. Man, being the unified idea of infinite Mind, is not in the possession of merely a group of more or less unrelated ideas, but of unified consciousness. Consequently, when one says, "The wish is ever father to the thought," he utters a tremendous truth, for the desire for good and the realization of good are identical, in as much as the realization is the further unfolding of right desire. If some one thinks he wants good and yet seems to lack it, he may be sure that his desire is not wholly for good. By discerning this error, however, he destroys it and so paves the way for sincere desire. In Truth, or the infinite, we have freedom to desire all good, and consequently to possess all good. Thought and action are one in the same sense that desire and realization are one. From the view of infinity the injunction, "Know thyself," becomes simply, "Know thy God, and man as His image and likeness." As one understands Truth, he is bound to do this. It is not hard to refrain from self-depreciating comparisons when one is looking steadfastly toward the infinite Ego, the All-in-all.

Man's business, then, is first to understand the infinite and then to press on in that direction. The vague will continue to give place to the unlimited, when, as Mrs. Eddy says in "Science and Health with Key to the Scriptures" (p. 323): "Beholding the infinite tasks of truth, we pause, —wait on God. Then we push onward, until boundless thought walks enraptured, and conception unconfined is winged to reach the divine glory."

Perpetual Unfoldment of Principle

ALLISON P. ALLINGHAM

HE carnal or mortal mind, under various aliases, all down 1 the centuries, has tried to drown or stifle the voice of Truth, but the law of God, operating silently, unobtrusively, counteracts this labored effort; and the voice of Truth is not Pharaoh thought that by drowning and cannot be stilled. all the male Hebrew children he could drown the Christ-idea and the voice of freedom, but God's protecting care and wisdom made the edict of the king to react against him, in having Moses brought up in his own home to become the great leader of the Hebrew people. Then history repeated itself, at the birth of Jesus, in the decree of Herod to destroy all the male children; but God again protected His idea. When Christ Jesus by his loving work and demonstration of healing had proved spirituality, mortal mind again sought to destroy the great Exemplar and those who by his teaching were substituting for the gross materiality of the age a knowledge of the unreliability of the testimony of the physical senses and the omnipotence of divine Mind to overcome selfishness, greed, dishonesty, deceit, self-aggrandizement, and the legion of erroneous beliefs.

On account of the limitations of the age, only a comparatively small class of students was able to comprehend the teachings of the Master, and when these had passed away their followers gradually lost the spirit and became more concerned with the letter of the Master's teaching, thus ascribing less to the power of divine Mind. With the introduction of the printing press and modern methods of transportation the world had become ready for the voice of Truth to be again heard, and Mrs. Eddy has in "Science and Health with Key to the Scriptures" declared to the world (Pref., p. vii), "To those leaning on the sustaining infinite, to-day is big with blessings." Throughout the book she enunciates in clear-cut phraseology the rules by which man

sciousness] of [LOVE] for ever."

in the image and likeness of God can know he is governed

by Principle and not by false beliefs, and closes these rules

with the beautiful interpretation of the twenty-third psalm

(p. 578), "Surely goodness and mercy shall follow me all

the days of my life; and I will dwell in the house [the con-

It was not to be expected, therefore, that mortal mind

would sit idly by and see its supposed kingdom despoiled by

the ever increasing and world circling demonstrations of the

law of Mind over material beliefs. Material belief says:

"Destroy the fountain of all this stream of healing, the

medium which is uncovering to mankind the facts of being,

and we shall have nothing to fear. We do not want man-

kind to loose the demons of hatred, malice, envy, greed,

jealousy, and all their kindred, else they will devour us. We

do not desire the pleasures of the senses taken from us;

we fear the austerity of a life 'hid with Christ in God,' so

we will have none of it." Thus the supposed mortal mind

reasons and, as subtly as ever the serpent spoke to Eve and

through her to Adam, so it suggests to students of Christian

Science that all is not well with the methods of dissemina-

tion of the gospel of healing and endeavors to stir up the

belief of self-destruction. Happily, however, the fact be-

comes more clear as the rules taught by Mrs. Eddy in her

textbook are applied, that her demonstration, the giving of

Truth to a weary world, was and is complete, and all the

shalts of error, envy, malice, and hatred cannot destroy or

hinder the unfoldment of divine Principle as the conscious-

Mortals have to learn that, as Mrs. Eddy says (Science

and Health, p. 403): "You command the situation if you

understand that mortal existence is a state of self-deception

and not the truth of being. Mortal mind is constantly pro-

ducing on mortal body the results of false opinions; and it

will continue to do so, until mortal error is deprived of its

imaginary powers by Truth, which sweeps away the gos-

samer web of illusion." And on page 306 she says, "Un-

disturbed amid the jarring testimony of the material senses,

Science, still enthroned, is unfolding to mortals the immuta-

ble, harmonious, divine Principle,-is unfolding Life and

Dear Lord, for Thou art everywhere,-

I stand directly 'neath the rays

Of vibrant Truth, of Love divine. My prayer, my speech, my soul are Thine. Selected Articles

["Compromise"—The Christian Science Monitor, Boston, U.S.A., June 24, 1920]

The human mind is a compromiser. The divine Mind, or Principle, is, by its very nature uncompromising; this is one of its essential characteristics. The infinite Mind, God, and its idea represents the fullness of all that is true, within which there is neither compromise nor halfway position. Truth is the only cause and is both unchanging and irrevocable, never possessing the slightest variableness. Man, Truth's full representation, is unalterably fixed and absolute, never recognizing any expedient or compromise. Facts are veritably stubborn things. Even the most plausible argument cannot alter them in the least. Divine, eternal Principle and its expression constitutes the completeness of reality, within which nothing can enter which defileth or maketh a lie. And it becomes self-evident, therefore, that within this realm of divine Principle, there is neither room nor opportunity for human belief or theory. The very nature of compromise involves making concessions; that is to say, all concerned therein must be prepared to abandon, in part, that which they are convinced is true. Such a course is foreign to the character of absolute truth, which is inscrutable.

A mathematical truth, for example, permits of no deviation. It prohibits the introduction of a false hypothesis or accepting a single false premise in any stage of a problem. The slightest deviation from this position will insure a faulty answer and prevent the externalization of the one and only right solution. Radical adherence to truth in every particular is requisite. Less than this would invite disaster. Let us assume that A is convinced that three and three equals five, and B, knowing the truth about the proposition, approaches A in the hope of healing him of the error by showing him the truth. B, however, finds A incensed at the suggestion of changing his view and utterly unwilling to admit the truth that the sum is six. A, because of self-will and pride, is inclined to compromise by accepting five and one-half as the solution. Granting that such a course might result in a restoration of good feeling between them, is it not plain that, irrespective of B's motive in yielding to the error, he would in fact be injuring his friend, for he could not escape perceiving that the acceptance of this false premise as true would inevitably lead to discord and confusion? Far better for B to see that, in time, A would be forced to recognize the simple truth than to attempt to compromise that which is on the face of it uncompromisable.

Precisely analogous is the attempt to accept the human or mortal mind as any part of God's plan. When the counterfeit is recognized it cannot be mistaken for the genuine. When light appears darkness disappears, for it is no part of it. When Mrs. Eddy, with her remarkable moral courage born of her revelation of Truth, declared that all is Mind and its idea and that there is no matter, all the wise men mocked and derided her although she was declaring the same truth as taught and practiced in the beginning of the Christian era; but these false opinions did not in the slightest degree weaken the power of Truth. Christ Jesus saw this plainly when he declared, "Heaven and earth shall pass away, but my words shall not pass away." This was evidence of his recognition of the immortality of his words, that could never be reversed nor compromised. Jesus of Nazareth perceived what Mary Baker Eddy again brought to light nineteen centuries later, namely, that even

F 67]

human opinions, though entertained by all alike, would not and could not alter the eternal facts one iota. His words, the expression of the divine truth, which he uttered for the deliverance of humanity could not perish from the earth.

"These two contradictory theories—that matter is something, or that all is Mind—will dispute the ground, until one is acknowledged to be the victor," Mrs. Eddy writes in "Science and Health with Key to the Scriptures" (p. 492). And then follow these uncompromising statements: "Discussing his campaign, General Grant said: 'I propose to fight it out on this line, if it takes all summer.' Science says: All is Mind and Mind's idea. You must fight it out on this line. Matter can afford you no aid. The notion that mind and matter commingle in the human illusion as to sin, sickness, and death must eventually submit to the Science of Mind, which denies this notion. God is Mind, and God is infinite; hence all is Mind. On this statement rests the Science of being, and the Principle of this Science is divine, demonstrating harmony and immortality."

The fidelity of Abraham, the moral courage of Moses, the devotion of David, and the obedience of Daniel serve to illustrate their resistance to any attempts to worship other gods in the place of the one infinite God, who is Love. The prophet Isaiah recognized the need of establishing a standard among the people and of holding fast to this divine Principle, for he declared: "I have set watchmen upon thy walls, O Jerusalem, which shall never hold their peace day nor night: ye that make mention of the Lord, keep not silence, and give him no rest, till he establish, and till he make Jerusalem a praise in the earth."

Christ Jesus never entertained a thought of compromise with error in any form. His terms were an unconditional surrender to the law of Mind or Truth. He was most uncompromising, never yielding to personal considerations of any kind. He saw that all judgment must be measured on the basis of the one Principle and not person, that the overcoming of error of whatsoever character, could be attained only in proportion to spiritual perception, operating in direct opposition to so-called material law. His defiance to these beliefs, called laws, was uniformly evidenced, in all his works. In the textbook, Mrs. Eddy has clearly set forth the position of Christian Science on this question. She says (Science and Health, p. 456): "Science makes no concessions to persons or opinions. One must abide in the morale of truth or he cannot demonstrate the divine Principle."

[Augustus Long in Reno (Nev.) Gazette]

In the Gazette of July 17 in a notice to the public from the city board of health the following statement was made: "If smallpox is prevalent in this city at about the time the schools open in September, this board . . . will require every school child to furnish satisfactory proof of vaccination, or of having had smallpox before allowing such child to enter school. . . . In case of refusal by parents or guardians to comply with the rules, upon religious grounds, the local health officer is hereby authorized and directed to exclude such unvaccinated children from attendance at school during the period of the epidemic."

The phrase "upon religious grounds" probably refers to Christian Scientists, as they rely upon Mind, God, not matter, for healing. Now we wish to promote all that is good and to suppress all that is evil, and no one more than the Christian Scientist deplores the spread of any disease, and he is conscientiously working along this line, at the same time

obeying the laws of our land. It is being shown that Christian Science is every day ameliorating the suffering from disease. Our main objection, however, is the methods employed by materia medica. Why should a child that is perfectly well be kept out of school because the parents, relying upon their own judgment and experience, firmly believe vaccination more harmful to the child's welfare than small-pox itself?

Under these circumstances is it fair or just to force children to submit to such treatment? Vaccination like other serum treatment is purely experimental, a mere theory without proof, and medical men themselves are divided in their opinion upon it. This being so, should the laity have this forced upon them?

Since it is conceded that smallpox emanates from filth, would it not be better to enforce the sanitary laws more rigidly and appeal to the press less to spread fear about this disease? It is conceded even by medical men that fear is a potent factor in the spread of disease.

The Christian Scientist believes in medical freedom as much as religious freedom. He concedes to every one the right to worship God in his own way, at the same time claiming the privilege of appealing to God Himself in case of need, whether this need be physical or otherwise. If mankind would only realize their ability to reflect good and not everlastingly be so fearful of disease they would go onward and upward away from the bondage of disease. Freedom is our true inheritance. Let us then know this and rely on Him, "who forgiveth all thine iniquities; who healeth all thy diseases." This is practical, this is sensible.

[From "History of American Journalism"-James Melvin Lee]

In spite of unsuccessful attempts in Boston, New York, Philadelphia, et cetera, to establish daily religious newspapers, Mary Baker Eddy, the Founder of Christian Science, made up her mind that she would start a daily paper modeled along lines which had been suggesting themselves to her for a long time in connection with her work. . . . She resolved that her newspaper, instead of being a mirror for reflecting destructive agencies, should be a journal to record achievements in every useful field of human endeavor. She accordingly started The Christian Science Monitor, in Boston, November 25, 1908. From the start the paper was more international in scope than most rivals in the secular field. Special attention was paid to commercial conditions in foreign lands in general, and in South America in particular. Art and education were given prominent positions in the paper; its religious propaganda was limited to a daily article on one of the back pages. From the first issue the paper was successful, due largely to the wonderful cooperation of the church of which Mrs. Eddy was the visible head. It is but justice to the Monitor to say that no paper has a higher standard of ethics. Its circulation has not been confined by any means to members of the Christian Science church.

[Louis E. Scholl in Chehalis (Wash.) Bee-Nugget]

In replying to this last tirade of abuse by an evangelist, I shall depart somewhat from the usual method of reply, and quote some recent utterances of the press that are pertinent, and leave the public to form their own conclusions.

If Christian Science were the "damnable cult" that the revivalist says it is, no sane or self-respecting person would be found identified with it, and assuredly no minister of the gospel could have a kindly word for it; but listen to this: Bishop Herman Page of the Protestant Episcopal Church,

speaking before the ministerial association of Spokane, said, as quoted by the Spokane Chronicle of April 5 last: "I know of nothing so remarkable as the growth of religious healing, and I know of no such movement so well organized as the Christian Scientists'. You can 'fool some of the people some of the time and some of the people all of the time,' but this is an age when people can get facts and truths, yet the Christian Science movement has grown, and it is an old one. The only reason I can see for this is that the people have received help through Christian Science."

Speaking of Christian Science, Rev. J. D. O. Powers, pastor of the People's Church in Seattle, said in the Post-Intelligencer of May 3: "It represents the very heart of the life and teachings of Jesus Christ also, i. e., his healing ministry and his assurance of immortality. Instead of damning it and its adherents and calling it bad names, if the church is to save itself, we must study it and incorporate in the practice of the church all the truth it has in its possession."

Also, Rev. Raymond Brooks, D. D., who is now pastor of the First Congregational Church of Berkeley, California, and who was formerly pastor of the Congregational Church in Walla Walla, before leaving his pastorate there, preached a sermon on Christian Science. In the Walla Walla Union he is quoted as saying in his closing remarks: "Indeed, I am persuaded that no one of the great denominations has brought a more significant contribution to our common life than has Christian Science, and I long for the day when the people of every name, the children of a common Father, can help each other to all the unseen helps available for physical health, moral strength, and spiritual vigor. When that day comes, as it surely is coming, we will all of us look back with profound gratitude for the help which has come to our common humanity through this great movement, to the origin of which we stand so near; and then we will clearly see that the Christian Science movement has been a mighty influence in helping to stem the tide of materialism which threatened to sweep the land and which had carried many people off their feet. It has been of incalculable service in an age given over to commercialism and paganism, in helping a multitude of people really to discover the supremacy of the spiritual, and to find comfort and quiet assurance in coming to know that God is nearer to us than breathing, closer than hands and feet, and that His power and love are available for us even now. More than this we can scarcely compute its value in furnishing men and women with an incentive to do just what the gospel of Christ has always called upon us to do, to live with a quiet mind, without worry, without anxiety. In many homes where discord and unhappiness prevailed it has introduced a cheerfulness and a quietness of trust which is exceedingly to be desired. It has taught charity in judging the deeds and motives of others. Indeed, the plain truth is, sad though it may be to confess it, that the religion of Jesus has become so conventionalized in many of our churches that the Christlike qualities of mind and of heart were no longer expected and many members of our churches, hungry and thirsty, have gone to Christian Science to find a fountain opened which seemed to have been closed in their own church homes."

[F. W. Reed in The Idaho Republican, Blackfoot, Idaho]

On page 107 of "Science and Health with Key to the Scriptures" Mrs. Eddy writes, "In the year 1866, I discovered the Christ Science or divine laws of Life, Truth, and Love, and named my discovery Christian Science." She immediately began teaching and applying the laws of this divine Christianity, and healing inevitably resulted. From that

time to this the spread of Christian Science has been rapid, and now its adherents are unnumbered and found in every part of the civilized world.

During its ministry of more than fifty years of healing, countless thousands have testified of its healing efficacy. It is also true that during that time no one was ever healed through Christian Science by the concentrated thought of the healer or patient. When, therefore, the assertion was made in a recent issue of your paper that the Indian sun dances "are devotional affairs, and dancers concentrate their thoughts and determination on being well and strong, pretty much the same as Christian Scientists do in their more quiet way of healing," an unwitting error was committed.

If there is one thing that is made plain in the Christian Science textbook, "Science and Health with Key to the Scriptures," and in all of Mrs. Eddy's other writings, it is that the human mind is not a factor in the process of Christian Science healing; and nothing in her works can even be remotely construed to teach the healing of disease or sin by a process of human mind concentration. If cures could be wrought in that manner, which Christian Science disclaims, it would amount to nothing more nor less than mesmerism, or the operation of one human mind over another human mind. This would, necessarily, be a kingdom divided against itself, which Jesus said could not stand. "If Satan cast out Satan . . . how shall then his kingdom stand?" Mrs. Eddy has explained this on page 144 of the Christian Science textbook, where she says: "Human will-power is not Science. Human will belongs to the so-called material senses, and its use is to be condemned. Willing the sick to recover is not the metaphysical practice of Christian Science, but is sheer animal magnetism. Human will-power may infringe the rights of man. It produces evil continually, and is not a factor in the realism of being."

Christian Science teaches that mankind is made well and strong, and kept so, through the understanding of a perfect God, and that man, created in the image and likeness of God, as the Bible declares, must likewise be perfect. It is the demonstration of this knowledge obtained from the study of Christian Science, which is available to all, that makes the sick man well, the bad man good, and the good man better.

[Written for the Sentinel]

Love Knows the Way

ROBERT E. CROSSLAND

GOD clothes the birds and flowers fair;
Love knows the way.

This thought goes with me everywhere,
Love knows the way.

Oh, blessed thought, that fills each day
With peace and joy—Love knows the way.

Love fills my life with all things sweet;
Love knows the way.

Love forms the pathway for my feet,
Love knows the way.

Oh, blessed thought, that fills each day
With peace and joy—Love knows the way.

I do not know what lies before;
Love knows the way.

I only need to trust and say,
Love knows the way.

Oh, blessed thought, that fills each day
With peace and joy—Love knows the way.

Steadfastness

Nonopy appreciates the character of a trimmer. In spite of Halifax's brilliant and ingenious defense of the tribe, the world recognizes something unstable and mean in the mentality which produces one. Halifax himself may be regarded as an exceptional specimen, born of a particularly nicely balanced objection to extremes. And yet the man who follows Principle instead of person may find himself at any moment passing from side to side, as those sides sway with unrestrained momentum from extreme to extreme.

The question therefore arises, What is a trimmer? and most people who study the political conditions amidst which Halifax found himself would probably agree that he sailed far nearer to Principle than the whole-hearted exponents of party, on either side of him. The curious part of the matter is, however, that it is really the parties which change and not the trimmer, if the trimmer is holding to a straight and scientific course. Halifax left this party and that party because in office they tended to abjure the very ideals for which they had contended in opposition. He was on the side of the persecuted and the ostracized, that is to say, in the day of their persecution and ostracism, but when they obtained power, he declined to follow them in persecution and ostracism of their opponents. In his way, then, and in circumstances of great difficulty, Halifax made the name of trimmer a title of honor. But one Halifax does not make a political millennium. The ordinary trimmer is a man who takes advantage of conditions to improve his own opportunities, and acts selfishly and cravenly where his opponent may act courageously though violently.

If Halifax had possessed a real understanding of Principle, he might have steered a scientific course amidst the breakers, or he might have yielded to the prejudices of his education, and remained the trimmer of his own defining to the end. It is because the world knows so few Halifaxes that its dislike of trimmers has degenerated into a contempt. Yet in estimating the character of the trimmer it is necessary to take into consideration the various elements which go to form it. And in the end it will be found that, as in so many other cases, it is the motive which is the test of the result. At the same time, motive is one of the most difficult things in the world to estimate. A man may ask himself every morning and every evening what his motives have been for the course he may have pursued; and in spite of every effort to answer truthfully, he may persuade himself by the most egregious reasoning of almost anything. It would be difficult to say if Mr. Pecksniff really appeared to himself such an unmitigated fraud as he did to his "venerable friend" and to everybody else who knew him.

The difficulty of forming a conclusion is, of course, whether the individual knows it or not, owing to the mental suggestion by which every one is oppressed. In times of great stress this mental pressure is redoubled, and the

occasion for taking stock of the situation and protecting one's self against this aggressive suggestion is increased. It is a significant fact, to be taken into consideration by every student of Christian Science, that Mrs. Eddy's writings contain five passages which can be construed as daily prayers, and every one of these resolves itself into a realization of the nothingness of suggestion and the omnipotence and omnipresence of divine Mind. Thus, on page 40 of the Manual of The Mother Church, she declares, "The members of this Church should daily watch and pray to be delivered from all evil, from prophesying, judging, condemning, counseling, influencing or being influenced erroneously." On the next page, in the Daily Prayer, she insists, "It shall be the duty of every member of this Church to pray each day: 'Thy kingdom come;' let the reign of divine Truth, Life, and Love be established in me, and rule out of me all sin; and may Thy Word enrich the affections of all mankind, and govern them!" Whilst, on the very next page, again, she writes: "It shall be the duty of every member of this Church to defend himself daily against aggressive mental suggestion, and not be made to forget nor to neglect his duty to God, to his Leader, and to mankind. By his works he shall be judged,—and justified or condemned."

Now the necessity for this protection is made very clear in the last words of the third quotation. Mrs. Eddy does not give any hope to the individual that he will be judged by good intentions. Principle knows nothing of human intentions; and the human being acts either in obedience to Principle or in disobedience. It is not in the least good, so far as the immediate result is concerned, for the person who has made a miscalculation in a mathematical problem to declare that he has done his best; the result remains wrong all the same. It would not save a man who stepped over the edge of a platform to explain afterwards that he was honestly certain he was several feet from the edge; the result would be precisely the same, in spite of his honesty of convictions. A right motive may make it easier for a person to recover his course than a wrong motive, but for the time being he will have lost his way all the same. That surely is what Mrs. Eddy means by saying, "By his works he shall be judged,-and justified or condemned."

The necessity, therefore, becomes apparent for the perpetual examination of motives, and for the incessant alertness to protection against mental suggestion. No man knew this better than Paul when he counseled the Romans to continue instant in prayer. Not, of course, that Paul meant that a man was never to leave off praying, so far as the repetition of words was concerned, but he did mean that he was never to forget that temptation lay perpetually before him, and that evil was perpetually suggesting to him that he should accept this temptation; and that he should, therefore, protect himself against this suggestion by realizing the scientific fact, so determinedly dwelt upon by Christ Jesus, of the unreality of evil and the omnipresence and omnipotence of Principle. This is why it is so absolutely necessary that the individual should never give in for one moment to the evidences of the senses, never permit his thoughts to dwell on the material counterfeits which form distorted images, and so persistently suggest the very things which he is endeavoring to thrust behind him. "One thing I have greatly desired," Mrs. Eddy writes, on page 127 of "Miscellaneous Writings," "and again earnestly request, namely, that Christian Scientists, here and elsewhere, pray daily for themselves; not verbally, nor on bended knee, but mentally, meekly, and importunately." FREDERICK DIXON.

What Is Schooling?

In the autumn when the public schools are beginning their sessions, it is well for parents, teachers, and pupils alike to answer for themselves anew the question as to what schooling is. It is not merely the learning of what are called facts. It is not, on the other hand, simply training in how to do things. It is not even just a study of the way in which seeming human knowledge is used in daily living. If education were nothing more than the sort of formality that has been developed by mortal teachers throughout the centuries, it would indeed be limited and of little value. Reasoning in accord with Principle is the truth of education, which is much broader than any academic system. What is essential is the unfoldment of divine Life itself as activity in conscious order. This is the ideal expression of infinite Mind. of which any mortal form of drill is, at the best, a very unsatisfactory counterfeit.

Since this is so, one may naturally ask why any kind of human instruction is ever worth while. Why should one go to school at all, or try to learn theories that are changing every instant? The answer is, that for such a makeshift sense of discipline there must be the true idea. The work of each one, in school or out, is to discern and prove the true idea in place of the supposed opposite. That is, each one should take both scholastic lessons and seeming daily experience as opportunity for knowing Truth and practicing in accord with it. Schools will be improved in proportion as their false theories give way to the demonstration of infinite Principle. Each one who turns his whole attention to Princiole aids in this improvement even while he is proving his own education. No present sense of things can be effectively done away with until it is actually displaced by the divine ideal. Going to school, sending one's child to school, or teaching school, must always be, then, when rightly considered, real opportunity for expressing infinite Truth.

This schooling is never limited, of course, to human methods. All genuine doing, all conscious manifestation of divine intelligence, is education, since it can exist only as the unfoldment of Principle. Such activity is the constant realization of Immanuel, or "God with us," taking the place of suppositional ignorance and inaction. In other words, the continual finding of the omnipresent Christ, as the allsufficient interpreter of omnipresent God, immortal Mind, is eternal schooling. The true idea, manifesting the one Mind, incessantly displaces false beliefs. This is progressive salvation. To turn one's attention wholly thus to divine Principle and its idea is to depend upon God and the Christ, Father and Son, demonstrable cause and effect, as the sole instructive power. The unfoldment of the one infinite Mind and its one infinite manifestation is the only real learning. Sooner or later all engaged in education of any sort must recognize their responsibility for the knowing and proving of this truth. On page 18 of "No and Yes" Mrs. Eddy declares, "If the schoolmaster is not Christ, the school gets things wrong, and knows it not; but the teacher is morally responsible."

Repeating this statement in a somewhat different form, Mrs. Eddy says on page 365 of "Miscellaneous Writings," "The school whose schoolmaster is not Christ, gets things wrong, and is ignorant thereof," a sentence which she precedes with the declaration, "Human theories weighed in the balances of God are found wanting; and their highest endeavors are to Science what a child's love of pictures is to art." The student of Christian Science is indeed glad that his genuine education is continuous as Principle scientifi-

cally expressed. Daily such a one, through earnest individual effort in the practice of Christian Science, rejoices in broadening ability, unfolding appreciation of good, actual achievement. The effective effort is not, of course, any mere trying to do something; it is the manifestation of the divine power, the energetic display of intelligence, that is as much more than human striving as success is more than futile attempt. Any so-called endeavor which fails is sheer ignorance to be scientifically corrected by the understanding of omnipresent Mind. Divinely scientific understanding is, thus, "God with us" to save from any suppositional ignorance, through the demonstration of the true man's unlimited ability. With the declaration of this understanding as present, there is no room nor time for getting things wrong, for ignorance, or for futile struggling with mere theories of any sort. On the contrary, to affirm the omnipresence of unfolding Principle is to find that the Christ does indeed furnish the true idea in place of any seeming. Thus only does one demonstrate ever broadening ability in the expression of divine intelligence.

On page 183 of "Miscellaneous Writings" Mrs. Eddy says: "Man is God's image and likeness; whatever is possible to God, is possible to man as God's reflection. Through the transparency of Science we learn this, and receive it: learn that man can fulfil the Scriptures in every instance; that if he open his mouth it shall be filled—not by reason of the schools, or learning, but by the natural ability, that reflection already has bestowed on him, to give utterance to Truth." In no way does Christian Science teach that education is not necessary; but Christian Science is showing to the world a broader ideal of education than any human theory has conceived of. Mrs. Eddy herself exemplified throughout her experience, and especially in her writings, this boundless education which comes from Principle.

Since the divine Mind and what the divine Mind knows must be the only consideration for true schooling, the advantages of education are equally for all, no matter what one's human training may have seemed to be. It is never too late to know God as the source of all wisdom. Any human sense of years or lack of years has nothing to do with spiritual unfoldment going on throughout eternity. Now is exactly the right time for the happy replacement of both ignorance and so-called false knowledge with the wisdom which is inherent in omnipresent Mind. There is no reason for either self-reproach or condemnation of others because of seemingly hampering conditions of a mortal past which really, in the realm of the divinely eternal now, never existed. Knowing that divine Love is absolutely conscious of spiritual unfoldment as the reality of man, one necessarily rejoices in infinite revelation daily. GUSTAVUS S. PAINE.

Among the Churches

*** * ***

Current Notes

NEW YORK, N. Y.—Plans have been filed for the erection of the edifice of Sixth Church of Christ, Scientist, to go up at the northwest corner of Anthony Avenue and Echo Place in the Bronx. The structure is to cost \$350,000, according to the estimate of the architect, and will occupy a site measuring 80.8 feet by 95 feet.—New York Tribune.

MILWAUKEE, WIS.—Christian Science organizations of Milwaukee, consisting of three churches and one society, have made steady progress in increased attendance at their Sunday services and Wednesday evening testimony meetings. During the last year fourteen lectures on Christian Science have been given in Milwaukee by lecturers authorized by The Mother Church in Boston, Massachusetts, one of which was a noonday lecture at the Majestic Theater, and one given at the Milwaukee County House of Correction, at the invitation of the inmates.

In addition, regular meetings are conducted at the House of Correction, County Jail, and at the County Infirmary. That many healings took place at these meetings is the testimony of witnesses.

Services are also held in the State Prison at Waupun and at the State Reformatory at Green Bay. Reports of prisoners who have been interested in Christian Science and who, upon release, have made good, are on record. Financial assistance rendered to released prisoners by a committee appointed by the churches has been returned in almost every case.—Milwaukce Journal.

SEATTLE, WASH.—Plans have been completed for the building of a large masonry church structure to be known as Sixth Church of Christ, Scientist, and construction is to be started without delay at the corner of Forty-second Avenue Southwest and Lander Street. The plans call for a two-story building 109 by 76 feet in size, to cost approximately \$50,000. West Seattle Scientists have long felt the need of a suitable structure sufficient in size to accommodate the large congregation and the new edifice will meet all present requirements. No contract has yet been awarded by the architect.—Scattle Journal of Commerce.

Hamilton, Ohio.—The large hall over the Oxford Theater which is to be used by the Christian Science Society will soon be ready for use as a meeting place for the society. The walls are being decorated and a change made in the arrangement of the windows. The hall will be partitioned, making two rooms with the smaller in the rear. It is hoped that all the work will be finished within two weeks.

Republican News.

ONTARIO, CALIF.—Euclid Avenue, Ontario's far famed, two-hundred-foot wide avenue, lined with handsome homes and notable public edifices, will have another splendid structure added to it before long. The Christian Science Society of Ontario has bought two lots at the southeast corner of Euclid Avenue and G Street, and plans to build a handsome home of worship there. The congregation now worships in its own church in West B Street. It is of bungalow type, modern and excellent in every respect except that it is too small to accommodate the growth of the congregation. It is planned to move off the house now at G and Euclid, sell the West B Street structure, and build a fitting temple of worship at Euclid Avenue and G Street. The Christian Science Society of Ontario embraces all of that faith in Ontario, Upland, and the whole west end of San Bernardino county. The membership has been growing steadily.—Ontario Report.

Admission to Membership in The Mother Church

The next admission of candidates will take place on November 5, 1920, as provided in Article XIII, Section 2, of the By-laws of The Mother Church. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before Friday, October 22, 1920. Consideration of any applications received after that date will be deferred until the June 3, 1921, admission.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to June 5, 1920, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

Charles E. Jarvis, Clerk,

236 Huntington Avenue, Back Bay, Boston 17, Mass.

The Lectures

PACIFIC GROVE, CALIF.—Lecturer introduced by W. Edson Smith, who said in part:—

Nowadays the world is wiser. It is ceasing to criticize person and performance and, instead, is turning more and more to the love reflected; to that living, working Principle of Christian Science which solves all problems, heals all diseases. That the world may understand more of this working Principle which Jesus applied so well, Christian Science lectures are given.

The lecturer of the evening is a member of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, Massachusetts, and, as such. comes well qualified, duly authorized; comes in the way Mrs. Eddy speaks of in a letter to the Board of Lectureship on page 248 of "The First Church of Christ, Scientist, and Miscellany," where she says, "You go forth to face the foe with loving look and with the religion and philosophy of labor, duty, liberty, and love."

The subject, Christian Science, needs no lengthy introduction either. You have here a branch of The Mother Church with its Wednesday evening testimony meetings; a free lending library and reading room where may be read and borrowed or, if you like, purchased, the Bible and the Christian Science textbook, "Science and Health with Key to the Scriptures," also the Christian Science literature instituted by Mrs. Eddy,—the Herald, now printed in French as well as German, the Science, the Journal, and that great newspaper, world-loved and world-loving, The Christian Science Monitor.

Moreover, our Leader, Mary Baker Eddy, has said, beginning on page 149 of Science and Health, "To-day there is hardly a city, village, or hamlet, in which are not to be found living witnesses and monuments to the virtue and power of Truth, as applied through this Christian system of healing disease." It is my privilege to be one of these witnesses. Hereditary laws—lies—were laid down for me when I was born. At the age of sixteen I knew what it was to be a drunkard. Sixteen years later, a compassionate Christian Science practitioner drew me from the depths you may conceive, ridding me of that physical infirmity by one Christian Science treatment. Again, I have seen the child of our home with a great burn all down one side of his face—a burn which medical theories would have pronounced painful, disfiguring. Yet he fell asleep within the hour under Christian Science treatment, and in a week or two, with no pain, every shadow of the scar had gone. And I have seen my wife many years ago in the agonizing grip of rheumatism supposedly incurable; but it too vanished by grace of Christian Science-never to return.

FAR ROCKAWAY, N. Y. (First Church).—Lecturer introduced by Mrs. Stella Eiseman, who said in part:—

The first recorded word of the Supreme Being is, "Let there be light." This light, although dimmed and obscured at times, has never ceased to shine, or to reveal itself to those

Digitized by Google

who have earnestly sought its enlightening rays. Centuries of darkness pass, and it is recorded by another inspired writer, "The people that walked in darkness have seen a great light." After generations of slavery the children of Israel sought this light and were led out of the bondage of Egyptian darkness into the glorious light and liberty of the promised land; but they soon began to follow the strange gods of the nations around them, and forgot the divine command, "Hear, O Israel: The Lord our God is one Lord." The light was again lost sight of, and there followed another long night of bondage to ignorance, doubt, superstition, and fear. Then, weary of their wanderings and of the failure of their false gods to help or to save them, they remembered the God of their fathers, and in their distress turned again to the never failing light of the one supreme intelligence to guide them. Their prayer was answered in the fulfillment of the prophecy of Moses, the first great deliverer of Israel. Then it was that over Israel's night "the Sun of righteousness" arose "with healing in his wings" in the person of Jesus of Nazareth, Jesus the Christ, or Messiah, who astonished all who heard him with the startling statement, "I am the light of the world: he that followeth me shall not walk in darkness, but shall have the light of life." And what astonished them still more was that he proved his words by his works in the healing of the sick, the sorrowful, and the sinning, and after instructing his followers to do the same, he added, "Let your light so shine before men, that they may see your good works, and glorify your Father which is in heaven."

The same idolatrous condition of thought, however, which led the children of Israel into bondage and captivity. led also to the deifying of the man Jesus and to the consequent loss of the light of the Christ, Truth, which he came to reveal and to establish. But although obscured and hidden by the mists of man-made creeds and doctrines, this new-old light still shone in the darkness, though the darkness comprehended it not, until in the latter part of the nineteenth century a pure, selfless, spiritually minded seeker of the light, Mary Baker Eddy, discovered through the gloom its shining rays and gave to her discovery the name Chris-

NEWPORT, N. H. (Society).-Lecturer introduced by Mrs. Alice R. Mooney, who said in part:-

In II Timothy we read: "All scripture is given by inspiration of God, and is profitable for doctrine, for reproof, for correction, for instruction in righteousness: that the man of God may be perfect, throughly furnished unto all good works." We feel that these words quoted from Timothy are true. Mrs. Eddy tells us in "Science and Health with Key to the Scriptures" (p. 241), "The error of the ages is preaching without practice." At a time when the problems confronting us seem so stupendous and the need of understanding is so great, it is right that honest seekers after Truth avail themselves of every opportunity for instruction.

We have with us to-night one well qualified to enlighten us on a subject of vital importance to each child of God.

Merced, Calif. (First Church) .- Lecturer introduced by E. T. Cunningham, who said in part:-

It seems there never was a time in the history of the world when men needed a Savior more than they do today.-a Savior that can save them now, one that can teach here and now in this busy world of strife and tumult how to become strong, healthy, and successful. These are the things that are vital to the busy man. The inevitable time has arrived when if we are to get the results we are expecting we must awaken and learn that we have a Savior and that we can prove his presence.

Nearly two thousand years ago Simon, the fisherman, and his brethren complained of poor business, having toiled all the night and caught nothing. The great Galilean Prophet told them what to do to get results. This same advice is applicable to-day: "Cast the net on the right side."

St. Louis, Mo. (First Church).—Lecturer introduced by Mrs. Julia W. Thomas, who said in part:-

The purpose of these lectures is by this time so widely known that it is hardly necessary to define it. Our Mother Church sends out a body of consecrated men and women whose rich and generally hard-won experiences entitle them to explain the nature of Christian Science and the effect of its application to human needs. Really, each of them tells in his own way the same old story of Jesus and his love, and of his works, which he said were possible to his devoted followers in all ages.

REDONDO BEACH, CALIF. (First Church).—Lecturer introduced by Mrs. Mary A. Hoffman, who said in part:-

Whether we come out of idle curiosity or a sincere desire for good, divine Love is here ready to bless every heart that will receive. In the Bible we read, "Ye shall seek me, and find me, when ye shall search for me with all your heart." Just in the degree that we seek the spiritual understanding of God and man's relationship to Him, and apply it in our daily life, do we gain health, happiness, and holiness .- Redondo Breeze.

Lectures to be delivered

By Members of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, U.S.A.

ENGLAND-London (Third Church): Church Edifice, Curzon Street, Piccadilly, Mayfair, W. 1, 8 p.m., Oct. 15.

Iowa-Sioux City (First Church): The Auditorium, 8:15 p.m.,

Kansas-Marysville: Liberty Theater, 3 p.m., Oct. 3. Topeka: Grand Opera House, 3 p.m., Sept. 26.

MICHIGAN—Muskegon: Elks Temple, 8 p.m., Sept. 30.

MISSOURI—Kansas City (First Church): Church Edifice, 9th
Street and Forest Avenue, 8 p.m., Oct. 1.

Mt. Washington: Moss Hall, Independence Road and Arlington

Avenue, 8 p.m., Oct. 1. New York—Glen Cove: Danis Building, 9 West Glen Street, 8 p.m., Oct. 8.

New York (Twelfth Church): Grand Ballroom, Commodore Hotel, 3:30 p.m., Oct. 3.

TENNESSEE-Memphis: Church Edifice, Dunlap and Munroe Streets, 8:15 p.m., Oct. 4.

[Written for the Sentinel]

A Song of Deliverance

E. B. SARGANT

HOW can the heart be filled with fear That knows the love of Love? What arm can fail if Truth appear Below, around, above?

Through Christ is Love forever shown, Through Christ the truth is given; For God is Love, and God alone The Life of earth and heaven.

Triumphant Truth, triumphant Love, Triumphant Fatherhood, In Thee we live, in Thee we move, O unity of good!

Testimonies of Healing

It is with a heart overflowing with gratitude for the inestimable blessings that have come to me through the study and practice of Christian Science that I am offering this testimony, in proof of its healing efficacy.

Christian Science was brought to my attention about ten years ago when my son was healed of appendicitis in three days. At the same time my wife was healed in one treatment of an ailment of many years' standing. At that time I was a hopeless sufferer from many ailments, one of which was pronounced incurable by one of the best physicians, being inherited through three generations. After reading Science and Health for a short time my thought was so enlightened by the spirit of Truth that I was healed instantaneously of what was called chronic stomach trouble. My joy and gratitude to God and to our dear Leader, Mrs. Eddy, for this practical religion, which she restored to a world hungry for Truth and Love, are boundless.

Through the sincere study and application of the truth, bowel disorder, kidney trouble, rheumatism, and many other ailments have dissolved into their native nothingness. Untold blessings come to me continually through the work of teaching a class in the Christian Science Sunday school, for which privilege I am most grateful. In this capacity I believe one has the best of opportunities to serve God and mankind, and the reward is great. I can now understand the Master's love for children.

I wish to testify to the availability of Christian Science in every emergency. In our textbook Mrs. Eddy tells us (Science and Health, p. 424), "Under divine Providence there can be no accidents, since there is no room for imperfection in perfection." This statement has been to me of great value, as I have proved it to be true. On page 128 of the same book we find, "From this it follows that business men and cultured scholars have found that Christian Science enhances their endurance and mental powers, enlarges their perception of character, gives them acuteness and comprehensiveness and an ability to exceed their ordinary capacity." This in connection with the Golden Rule applied to business is bringing me wonderful results.

I am very grateful for all of these healings but especially for the spiritual regeneration and peace, for the realization that God is an ever present help, and for the ability to do something for mankind in return for the many blessings received.—Charles Adelhelm, Chicago, Ill.

As my husband has mentioned my healing, I would like to say that his statement is true. We have been wonderfully blessed since we took up the study of Christian Science, and we are daily striving to live up to its teaching. I am grateful to our revered Leader, Mary Baker Eddy, that she has given to the world this wonderful truth.

(Mrs.) THERESE ADELHELM.

I wish to express my gratitude for the many blessings received through Christian Science. It has been about nine years since I first became interested. I was hungering for spiritual food at that time but did not know it. I thought there was nothing left for me but death and prayed in the old way to pass on, not so much because of ill health but because of sorrow, discord, darkness, despair, and loneliness. But this wonderful truth was shown to me like a light in the dark, healing me of these seeming discords.

Sometimes there would be struggles, and self-pity would creep in, but by reading the chapter on Prayer, also the chapter on Marriage I would be uplifted, and as time went on things grew brighter. After five years of study of our textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, my husband was healed of the liquor habit. He had had that false appetite for several years and is now entirely free from it. We began to progress, prosperity came to us, our home came to us through divine Love. That was four years ago. The poem, "Feed My Sheep," written by our Leader, the first stanza of which is:—

Shepherd, show me how to go
O'er the hillside steep,
How to gather, how to sow,—
How to feed Thy sheep;
I will listen for Thy voice,
Lest my footsteps stray;
I will follow and rejoice
All the rugged way,

has been my prayer and has helped me up the steep places. I have been healed of chronic constipation of nine years' standing, also granulated sore eyes, one eye being blind. I had tried many doctors and material remedies for twenty years and have been healed of this disease for six years, and read quite a bit without the least discord. I am most grateful for the spiritual awakening, and know I have indeed found the "pearl of great price." I thank God for giving us a Way-shower, Christ Jesus, and for Mary Baker Eddy, who gave us "Science and Health with Key to the Scriptures." I am also grateful for her other writings and the Christian Science literature, for I receive so much good from each article read.

(Mrs.) LULU M. MARTIN, Los Angeles, Calif.

I wish to corroborate the above statement of my healing in Christian Science. I was healed four years ago by treatment from a practitioner.—Steve S. Martin.

4

I desire to express my gratitude for the good which I have received through Christian Science. For some time I had been suffering from erysipelas and was greatly troubled with headaches. Through an acquaintance my attention was attracted to Christian Science. With great faith I went to a practitioner, who declared the truth for me. With great joy I can testify that I am no more troubled with either of my former complaints and that I feel entirely well. With my whole heart I express my gratitude for the love and benefit which I have received.

(Miss) BERTHA KALAUCH, Dresden-Cotta, Germany.

It is with a heart filled with gratitude and love that I write this testimony, hoping it will be a help to others. A short time ago I was asked by a lady, over the telephone, if I were free to nurse for her. She explained that most of her household were very ill with influenza. I told her I was sorry I could not help her as I was then on a case, and I went away from the telephone feeling very sorry for her and with a mental picture of the suffering family. Within two hours of this conversation over the telephone I found myself suffering from every symptom of influenza, and I felt so ill I thought I must ask a practitioner for help, but there were reasons why I could not do so. I then saw clearly that I must do the work myself, and realized very clearly that God is here, a very present help, and that I had let my thought become filled with thoughts of disease instead of knowing only good. I at once tried to blot out of my thought this false picture and to keep my thought just filled with Truth and Love, and although when I went to bed the suggestion came to me that I would soon wake feeling much worse I just put the thought from me and in a few hours awakened to find that every symptom of the disease had vanished and I was feeling uplifted in body and every way.

Christian Science has altered my whole life. When first I started to read "Science and Health with Key to the Scriptures" almost ten years ago, I never knew what it was to feel well and happy; now I only know perfect health. It has sustained me during the most strenuous times, once while I nursed a sick baby and could not go to bed for a fortnight. It has also helped me to overcome lack. When I realized that all supply is spiritual then I found I had more than I needed materially. I am filled with gratitude for the spiritual awakening, and for the joy and peace it brings to me when I have to be away from those who are dear to me, in knowing that there is only the one Mind. I am grateful to Mrs. Eddy, who gave us Science and Health.

(Miss) RUTH TROKE, Steep, Petersfield, England.

٠

It is with gratitude I give this testimony with the hope of helping some one along the road from error to Truth. When Christian Science was presented to me some six years ago, I was very much discouraged as my health was failing rapidly. My physician gave me no encouragement, not knowing what the trouble was. After seeking help through chiropractic and osteopathic treatments and not receiving any benefit therefrom, I turned to God to direct me to some means to health and at this stage of discouragement Christian Science found me. My mother years ago had taught me to beware of false prophets, and she thought Christian Science was a false teaching, but when a kind neighbor offered me "Science and Health with Key to the Scriptures" by Mrs. Eddy, I accepted the opportunity, and in reading this book the first day I received a healing of inaction of the bowels of seven years' standing. The third day I laid off my glasses which I had been wearing for astigmatism. These healings were a great revelation to me, they gave me faith and a desire to know more, and I have studied and worked along with the aid of practitioners.

I am very grateful for a little understanding of God and man as taught in Christian Science. I have received many healings, such as the overcoming of chills and fever, which I had had ever since a child, also sick headaches, poison oak, grippe, and tonsillitis. I had an instantaneous healing of an injury to the eye, which was apparently very serious, also of the effects of a severe fall. I am most grateful for a healing of the seeming reality of evil suggestion. In all of my study up to a little over a year ago these suggestions seemed overwhelming. I have always had a strong sense of what I thought was right, and if my fellow beings did not come up to this standard of my judgment of what was right, pure, and honest, I was ready to criticize and condemn. I am very thankful to God that I had an occasion to be shown that this was error, and with the help of God it has been overcome.

Words cannot express the gratitude I have for this healing and for the many physical healings I have had. I am very grateful for Christian Science and for what it is doing for mankind.—(Mrs.) MARTHA HORN, Portland, Ore.

4

While reading the Sentinel I was healed of a very bad cold I had had for a number of days, and was prompted to give my testimony. I have been putting it off for a good many years. Ofttimes the thought would come: Why do

you not give yours, perhaps some one would get help from it, the same as you do from those of others. I have been in Science a good many years. First I was healed of what the doctor pronounced tuberculosis, and I had violent hemorrhages at times. I tried doctors far and near but none could help me. They were very kind and did all in their power, but to no avail. At last a friend of mine suggested Christian Science to me. First I made light of it, then I began to think about it, and as long as the doctors could not help, I thought I would try it. I was very miserable and this was to be my last resort. If Christian Science did not help me I would just wait until my time came to go; but thanks be to God for His goodness toward me, to-day I am a well woman and am working every day. I have been helped in a good many ways and have been healed of sick headaches and many other ailments. I am a member of The Mother Church and belong to a Society six miles away. I am very thankful to Mrs. Eddy for her discovery of the truth which the world needs so much, also for her wisdom in providing for us our literature, which is such a help. I want to thank all of the Christian Science friends who have helped me in the straight and narrow way to health and happiness.

(Miss) IDA L. KLAMPE, Dodge Center, Minn.

4

It is with joy that I testify to the good that has come to me through Christian Science, for it has indeed brought me health and much happiness. When I first heard of it many years ago it did not in the least appeal to me. I was then a member of a Congregational church, and an ardent Sunday school teacher. Gradually, however, I became dissatisfied with my religious teaching and lost all interest in church activities. It was not until my mother had a paralytic stroke that I realized I had no anchor. Kind doctors and nurses vainly endeavored to restore the use of the right hand. though we were taught to believe that a loving heavenly Father had sent the affliction for some wise purpose. We again heard of Christian Science from a friend who had been healed of a serious nervous breakdown while reading "Science and Health with Key to the Scriptures" by Mrs. Eddy. This greatly impressed us. For about four years after my mother had passed on I began to take a frightened interest in Christian Science. I did not like the idea of leaving the church she had loved. Then, too, I was told that Mrs. Eddy did not believe in the atonement. If only I had read the beautiful chapter entitled, "Atonement and Eucharist," in Science and Health I would have found what a mistake this was, but I would not then look at the book.

At last I became very miserable and ill. Three eminent doctors diagnosed the complaints as rheumatism and neuritis, but their capsules, baths, and various remedies failed to give relief. Finally when everything and everybody seemed against me, I went to a lady to ask about Christian Science. I shall always remember my visits to her. She just radiated love and happiness, and the peaceful atmosphere of her home seemed like heaven. Willingly, patiently, and gently she explained the beautiful teachings of Christian Science and lent me a copy of "Science and Health with Key to the Scriptures" and a Quarterly, and I at once began to study the Lesson-Sermons. But I was too full of self-pity and resentment to make any progress, and when a severe attack of acute lumbago was added to my other troubles I asked this lady for absent treatment. Never can I forget or describe the wonderful healing that followed. Quite suddenly I was perfectly well, and still more wonderful, thoughts of love and peace flooded my consciousness. I could

only rejoice and give thanks to God, for I knew He was my Healer. During the ensuing three and a half years there has been no return of the complaints, nor have I even thought of medicine, though before I was dosing regularly.

The same practitioner again gave me absent treatment for a very painful attack of pyorrhea, and healing and joy came almost immediately. For the last year I have found glasses unnecessary, after wearing them for eight years for reading and needlework. I had always suffered horribly from seasickness, but recently during a very stormy crossing, all fear and discomfort vanished as a verse from the Lesson-Sermon came to me, "He maketh the storm a calm, so that the waves thereof are still." The more I study the Bible and Mrs. Eddy's writings, the more successful I am in overcoming discordant conditions of every nature. Among the many helpful passages in Science and Health there is one on page 471 which has often brought comfort and peace, "God is infinite, therefore ever present, and there is no other power nor presence." I feel it a great privilege to subscribe for all the Christian Science literature, which is a daily source of help and delight. How can I help being sincerely grateful to Mrs. Eddy for her beautiful teaching and grand and noble life?

(Miss) Bessie Mead, Overton, Hants, England.

٠

For over six years the healing truth of Christian Science has been the only medicine in our home. Through six weeks of earnest and conscientious study, the manifestations of a carbuncle disappeared, only a tiny scar remaining. After this, my first demonstration over physical discord, I knew that the Christ-healing stood alone in its efficacy, as it has since proved so many, many times. Colds, headaches, and burns have vanished into their native nothingness. Chilblains of several years' standing were instantaneously healed by the reading, and spiritual understanding, of our invaluable textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy. A habit of biting the finger nails, in this case a so-called hereditary habit for which many material remedies had been applied, was overcome in a very short time; while a quick temper, unkind criticism, harsh judgment, petty nagging, and jealousy are losing their

It would take much more than the few words of a testimony even to begin to express my gratitude for this wonderful truth which is daily bringing more harmony and contentment into our home. Our periodicals, too, are continuous and consistent agents for good, always welcome because satisfying the need and desire for spiritual uplift. How reverently we should esteem our Leader, Mrs. Eddy, who through her spiritual understanding could show us how to work out our salvation in the way Jesus taught.

(Mrs.) GLADYS H. SILVA, Cleveland, Ohio.

4

"If ye continue in my word, then are ye my disciples indeed; and ye shall know the truth, and the truth shall make you free." When I first heard this and heard Christian Scientists speak of "knowing the truth," I had no understanding of what it meant. Now through the study of Science and Health and the Bible I begin to know the truth of God's perfect creation. With only the absent help of a Christian Science practitioner, the birth of our baby was one of harmony and happiness, and I took all the care of the baby from the first day after it was dressed, together with the other household duties.

How grateful I am for this wonderful truth that I may teach to these little ones. It is the greatest blessing which has ever come into my life. Having lost two children before I knew God aright I had great fear for the others, but all claims of the flesh are quickly overcome through a knowledge of the truth. I am more grateful than words can express, to Mrs. Eddy, the Discoverer and Founder of Christian Science, for it was only through the study of Science and Health that I learned to know God aright. I was healed of bowel trouble of nine years' standing by reading the textbook, and from that time I have been an earnest student of the Bible, whereas I had never before had a desire to look at it. I am indeed thankful for Christian Science, and for all this blessed truth is to mankind.

(Mrs.) MAUDE ELIZABETH LOHR, Springfield, Mo.

4

I have received so much help from the testimonies of healing in the Sentinel that I now wish to give mine, hoping that it may help others on their journey toward spiritual understanding. My heart is indeed filled with gratitude for Christian Science.

During the past ten years God has been our only Physician, and the healings and blessings received have been many; but what I am most grateful for is a better understanding of God and of man's relation to Him. One experience which we had during the past summer while motoring in Ohio gave us ample proof of God's protective power and tender care. Our machine skidded on a wet pavement and went into the ditch. My husband and myself both knew that there are no accidents in divine Mind, and in fact voiced this truth audibly, with the results that we were able to avoid hitting a post and the machine did not turn turtle. I cut my head on the wind shield, but by knowing the truth, it was healed in a short time. A farmer with his team came by almost as soon as we went into the ditch and pulled the machine out. We were then able to continue our journey up and down hills to the nearest town, a distance of six miles.

I find the periodicals a great help in meeting and working out the problems that come up in our daily experience. I have been healed of stomach trouble of several years' standing, bowel trouble, colds, sore throat, in a measure of nervousness, and have been able to lay aside glasses.

For all these blessings that have come to me and are coming each and every day I am indeed grateful to God and to Mrs. Eddy, who was good and pure enough to show us the way.—(Mrs.) EMESTINE McADAMS, Detroit, Mich.

4

It is with sincere gratitude I send this testimony, trusting it may help some one. A little more than five years ago, life promised me only suffering and poverty. I had been under the care of physicians intermittently for nine months, suffering from intercostal neuralgia as well as neuralgia of the stomach and bowels. The physicians, though most kind and patient, were not able to afford me any relief. My mental condition was even worse than the physical, for I was filled with fear and saw no hope for the future.

Some of my friends suggested that I try Christian Science. I knew little of it, except as I had heard it ridiculed by scoffers, and thought it a religion for fanatics. One night while suffering from an unusually acute attack, and knowing the physicians afforded no relief, I seemed to hear a voice repeat over and over again, "Try Christian Science," and I asked to have a practitioner called. The practitioner arrived in a short time, and in about an hour I was asleep.

医复合性工工者 工艺是世界工作工作

.

I awakened next morning to what seemed a new world. The erroneous mental condition had been destroyed, and I was freed from pain. There were recurrences of the neuralgic condition, which yielded more slowly; but it was always met and destroyed, with a very few exceptions, by my own understanding. Since this time Christian Science has been our only physician, my husband, son, and myself relying wholly on the healing power of the ever present Christ.

Among the many errors that have been overcome are ulcerated teeth, very severe headaches, from which I had suffered at intervals of two to six weeks since a little girl. The headaches were said to be the result of a weak spine and physicians gave me no hope of ever being freed from them. Also the belief of lack which held us in such seeming bondage has been overcome and we rejoice in the knowledge that supply is unlimited.

I am also very grateful for class instruction, and am grateful to God and to our Leader for having opened this way to a clearer understanding of the truth.

(Mrs.) MARGARET MEAD, Tonopah, Nev.

4

I was subject to colds every winter, and finally in the year 1910 I had a bad attack of bronchitis. I tried every kind of medicine but nothing seemed to help me, and I was very much discouraged and thought I never would get better, for I had been confined to the house four months, in fact never went out of my bedroom. Finally the doctor said if I went to a warmer climate it would help me, so I went to Los Angeles and stayed there two months but had several bad attacks just the same.

My aunt, with whom I was staying, persuaded me to try Christian Science, so we went to a lecture and the following Sunday to church. I thought it perfectly wonderful and decided to take some treatments, which I did, from a lady who lovingly tried to explain Christian Science to me. I felt much better and after returning to San Francisco was able to do my housework again. I had bought the book, "Science and Health with Key to the Scriptures" by Mary Baker Eddy, and for a while I studied faithfully, but later it seemed as though I could never get the time to read much, and besides it was becoming harder for me to understand all the time. I laid the book away and never seemed to get time to go to church or to the Wednesday evening meeting. Every winter I had bronchitis and would use material remedies. In October, 1915, I was confined to my bed again for a week and the medicine I took did not help me at all. I tried three different doctors but still no relief for the cough. I spent sleepless nights and was always discouraged. My husband then begged me to try Christian Science again, so we sent for a practitioner, who lovingly helped me to understand that God would heal me, and in less than two weeks I was able to be out again and felt better than ever. I started going to church again on Sunday, and also to the Wednesday evening meetings. I shall never forget the first Sunday that I went. It seemed as if the hymns and the reading of the Bible and the textbook were all selected for me. I was indeed happy to know that God is an ever present help in time of trouble and I can truthfully say that I have never taken any more medicine since that time, and have had some wonderful demonstrations for myself and my

I am so grateful for God's protection of our youngest son, who was in the service during the war. On the twentyseventh of September, 1918, he went "over the top" and came out without a scratch. He told us in some of his letters that he constantly thought of the ninety-first psalm and knew that nothing could harm him.

I truly hope my testimony will help others who may be discouraged. I am so thankful.

MRS. HENRY SCHMIDT, San Francisco, Calif.

4

Having received so many blessings through the study of Christian Science, I would like to add my testimony with the desire that others may receive the help and encouragement that I have received through the testimonies in our loved Sentincl and Journal. Through the power of Truth, I have been healed of severe kidney disease, heart disease, headaches, colds, constipation, and influenza. Within the last ten months two tumors have disappeared into their native nothingness, also the effects of a paralytic shock were most beautifully overcome in three weeks' time, entirely through absent treatment. Some of the healings seemed slow, as there were many weeds of wrong thinking to be uprooted.

Besides these physical healings I have had proof that my supply is from God alone, and in trusting Him every need is always met. These, with the overcoming of separation and many mental inharmonies and the recovery of a lost pocketbook, are only a small part of the blessings received. These healings have proved to be so complete that all remembrance of suffering has been wiped out.

I am very grateful to our faithful Leader, Mary Baker Eddy, for giving us the Key to the Scriptures in Science and Health. And my gratitude goes out to the practitioners who have so lovingly helped and guided me when the way seemed dark and the fear very real. I am grateful also for membership both in The Mother Church and in our local branch church, and to The Christian Science Publishing Society for our Lesson-Sermons as well as for our Journal and Sentinel with their beautiful, helpful articles, and for the one and only newspaper, The Christian Science Monitor, with its clean, uplifting world news. For each and all of these I thank our Father-Mother God.

(Mrs.) GRACE M. PAGE, Springfield, Mass.

I can vouch for the truth of the foregoing testimony and know from my own experience that Christian Science heals, for I was healed of profanity and of the tobacco habit by reading "Science and Health with Key to the Scriptures" by Mary Baker Eddy. I was also healed of fractured ribs when caught between two steel cars in the railroad yard. The company's doctor, after an X-ray examination, claimed I would be out of service at least three months, but under Christian Science treatment I resumed my duties as yard conductor in five days, perfectly well. I am truly grateful for the moral as well as the physical healings, for the loving help received from practitioners, for the literature as received through The Christian Science Publishing Society, and for the works of Mrs. Eddy, our beloved Leader.

ALGERNON W. PAGE.

I feel very grateful for the demonstrations I have had of the healing power of God made practical to-day through the study of Christian Science. I was very ill from the effect of ptomaine poisoning, being so overcome that a practitioner was called in. I received instant relief and was entirely healed in less than half an hour and feeling no bad effect whatever, as has been the case usually. For this and many other healings and a better understanding of the Bible, I am truly grateful.

(Mrs.) ADELIE B. DUNN, Los Angeles, Calif.

Signs of the Times

[Harry F. Ward in The Biblical World]

I believe in giving justice, because such an attitude is one of the expressions of God in human living. So necessary have men seen justice to be that they have always conceived God as a just Being. They got astray with their doctrine of the divine right of kings because they truly felt that the real king could not do wrong. "Shall not the Judge of all the earth do right?" In all ages the comfort and the stay of the oppressed has been the belief that somewhere there was a just God whose ear is never closed to the cry of those who suffer injustice and from whose hands redress can finally be secured. Herein is evidence that justice is one of the supreme values of life. Men believe in a God who is always seeking to establish justice. Those who thus believe will join with Him in that endeavor.

[Rev. Stewart Means, D. D., in The Hibbert Journal]

We are facing a world to-day outwardly unlike the world of the sixteenth century, yet in its spiritual conditions not so unlike. Spiritual bankruptcy threatens us. The proud industrial world, which was to bring success, happiness, and victory, has fallen into ruins, as feudalism fell. The old relations and interpretations of life are, too many of them, a complete failure, and do not meet the new conditions. . . .

A reinterpretation of life is necessary before the world can return to the path of its highest history. This reinterpretation involves a new relation with Jesus Christ, more intimate and organic than that which now exists or ever has existed. For the old interpretations are imperfect and incomplete, inasmuch as they are not adequate to the larger needs and the more varied necessities of the spiritual life. Man himself has become more significant in his spiritual nature than he has ever before been. . . .

[John Galsworthy in The Atlantic Monthly]

When we are assured by statesmen that the bad old world must and shall pass away, we naturally ask ourselves why, failing any real change of directing mood, it should become anything but worse. Must we, then, throw up our hands and say, Well, we're only human beings: we do what we can, and after all in some respects the world is better than it was, even if we are heading for a conflagration more hideous than the last? Or is there any way in which we can try to struggle up out of the *impasse?*

If there be a saving way at all, it is obviously this: substitute health and happiness for wealth as a world ideal; and translate that new ideal into action by education from babyhood up. To do this, states must reorganize education spiritually—in other words, must introduce religion,—not the old formal creeds, but the humanistic religion of service for the common weal, a social honor which puts the health and happiness of all first, and the wealth of self second.

Articles and Testimonies

Available articles from Christian Scientists and good testimonies from those healed by Christian Science are always welcomed for consideration by the Editors. Manuscripts for publication in the Sentinel and Journal, whether articles, poems, or testimonies, and correspondence relating thereto, should not be addressed to individuals, but to the EDITORIAL DEPARTMENT, THE CHRISTIAN SCIENCE PUBLISHING SOCIETY, Boston 17, U.S.A.

Announcements

From The Christian Science Publishing Society

New Morocco Bound Vest Pocket Edition of the Textbook

Announcement is made of the publication of a new, morocco bound, vest pocket edition of "Science and Health with Key to the Scriptures," by Mary Baker Eddy.

This small volume, 3 1-16 by 4 5-16 inches, the same in size as issued for soldiers and sailors during the war, is bound in black morocco, limp, leather lined cover, round corners, gilt edges. Price \$3.50 for single copy and when included in lots of twelve or more copies of Science and Health in any or all bindings, \$3.25 each.

Orders for this edition will be filled in rotation.

Vest Pocket Bible

The Bible, bound in morocco, uniform in style with the vest pocket edition of Science and Health, is now on sale at \$4.75 a copy. Order by number 08X. Reading room discount 10 per cent.

New Pamphlets

Advance information will in future be given two weeks before each new pamphlet is placed on sale. This will replace the former system of standing orders.

New Pamphlets in German

On October 9, 1920, there will be placed on sale a new German pamphlet entitled "Ein stilles, sanftes Sausen" ("A still small voice") containing the following articles reprinted from the Christian Science periodicals with alternate pages in English: "The secret place of the most High," "Never too Late for Healing," "Treatment," "Cause and Effect."

There is now on sale a new German pamphlet entitled Läuterung (Purification) containing the following articles reprinted from *The Christian Science Monitor* with alternate pages in English: "Lusting Against Lust," "The Lust of Money," "The Lust of Power," "Looking Ahead," "Sincerity."

Price of each of the above pamphlets 5 cents a copy. Reading room discount 20 per cent.

"Rudimental Divine Science" for the Blind In English Braille

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U.S.A.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U.S.A.

From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to Charles E. Jarvis, Clerk, 236 Huntington Avenue, Boston 17, Massachusetts.

From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address.

Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to Edward L. Ripley, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

Letters of Appreciation

Many letters of appreciation of THE CHRISTIAN SCIENCE MONITOR and other Christian Science activities are constantly being received. These letters express what these activities mean to different individuals in various occupations and pursuits. The favorable comment that has been received on those already published indicates that they are welcome and helpful; therefore others will be published under the above heading. Extracts from such letters follow:

JUST a line to express my appreciation of the splendid article in The Christian Science Monitor. So often an interview is the means used by which a man is made to say things of which he has never dreamed, that it is very refreshing to find a correspondent who can and will report a man fairly and honestly. Thank you very much and please accept this sincere expression of my appreciation. I like the Monitor and hope to have it on my table regularly in the near future.

IT gives us the utmost pleasure to inclose herewith check for — in payment of the account due for advertisement in the The Christian Science Monitor. We are gratified to find that the advertisements are again increasing for — section, and we wish you the utmost success in your endeavors. The Monitor is the greatest newspaper in the world and deserves the phenomenal success which it is proving.

WORKS ON CHRISTIAN SCIENCE

Written by MARY BAKER EDDY, Discoverer and Founder

of Christian Science and Author of its Textbook

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each \$3.00; twelve or more, each \$2.75. Ooze leather, vest pocket size, single copy \$3.00; twelve or more, each \$2.75. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy \$4.00; twelve or more, each \$3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$5.00; twelve or more, each \$4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book), single copy \$6.00; twelve or more, each \$5.75. Large Type Edition, designed especially for the use of First Readers. Large type (18-point) on Oxford India Bible paper, bound in leather. Size 8 by 10³4 inches. Single copy \$7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

FRENCH TRANSLATION. Alternate pages of English and French. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, \$5.50; six or more, each \$5.25. Orders for the French translation in lots of six or more may include both bindings.

German Translation. Alternate pages of English and German. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each \$5.50; six or more, each \$5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, French, and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy \$2.25; twelve or more, each, \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; twelve or more, each \$3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy \$5.00; twelve or more, each \$4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 366 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy \$2.25; six or more, each \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; six or more, each \$3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy \$5.00; six or more, each \$4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy \$6.00; six or more, each \$5.50.

Christ and Christmas. An illustrated poem. Cloth, single copy \$3.00; six or more, each \$2.50. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Unity of Good and Other Writings. One volume, containing Unity of Good. Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy §3.50; six or more, each §3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science versus Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy \$1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy \$2.00; six or more, each \$1.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, single copy \$1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy \$1.00; six or more, each 75 cents.

Unity of Good. This book lays the ax at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy \$1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy \$1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, alias Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point, American Braille, and English Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Rudimental Divine Science and No and Yes. In one volume, French translation, with alternate part of English, vest pocket size. Blue cloth, gray edges, single copy \$1.25; six or more, \$1.10; blue leather, gray edges, single copy \$2.00; six or more, \$1.75 each.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science versus Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy \$1.50; six or more, each \$1.15.

Christian Science versus Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

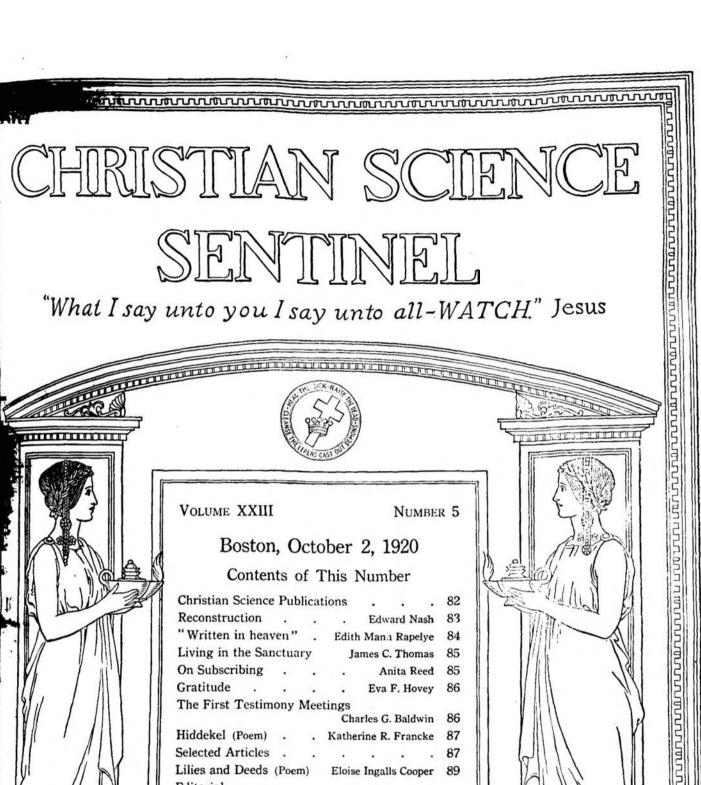

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy \$1.50; six or more, each \$1.25. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign. Address orders and make checks payable to

Reconstruction

EDWARD NASH

THE destructive element has been so prominent of late years that it is not now surprising to see, supervening, a reaction toward the idea of reconstruction. The success or failure of efforts in this direction will, of course, depend upon careful planning. The old saying, "First think; then act," is superfluous, since there can be no action unless there has been first the idea in Mind. Right action is the true idea. For foundation there must be the soundness of right thinking. Now, right thinking can only come from Principle, Mind. If a building up is attempted on the basis of mortal mind there must be as many diversities of opinion as there are diversities of so-called mortal minds. Hence, unless reconstruction is based on one Mind, one Principle, there is sure to be endless discussion, confusion, and ultimate failure—the inevitable result of failure to think rightly.

Mrs. Eddy, the inspired author of "Science and Health with Key to the Scriptures," the Christian Science textbook, says in her Preface (p. vii), "The time for thinkers has come." The thinker who as yet knows nothing about Christian Science cannot understand how what he calls "religion" can have anything to do with the practical side of reconstruction. He may go to church and may join in a supplication for blessings on those in authority whose business it is to guide the affairs of the nation; but if he really is a thinker, he may not readily believe that his supplications are going to lead God to grant his requests, because he has never yet seen regular, certain, and definite results from his prayers. If he thinks at all of the words which are being repeated for him, he still may have no real belief that any result is to be expected. And no result comes. It may be hard for him to believe that religion can in any way really affect practical problems. On the other hand, a thinker who has studied and has gained some knowledge of the truth of being, as explained by Christian Science, has also probably seen more than a few demonstrations of the collapse of discord and the incoming of harmony into daily life, which convince him not only that practical problems can be solved by right thought but that they can be solved in no other way; and this is the standpoint of Christian Science.

Christian Scientists know God as Principle, Mind, or Spirit. They know also that Mind is omnipotent, omniscient, and omnipresent. They know that there is no power, presence, or intelligence which can guide man rightly in his daily practical work except this Mind. They know this because they see it demonstrated daily, not only in the healing of sickness, but much more in the harmony which is brought into ordinary affairs, both small and great. And they have been taught by Mrs. Eddy's writings—writings which are altogether based on the life and sayings of Christ Jesus and on the sayings and doings of the inspired prophets—how they may bring into operation this power of divine Love. Thus, when a Christian Scientist thinks of reconstruction he knows that there must first of all be a reconstruction or re-

creation of thought which should rule out of himself all material selfhood—all self-seeking, all desire for place, power, or gain, all jealousy and pride, all desire for praise, and all fear of blame. With this preliminary thought he is ready to face the problem.

He knows that all man's needs are supplied by divine Love, and that the source of supply is infinite. Therefore there can be no lack of material, no shortage of labor, no lack of provision for sustaining the health and the strength of workers. He knows that there is only one Mind. Therefore there is one source of design, one plan, one system of working, one organization by which employers and employees can carry on work harmoniously and with mutual benefit. He knows that there is only one source of power, omnipotent good, and that there is no power of evil which can prevent or turn aside action. There is no suggestion of weakness or failure or discord which can interfere with this building. Now, it is easy enough to write and to repeat these things but it is not so easy to know that they are true, to understand why they are true, and to know what is true consciousness. Mrs. Eddy says (Science and Health, p. 209), "Spiritual sense is a conscious, constant capacity to understand God," and until this spiritual sense is gained there is nothing but a powerless belief, however acceptable the words may seem to be. For a man has no power of his own, but the true man reflects God, and to him belongs the power of God because the "Spirit of the Lord" is upon him as it was upon Christ Jesus when he came down from the Mount. This power is not to be attained by supplication, but only by true prayer as defined in the chapter on "Prayer" in the textbook, and by fasting, which is a relinquishment of all material desire.

To some all this may seem to be strange since the only outward evidence of reconstruction must apparently be material. The soldiers and sailors have to be settled on the land, or in industry; their houses have to be built for them; money has to be provided; trade has to be encouraged and new channels found for it; transport of every description has to be provided and organized, and so on. Just so. Mrs. Eddy says (Science and Health, p. 313) that "Jesus of Nazareth was the most scientific man that ever trod the globe," yet when he was speaking of food and clothing he did not say that these things were unnecessary; he only said that they were not the things to think about. His words were, "Seek ye first the kingdom of God, and his righteousness [right thinking]; and all these things shall be added unto you." This is not a mere ideal or mystical saying: it contains absolute, demonstrable fact.

We cannot build or rebuild on unstable foundations. At the close of his wonderful Sermon on the Mount the Master said that any one who heard his words and acted upon them was like "a wise man, which built his house upon a rock." Christian Scientists believe this saying and know that to attempt reconstruction upon any other foundations than the teaching of the Master is to court certain failure. The keynote of this great sermon, as well as of all the Mas-

Copyright, 1920, by The Christian Science Publishing Society, Falmouth and St. Paul Streets, Boston, Massachusetts. Entered at Boston post office as second-class matter. Acceptance for mailing at a special rate of postage provided for in section 1103, Act of October 3, 1917, authorized on July 11, 1918.

ter's sayings, is that of a true democracy founded in love of God and love of man, which is based on a scientific understanding of God, and of man in his eternal and inseparable relationship to God. If we build thus we shall be building the true Church; for our Leader has defined Church, in part, as "the structure of Truth and Love; whatever rests upon and proceeds from divine Principle" (Science and Health, p. 583). Such reconstruction, leading up to God in humility and gratitude, will be the only fitting memorial to the constancy, courage, and self-sacrifice of those who have fought so valiantly on the side of Principle against material might.

"Written in heaven"

EDITH MANN RAPELYE

THE tenth chapter of Luke's gospel records that "the seventy returned with joy, saying, Lord, even the devils are subject unto us through thy name." With quiet confidence in the eternal power of good, the Master confirmed the demonstrations which, naturally, they were so happy to report to him, when he replied, "I beheld Satan as lightning fall from heaven." Notwithstanding their successful conquest over "the spirits," the Master saw that the real reason for rejoicing is, not that a false sense of things has been overcome, but that the true man always does live in heaven, or spiritual harmony. He saw the immediate need of awakening them from any illusions whatever as to this fundamental truth.

"In all points tempted like as we are," the beloved Wayshower had met, first of all, and had conquered all phases of the mortal, or to use Paul's term, "the carnal mind." For that reason no one ever achieved a greater ability than he did to discern the difference between good and its counterfeit, between reality and unreality. Christian Science makes it very plain that it was not a personal devil or even an evil spirit named Satan who, at one time, led Jesus up on a high mountain and there tempted him to use his spiritual power to material ends; rather does it teach that in the ascending scale of his reasoning, on the summit of clearer perception, various suggestions of ambition, power, and pride, products of the carnal mind, presented themselves to him, as witness the words of Lucifer in Longfellow's "Christus":—

"I cannot thus delude him to perdition!

But one temptation still remains untried,

The trial of his pride,

The thirst of power, the fever of ambition!

Surely by these a humble peasant's son

At last may be undone!"

What, of course, was taking place was not an argument between Christ Jesus and a personification or evil spirit named Satan, but simply a mental warfare suggesting itself as human consciousness. Jesus loved good whole-heartedly. He was loyal to the vision of permanent sonship with the Father. He neither needed nor desired anything that matter could offer him, because he rejoiced in knowing that his name was "written in heaven."

Ever holding to the viewpoint of absolute truth about God and man, or in other words, Principle and idea, never compromising in the smallest degree with anything less than perfection in his thinking, he nevertheless always handled the "babes in Christ" with the uttermost tenderness and compassion. Neither did he address them as though from a pinnacle of mental height far beyond theirs but even as one with them, journeying over the same path out of the beliefs of matter into the understanding of Spirit. So it was when they told him, in guileless joy, of their victory over

the spirits that he graciously replied, in the kindest attitude of fellowship, "I beheld Satan as lightning fall from heaven." He promised them furthermore to give them power over serpents and scorpions and over all evil, and that, moreover, nothing would hurt them in any way. What a wonderful promise! How great the gift from divine Love! Having prepared their hearts with this assurance he then uttered the command which to us echoes down the ages tenderly albeit imperatively, "Notwithstanding in this rejoice not, that the spirits are subject unto you; rather rejoice, because your names are written in heaven."

Why has this command been necessary? The answer is very plain on page 351 of Science and Health, where our Leader says: "We cannot bring out the practical proof of Christianity, which Jesus required, while error seems as potent and real to us as Truth, and while we make a personal devil and an anthropomorphic God our starting-points, -especially if we consider Satan as a being coequal in power with Deity, if not superior to Him. Because such startingpoints are neither spiritual nor scientific, they cannot work out the Spirit-rule of Christian healing, which proves the nothingness of error, discord, by demonstrating the allinclusiveness of harmonious Truth." Realizing this fundamental truth, students of Christian Science proceed to and do heal the sick and demonstrate the power of good. They perceive how necessary it is to think from the basis of good as a reality and to deduce all conclusions therefrom. When, however, one grasps this fact, and the presence of eternal harmony is acknowledged where discord seemed to reign before, the temptation occasionally presents itself to believe that a great big, awful devil has been discovered, vanquished, and destroyed, and with it has come the suggestion that, fresh from one victory, there must be other devils and "other worlds to conquer." No student will long be fooled with this illusion if he will clearly realize that this is the last plea from a supposititious devil for a name and place in God's creation.

When it has failed in its effort to be accepted as consciousness in the above-named manner, the lie will sometimes assume a new method by dressing itself up in a new name. It will not style itself this sickness or that sickness but—ah, yes-"a claim"! How is it different to rejoice that "a claim" has been met, if by so doing we give it the minutest degree of power in our thinking, from that rejoicing of old that "even the spirits are subject unto us"? On page 54 of "Unity of Good" Mrs. Eddy says: "To say there is a false claim, called sickness, is to admit all there is of sickness; for it is nothing but a false claim. To be healed, one must lose sight of a false claim." The fact that a demonstration has been made gives us no more liberty to think and speak of error as an actuality than we had when, in working from the basis of good only as real, we certainly did not choose to think of the error as true in any sense of the word. When one is tempted to rejoice in changing material phenomena, it is good to know that the ever present Christ restrains from any sense of error.

If the Christian Scientist will pause in humble obedience, his heart made ready as were those of the first disciples, he will hear the loving instruction to rejoice not so much that error has been accepted as true by some mortal and that it has been destroyed, but rather to be glad in the forever positive fact that "God saw every thing that he had made, and, behold, it was very good." Let our rejoicing evermore be based, therefore, upon the grand realization that God and man are, now and forever, inseparable and that our "names are written in heaven." 3.

Living in the Sanctuary

JAMES C. THOMAS

DIVINE metaphysics reveals that Life is Mind, the perfect consciousness, and that the man God made is the likeness of Mind. Consequently, it is only as men comprehend the Science that is Christian that they really begin to live. For then only are they drawing near to Life, or God. Individuals whose outlook is bounded by the material senses, and whose thinking deals only with the testimony of those organs are far from Life and are assuredly included in that class to which Christ Jesus referred when he said, "Raise the dead." Truly is the student speaking when he says, "Christian Science is all-in-all to me," for it brings him to Life, it leads him to Principle, without at least a glimpse of which he is not really living at all. And he attains more of Life as he pushes ahead into the unseen joys of Christian Science—unseen and uncomprehended by material sense. And as he advances, Life is there with all its abundance of good and stainless satisfaction.

Mrs. Eddy has described in "An Allegory" (Miscellaneous Writings, p. 325) the "so-called living" whom "the Stranger," the Christ, proceeding through the world, comes upon but avoids: "Somewhat disheartened, he patiently seeks another dwelling,-only to find its inmates asleep at noontide! Robust forms, with manly brow nodding on cushioned chairs, their feet resting on footstools, or, flat on their backs, lie stretched on the floor, dreaming away the hours. Balancing on one foot, with eyes half open, the porter starts up in blank amazement and looks at the Stranger. calls out, rubs his eyes,—amazed beyond measure that anybody is animated with a purpose, and seen working for it. They in this house are those that 'provoke Him in the wilderness, and grieve Him in the desert.' Away from this chamel-house of the so-called living, the Stranger turns quickly, and wipes off the dust from his feet as a testimony against sensualism in its myriad forms."

What a man wants above all is Life, God. Christian Science, then, which unlocks the door to Life, must have the first place in his affections and never be given second position as regards any person, object, or circumstance whatsoever. Thus is seen the correct interpretation of the phrase "God First"-Mind and its idea as all. Assuredly, Christian Science is infinite, unlimited. Its message is available in the remotest corners of the earth, and the form in which it is met with is boundless in variety. Individuals everywhere who understand and hold to the truth that God is the Supreme Being, or Principle, in the sense of being the one omnipotent power and reality and the only Mind, unopposed by any supposition of matter, understand divine Science to the extent of their knowing. The complete statement of this Science is found in the works of Mary Baker Eddy, its Discoverer and Founder, and all may have recourse to them, the truth, purity, and potency of which have been fully demonstrated.

The student of Christian Science should be "animated" with the "purpose" really to live, to reflect Mind, and he cannot be so purposed while paying tribute to the physical senses without any attempt to free himself from them. Any man anywhere can prove that he does not actually live in, of or by matter and its multitude of forms. He can turn his back upon all of these things at any time by inquiring into the true source of his being conscious, which is, he will comfortingly find, the infinite consciousness, in which the so-called physical senses of seeing, hearing, tasting, smelling, and feeling have no part whatever. Any one is able to

discover very simply that he thinks or is conscious without the aid of any of these five deceptive counterfeits of spiritual sense which knows the divine consciousness and nothing else. Thus casting aside the limiting pseudo sense, an individual's way opens in thought to the unlimited glories of spiritual perception. In this realm of fathomless Mind, infinite wholeness is the only fact. Thus did Jesus state all these things in saying, "When thou prayest, enter into thy closet, and when thou hast shut thy door, pray to thy Father which is in secret; and thy Father which seeth in secret shall reward thee openly." And Mrs. Eddy writes on page 15 of Science and Health: "The Father in secret is unseen to the physical senses, but He knows all things and rewards according to motives, not according to speech. To enter into the heart of prayer, the door of the erring senses must be closed." The sub-heading of this passage is "Spiritual sanctuary."

Life then is found when objects of sense fade away, mirage-like, before spiritual understanding. In this way spiritual living is really everywhere that material forms and activities falsely seem to be, and all individuals are privileged to have Life, or God, revealed, no matter how untoward are the conditions surrounding them. In no matter what falsely assertive presence of death, disease, or sin, there is Life. Life is the only fact, no matter where death, disease, or sin falsely assert their presence, and even in the very places where so-called material living seems to be most apparent.

There is not a single moment of the day when an individual can afford to give up Principle and confer the slightest acknowledgment of reality upon the evidence of matter. To know Life, really to live throughout the day, which means day and night, is to serve Principle always. It is to become acquainted with eternity, which should be the aim of every man. This involves the sooner or later elimination of that mental apathy called sleep, because unconsciousness is not the knowing of real Life, or divine consciousness, which is never suspended in its activity.

The issue before men is evident. Life is here in all its abundance, and material existence is a barrenness that must give up its claim, for Christian Science says in the words of Jesus the Christ, "I am come that they might have life, and that they might have it more abundantly."

On Subscribing

ANITA REED

THE Christian Science literature is one of the biggest I blessings the world has to-day. Do we realize this, and do we appreciate it, or do we just take it all for granted? First and foremost, there is the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy, which, together with the Bible, is the very foundation of Christian Science. Indeed, has not Mrs. Eddy said (Miscellaneous Writings, p. 313), "Humbly, and, as I believe, divinely directed, I hereby ordain the Bible, and 'Science and Health with Key to the Scriptures,' to be hereafter the only pastor of The Church of Christ, Scientist, throughout our land and in other lands"? In Article XIV, Section 1, of the Manual we also find a record of this ordination. Then there are all Mrs. Eddy's other writings,-what happy hours we may spend with these and the help of the concordances!

Then daily, weekly, and monthly come the periodicals, bringing with them joyous encouragement. How often we have found an article in one of these that has just met our need of the moment! These organs are channels through which we can all share the joys of experiences and demonstrations. The broadness of Christian Science is manifested in the *Monitor*, turning one's attention to the good in every part of the globe, uplifting man's sense of art, literature, the stage, and so on. Instead of the Christian Science literature being narrow or sectarian and solely religious, it enlarges thought, enabling one to think beyond one's immediate surroundings, about all good. Not only may we find comfort, help, healing, and teaching in these periodicals, but it is also our privilege to contribute to them with articles and testimonies.

It was with much forethought that our inspired Leader, Mrs. Eddy, wrote on page 352 of "The First Church of Christ, Scientist, and Miscellany," "My desire is that every Christian Scientist, and as many others as possible, subscribe for and read our daily newspaper." Are we sometimes tempted to stop reading or taking one or perhaps even all of the periodicals, because error would have us believe that we cannot afford them or because we have not time to read them all; but could we disobey those imperative words of our Leader and feel that we are honest? Well do we know that every word Mrs. Eddy has written in the Manual or elsewhere demands our implicit obedience, and should be obeyed joyfully. There is nothing that error would like better than to stop the operation of Truth—to enthrone itself, and in its subtle way it would have us stop reading or subscribing for the literature, And so, if we are not awake and alert, we would be imperceptibly swept away from the rock-Truth; but if we are awake to this suggestion, we shall recognize it as nothing more or less than suggestion, and prove the utter unreality of it, thereby destroying it.

Gratitude

EVA F. HOVEY

IN Old Testament times a gift was offered as a mere expression of politeness, or with the expectation in return of favor or protection,—as Jacob's gift to his brother Esau. Also, a gift was given when consulting a prophet or oracle. Doubtless it was the general belief that a gift to God operated in the same manner as one to an earthly ruler.

David's more spiritual insight realized that the favor of the Lord did not depend upon material gifts, and Isaiah tells us, "If ye be willing and obedient, ye shall eat the good of the land." In the New Testament, as pointed out in Hastings' Dictionary of the Bible, we find that many of its usages of the word gift are connected with God's gifts to men: His Son, Life, the Holy Spirit, as well as that free gift of grace which Paul writes of in the inspiring fifth chapter of Romans.

No more wonderful gift has been given to mankind than the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy. Through the study of this book many thousands of suffering humanity have been healed. It is a veritable key to the Scriptures, unlocking to all the treasures of the Bible, the promises of which are seen to be for each and all now, proving the ever presence of the living Christ, Truth, as our Savior promised, "Lo, I am with you alway, even unto the end of the world." Our textbook is the outcome of Mrs. Eddy's spiritual understanding of the motherhood as well as the fatherhood of God. Love and duty to God and mankind caused her to give to the world this sacred gift, teaching, as she tells us in Science and Health (p. 496), "the rule of healing, based upon its divine Principle, Love, underlying, overlying, and

encompassing all true being." The entire sentence reads: "Hold perpetually this thought,—that it is the spiritual idea, the Holy Ghost and Christ, which enables you to demonstrate, with scientific certainty, the rule of healing, based upon its divine Principle, Love, underlying, overlying, and encompassing all true being."

As we daily, hourly keep substituting spiritual truths for material beliefs, we are putting on that Mind "which was also in Christ Jesus," and so coming into a clearer vision of man as God's image and likeness. How can we refrain from expressing our gratitude for that inspired gift which opens our spiritual eyes until we see, as did our revered Leader (Poems, p. 12):—

Then His unveiled, sweet mercies show Life's burdens light. I kiss the cross, and wake to know A world more bright.

And o'er earth's troubled, angry sea
I see Christ walk,
And come to me, and tenderly,
Divinely talk.

The First Testimony Meetings

CHARLES G. BALDWIN

PERHAPS the first Christian testimony meeting of which we have any record was held in a prison cell. John the Baptist conducted the simple ceremony, and around him were the few faithful students whose devotion had gained for them admission to their teacher in prison. Eagerly these earnest men, one after another, told of the instantaneous healing work which they had witnessed. The lame walk, they reported to John, the blind are healed so that they can see, the dumb are made to speak, and those who are ready may learn how this healing is done, and the good news of health and holiness is brought to them. Another testimony meeting is recounted in the fourteenth chapter of John. Jesus is here trying to reveal the secret of his mission and of life itself, and finally has to have recourse to his healing works to afford the necessary proof. At this meeting Jesus taught that if we study the truth and keep everlastingly at it we shall be entirely free from fear, error, evil, and discord of

Once we perceive God as Spirit, Mind, or Soul, we can think of man as the child of God, entirely spiritual and the very image and likeness of Soul. God, Mind, or Spirit is infinite, and man, God's spiritual offspring, lives, moves, and has his being in God. Man, therefore, has a place in Principle and cannot be made to believe or imagine that he has any cause to be troubled or fearful. Christ Jesus blazed the way of safety through the mazes of mortal belief and trouble by the perfect understanding of God and His omnipotence, omnipresence, and omniscience, and we have only to follow in his footsteps. Not only this, but his teachings are ever with us as we take each step in the path, so that we have only to study the way when we are confronted with doubt and fear. Jesus the Christ has demonstrated man's real spiritual being, and we know that he did it by declaring and realizing always and in every circumstance that God is Spirit and that man is the offspring of God.

Thomas, one of Jesus' disciples, could not grasp or make practical this wonderful truth demonstrated by Jesus, and when Jesus spoke of his departure and took for granted that his disciples perceived that he was going to prove his true relation to God, omnipotent Mind, and that he would sit at the right hand of God—that is, manifest God's power to overcome hatred, matter, and death—Thomas could not

50

ti.

understand and asked for an explanation. Jesus said to him, "I am the way, the truth, and the life: no man cometh unto the Father, but by me." Thomas was also told that had he known Christ Jesus he would have known God, and Jesus gave him this spiritual knowledge, for he said, "From henceforth ye know him, and have seen him."

Philip, in temporary confusion, asked to see the Father, God. Now God cannot be seen through the material vision, but is manifested through Christ, the perfect expression or reflection of God, and so Philip was told by Jesus that when he saw the Christ in place of Jesus the Christ, he saw the Father expressed, and all the works that he had seen done by Jesus were in reality the reflection of God, manifested by Jesus the Christ. Then Jesus, despairing of proving his true relation to God by beginning with God or Mind, arguing inductively, said, "Believe me that I am in the Father, and the Father in me: or else believe me for the very works' sake." In other words: Let the works which I have done, my many cases of instantaneous healing of disease, my walking on the water, stilling the waves, and raising the dead, increase your faith so that you can perceive the real I is the son of God equally with the reality of yourselves and can truly say with me, "Our Father," for there is no other power less than omnipotence which could thus produce health, happiness, and dominion.

lesus the Christ had raised others from death and the grave, as did Peter, later, and many others. Jesus' understanding raised Jesus' body from the tomb, with no help from others. Here he put into action "the certain sense of eternal Life" to which Mrs. Eddy refers on page 509 of "Science and Health with Key to the Scriptures," where she says, "Our Master reappeared to his students,—to their appreheasion he rose from the grave,—on the third day of his ascending thought, and so presented to them the certain sense of eternal Life." While in the garden of Gethsemane Jesus gave up his own human will. After the most momentous struggle in history, angels "ministered unto him." Perhaps these angelic inspirations were the same which appeared to Mary Magdalene at the sepulcher of Jesus. These holy women were strengthened by their fidelity in the awful experience of their teacher. The spiritualization of their thought enabled them to see the angels and then their risen Lord after his great struggle. These women related their experiences to his disciples and other followers, but "their words seemed to them as idle tales, and they believed them not." Peter, however, was inspired to go to the sepulcher, and he ran thither. Two of the others also-not of the eleven-saw Jesus and recognized him. They told their story, and then the eleven (his disciples) could see him, and he ate before them and taught them from the Scriptures.

This whole experience shows, of course, the importance of that which testifies to Principle. In other words, evidence of the operation of Principle, such as is given in our Christian Science Wednesday evening meetings to-day, is highly important. If those who have been healed testify, it enables others to seek the healing, and for each earnest testimony of one who has seen the Christ others are enabled to see him also, and gain a "certain sense of eternal Life."

[Written for the Sentinel]

Hiddekel

KATHERINE R. FRANCKE

BLESSED river of truth that flows from the throne of God, On thy green banks of old the feet of the prophets trod; To-day our waiting hearts at sound of thy murmur thrill, And we lay our burdens down at Christ's command, "Be still."

Selected Articles

["Religion versus Ceremonialism"—The Christian Science Monitor, Boston, U.S.A., August 16, 1920]

A group of people, if asked to formulate a definition of religion, would probably offer many and diversified replies, conforming to the practical or theoretical aspect of religion involved in their experience. Christian Science, explaining religion on the basis of absolute metaphysics, wholly eliminates the ceremonial and superstitious beliefs usually included in such a definition; for notwithstanding the scholar's claim for the inseparability of religion and magic, Christian Science establishes an interpretation of religion with which superstition and ceremonialism could have no possible relation. All superstition is ignorance, and ignorance could never form an intelligent concept of religion.

Cicero's definition from relegere, to revere the gods, reflects the general viewpoint of antiquity when it was thought necessary to propitiate the so-called gods in order to secure their favor. Although Cicero's etymology is conceded by most scholars to be correct, the theology of the Middle Ages and modern times has found expression in the Augustinian development of the definition offered by Lactantius from religare, to bind together. Early beliefs were concerned only with the practical aspect of religion, while the later concept comprises eschatology as well.

Christian Science includes both the viewpoints, reverence and oneness, included in the two Latin words, relegere and religare; for in religion as simply defined as "man's relationship to God" both the statement and its practice are involved. Thus, although there may be as many concepts of religion as individuals to formulate them, Christian Science teaches that the relationship of God and man, Mind and idea, constitutes all there is to true religion. In this relationship, ceremonialism plays no part. Infinite Mind and its infinite expression, in their oneness, comprise all the activities of man. Man is dependent alone on God, the creative Principle. Therefore, being the emanation of Mind, the source of his every act and thought, man necessarily maintains a rightful attitude toward the all-embracing consciousness which binds man to Mind inseparably. The essence of religion is found in Jesus' statement, "I and my Father are one."

The survival of ceremonialism, which chills the spirit of Christianity, is the hindrance to a more spiritual apperception of religion. A prayer used by some Oriental peoples to-day consists of a short form during the repetition of which seventeen postures are assumed, each so important that none can be omitted. In magical practices the word itself, or incantation, is supposed to have power. But with the increase of spirituality the power attributable to the form of prayer lessens in face of the predominating power of spiritual knowing in accord with Principle. Thus as the interpretation of religion becomes more nearly divine, the more nearly correlated are religion and life, until the ceremonialism pertaining to a materialistic concept entirely vanishes. The practice of religion is thus found to be active harmony and freedom expressed through unity with Principle.

On page 43 of the Manual of The First Church of Christ, Scientist (Art. VIII, Sect. 9), Mary Baker Eddy indicates the necessity of nullifying the survivals of ceremonialism: "No member shall use written formulas, nor permit his patients or pupils to use them, as auxiliaries to teaching Christian Science or for healing the sick. Whatever is requisite for either is contained in the books of the Discoverer and Founder of Christian Science." It is evident to the en-

lightened understanding that formulas or the mere repetition of words have in themselves no power to heal. The bare practice of religious rites does not bestow salvation. Jesus in his redemptive mission constantly stirred up the theological formalism of his age by teaching and healing on a basis diametrically opposed to established order. So to-day Christian metaphysics reveals religion in its purity and wholeness by healing and teaching in opposition to the traditions of men. In thus recognizing the spiritual relation of Mind and idea, Christian Science confers the healing power that is an integral part of true religion.

Perfunctory churchgoing as the mere performing of an ecclesiastical rite never saved any one, never prevented sickness or trouble. To many, religion is associated with the thought of stereotyped, pious observances, but Christian Science entirely divorces religion from ritualism by recognizing genuine worship as conscious communion with Mind, not communion once a month or once a week, but the constant apprehension of God here and now as the sole governor of the universe. Attending church, not with the motive of propitiation, or of duty, or as a charm to ward off evil, but with the rejoicing understanding that church activity is omnipresent, forever to be enjoyed, takes religion out of the old category of superstitious practices and places it on the rock of understanding, against which the illusory gusts of ignorance shall not prevail.

Ceremonialism and religious festivals, that are the survivals of the pagan four season festivals, deny the unity of God and man. On page 67 of the Manual referred to above, in a section significantly entitled "Duty to God," Mrs. Eddy rebukes the usual custom of celebrating these various holidays: "Members of this Church who turn their attention from the divine Principle of being to personality, sending gifts, congratulatory despatches or letters to the Pastor Emeritus on Thanksgiving, Christmas, New Year, or Easter, break a rule of this Church and are amenable therefor" (Art. XXII, Sect. 10). All through her writings Mrs. Eddy teaches the importance of abandoning the materialistic thinking that found expression in Pharisaism, fetishism and the like, in favor of a more spiritual concept of religion, that man in the image and likeness of God may appear. In her poem, "Christ and Christmas" (p. 19), Mrs. Eddy directs attention to the scientific way to celebrate Christmas:-

Thus Christ, eternal and divine,
To celebrate
As Truth demands,—this living Vine
Ye demonstrate.

The demonstration of Principle is the one way in which to celebrate Christmas. To demonstrate Christ is commemoration in the truest sense. Thus every holiday or festival becomes the opportunity to live in accordance with Principle and this should be the everyday fact of existence. In this demonstration of Truth, health is found to be as much a part of religious practice as morality; for to be truly religious one must manifest the wholeness and harmony of God. Man's relationship to God necessarily expresses that unity with Mind from which there can be no deviation. Religion is not something to be attained; religion is the harmonious activity of consciousness to be uninterruptedly enjoyed.

[William Lyon Phelps, Professor of English at Yale University, New York (N.Y.) Evening Post]

There are periodicals published by learned societies, there are periodicals of a special and technical nature and there are serious reviews—which bear to the trivial weeklies inversely as the *revue* to the drama. It is necessary for the

scholar, engineer, or business man to keep abreast of the latest information in his subject; it is necessary for every one to read at times a good review.

Every intelligent man, woman, and child should read the newspapers; but no time should be wasted on them. I read local newspapers morning and evening in my own town and am a regular subscriber to morning and evening New York newspapers. I wish to know what is going on in my own city and in the world, and I read editorial comment because it is representative of the views of thousands of my countrymen. I also subscribe to The Christian Science Monitor because it has the best special reports from every locality on earth of new plays, new music, new developments in art and literature, and an admirable page on athletics—I always read sporting news.

[Dissenting opinion of Associate Justice Nourse of the District Court of Appeal of California, in re Travers]

I dissent. The undisputed facts are that petitioner was arrested on a charge of vagrancy, was taken from her place of abode to the police court where she pleaded not guilty, and, without trial or judgment, was ordered into the custody of the health officer. She was then taken to the city and county hospital where, in direct defiance of a penal statute, she was subjected to a medical examination by an unlicensed employee illegally styling himself a doctor. As a result of such examination she was ordered confined in the city and county hospital for an indefinite period and was so detained without warrant or judicial commitment when released on bail by order of this court.

The power to quarantine diseased persons for the purpose of preventing the spread of communicable diseases need not be questioned. The power to imprison a citizen in a public hospital without trial or commitment is obnoxious to every American principle of right and justice. It is one of the fundamental principles of both our federal and state constitutions that no person shall be "deprived of life, liberty or property without due process of law." "It is a rule as old as the law, and never more to be respected than now, that no one shall be personally bound until he has had his day in court, by which is meant, until he has been duly cited to appear, and has been afforded an opportunity to be heard" (Galpin v. Page, 85 U. S. 350, 368)....

The broad scope of the main opinion is atrocious in its consequences. Having approved the farcical and unjudicial pretense of a trial in the police court, the effect of the opinion is that any citizen may be taken from his home, and, with trial or judgment, confined in a public hospital during the will and pleasure of the health officer if some unlicensed employee of the institution believes that he is afflicted with some contagious disease. During such confinement the victim may be denied the right to call in his own physician, but is forced to subject himself to such medical treatment as the employees of the hospital may choose to give him.

Section 2979a of the Political Code, the section under which the health officer is acting, authorizes him, when acting as an inspector under the state board of health, to "take possession or control of the body of any living person" upon being informed of any of the contagious or infectious diseases mentioned in the section. Among the diseases therein mentioned are tuberculosis, pneumonia, diphtheria, measles, chicken pox, whooping cough, mumps, and "any other contagious or infectious disease." Thus a parent whose child is afflicted with any of the many contagious diseases prevalent among children may be denied the right of caring for his child in his own home and of calling a physician of his

j.,

i

own choosing. All that is necessary, under the main opinion, is for the health officer to be informed that some contagious disease exists. Then he may take possession and control of the "body of any living person" (not necessarily one afflicted with the disease), remove him from his home and the care of his family, and confine him in the county hospital, without commitment, until such time as the employees of the hospital may determine that his illegal imprisonment might cease. If such be the law, one who is afflicted with tuber-culosis may suffer a greater punishment for his offense than one who has committed a burglary.

The provisions of section 2979a, in so far as they attempt to authorize the imprisonment of the individual for an indefinite term without trial and without commitment, are unconstitutional and void. The petitioner is detained by the health officer solely under the authority of that section. Her imprisonment in the city and county hospital is without the semblance of a legal confinement and she should be discharged.

[New York news dispatch in Corona (Calif.) Independent]

Attention of believers in medical freedom is called to the fact that the Illinois constitutional convention at a hearing before the committee of the whole voted almost unanimously against inserting in the constitution of that state a section known as "proposition 300," which was offered by the Illinois State Medical Association for the purpose, as stated by Dr. Charles E. Humiston, to deny to Christian Scientists, chiropractors, and others the right to treat the sick in Illinois.

The Citizens' Medical Reference Bureau points out that Dr. Humiston stated that "we had a purpose rather than a plan, that we wished to deny to quacks, to faddists, to Christian Scientists the right to practice medicine and treat the ailing, the sick, in Illinois, and that was the object of this proposal, and we asked that committee, as a whole, or any member of it, to write it in such a way as to make that clear. That was what we wanted."

The action by the constitutional convention, as given in full in the *Illinois Medical Journal*, is suitable for helpful reference in case similar efforts are made in other states to secure such an amendment to the state constitutions. It is of interest in showing by what an overwhelming majority the amendment was defeated. It also brings out the fallacy of the plea, so frequently advanced by allopathic medical societies, that all persons who "treat or undertake to treat any ailment, infirmity, or disease of another for pay, reward, or compensation," be required to pass the same examination.

It was declared that the proposed amendment, which was to place every one who administers to the sick in Illinois under the same requirements, was "so sweeping as to prohibit the practice of dentistry, pharmacy, nursing, and midwifery by any other than a person who was able to meet the one standard for treatment of the sick."

[Louis E. Scholl in Yakima (Wash.) American]

A recent article in your editorial columns says: "A politician has the Christian Science attitude in regard to profiteering. He escapes the necessity of finding a remedy by professing inability to find the evil." A protest is offered to this statement because such an attitude toward profiteering can in no way be likened to the Christian Science attitude toward evil of any kind.

Christian Science, like Christianity, came to the world because of the necessity for a remedy for the world's evil. If Mrs. Eddy had professed inability to find evil, she would never have discovered Christian Science. Realizing fully the awfulness of evil, she sought the remedy, and like the "merchant man, seeking goodly pearls," of whom Jesus told, she, having found one pearl of great price, went and sold all that she had and bought it. On page 226 of "Science and Health with Key to the Scriptures," she writes: "The lame, the deaf, the dumb, the blind, the sick, the sensual, the sinner, I wished to save from the slavery of their own beliefs and from the educational system of the Pharaohs, who to-day, as of yore, hold the children of Israel in bondage. I saw before me the awful conflict, the Red Sea and the wilderness; but I pressed on through faith in God, trusting Truth, the strong deliverer, to guide me into the land of Christian Science, where fetters fall and the rights of man are fully known and acknowledged." There is no evidence in any of her writings, of failure to understand the nature of evil or the right method for its destruction.

Selfishness is the disease at the root of political life, and it seems to be as malignant now as when a certain senator declared the purification of politics to be an iridescent dream. Christian Science offers the same solution for economic problems that Jesus offered. Profiteering and all kindred abuses will be no more, only as men come to understand and live the teachings of the Sermon on the Mount, or in other words, as men are found, not in selfish self-righteousness, but reflecting the divine nature.

In Miscellany (p. 266), Mrs. Eddy gets at the heart of the political problem when she says, "To my sense, the most imminent dangers confronting the coming century are: the robbing of people of life and liberty under the warrant of the Scriptures; the claims of politics and of human power, industrial slavery, and insufficient freedom of honest competition; and ritual, creed, and trusts in place of the Golden Rule, 'Whatsoever ye would that men should do to you, do ye even so to them.'"

The trouble with the type of politician referred to by the *American* is not that he has the Christian Science attitude, but that he lacks it.

Lilies and Deeds

ELOISE INGALLS COOPER

DEEP in the earth
A lily heard the call:
Go forth—proclaim your faith
In Life's unfailing power.
Obedient,
Green leaves uprose
One above another.
A bud lifted its cup,
Brimmed it with pure radiance,
And wide outflung
Petals milk-white.
Forth from its golden heart,
Like sweet incense of prayer,
Impartial, streamed its fragrance
Prodigally.

Can I not hear
My Father's call, and pour
My faith in Love abroad—
Gentle, patient, kind—to heal
Earth's weary ones?
Christ is risen!
Sin, sorrow, pain, and death
Are lost in the glory
Of His love—through whom I live
Abundantly.

Right or Wrong

THERE is a story of Lord Palmerston, which may or may not be apocryphal, to the effect that he once received a memorial from a certain number of his followers assuring him that they would support him in a case in which he was so obviously in the right. The irritation of the prime minister was beyond words. He intimated that anybody would support him if he was right, and that what he was looking for in his followers were those who would support him whether he was right or not. The anecdote, which was no doubt meant to express the fiery nature of the great Irishman, finds a parallel in a really historic saying of that famous American seaman, Stephen Decatur. It was in proposing a toast, at Norfolk, in the year after Waterloo, that Decatur gave utterance to that remarkable and often quoted saying, "Our country! In her intercourse with foreign nations may she always be in the right; but our country, right or wrong.'

Now if Decatur had been told that he was giving utterance to the most preposterously unpatriotic sentiment for which he could be held responsible, he would no doubt have been quite as irritated as Lord Palmerston is reported to have been, and so no doubt would those who drank his toast, and all the patriotic associations of later years which have acclaimed it. Yet anybody, who will take the trouble to think, must see that the sentiment is not only an entirely immoral one, but is calculated to involve any country in disaster rather than in success. It is the support of just such ideals which has brought about the fall of the great empires of the past. The absence of fearless criticism which would tell the truth to rulers has been more responsible for national disasters than almost any other one thing. To approach a Roman emperor or a Turkish sultan with such a criticism would no doubt have been almost seeking extinction, yet if the emperors of Rome and the sultans of Turkey could have found truth-telling instead of sycophancy, the history of Rome and the history of the Ottoman Empire might have been very different from that which they are to-day. The Hebrew prophets did, indeed, deal faithfully with the kings of Israel and Judah in just this way, and they experienced extremely dangerous moments in doing so. Nevertheless, there can be no question at all that the story of the kings of Israel and that of the kings of Judah would have been even more unfortunate than they actually were, if it had not been for the fearless integrity of the prophets.

Now what is true of the king or the prime minister is true also of their subjects or supporters individually. Indeed, that a nation is only a collection of individuals is, of course, the tritest and most obvious of sayings. It is, therefore, the moral fiber of the individual which constitutes the character of a nation, and if this moral fiber is missing, the character of the nation spells disaster for the nation. Count Czernin points out, in his recent memoirs, how essentially this was the case in pre-war Germany, and just what it led to.

The kaiser, he explains, lived in an absolutely exotic atmosphere in which the truth was never allowed to be mentioned. The disagreeable, that is to say, was always excluded, with the result that the unfortunate ruler of Germany drove in on his doom, without a suspicion of the realities with which he was surrounded. The reason for this was, the Count explains, to be traced to the parasitic nature of German society. The court of Vienna, he insists, was sufficiently docile in its attitude toward its own emperor, but in Vienna the scenes which he witnessed in Prussia would have been impossible, for never could a great Viennese merchant have been induced to cover the hand of the emperor with kisses because that hand had bestowed on the recipient a gold scarfpin.

It is just this appreciation of false standards which undermines the integrity of men and nations and brings inevitable disaster in its train. "The objects we pursue and the spirit we manifest," Mrs. Eddy writes, on page 239 of Science and Health, "reveal our standpoint, and show what we are winning." How, then, could the success of one's country in wrongdoing bring anything but ultimate defeat to that country? The more apparent the momentary success, the more terrible the ultimate disaster would be bound to be. "Be not deceived," Paul wrote to the foolish Galatians; "God is not mocked: for whatsoever a man soweth, that shall he also reap." If Principle is the reality, the support of wrong to gain a desired end is a descent to the inferno of the Jesuitical method of doing evil that good may come of it. The only good that can possibly come of it is the temporal and material good of sensual satisfaction. "For." continued Paul, "he that soweth to his flesh shall of the flesh reap corruption; but he that soweth to the Spirit shall of the Spirit reap life everlasting." The man who calmly proposes to sustain his cause, whether it is right or wrong, is certainly sowing to the flesh, and will inevitably reap corruption.

The curious thing is that the world does not perceive this; that the world still believes that it is possible to find success in doing evil. Now, as Mrs. Eddy writes, on page 239 of Science and Health, "Let it be understood that success in error is defeat in Truth." When once that very simple but inviolable scientific fact is grasped in all its significance, people will give up imagining that they can do wrong in the name of good, or, as the old proverb tells them, that two blacks, or for that matter any number of blacks, can ever make a white. A real patriot would only desire the defeat of his country if it were in the wrong, for he must know that only through that defeat could ultimate success be attained. No matter how far one person may have deviated from Principle, another person can never hope to obtain the protection of Principle by following in that deviation. If the first person says that twice two is five, the other person will gain no advantage by saying that it is The believer in the power of evil may imagine that an advantage may be gained in this way, but the person who professes to believe that the only power is good, stultifies his argument by such an admission and is left totally incapable of achieving victory. Does any person exist who believes that Abraham Lincoln could have given Decatur's toast?

FREDERICK DIXON.

The Omnipresence of Advertising

It is a popular commonplace to say that we live in an age of advertising. Many newspapers and magazines seem to exist simply because of their profitable advertising pages. Natural scenery is disfigured with billboards and other signs. Motion pictures are used for the purpose of suggestion. A

新州村田田田田田

ж. Ч.

multitude of other advertising methods are eagerly used by business people, though some variations, because of their peculiarly hypnotic intention, are discountenanced by alert merchants as well as by the general public. The average person does not have to be convinced, therefore, that devices for attracting the attention of the many seem, indeed, omnipresent and inescapable.

The fact is, of course, that even the worst phases of this prevalent belief are but counterfeits of the activity which expresses Principle. There could not even seem to be such a concept as advertising without there being the true idea of it in the divine Mind. The true idea must be wholly good, wholly spiritual, wholly unlimited, wholly apart from any human sense of things. Since infinite Mind is entirely here and now, all that infinite Mind produces must really be completely present, unfolding constantly because of the inexhaustibility of the divine cause. In other words, the real idea is never absent for a moment but is occupying consciousness and leaving no room for any supposition of an opposite. What constitutes the true idea is for each one to reason out for himself in every connection.

In prophesying the coming of the Christ, Balaam the son of Beor declared, "Come therefore, and I will advertise thee" as to the future. At least that is the English translation of the Hebrew, given in the King James version of the Scriptures. Though the question may arise as to whether the word "advertise" in that passage meant the same in the early seventeenth century as it does in the business world to-day, still there can be no doubt but that the word in both English and Hebrew indicated then and indicates now a turning of thought in some specific direction. The turning of thought in the right direction is, thus, the true way of advertising. The turning of attention in wrong directions is sheer hypnotism and is necessarily futile. In fact, sooner or later all attention has to be directed to the one divine Principle, which demands, "Look unto me, and be ye saved, all the ends of the earth: for I am God, and there is none else." The activity of Mind which constitutes man is already turned altogether in this one right way, since there is no other. What the student of Christian Science learns and proves is that all genuine desire is satisfied through being focused on infinite intelligence, and not on any material sense of things

That is the difference between righteous advertising and hypnotism. The one is reasoning that is thoroughly in accord with Principle; the other is utterly illusory belief that matter can be attractive. The power of the former comes naturally from right motive; the futility of the latter lies in its being merely suppositional effect of suppositional cause, a belief without any actual believer, sheer nonentity. No one can do anything eternal or real because of suggestion, for the very supposition of suggestion comes from nowhere and is kept forever null and void by the allness of the divine Mind and its idea. This is for each one to prove in his daily experience. By turning attention wholly to Principle, reasoning, practicing, and living in accord with Truth, one finds Principle expressed here and now as the omnipresent Christ to heal all manner of seeming wrong. Advertising, in its best sense, is, then, simply a name for the turning of attention to Principle in all circumstances. Anything less than this is not really advertising. It is the understanding of the reality that protects perfectly from any spurious sense of things.

Principle manifest is all there is to advertise and is, of course, completely and rightly advertised continuously. Since Principle is all-inclusive, there is nothing else to pay

any attention to. This is the fact to be affirmed in the very face of seeming obstacles. Even a denial of this fact can never succeed in doing anything but proving that attention is turned to the fact. Whatever would try to oppose itself to Principle necessarily succumbs as a mere incident in the inevitable turning to Principle. Thus on page 191 of "The First Church of Christ, Scientist, and Miscellany" Mrs. Eddy says: "Be patient towards persecution. Injustice has not a tithe of the power of justice. Your enemies will advertise for you. Christian Science is spreading steadily throughout the world. Persecution is the weakness of tyrants engendered by their fear, and love will cast it out. Continue steadfast in love and good works. Children of light, you are not children of darkness. Let your light shine. Keep in mind the foundations of Christian Science -one God and one Christ. Keep personality out of sight, and Christ's 'Blessed are ye' will seal your apostleship." This passage is an excellent one for the business man or woman, as for any one else, for the whole of every true business is to express Principle, and the understanding and demonstration of Principle, no matter how much it may seem to be denied by suppositional mortal mind, must always succeed.

The business which is to be rightly advertised is not dependent, therefore, on human personality. It is the spiritually tangible manifestation of divine intelligence in infinite variety. Even though people may seem temporarily afraid to recognize this activity as the one business that is worth while, the recognition must come, as the very belief in human opinions surrenders to the truth. The love of Principle does cast out any frightened reluctance. Hence all advertising that is, in fact, the love of Principle is boundless in its reach and true attractiveness. Only the right stand on this basis is happy and successful, entailing that constant unfoldment which is genuine prosperity because it is the constructive result of the one divine source. Advertising, then, is but one of the multitude of names for divine idea. In proportion as one understands this, one finds any belief of lack or discord replaced by the spiritual idea of harmonious abundance. It is as impossible for advertising or turning to Principle to cease as it is for God to cease to be God. The omnipresence of God is forever expressed in the omnipresence of true activity in accord with the divine standard. To find advertising as the divine Mind manifest and not as any human sense of things is to prove the perfect effectiveness of spiritual intelligence in business and all the activity which makes up living. GUSTAVUS S. PAINE. +++

Among the Churches

Current Notes

Boston, Mass.—The First Church of Christ, Scientist. Sunday services, 10:45 a.m. and 7:30 p.m.; Sunday school, 10.45 a.m.; Wednesday evening meeting, 7:30 p.m., in the church edifice, Norway, Falmouth, and St. Paul Streets. The church is open to visitors Wednesdays and Fridays from 10 a.m. to 5 p.m.

Reading rooms: Little Building, corner of Tremont and Boylston Streets (fourth floor); open daily, except Sunday and Wednesday, from 9 a.m. to 9 p.m., and on Wednesday from 9 a.m. to 5 p.m. International Trust Company Building (second floor), 45 Milk Street, near Devonshire, opposite post office; open daily, except Sunday, from 9 a.m. to 5:30 p.m. Coolidge Corner Building, 1316 Beacon Street, Brookline; open daily, except Sunday, from 9 a.m. to 6 p.m.

MARLBORO, MASS.—The practical completion of the Christian Science church at the corner of West Main and Winthrop Streets gives to that locality a finished aspect, and is in marked contrast to the building which for generations stood upon the site. It was the old Arnold homestead. The new church edifice is sufficiently advanced so that services were held there last Sunday [Aug. 1] for the first time. The society bought the property twenty-one years ago.

The Boston Globe.

RACINE, Wis.—The new church edifice for First Church of Christ, Scientist, of this city, now in process of erection on the northwest corner of Ninth Street and College Avenue, is planned to accommodate some five hundred persons exclusive of the Sunday school children. The building will contain, in addition to the auditorium and Sunday school room, two small foyers with cloakroom space, and room for readers, organist, soloist, trustees, ushers, distribution work, toilet rooms, and so forth, and will be thoroughly up-to-date with respect to accommodations for its congregation.

The "head stone of the corner" was unveiled Wednesday, September 1, "at the rising of the sun." The brief ceremony, which was conducted by the First Reader of the local church, was very appropriate and profoundly impressive.

The Racine Journal-News.

Pasco, Wash.—Beginning with next Sunday's [Aug. 15] services the Christian Science Society will hold its services in the old Methodist church building at the corner of Third and Bonneville.—Pasco Herald.

LONGMONT, COLO.—Christian Science was introduced to Longmont by one of its residents who on one of her trips in search of health was healed by it of various diseases. She interested several persons, and in her home Christian Science meetings were held until September 27, 1902, when twelve people met in this home, and First Church of Christ, Scientist, Longmont, Colorado, was organized. Later it was incorporated according to the laws of Colorado. For five years services were held Sunday mornings and Wednesday evenings in Blum Hall, where a free reading room was open daily from 9 a.m. to 5 p.m. The first lecture was given in 1903. The Sunday school was started and has continued, sometimes with only a few in attendance, until to-day it is in a very satisfactory condition. The funds of the Sunday school have been used to aid the various activities of the cause, such as subscriptions for periodicals and the Monitor for the Public Library, the War Relief Fund, the lectures, and recently, the motto on the church wall.

A building fund was started with a donation of five hundred dollars. When the extension to The Mother Church was being built, the collection taken the first Sunday in each month was set aside for it, and the third Sunday's collection for the local fund. Finally at the last call for funds for The Mother Church, all money in the local fund, with the exception of the five hundred dollars, was given to The Mother Church.

The church moved to Donovan Building, August, 1906; to Schey's Hall in the spring of 1908, and to Buckley Hall in 1909, where services were held until August, 1913, when the organization moved to its own church edifice, for which the site had been purchased in December, 1910, for \$1500, half of the amount being paid at the time of purchase, and the remainder in 1913. The corner stone was laid on June 26, 1913, at 8 a.m., with appropriate services. The church was ready for occupancy September 7, 1913. The reading room was established in the church building, for the reading

and sale of authorized Christian Science literature, also a lending library, given by the Trustees Under the Will of Mrs. Eddy. The indebtedness of the church was gradually diminished, and the promise of God again was proved as voiced by the prophet Malachi: "Bring ye all the tithes into the storehouse, that there may be meat in mine house, and prove me now herewith, saith the Lord of hosts, if I will not open you the windows of heaven, and pour you out a blessing, that there shall not be room enough to receive it."

Love made a channel in June, 1919, by a generous offer which opened the way to cancel the debt. Members and friends responded generously, and the note was paid July 1. The entire property—lot, building, and furnishings, costing approximately \$5500—has been paid for by voluntary contributions of members and friends. More than the necessary amount was received, and the surplus has been used for the renovation of the church.

LAWRENCE, KAN.—In 1893, the healing of a number of cases which had been pronounced incurable, together with the difference in the manner in which Christian Science was now being presented, resulted in a few becoming willing followers of Truth, and in August, 1895, the church was organized in accordance with the by-laws of The Mother Church and under the regulations of the state laws.

Sunday services were first held at a private residence until December, 1896, when a hall was rented in the business section of the town. Here the Wednesday evening meetings were begun, also a reading room was opened afternoons from two to five o'clock. The first lecture was given in the fall of 1899. In January, 1900, new rules and by-laws were adopted, which were changed and added to as the need for revision arose, and which were also necessary in order to keep up with the progress of the entire movement of Christian Science. In 1902 subscriptions to The Christian Science Journal and Scntincl were placed in the city library, and later a subscription to the Monitor was added.

Because Lawrence is a university center and its population is rather transient, many of the church members moved away. This necessitated the holding of services at a residence for a time in 1902, but as the healing work continued, the increasing numbers in attendance made it again necessary to go back to the hall for services and to reopen the reading room. However, not until a more convenient location was procured in the Fraternal Aid Association Building in 1905, were the Wednesday evening meetings resumed, and here, too, as soon as a room was available, the reading room hours were continued. In June, 1911, there was purchased at the corner of Thirteenth and Massachusetts Streets, a very beautiful building site, and the house thereon was remodeled and converted into an attractive church home, ready to be occupied for services on September 1, of the same year.

At the time the church was organized the Sunday school was started with four "Busy Bees" who contributed their mite toward the furnishing of "Mother's Room" in The Mother Church. Both the church and Sunday school have kept up a gradual steady growth, contributing financially to the different funds of The Mother Church whenever the opportunities arose, and finally on September 1, 1919, the church was freed of its entire indebtedness, leaving a surplus in the Building Fund for a new church edifice. The words of our dear Leader referring to the organization of The Mother Church as given on page 18 of the Manual, might well be applied here: "Although walking through deep waters, the little Church went steadily on, increasing in numbers, and

at every epoch saying, 'Hitherto hath the Lord helped us.'" Thus with a clearer realization of the spiritual meaning of Church as contained in the definition on page 583 of Science and Health, "The structure of Truth and Love; whatever rests upon and proceeds from divine Principle," we build "an house not made with hands, eternal in the heavens" "whose builder and maker is God."

TURLOCK, CALIF.—The Christian Scientists are soon to have their own church in Turlock, according to an announcement made public by the chairman of the building commit-

A lot has been purchased on the southwest corner of Laurel and Columbia, which is about one block from the old high school, and the committee is at work on plans for the church. Construction will be started in two or three weeks if the plans of the committee materialize. The building will cost in the neighborhood of eight thousand dollars and will be a frame structure.

The society has been in existence in Turlock for some time and is holding its services at present in Broadway Hall. According to The Mother Church Manual they were not authorized to form a church, which is the next step from a society, until about the first of March of this year, at which time they had reached the required membership. The membership is growing fast.—Turlock Tribune.

Syracuse, N. Y.—Plans have been formulated for work on the new edifice for First Church of Christ, Scientist, at the comer of Forman Avenue and East Jefferson Street. Ground will probably be broken next spring and work pushed rapidly to complete the building, which, it is estimated, will cost in the neighborhood of \$200,000. The church owns three lots in East Jefferson Street opposite Forman Park, which will be used entirely for the building .- Syracuse Journal.

RENO, NEV .- The first unit of the new Christian Science church, which will be located on the corner of Court and Granite Streets, is completed. The first unit includes the foundation and the basement. The foundation has been finished and cement is being poured. The next unit of the church will be the Sunday school room, and work on that will be started as soon as possible after the basement and foundation are accepted. The auditorium, which will occupy the entire second story of the edifice, will constitute the third unit.... It will cost, complete, approximately \$80,000.

Reno Gazette.

Admission to Membership in The Mother Church

The next admission of candidates will take place on November 5, 1920, as provided in Article XIII, Section 2, of the By-laws of The Mother Church. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before Friday, October 22, 1920. Consideration of any applications received after that date will be deferred until the June 3, 1921, admission.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to June 5, 1920, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second CHARLES E. JARVIS, Clerk,

236 Huntington Avenue, Back Bay, Boston 17, Mass.

The Lectures

SPRING VALLEY, N. Y .- Lecturer introduced by Elting

Alexander, who said in part:-

Christian Scientists are certain that they have gained some understanding of that truth which Jesus, the great Way-shower, taught and of which he spoke when he said, as recorded in the gospel of John, "If ye continue in my word . . . ye shall know the truth, and the truth shall make you free."

It is a perfectly fair and reasonable question for one to ask, "How can I be certain that this teaching is true?" Right here I would like to call your attention to a passage in the seventh chapter of Matthew, which is but one of many in which Jesus emphasized the fact that "by their fruits ye shall know them." It is recorded in the third chapter of James that no fountain can both "yield salt water and fresh," and it is also pointed out that olive berries do not grow on fig trees.

Now since every Christian Scientist has benefited in proportion to his understanding of God as infinite Love, the source of all good and good alone, and these benefits are made manifest in better lives, better health, and, more than all else, a decided willingness to look to God and not materiality for every need,-bearing in mind their demonstrations, or fruits, and these references from the Scriptures,can you not understand why Christian Scientists are so certain of their ground?

When, my friends, you and I find something that is a real help in our daily lives, be it a new book, a tool, or a new invention, it is natural and certainly Christian to want others to benefit as we have done, but to have no desire to compel them to accept it. Take for example the telephone. Having one, we learn to appreciate its convenience, and in sharing its advantages we not only bring a similar pleasure to our friends but in no way deprive ourselves. Through this desire to share blessings as well as to correct false impressions regarding Christian Science, the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, Massachusetts, was established.

Lectures to be delivered

By Members of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, U.S.A.

CONNECTICUT—Hartford (Second Church): Church Edifice, Asylum Street, corner of High Street, 8 p.m., Oct. 11. England—Derby: Central Hall, 3 p.m., Oct. 31.

Halifax, Yorkshire: "The Picture House," Wards' End, 3 p.m.,

Kingston-on-Thames, Surrey: Lecture Hall, Epsom, 8:15 p.m.,

ILLINOIS-East St. Louis: Church Edifice, 612 Washington Place, 8 p.m., Oct. 8. Murphysboro: Liberty Theater, 2.30 p.m., Oct. 10.

Indiana-La Porte: Masonic Temple, 8 p.m., Oct. 9.

Marion: High School Auditorium, 3 p.m., Oct. 3.

MISSOURI-St. Louis (First Church): Church Edifice, Kingshighway and Westminster, Oct. 5.

St. Louis (Third Church): Church Edifice, 3524 Russell Avenue. 7.30 and 9 p.m., Oct. 7.

NEBRASKA-Beatrice: Church Edifice, corner Eighth and Ella Streets, 8 p.m., Oct. 3.

Norfolk: Library Hall, Main and Eighth Streets, 8:30 p.m., Oct. 12.

NEVADA-Tonopah: The Airdome, Brougher Avenue, 8 p.m., Oct. 5.

Testimonies of Healing

So much good has come to me since beginning the study of Christian Science, I wish to acknowledge through the Sentinel some of the blessings received. During part of the year 1918, and up to March, 1919, my health seemed to be failing rapidly. Prior to that time, I had enjoyed excellent health. In January, 1919, I was sent to a hospital for what a physician diagnosed as a complication of incurable diseases. After remaining in the hospital for a month without any improvement in my condition, I was removed to my home, and no encouragement was held out to me that I might ever be any better. In this condition I turned to Christian Science, seeking a practitioner for help. I was healed almost immediately not only physically but spiritually. The practitioner treated me for one week only and, with the exception of one visit made to her, all other treatments were absent. At the end of one week I called her over the telephone and said, "I think I can take care of myself. I never felt better in my life." I had been living on the strictest diet, but on the recommendation of the practitioner, given in my first treatment, I began to eat everything forbidden me by the physicians.

Five weeks after my first treatment, to please my husband and to make my family feel more comfortable I had one of the physicians make a thorough examination. Much to his surprise he found me a well woman. Since I had not called on him for professional help for five weeks, he was at a loss to understand what had caused the change. He said, "What has caused the change?" I said, "I have been healed by God, through the understanding of a Christian Science practitioner, and have not only been healed physically but uplifted spiritually." There is nothing impossible with God. I hope this testimony may be the means of pointing the way to some sin-sick mortal who is looking for help as I was.

Words fail to express my heartfelt gratitude to God, and to our revered Leader, Mrs. Eddy, who has shown us the way, and to the practitioner whose devoted ministration has brought me to see and know the truth.

(Mrs.) Mary A. V. Shaw, Paris, Texas.

I am giving the following testimony regarding Christian Science because, having received the greatest benefits from its study over a period of more than three years, I am glad to express gratitude and to share with others the lessons learned from my experience.

When I started studying Christian Science I had previously tried many plans, including denominational Christianity, in the endeavor to improve my life, which was very unsatisfactory. These plans had all failed in that they did not produce lasting results and were all dropped after a longer or shorter trial. I finally became convinced that my difficulties were caused at bottom by regarding material things as the essentials of life, and I started looking around to find some religion, or plan of living which put spiritual things first. I had heard of Christian Science and determined to give it a fair trial since what I had heard indicated that it, at least, was not a plan of living that regarded material things as of first importance. A trial of a few weeks convinced me that Christian Science was wonderfully different from anything else I had ever tried, in that the honest application of its rules was certainly tending to produce the results that I had become almost hopeless of attaining. Once convinced of this I continued the study and practice of Christian Science to the present time.

As a result I am entirely freed from nervous debility, manifested in severe fatigue after a few hours of work, which was a result of nervous prostration. I had for a long time, on my physician's advice, been in the habit of leaving work after lunch to lie down for an hour or two, but I now work regular office hours, and often evenings, without discomfort. Other results are a steady and rapid increase in my salary-I now receive over four times the salary I was receiving when I started studying Christian Science, and I have the satisfaction of feeling the increase to be fully earned; a much more harmonious home life; the gradual stopping of drinking, which I knew by experience was making me much trouble and which had been growing on me; the rapid cure of a number of unpleasant symptoms remaining after nervous prostration, such as continual trouble with my eyes, limiting me in the use of them for reading; backache, insomnia, irritability, extreme sensitiveness to heat and cold; dislike of mixing with people, et cetera. Almost any manufacturer will admit that the past three years have presented peculiarly difficult problems. Some of these problems have for me been satisfactorily solved, or are in a process of solution, through the application of Christian Science by a practitioner.

These results do not really express the true benefit which underlies these signs of improvement. The real benefit has been the substituting of peace, happiness, and successful work, for irritation, unhappiness, and failure. The three most important factors in producing these results, I believe to have been (1) the fact that we have the truth in Mrs. Eddy's statement, with related statements in Science and Health, that the power that Jesus manifested is available now to each of us individually; (2) scientific, patient, and loving work on the part of a practitioner, and (3) willingness to be led and to work toward spiritual good on my part.

It might be asked how do I know that the results mentioned were due to Christian Science. The reason is that during the three years it happened that many times I became tired of and careless in doing the work required of those endeavoring to demonstrate Christian Science. In every case where this happened I ceased to progress and began to manifest the old symptoms, and it was only by reapplying myself to observing the rules of Christian Science that I was able to resume progress. As this occurred over and over again in the course of three years, there is no question in my mind that the application of Christian Science was entirely responsible for the beneficial results.

HENRY A. NORTH, Chicago, Ill.

I wish to express my gratitude for what Christian Science has done for me and my little boy, now nine years old. Two years ago we were both sick, the boy suffering from abscesses in the head, adenoids, and appendicitis. He could not walk and was unable to stand without assistance. The doctor attending him said that two or three operations would be necessary, but none was submitted to, yet to-day through Christian Science he is perfectly all right and has not missed a minute from school this session. I did not know what Christian Science was, but I thought I knew God, so I prayed to be shown a way to get well and was led to Christian Science. I asked people what it was, and when I had found it I had found the "pearl of great price," for there is nothing it will not do for us. I was healed of rheumatism, neuralgia, nervous breakdown, liver complaint, swollen limbs, and deafness, being so deaf I could not hear the telephone bell in the room with me. Cancer on my limb, which I had for more than twelve years, has disappeared; nervous sick headaches which I was supposed to have in-

herited have gone. I could not eat cooked food, as I suffered from nervous indigestion for eight years, could not sleep, but to-day I have perfect health. I weighed only about a hundred pounds then, now I weigh one hundred and forty. I am grateful to Mrs. Eddy, who has so lovingly shown us the way, and to the loving practitioner who so willingly helped me. For the literature, also, I am grateful; it has helped me so much. I have had the privilege of class instruction and membership in The Mother Church and in a branch church.

(Mrs.) EFFIE V. KURTZ, Washington, D. C.

When I first took up the study of Christian Science, I used to scan the testimonies, hoping to find a case similar to mine that had been healed. I think this is a great help to one when first coming to Christian Science, so I give this testimony, hoping it may help some one afflicted as I was.

For three years I was troubled with internal weakness, with its accompanying despondency and nervousness. When I had reached the limit of endurance both mental and physical, and after praying to God for some way out of my unhappiness, I was led to a Christian Science friend, who told me that Science could heal me. I started to take treatments and in about three months was perfectly well. The nervousness left me, and how wonderful it seemed to be happy again.

I wonder each day how people live without this great truth. Every erroneous condition in our home, whether it is physical, mental, or business worry is met by our understanding of Christian Science. No material possessions could tempt me to give up what I know about God.

(Mrs.) CLAUDIA C. THOMAS, Santa Fe, N. Mex.

I wish to express my deepest gratitude for all that Christian Science has done and is still doing for me. I first heard of Christian Science in 1916 through a friend, when I had dragged myself around for years in great mental distress. Now I have seen a light through the textbook, "Science and Health with Key to the Scriptures," by Mrs. Eddy, which enables me to understand the Bible better. I was always downhearted and lived in mental darkness, but I have learned that even when the need is greatest God is near. A throat trouble has been healed through the work of a kind practitioner, and I have had many other demonstrations of healing in the family, through Christian Science. Indeed I am grateful that I am learning to know God, and hope that soon all mankind may see God's light, for as the Scriptures say. "In him we live, and move, and have our being," and also, "The kingdom of God is within you."

For the past nearly five years I have not taken any medicine and have become a new creature. I cannot be grateful enough to God and to Mrs. Eddy for the wonderful revelation of the Christ-healing.

(Mrs.) ANNA MUELLER, Butte, Mont.

In loving gratitude I submit this testimony, hoping that it may be of as much benefit to others as those of others have been to me. During the six years of our study of the Christian Science literature, we have experienced untold blessings spiritually, financially, and physically. One of my first healings was that of bowel trouble of fifteen years' standing, for which I had treatment from several physicians, but without avail. This healing took place before I had finished reading the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker

Eddy, and when I only partially understood it, at that. Colds, croup, chilblains, and fevers have been overcome within a few hours. I experienced an instantaneous healing from fever, which healing came about in the following manner: I was away from home, and having spent what was to me a miserable day, awaited the coming of my husband. When he arrived that evening I complained to him, and I recall his saying that I was very foolish to give up to error in this manner. I pondered his words, and it dawned on me that I was holding fast to error, and I realized my mistaken attitude. Then straightway the fever left.

I could write pages telling of the many, many blessings that have come to us daily through reading and studying the Christian Science literature. We owe an immense debt of gratitude to Mrs. Eddy for so patiently and lovingly exploring the way for us, and I thank God that we are living in this age in which has been given to us the wonderful opportunity to live and practice the Golden Rule. I also desire to thank those kind and loving practitioners who have always been so willing day or night to lend a helping hand during our journey Spiritward.

MRS. CHARLES E. LEHMANN, Hollister, Calif.

Two years ago I was so ill that the doctors did not think I could possibly live more than a week, suffering daily with heart disease, neurasthenia, rheumatism, et cetera. My life had become a misery, and though only twenty-four years of age I had no desire to live, excepting for the sake of those I loved. I wrote to a friend with the desire to say "Good-by" ere I passed on; this friend, however, did not say "Good-by," but filled me with new hope by presenting the truth to me. We went to the Wednesday evening testimony meeting but, to be quite frank, I did not expect to sit . through the service, having had an attack only the previous day, and still feeling very ill. During the service the reader read from the Bible, Isaiah 59, "Behold, the Lord's hand is not shortened, that it cannot save;" also Psalms 107, "Then they cried unto the Lord in their trouble, and he delivered them out of their distresses." I knew these words were for me and seemed to be a message from God that if I would only have faith, He would heal me. I at once resolved to give Christian Science a trial and to stick steadfastly to faith in God, for I knew doctors had done all they possibly could for me. My willingness was sufficient, for during that service the healing began, and the next morning I awakened to perfect health and happiness, such as I had never known before. My friend asked me to see a practitioner next day, which I promised to do; but when the practitioner and I had a conversation, she lovingly told me that I did not need her help, but to continue reading the textbook. Since then I have manifested better health than ever before, and those who know me well marvel at the change.

My gratitude to God is unbounded, for I know He has answered my prayers; also to Mrs. Eddy, who has shown us how to love our neighbor; and for the literature, which is ever helpful and refreshing. My life, however, can only express the deep gratitude I feel.

(Miss) URSULA HOWARD, Watford, England.

As I have always found the testimonies in the Journal and Sentinel most helpful, I feel it is time I added mine. For fourteen years before I took up the study of Christian Science I had been a semi-invalid suffering from an internal

Science I had been a semi-invalid suffering from an internal trouble. For this I had an operation, which proved for a time successful, and we thought my troubles were at an end.

Digitized by Google

I had been home only a short time before I was suddenly seized with bad turns which proved to be epileptic fits. I suffered from these for about three or four years, during which time I had two doctors and two specialists who were all most kind to me and did their best. The last specialist tried every drug but one, and that he did not care to give. We were in despair, and it was then that Christian Science came to me through a friend who was a Christian Scientist. I had never heard of Christian Science and had no idea what it was. She explained a little to me, and although I did not understand it I decided to try it for the sake of my husband and children. I at once gave up all medicine and dieting, and ate just what the others did, a thing I had not done for a very long time. Science and Health was lent to me but I could not read it owing to the supposedly weak condition of the brain. A few days afterwards I asked for treatment and was instantaneously healed although I had no knowledge of what Christian Science was.

I shall never forget the wonderful uplift I experienced with that treatment, and I left the practitioner's office a very different woman from the one I was when I entered it, and for three months I was absolutely on the mountain top. I have had no return of the trouble, and that was twelve years ago. I had a return of the internal trouble for which I had had an operation, but it was quickly overcome in a few days by my own realization of the truth. Since then I have been gradually working out my own salvation. Bronchitis, a growth, indigestion, and muscular rheumatism (all supposed to have been inherited complaints) have been overcome. For some of these I have had help. Smaller ailments such as a weak lung, nettle rash of years' standing, influenza, colds, bilious attacks, corns, chilblains, chapped lips and hands have all been overcome through the knowledge of the truth. No material remedy of any kind have I used during the twelve years. My remedy has always been the truth and it has never failed.

I think that, of all the healings, I am most grateful for the overcoming of jealousy. Only those who have suffered similarly know what it means to have come out of that. This healing was very slow, for it took eight years and it was only as I clung steadfastly to the truth and realized that passage from Science and Health (p. 57), "Happiness is spiritual, born of Truth and Love" that I was freed. I can truthfully say I now know what real happiness is, for I am happy and free as never before. Words can never express the gratitude I feel for that healing. I have been told repeatedly that such jealousy could not be overcome. I am healed to-day through Christian Science. Although I am grateful for the physical and mental release, I can never feel sufficiently grateful for that wonderful sense of peace that I possess through the knowledge I have gained from Christian Science of what God is. That is best of all. My heart goes out in warm and loving gratitude to Mrs. Eddy for so lovingly showing us the way, and also to all those who have helped me. I feel it a great privilege to be a subscriber for all the periodicals, for they are veritable expressions of good. -(Mrs.) R. E. Blanch, Stroud, Gloucestershire, England.

I wish to verify my mother's testimony. Until she was healed through the study of Christian Science I had never known her to be absolutely well, and her healing has certainly been one of entire restoration and rejuvenation. Our home has been completely changed and I shall always be very, very grateful for the fact that Christian Science was brought to our notice.

Personally I have been helped in many ways, as who is

not when one relies solely on the divine power of Truth? Colds, sore throats, bad headaches, and warts on the hands are some of the discords which have passed out of my experience. I have also had an instantaneous healing of measles, and was very beautifully protected during the recent epidemic which ravaged the country. During the first appearance of the epidemic I was constantly coming into contact with those of my friends who were suffering from its ill effects, but through realizing the truth as taught in Christian Science and knowing that I was dwelling securely in an "atmosphere of Love divine" as the words of one of the hymns in the Christian Science Hymnal so beautifully express it (p. 84), I was enabled to come through the experience unharmed. On the second occasion of the trouble I awakened one Saturday morning with all the symptoms of an influenza attack, together with a sore throat, but was able to attend the office at which I was working quite happily by knowing that the only business I could be about was the Father's and that He would give me strength to get through the day. On the next morning the sore throat had entirely disappeared and after attending the service the rest of the symptoms had vanished completely.

Christian Science has also helped me to overcome fatigue and weariness during long and strenuous office hours, and to conquer great fear while my brother was at the front. It is proving a daily blessing to me in my college life in helping me to know that the true source of all knowledge is God. For all these manifold benefits I am very grateful, but more than all else I should like to give thanks for our Leader, Mary Baker Eddy, who proved such a steadfast disciple of our Master in giving to the world this great healing message, showing us that if we will but serve God with all our heart and with all our mind, He becomes the source of all our happiness.

I feel it is only right that I should express my thanks and gratitude for our splendid periodicals. They are indeed proving great channels through which the seed of Truth may be spread; I have received the answer to many problems through perusing their pages and have, on several occasions, gained practical help in my ordinary studies while reading the columns of *The Christian Science Monitor*. To all those who are so faithfully giving their services to the cause of Christian Science and to those who have many times helped me I am indeed grateful.

(Miss) Mabel Blanch.

Fourteen years ago I was almost a physical wreck. I tried several doctors and many different kinds of medicine, which did no good. I had internal trouble, including kidney and bladder disease. I prayed very earnestly to be healed and also had others pray for me, but it seemed to do little good. An operation was advised, which I went through, and suffered very greatly under it and under the treatments while in the hospital where I stayed seven weeks, and then was sent home, but no better. The last physician I visited told my husband I was just as well off without the medicine as I was with it; that I could not be cured. Then I turned to Christian Science and I was healed in a very few treatments. I found a God in Christian Science who heals all our diseases, and I found the peace that this world cannot give. I could go to bed and sleep like a child, where before I had been so nervous I would lie awake most all night long suffering with pain.

I am the mother of six children and they have all been healed of diseases that are common to children. Pneumonia, fever, measles, mumps, croup,—all have been overcome with

Christian Science treatment. I had a daughter healed of influenza during the epidemic of a year ago last winter. I called in a doctor, as not all were willing to rely on Christian Science treatment. He treated her for some time and she did not improve but grew worse. She had an abscess on the lungs and it broke, and the doctor told her husband he did not have much hope for her recovery, as he was afraid she would have tuberculosis. We dismissed the doctor and had Christian Science treatment, and she was healed. Her cough is all gone and she is as well as ever. I am grateful for the physical healings in Christian Science, but the spiritual healing means much more to me.

(Mrs.) MINNIE M. GATES, Ralston, Okla.

4

Words seem so inadequate to express the heartfelt gratitude I feel for the many and great blessings conferred on me through the spiritual understanding gained by the study and application of Christian Science, that unparalleled gift to the world by our revered Leader, Mary Baker Eddy, its Discoverer and Founder. Thousands in all parts of the world are awakening to the inestimable value of this sacred truth, and more and more are heartfelt praise and thanksgiving being offered to the Giver of all good for the unbounded love and devotion manifested by Mrs. Eddy, God's messenger to this age.

I am most devoutly thankful for the overcoming of many false beliefs, physical and mental, among which are neuritis, bronchitis, sprained ankle, gastritis, and pneumonia. Pneumonia was met and overcome in four days, regardless of marked delirium and a temperature that has too often proved fatal under materia medica treatment. This remarkable demonstration was accomplished through knowing the omnipotence of divine Mind, both through the consecrated loving thought of a practitioner and the patient's faith and cooperation.

I in turn have been permitted to work for others and see their fear changed to thanksgiving. It is my desire to continue in the labor of Love, encouraging the earnest seeker to secure the pearl of great price. I am a member of The Mother Church, also of a branch church, both affording unnumbered opportunities for scientific Christian service. Our textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, I have studied for some years, have had the great privilege of class instruction, and for some time have been the happy possessor of Mrs. Eddy's books and the authorized literature of Christian Science—inexpressible blessings.

Jesus said, "Ye shall know the truth, and the truth shall make you free." Mrs. Eddy says, Science and Health (Pref., p. vii), "To those leaning on the sustaining infinite, today is big with blessings." I am proving both these declarations day after day for others as well as for myself, and all may do the same, who are willing to be led by the truth. "When we wait patiently on God and seek Truth righteously," says Mrs. Eddy in Science and Health, page 254, "He directs our path."

(Miss) VIRGINIA R. APSEY, Chicago, Ill.

I am truly grateful for what Christian Science has done and is doing for me. I was first led to the truth through the healing of my mother when I was only a small girl, but was never deeply interested, although I had had several beautiful demonstrations, one of which I wish to mention. Having been troubled with kidney disease and finding it very difficult to attend school, I took treatments of a Christian

Science practitioner and soon had relief from the trouble through the day although for several years I was bothered at night. After this trouble was overcome I gradually lost interest, lingering along in Science until the birth of our baby and a few months preceding. After suffering from Thursday evening until Saturday morning, having a physician in the house most of the time, I went into convulsions. As requested by the physician in attendance we called in another physician. We also called a Christian Science practitioner and a Christian Science nurse who had been engaged, and in about two hours the baby was born. I had only one slight convulsion after the practitioner was called, and there has been no return of the trouble since. The baby is now fifteen months old, and has had only two days' sickness. His teeth were through before we knew it.

I have since been healed of a weak heart, nervousness, and gallstones. We were also healed of Spanish influenza in a few days. For all these healings I am grateful and for the literature and lectures, also to Mrs. Eddy for her untiring efforts in unfolding to the world this great truth.

MRS. HARRY KEAFFABER, Urbana, Ind.

4

Of the efficacy of Christian Science I have had many proofs during the years since I accepted its teaching and regulated my experiences according to my understanding of Principle. My first healing, the result of my own application of Christian Science to what appeared to be a stubborn condition, occurred when I was fourteen years of age, and served to establish firmly for me the fact that Christian Science heals.

The operation of law in mathematics, physics, and astronomy interested me always, and to go one step farther and acknowledge the basic law of true thinking itself to be Mind or Principle was simple and demonstrable. My university course but emphasized the value and utility of Christian Science, revealing what a priceless gift is the ability to reason from the standpoint of Principle instead of listening to the dissertations of human opinions, as incorrect as they are plausible. At the end of the four years I knew that I had the real "Light, which lighteth every man that cometh into the world," and in all the intervening years my faith in and my allegiance to Christian Science have never swerved. My children were born under its kindly and efficient ministrations, without the presence of a physician, and without suffering. Grown now almost to manhood and womanhood, yet, save for an occasional vaccination, they have never had medical treatment of any sort, nor have they been inconvenienced by disregarding the so-called health laws of mortal mind, the penalty for which is often sickness and death.

Adenoids, rheumatism, hemorrhoids, blood poisoning, have been disposed of successfully, by their elimination even as supposed reality, presence, or power. Minor disorders have appeared, only to vanish at the first statement of Truth. Furthermore, I know that disease, accidents, and wrongdoing have been averted through the continuous activity of correct thinking and as the consequent of right desire—which desire Mrs. Eddy calls "prayer."

For the guidance and the good that have come to me through Christian Science, through our church organization, our literature, and the inspired writings of our Leader; for the wonderful gift of Christian metaphysics, which is to be likened to the descent of the Holy Ghost; for the vision of "the city foursquare," the New Jerusalem,—God as All-in-all, the present and eternal fact,—I can never be too grateful, and to Mrs. Eddy for making these experiences possible among men.—(Mrs.) Lilian M. Allen, Berkeley, Calif.

Signs of the Times

[Charles R. Brown, D. D., LL. D., in The Biblical World]

"Judge not"-the Master was not suggesting that we should give up the habit of moral discrimination. . . . He said to some of the leading churchmen of his day, who were false at heart, "Woe unto you . . . hypocrites." He told his disciples to beware of false prophets, who inwardly were ravening wolves. He had not taken leave of his own moral sense. He knew the difference between black and white, and was never disposed to mix his colors until nothing should be left but a muddy gray.

[Ozora S. Davis in Zion's Herald]

In the end it is only by telling the truth and doing the right and trusting others as we want them to trust us that we live happily and succeed.

There are two interesting illustrations of this principle in The American Magazine for July. The first is the report of an interview with Eugene G. Grace, president of the Bethlehem Steel Company, who not only gives the principles according to which he has organized and developed the great industry of which he is the head, but also indulges in some sound advice to young men. He tells how he called the sales force together and gave them the following instructions:

"From now on the Bethlehem Steel Company is going to be recognized for one hundred per cent integrity and for fulfilling every promise given. If there is any commercial man here who thinks it is good business to make a contract capable of a dual interpretation, so as to give him a loophole, the first time he brings in such a contract he will be ordered to step over to the cashier's window to get his money. Nothing tricky or clever, designed to take advantage of the other fellow, will be tolerated. Don't be afraid to put in writing every promise you make a buyer, because this company will religiously live up to your promises, whether you put them on paper or not." Do not miss the meaning of the adverb "religiously" in the quotation from Mr. Grace. It is a fine expression of religion when it becomes the standard or the sanction for the highest ideals of business ethics. At least this is implied in the sentence quoted above.

The second example of the principle that we are illustrating comes from an interview with Mr. Julius Rosenwald, head of the great mail-order house of Sears, Roebuck & Co. It is not the growth of this business that is supremely interesting, but rather the principles on which Mr. Sears founded it. To quote Mr. Rosenwald:

"One of these was the principle which Mr. Sears put into that first transaction: that it is essential for a merchant to tell the exact truth about what he has to sell. Another was that it is equally essential to deal with patrons on the basis of a belief in their honesty. In all the years this concern has been in business, involving millions of customers, that rule has proved a sound one. The percentage of people who have shown themselves dishonest is negligible. Honesty begets honesty; and nowhere more than between a merchant and his patrons."

As a practical illustration of this business law, Mr. Rosenwald cites this experience: "We have just as much confidence in our customers as they have in us. One of the most common ways we receive money is by personal checks, and we do not require that these checks be certified. Last year we took in over \$67,000,000 in personal checks, and our total loss through bad checks amounted to less than one fortieth of one per cent."

Announcements

From The Christian Science Publishing Society

New Morocco Bound Vest Pocket Edition of the Textbook

Announcement is made of the publication of a new, morocco bound, vest pocket edition of "Science and Health with Key to the Scriptures," by Mary Baker Eddy.

This small volume, 3 1-16 by 4 5-16 inches, the same in size as issued for soldiers and sailors during the war, is bound in black morocco, limp, leather lined cover, round corners, gilt edges. Price \$3.50 for single copy and when included in lots of twelve or more copies of Science and Health in any or all bindings, \$3.25 each.

Orders for this edition will be filled in rotation.

Vest Pocket Bible

The Bible, bound in morocco, uniform in style with the vest pocket edition of Science and Health, is now on sale at \$4.75 a copy. Order by number 08X. Reading room discount 10 per cent.

New Pamphlets

Advance information will in future be given two weeks before each new pamphlet is placed on sale. This will replace the former system of standing orders.

New Pamphlets in German

On October 9, 1920, there will be placed on sale a new German pamphlet entitled "Ein stilles, sanftes Sausen" ("A still small voice") containing the following articles reprinted from the Christian Science periodicals with alternate pages in English: "The secret place of the most High," "Never too Late for Healing," "Treatment," "Cause and Effect."

There is now on sale a new German pamphlet entitled Läuterung (Purification) containing the following articles reprinted from *The Christian Science Monitor* with alternate pages in English: "Lusting Against Lust," "The Lust of Money," "The Lust of Power," "Looking Ahead," "Sincerity."

Price of each of the above pamphlets 5 cents a copy. Reading

room discount 20 per cent.

"Rudimental Divine Science" for the Blind In English Braille

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U.S.A.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U.S.A.

From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to CHARLES E. JARVIS, Clerk, 236 Huntington Avenue, Boston 17, Massachusetts.

From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered. Please advise promptly of any change in name or address

Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to EDWARD L. RIPLEY, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

Letters of Appreciation

Many letters of appreciation of THE CHRISTIAN SCIENCE MONITOR and other Christian Science activities are constantly being received. These letters express what these activities mean to different individuals in various occupations and pursuits. The favorable comment that has been received on those already published indicates that they are welcome and helpful; therefore others will be published under the above heading. One such letter follows:

SHOULD like to say that The Christian Science Monitor provides me with my most unfailing contact with cultured It is in my case a substitute, also, for that social life where ideas, restrained humor, and clean bright talk can be encountered. It has been my misfortune to have failed in discovering or at least penetrating into such an atmosphere. Perhaps American social life may be enriched by just such influences as the Monitor. I wish to thank you for the beautiful illustrations, the fine reproduction of prints, and the Monday Art Page. I am engaged in a branch of "commercial art" for a livelihood and know a number of my associates who buy the Monday edition for its interesting and forward-looking Art section. The typography of the whole paper, the arrangement of advertising matter, as well as other matters in the "dress," call for the utmost commendation. Clippings of advertisements serve some of my acquaintances as models for hand lettering and arrangement. Interesting examples of pen handling are also frequently clipped. The editorial page is a gem—the clear unbiased reasoning and the literary quality daily evident give the effect of a monthly review issued every twenty-four hours.

Morocco. one to five copies inclusive, \$5.50; six or more, each 85.25. Orders for the French translation in lots of six or more may include both bindings.

German Translation. Alternate pages of English and German. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each \$5.50; six or more, each \$5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, French, and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy \$2.25; twelve or more, each, \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; twelve or more, each \$3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy \$5.00; twelve or more, each \$4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 366 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy \$2.25; six or more, each \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; six or more, each \$3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy \$5.00; six or more, each \$4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy \$6.00; six or more, each \$5.50.

Christ and Christmas. An illustrated poem. Cloth, single copy \$3.00; six or more, each \$2.50. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Unity of Good and Other Writings. One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science versus Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy \$1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy \$2.00; six or more, each \$1.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, single copy \$1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy \$1.00; six or more, each 75 cents.

Unity of Good. This book lays the ax at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy \$1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy \$1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, alias Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

Printed in the New York point, American Braille, and English

PRINTED in the New York point, American Braille, and English Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Rudimental Divine Science and No and Yes. In one volume, French translation, with alternate pages of English, vest pocket size. Blue cloth, gray edges, single copy \$1.25; six or more, \$1.10; blue leather, gray edges, single copy \$2.00; six or more, \$1.75 each.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science versus Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy \$1.50; six or more, each \$1.15.

Christian Science versus Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

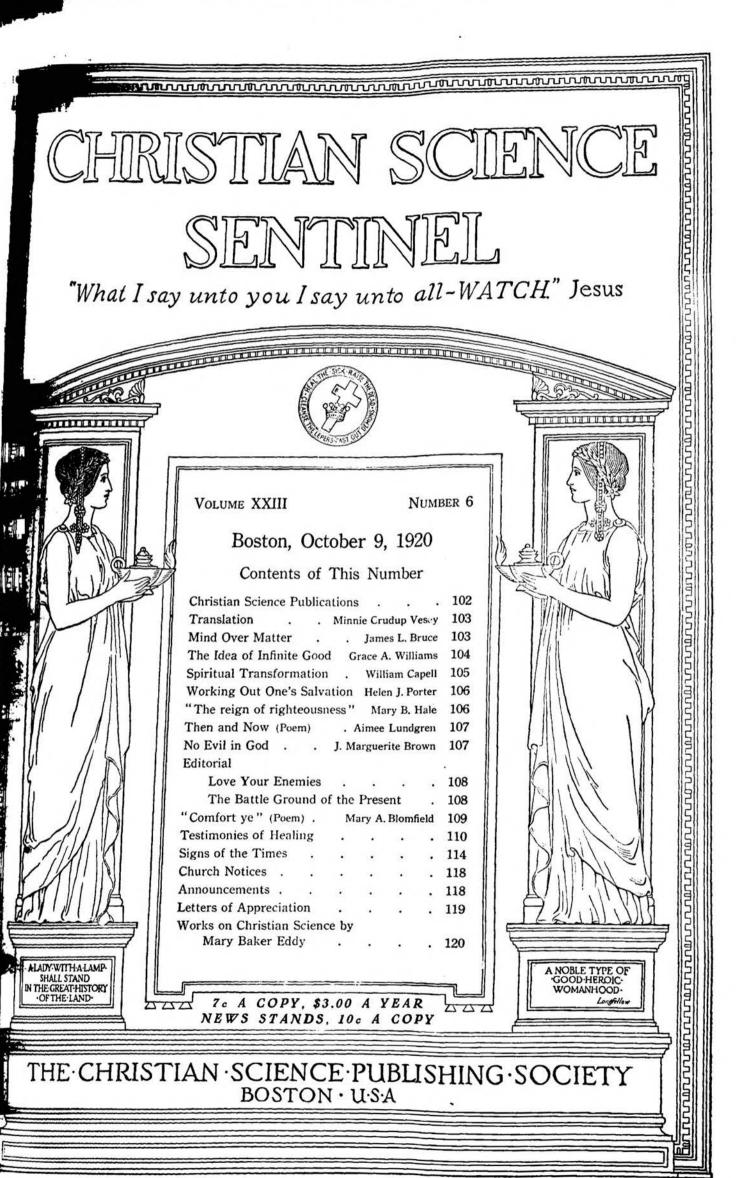

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy \$1.50; six or more, each \$1.25. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign. Address orders and make checks payable to

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY, BOSTON 17, U.S.A.

Sole Publishers of All Authorized Christian Science Literature

Christian Science Literature

"Science and Health with Key to the Scriptures" and all other published writings of Mary Baker Eddy are listed on the outside back cover page of this Sentinel.

Christian Science Sentinel

Established, 1898, by Mary Baker Eddy. Published weekly, containing articles, editorials, and special current information regarding the Christian Science movement, also testimonies of healing. NUMBER 6

Translation

MINNIE CRUDUP VESEY

NO see the universe as spiritual is to see infinite good. To see the universe as spiritual is to see the fullness of God. On page 361 of "Miscellitis to see the fullness of God. On page 361 of "Miscellitis to see the fullness of God." laneous Writings," Mrs. Eddy, the Discoverer and Founder of Christian Science, says, "God is the only Mind, and His manifestation is the spiritual universe, including man and all eternal individuality." From his very first introduction to the Principle and rules of Christian Science, the student understands in a measure that man-individual man-is the image and likeness of God. But it is after he has seemingly experienced many discordant conditions that he begins to realize that his apparent difficulty has arisen through his having attempted the impossible, namely, an effort to fit a spiritual man into a material environment. This realization causes him, if he is an earnest student, to cast about to find where the seeming trouble lies, and then he gets a glimpse of the fact that "all is infinite Mind and its infinite manifestation, for God is All-in-all" (Science and Health, p. 468). The quest to prove this is a quest of the

As the spiritual universe is the manifestation of the immortal divine Mind, expressing infinite ideas, so the material universe is but its supposititious opposite, presenting the phenomena which are the outcome of the mortal human mind's false pattern of divinity. On page 337 of "Science and Health with Key to the Scriptures" we read: "The visible universe and material man are the poor counterfeits of the invisible universe and spiritual man. Eternal things (verities) are God's thoughts as they exist in the spiritual realm of the real. Temporal things are the thoughts of mortals and are the unreal, being the opposite of the real or the spiritual and eternal." Thus it follows that the material universe is a lie about the truth. Every material object in it is a wrong presentation of the right idea. Christian Science teaches that to reverse the material falsity is to find the spiritual actuality. By this process the whole phenomenon of this matter world will give place to the spiritual reality; then will appear that which has always existed in the divine Mind-the new heaven and the new earth.

To bring about this reversal in daily and hourly experience, through persistent right seeing and knowing, is true unfoldment and will unravel the seeming mystery surrounding human existence. When it is realized that each seeming mortal experience with things is merely a state of so-called mortal consciousness, one awakens to the importance of recognizing every moment the real in place of the seeming. As this process of replacement is realized and practiced, whereby each false semblance gives place to the true idea, every earthly experience becomes a joyous reality, and one, instead of believing himself to be in a discordant world, finds that he is surrounded with beauty and light and love.

Not only are the sons and daughters of God true ideas reflecting His light and goodness, but those so-called material objects which the children of men designate as trees,

flowers, houses, money, food, clothing, et cetera, are all counterfeits of the boundless variety of idea that makes up that great world of Spirit which is fadeless and undying and is present here and now. As each material appearance, however small it may seem, is replaced by the spiritual verity, some vision of the real universe is gained and an equally consequent vision of the Christ. Every time the true idea appears, the Christ appears. Each recognition of the spiritual idea brings its element of freedom and this was certainly what Jesus meant when he said, "If ye continue in my word . . . ye shall know the truth, and the truth shall make you free."

When one sees the universe as spiritual, he sees God and he sees God's man, joyous, happy, successful, loving, and good, and he sees that he himself is that very man. He sees as unreal any supposititious opposite calling itself a sick man or a sinner. The true understanding of God and His manifestation, the spiritual universe, enables one to prove the statement made by Mrs. Eddy on page 126 of "The First Church of Christ, Scientist, and Miscellany," when in explaining that the one thing needful to spiritualize thought is divine Science, she says, "We have it only as we live it." And this is surely what is meant by the passage from I John 3:3 which is read in all Christian Science churches every Sunday, "And every man that hath this hope in him purifieth himself, even as he is pure." As the belief in a carnal matter world and its Adam-man disappears, the spiritual, real universe and its Christ-man appears.

Mind Over Matter

JAMES L. BRUCE

OFTEN in talking with those who have a misconceived sense of Christian Science rather than an understanding of it, the remark is heard, "I believe in the power of mind over matter, just as you do." Further inquiry as to just what the speaker means by this brings out the information that "will," a characteristic of the human mind, has been considered and that this has been regarded as the cardinal point or worth while element of Christian Science. This has been added to other views and the resultant has been considered "better than" or "just as good as" the genuine doctrine.

Now if a person is desirous of learning of the tropics and the flora peculiar to them, he does not inform himself of definitions foreign to the subject nor travel in the polar regions. Just so, one should not study into the suppositional vagaries of the human mind or the machinations of the human will and expect to get a comprehensive grasp of what Mrs. Eddy discovered and gave to the world, but he should travel in the country of the Christian Science literature and study its flora and not the flora of a country that is entirely opposite. On page 295 of "Science and Health with Key to the Scriptures" we read, "The theoretical mind is matter, named brain, or material consciousness, the exact opposite of real Mind, or Spirit," and again on page 144 of the same book, "Human will-power is not Science." Now this endeavor

Copyright, 1920, by The Christian Science Publishing Society, Falmouth and St. Paul Streets, Boston, Massachusetts. Entered at Boston post office as second-class matter. Acceptance for mailing at a special rate of postage provided for in section 1103, Act of October 3, 1917, authorized on July 11, 1918.

to identify the divine Mind with the human mind, and to counterfeit the expression of infinite intelligence with will power may seem modern, yet it has been a problem for centuries. Hume, reaching out for its solution, said that mind, and in fact all that man was, amounted to but the association and relation of ideas gained from matter through the five physical senses. Following him to a logical conclusion ends in skepticism.

To refute this argument, his more spiritually minded opponents began at its other end, as it were. They claimed that matter itself was but an idea, though of course, idea of the human mind. This leads us to no higher plane. It is like two men traveling in the same circle but in different directions. Sometimes they seem far apart, yet sooner or later, materialist or idealist, they arrive at the same point; for the human mind's belief and matter are one and the same thing. But, it may be said, mind and matter are so unlike they cannot possibly be the same thing. In a superficial sense this seems true, so it may be clearer to say they are different forms of the same thing. A good illustration of this is that by application of heat to water it becomes steam, by cold it becomes ice, and by electricity it becomes two colorless gases, hydrogen and oxygen. It is not difficult to see that the steam and ice, though dissimilar, are but different forms of water. Yet hydrogen and oxygen, though quite unrecognizable as water and possessing properties at variance with water,-as, for example, when they are united under proper conditions and ignited they produce a tremendous heat,are but the original in different forms. So with the evidence of these seeming facts before us, is it too much to say that mind and matter, though unrecognizably alike, are but different forms of the same thing?

Upon reflection, are we not all familiar with the case of the human mind showing itself in forms of matter when the predominating thought has been hate, jealousy, revenge, or perhaps some hereditary trait? This, you may say, is in itself a proof of the power of mind over matter; but is it not a proof beyond all doubt that the seeming mental conditions have but passed over into the physical, or, in other words, that the qualities of mind and matter are interchangeable and are the same thing but in different form? We also have cases of a belief of disease appearing as a so-called physical condition and then also as a so-called mental condition. But does it not all point to the one fact, that to accept the doctrine of the power of Mind over matter, one must look higher than mortal mentality? One must indeed. There is but one Mind, that is, God. The acceptance of this truth not only shows mortal mind and matter to be one, and thus eliminates the suppositional power of mortal mind, but it leads to a clear understanding that there can be but one supreme intelligence and that "there is none else beside him."

When this position is taken, one's spiritual understanding gradually unfolds and leads to the replacement of the multitude of false conceptions, whether disease of body or mind, of social or business life, disease of every kind, with the one universal idea of harmonious action. Just here, however, is a seeming snare of which the student of Christian Science must early learn to beware. The temptation may come and an attempt may be made to use this power of Mind for the gratification of the material senses. This brings obscurity and temporary loss until the student awakens to the great truth and necessity in the admonition, "But seek ye first the kingdom of God, and his righteousness; and all these things shall be added unto you." This is like all other truths; it cannot be reversed. God and His righteousness cannot be placed second. These must always be first, and any

attempt to change the order may easily lead into the condition pointed out as quite opposite to the power of Mind over matter.

The Scriptures prove to us that man's realization of the perfectly harmonious state—or the supremacy of Mind, God, omnipotent and omnipresent—is not a mere dream, but a demonstrable fact. Our attention is called to it on page 139 of Science and Health. There we read: "From beginning to end, the Scriptures are full of accounts of the triumph of Spirit, Mind, over matter. Moses proved the power of Mind by what men called miracles; so did Joshua, Elijah, and Elisha. The Christian era was ushered in with signs and wonders." These signs and wonders are evident to us to-day in proportion to our recognition and comprehension of the power of Mind over matter.

The Idea of Infinite Good

GRACE A. WILLIAMS

In studying Christian Science we learn that all is Mind and its self-expression, or idea; and that this is one—one infinitude; therefore there is but one infinite Mind and its infinite idea. This idea of infinite eternal consciousness, that is the true divine consciousness, which Mrs. Eddy has named Life, Truth, and Love, and that Jesus of Nazareth called Father, must be infinite also, because it is one with the divine infinite. Being infinite, it must be one; therefore the idea of infinite good is one and indivisible. To be sure, Mrs. Eddy speaks in her writings of many or various ideas; but they are so many expressions of the divine idea of being which must be infinite in variation, or expression, because it is in itself infinite. Being infinite one, how can idea be harmful to itself? How can it be divided against itself?

Yet mankind believes certain plants, insects, animals, minerals, to be poisonous, and it has a fear of germs. Bible students are familiar with the stirring incident of the great apostle Paul shaking off the viper that had fastened upon his hand and suffering no harm from the supposedly poisonous reptile, to the amazement of the natives of Melita, who watched him a long time, yet saw no change in him. Jesus said, "Nothing shall by any means hurt you." Yet to-day faithless Christendom seems filled with a deadly fear of socalled disease germs, as witness the epidemics of fear that sweep over it periodically, and the well-meaning doctors of material medicine busily inoculating people with the very microbes supposed to bring on the disease, in order to make them immune to it. But what does our wise guide to spiritual health and understanding, "Science and Health with Key to the Scriptures" by Mrs. Eddy, tell us about germs? We turn to page 361 and read, "A germ of infinite Truth, though least in the kingdom of heaven, is the higher hope on earth, but it will be rejected and reviled until God prepares the soil for the seed."

It is very important in order to be perfectly clear and correct in our understanding of the Science of Christianity to bear always in thought what our Leader has written on page 60 of "Miscellaneous Writings," where she says: "Evil in the beginning claimed the power, wisdom, and utility of good; and every creation or idea of Spirit has its counterfeit in some matter belief. Every material belief hints the existence of spiritual reality; and if mortals are instructed in spiritual things, it will be seen that material belief, in all its manifestations, reversed, will be found the type and representative of verities priceless, eternal, and just at hand." In this illuminating paragraph we have the remedy for all

material evils and the human fears that produce them. It is to reverse the evil seeming; to know that Truth is all that really is; that Truth is perfect, because it can contain no error. Instead of every seeming ill there is really only perfect Truth, perfect reality. Since Truth alone is real, all that is real is perfect; so we have the comforting statement in Science and Health, on page 335: "Reality is spiritual, harmonious, immutable, immortal, divine, eternal.

The truth, then, about germ is not that it is a wretched little poisonous material atom, but that the germ of infinite good is the only germ. The divine Mind is reflected by the infinitesimal as well as by the seemingly great things of His creation. Nothing is too small for His love. He is reflected and manifested in all His handiwork, or manifold variation and expression of His infinite, perfect, spiritual idea, that cannot be separated from Him. Then do we need to destroy anything? And can we destroy a verity? Have we the right to deny existence to anything we see, just because we think it an evil? Is not our remedy seen in obeying the injunction previously quoted from our Leader's writings; that is, to reverse the illusion of evil, of harm, and to know that only good is real, hence that all of God's glorious creatures moving about harmoniously in His divine universe are perfectly harmless, nay, even useful?

Reversing the human sense of evil, which is but disbelief in infinite good, or God, the Christian Science student beholds only good in all; and since all things are really thoughts, he entertains only good thoughts; and when was good ever harmful? This is the remedy for the fear of a microbe,—not merely to deny it life, truth, and love, but to know that the absolute idea of good is all there is to either the infinitesimal or the infinite. So we prove that germ does not cause disease, but that the germ of Truth is potent with good to heal and bless mankind.

We know that the only contagion there is must be the contagion of joy, purity, and moral health; that the beasts of the wilderness are the lion of high moral courage and the serpent of wisdom. The wolf and the lamb of God's creating lie down together in sweet content and safety, while the asps and wasps of spiritual creation can be played with freely by the loving thought, and the tiger meekly follows innocence. The truth about rest is spiritual activity; the material counterfeit of it is apathy, inertia. The truth about love is divine, sublime, unselfish, unchanging; the human counterfeit of it is selfish, fickle, exacting animalism. The truth of medicine is the Word, spoken to correct the error of belief; the counterfeit is the amazing, ludicrous number and variety of forms of that false sense of substance that is termed medicine. The truth about even jealousy and anger is the rebuke of evil by goodness and God's jealous exaction of the undivided devotion of His child, which, instead of being destructive in its tendency, like its mortal counterfeit, makes for the well-being and preservation of man in its demand for spiritual, unselfish, and active living.

So there may seem, all along the line, the human and material counterfeits of spiritual qualities, attributes, and veities. Everywhere, the divine idea, in its infinite variety of manifestation in form, color, and use, has seemingly its counterfeit in some human misconception of it, which appears to that human sense to be real, tangible, and obvious. To this false sense the Word of God speaks through Christianity completely, scientifically-understood as the Teacher of Galilee understood, taught, and practiced it; with the result that, when the soil is good, the individual perfectly honest and sincere, the false sense utterly disappears before the true sense of being; and it is recognized that the infinite

is one and indivisible, therefore complete, finished. God's work is finished, and He is satisfied with it,-and He knows all there is to know about it. There is in reality no human sense to discover something wrong somewhere, something to be feared and shunned.

There is no matter; it is only the human sense of substance, perishable and helpless, and really harmless. Substance is divine consciousness, which is, of course, substantial to itself, the substance of its own infinite idea, however expressed. Thus is seen the unreality of disease, of calamities of all sorts, accidents, wars, epidemics; and the eternal calm and tireless unerring activity and joy of conscious, loving reality-our true consciousness, without beginning or end, which we have named divine Mind or God. Ever conscious of unerring, solid Truth as being all that is true, we can look on calmly at the unrolling cinema of mortal mind, knowing that its changing pictures are not real, even though plainly visible; thus being able to say with Paul, "None of these things move me."

Spiritual Transformation

WILLIAM CAPELL

MOUSANDS have turned to Christian Science with the I hope of being healed of some specific inharmony; many have come for physical healing after all material means have failed; others have sought refuge from some seemingly crushing sorrow or from a paralyzing fear; and still others have come seeking freedom from the fetters of some besetting sin. All, however, who feel for the first time the liberating power of divine Love, eventually learn that this holy experience is but the beginning of the healing, which will not be complete until full salvation from sin, disease, and death has been attained.

In that very instructive conversation with Nicodemus related in the third chapter of John, Jesus not only indicated the source of all the woes of earth, but he also pointed out the only way to the attainment of the joys of heaven. He said, "Except a man be born again, he cannot see the kingdom of God." And when the materially minded Nicodemus failed to understand this statement, Jesus went on and made clear the distinction between the real man and the counterfeit, in these words: "That which is born of the flesh is flesh; and that which is born of the Spirit is spirit." In other words, all the ills and evils of mortal experience are due to a misconception of man's true nature and to ignorance of God; and only by gaining the true understanding of God and man can the supremacy of Spirit be seen and the powerlessness and nothingness of evil be proved.

Because the churches, like the Jews of old, have confused the personality of Jesus with the Christ, the fact that Jesus had to work out his salvation in precisely the same way in which we have to work out ours has been lost sight of. Consequently, the great helpfulness to be gained by a right appreciation of his experience has not been utilized. When it is perceived that in his explanation of the new birth Jesus was speaking to Nicodemus from the standpoint of his own personal experience, the great import of the Master's work as the Way-shower is better appreciated. While it is true that even in boyhood Jesus recognized to a remarkable degree the divine nature of his true selfhood, the New Testament affords ample evidence to prove that through revelation and demonstration he advanced in spiritual understanding. It was this spiritual growth which enabled the Master to overcome death and to make that wonderful demonstration called the ascension. As Mrs. Eddy says on page 564 of Science and Health, "Since Jesus must have been tempted in all points, he, the immaculate, met and conquered sin in every form."

Being born again has generally been confounded with the ordinary theological sense of conversion. And seeing the kingdom of God has been considered an experience which could take place only after death. Because of these mistakes the world has been deprived in large measure of the healing power of God which was so wonderfully demonstrated by Jesus and his disciples. Now Christian Science makes it perfectly plain that the new birth is the progressive spiritualization of thought, by which the false concept of man finally gives place to the real man, the image and likeness of God. The first stages of the new birth may seem to produce an improved mortal. The fact is, however, the mortal is being put off and immortality is being put on. To illustrate: Suppose a mortal suffering from some disease reads Science and Health, and by catching a glimpse of the truth of being is healed. In common parlance the man is said to be healed. Actually, he is not the same man who was suffering at all. A higher sense of self has been unfolded, which through clearer revelations of Truth and victories over error will yield to a more spiritual selfhood. Thus by spiritual transformation the carnal mind, which is but a lie and a liar, is eliminated; the lies of the liar are proved to be falsities, and Spirit and its manifestations are found to be the only realities.

Christian Science, then, is not a humanly evolved method by means of which mortals may dwell comfortably in the flesh. Christian Science is the Comforter revealing to the sincere seeker the way out of the flesh into the realm of Spirit, the kingdom of God.

Working Out One's Salvation

HELEN J. PORTER

ONE cannot work out his own salvation without the resultant benefit and helpfulness to all who come within the radius of his thoughts and acts. While it is exclusively his own salvation that he is compelled to work out, yet it is impossible to work out his salvation selfishly. For in compliance with the Bible's injunction in this respect, the working out of one's salvation is the coming out of every phase of selfishness—every false sense of self. In short, it is the unselfing of a mortal—the elimination of all claims to a power, life, or intelligence apart from God, good, through the understanding of Truth, whereby man's true selfhood is revealed.

Freedom, or salvation, is what mortals are constantly seeking but often it is sought through material means. As Mrs. Eddy says of one seeking thus (Science and Health, p. 427), "Spirit is his last resort, but it should have been his first and only resort." And so in the majority of cases it is some form of bondage or suffering and the failure to find surcease through material methods and cures that ultimately compel one to seek the truth that alone makes free.

As one reads the Bible he finds that he is not only enjoined to take upon himself the working out of his own salvation but he also finds the plan or method clearly set forth in these words of Jesus, "If ye continue in my word . . . ye shall know the truth, and the truth shall make you free." Since it is Truth, or the knowledge of Truth, that makes free, it is readily evident that if one is experiencing suffering, disease, or any discordant condition, it is not the effect of Truth or anything that is true, but something he has believed and, voluntarily or involuntarily, accepted as true.

One of the most tenacious and general phases of human

bondage is fear. On being accused of being afraid, many might quickly resent such an accusation; yet if they should analyze thought they would no doubt recall many instances wherein fear had apparently taken possession of them. Some people are afraid to eat this or that particular kind of food; are afraid of germs, of the weather, the atmosphere; afraid that they will lose health, strength, wealth, position, or some material possession. Besides fear, mortals find themselves slaves to such erroneous and false beliefs as jealousy, envy, lust, malice, and so on. And strive as one may, he cannot be freed from any claim of a power, life, or intelligence apart from God, except through a demonstrable knowledge of Truth, of God, good.

We read in the Bible that God made all that was made, "and without him was not any thing made that was made." Therefore that which is called evil—sin, disease, death—has in reality no creator; it never was made. As we begin to understand that fact, we begin to disbelieve in all that claims something besides God and His creation, and so to deny or reject the testimony of the material senses, which always testify to something which supposedly proceeds from some other source than from the one divine creator.

"Where the Spirit of the Lord is, there is liberty." Where spiritual understanding, or the understanding of Truth, is ruling as one's consciousness, it is ruling out all that which is false and untrue—all that worketh or maketh a lie, and a man finds himself in the present possession of his God-given heritage and freedom.

"The reign of righteousness"

MARY B. HALE

WHEN one gains, through the study of Christian Science, ever so slight a knowledge of divine metaphysics, he knows that it is impossible to blame any one but the false sense of self for what seems to be wrong, because all that he is conscious of is the externalization of his own thought. On page 86 of "Science and Health with Key to the Scriptures" Mrs. Eddy says, "Mortal mind sees what it believes as certainly as it believes what it sees." In Jeremiah we read, "They speak a vision of their own heart, and not out of the mouth of the Lord."

In turning away from this false sense of self to the reign of divine righteousness, the student must learn that one of the fundamental propositions of divine metaphysics, the basis of all right reasoning, is that God is indeed infinitely All-in-all. In Jeremiah again we find, "Do not I fill heaven and earth? saith the Lord." When one knows that God, good, fills all the heaven and earth there really is, one sees that the vanishing of evil is all there was to the Exodus, even while to the unenlightened thought of the Israelites there seemed to be a fleeing from evil. Evil must flee or vanish before the firm understanding of Principle. Planting one's feet unreservedly on the rock, Christ, Truth, one becomes conscious of the unfoldment of good, God, and learns that "a thousand shall fall at thy side, and ten thousand at thy right hand; but it shall not come nigh thee."

Since God's kingdom is everywhere, His image and likeness or idea is found in that kingdom, governed by the one infinite Mind, God. What is it that really governs all action? On page 283 of Science and Health Mrs. Eddy says, "Mind is the source of all movement, and there is no inertia to retard or check its perpetual and harmonious action." The truth is that there is only one Mind, without which one could do nothing. Any supposititious opposite of this one Mind is but nothingness claiming to be something. Could nothing

govern or direct man? Since Mind and its idea or action is one, there is really nothing that is not controlled by the divine Mind. It is only a false concept that would claim to say that one is disobedient, not governed by God, the one and only power, but governed by other gods such as envy, jealousy, lust for power, hatred, or malice. It is nothing but this false concept of self that has to be changed, in order that harmony may be seen.

On page 118 of "Miscellaneous Writings" Mrs. Eddy says: "Be of good cheer; the warfare with one's self is grand; it gives one plenty of employment, and the divine Principle worketh with you,—and obedience crowns persistent effort with everlasting victory." Let us ask ourselves, Have we begun this warfare, or are we warring with one another? So long as one finds himself at war with another, he is not loving his brother as himself, but is delaying the coming of the true kingdom, the reign of divine righteousness, for himself. One cannot possibly see himself in an infinite kingdom, without being conscious that each and every true idea has attained that kingdom-heaven, harmony-already. In order to do this, it is necessary to scourge every evil thought from one's temple-body, or seeming state of consciousness. As one persistently strives to reflect the one consciousness, or Mind, one realizes that he is touching the hem of the garment of divine metaphysics, letting that Mind be expressed in him that was expressed in Christ Jesus.

The argument is sometimes heard that too much metaphysics is cold and abstract. As part of the definition of the river Euphrates (Science and Health, p. 585) Mrs. Eddy gives this: "Divine Science encompassing the universe and man; the true idea of God; a type of the glory which is to come; metaphysics taking the place of physics; the reign of righteousness." Could one have too much of "the reign of righteousness," and does one find it cold and abstract? We must strive for that reign, remembering that Jesus' love was considered hate. In contemplating the First Commandment, "Thou shalt have no other gods before me," we become conscious that the real man is alone with the divine Mind, and therefore for the true man the reign of divine metaphysics is established here and now. Mrs. Eddy brings this out with wonderful clarity in her Message to The Mother Church for 1901, where she says (p. 20), "The Christian Scientist is alone with his own being and with the reality of things."

[Written for the Sentinel]

Then and Now

AIMEE LUNDGREN

MEMORY no more need linger In the wretched bygones, when Treacherous hope's seductive finger Pointed to a distant "then."

Now was ever dark and dreary, Then was radiant, whispered hope; Now, all uphill, bleak and weary, Then, a verdant, easy slope.

Lo, at midnight's darkest hour Stood a form with shining brow, Spoke in accents fraught with power: Wake, for then is one with now.

Hope, redeemed, deceiveth never, Joy is ours in present might, Filling now with glad endeavor, Finding then a now more bright.

No Evil in God

J. MARGUERITE BROWN

THE topic of conversation was earthquakes. The one 1 uninstructed in Christian Science insisted that God used this material means to shake His children up for their sinful disobedience; that God was conscious of evil because He had put Adam and Eve into the garden of Eden, where they found the forbidden fruit. Therefore God knew evil and He used it for His own good purpose, and earthquakes were created by Him. The Christian Scientist knew that the first chapter of Genesis contained the record of the true creation; that God had created man in His own image and likeness. The forbidden fruit which Adam and Eve had eaten was the belief of the reality of matter, or in other words, the testimony of the material senses. The tree of life which is ever sustaining the man of God is the eternal reality of man's oneness with his creator. Now man's oneness means man's complete, indestructible, exact ability to express infinite Life, Mind, Truth, Love, good, Principle, Spirit, Soul.

The story of the Adam and Eve creation was merely an allegory of the claim that there could be more than all there is; but God, good, is infinite, therefore God is All and evil simply is not. The only Eden or pleasure the idea of God could have is pleasure in expressing Mind. Since Mind is all, matter does not exist, and there can be no pleasure in it. Then there remains nothing for God to punish His creation for. God is not made after the pattern of mortal man, as we had thought before studying Christian Science. We can always rest assured that anything that seems to have an element of destruction is not of God's creation and is therefore nonexistent. If God's creation should cease to exist for one moment then there would be no creator or God, for one is dependent upon the other to form complete oneness. Mathematical problems are not worked with numbers only; their rules must be known and used. There must also be numbers to express the basis of mathematics. The working together of numbers in accord with their basis constitutes their oneness. The working together of Mind and its idea constitutes their oneness. Jesus showed this clearly when he said, "I and my Father are one," and, "The Father that dwelleth in me, he doeth the works."

God is ever present Love and is "of purer eyes than to behold evil." He does not use matter in any form to correct His idea, the ever present expression of infinite Life, Truth, and Love. To human sense it seems that God chasteneth; "for whom the Lord loveth he correcteth," but this correction is the activity of Love and constructiveness and not the hate and destructiveness of mortal mind. As a man learns through Christian Science that the hate and destructiveness which nature seems to express are but the illusion of mortal mind,-since mortal mind sees only what it believes,-he will be able to destroy this illusion in the same manner as Jesus calmed the wind and the waves, and as David replaced the concept of bestial ferocity with moral courage. Mrs. Eddy explains this clearly on page 293 of Science and Health, where she says, "There is no vapid fury of mortal mind-expressed in earthquake, wind, wave, lightning, fire, bestial ferocityand this so-called mind is self-destroyed. The manifestations of evil, which counterfeit divine justice, are called in the Scriptures, 'The anger of the Lord.' In reality, they show the self-destruction of error or matter and point to matter's opposite, the strength and permanency of Spirit. Christian Science brings to light Truth and its supremacy, universal harmony, the entireness of God, good, and the nothingness of evil."

Editorial

Love Your Enemies

THERE is no saying of Christ Jesus which has given more pause to humanity than the command, "Love your enemies, bless them that curse you, do good to them that hate you, and pray for them which despitefully use you, and persecute you." Humanity has scarcely attempted to live up to what it has regarded as such a doctrine of perfection. It has, on the whole, put it aside as one of the ultimates of demonstration; one of those things to be achieved some day, some day being any time but the present. Yet in all this humanity has been kicking against the pricks. The teaching of Christ Jesus sums up the unity of good. It is no more possible for the student of divine metaphysics to succeed by avoiding the deeper metaphysical problems than it is for the student of mathematics to become a mathematician by confining himself to the multiplication table.

In reality, however, divine metaphysics are as easy of comprehension as the metaphysics of the schools are difficult. The reason is simple: the one deals with the absolute, the other with the intricacies of negations. Thus Jesus saw quite clearly that, in divine metaphysics, man could have no enemy, since the image and likeness of God, Principle, was incapable of radiating or experiencing enmity; whilst, even in a counterfeit world of material illusion, a man could have no enemy but himself, his own belief in the reality and power of evil. It was then, surely, no excessive counsel of perfection to bid a man to love himself, so as to be enabled to begin the struggle against the belief of evil in his own material consciousness, the presence of which was hourly corroding his perception of harmony. "Even in belief." Mrs. Eddy writes, on page 10 of "Miscellaneous Writings," "you have but one (that, not in reality), and this one enemy is yourself-your erroneous belief that you have enemies; that evil is real; that aught but good exists in Science."

It was this, of course, to which Jesus was alluding when, repudiating to the rich ruler any claim to personal goodness, he insisted, "There is none good but one, that is, God." Obviously, if God, Principle, alone is good, there can be but one evil, the suppositional absence of Principle. An enemy, consequently, is never a person, but is always evil, or satan, the adversary of good, for the word satan is not the name of a person, but a Hebrew substantive meaning adversary. In this way the command to love your enemies becomes, in divine metaphysics, no superhuman task but a simple direction to grapple with sin in yourself, as Mrs. Eddy further points out, on page 8 of "Miscellaneous Writings": "Simply count your enemy to be that which defiles, defaces, and dethrones the Christ-image that you should reflect. Whatever purifies, sanctifies, and consecrates human life, is not an enemy, however much we suffer in the process."

For a man to love his enemies, then, is not to shut his eyes to the claim of evil to exist supposititiously in others, but to set out to gain for himself the full vision of the Christ, certain that in this manner only can he lay down, for his

friend, in the way Christ Jesus meant, his own sensuous life, his sense of the power and reality of evil. For if a man has no enemy except his own belief in evil, then manifestly he can hold forth his hand in friendship to the world, though the world, in its ignorance, may refuse to take it, strong in its own belief in human fears and hatreds.

Human friendship is a common attraction usually to the same aims and passions. Only as this attraction exerts its influence toward good does friendship begin to enter the orbit of Principle, and so tend to become permanent. Christ Jesus stated this, with perfect metaphysical precision, when he demanded of the multitude seated about him, "Who is my mother, or my brethren?" and immediately answered his own question with the words, "Behold my mother and my brethren! For whosoever shall do the will of God, the same is my brother, and my sister, and mother." Friendships, in other words, based on human concepts of imperfection, necessarily carry in themselves the seeds of destruction. The metaphysician, consequently, just as he recognizes that there is none good but God, recognizes that he has no friend save Principle. At the same time, by reason of this, he binds to himself, in the words of Polonius, with hoops of steel, all those who are truly following Principle. He does not have to decide the measure of their understanding of Principle. They, like him, have reached an atone-ment with Principle, and this at-one-ment constitutes the bonds, not of steel but of Spirit, which bind them to him, and him to them.

In order, however, to enjoy friendship of such a nature, a man must learn to love his enemies, since it is obvious that only in proportion as a man surrenders his enmity to men, can he experience that true friendship which is founded in a common understanding of the infinity of Principle. Then, as in all Christian Science practice, the effort to demonstrate the harmony of Principle must begin in the willingness to sacrifice everything that is opposed to Principle in the individual consciousness, and this end can only be achieved by recognizing that there is, in reality, nothing out of which to fashion an enemy except the individual's own belief in the power and reality of evil; and it was precisely because of this that Paul was able to write to the church in Rome, "For I am persuaded, that neither death, nor life, nor angels, nor principalities, nor powers, nor things present, nor things to come, nor height, nor depth, nor any other creature, shall be able to separate us from the love of God, which is in Christ Jesus our Lord."

FREDERICK DIXON.

The Battle Ground of the Present

Though the suppositional illusion called mortal mind remains throughout the ages the same in its antagonism to the allness of the divine Mind and idea, fortunately it never has had any real existence. Its nothingness is constantly being proved so that even its seeming is lessening. The battle of the ages is, therefore, whether infinite Principle or preposterous mortal mind is to be accepted as the conscious governor of one's activity. Really it is no battle at all, for the issue is already decided by divine intelligence, which is inexorable in its spiritual allness. Every question, of progress or permanence, of government or individual happiness, of any relationship whatever, has to be decided in accord with what the one Mind knows. There is no other standard of good. Any reluctance to accept this standard and to relinquish mortal beliefs for the glad conformity of infinite understanding is what entails the turmoil of the mortal void.

All the while, however, the tangible peace of immortality, with all its vigor in action, is at hand to be proved and enjoyed. To give up the futile struggle and accept the tireless variety of Truth is the way, then, which is open to all and which is taken advantage of as fear melts before the meta-

physical guarantee of actual good.

As spiritual idea, created by the divine Mind, the real man is the same to-day as throughout eternity, which is without beginning and without end. This sameness of boundlessly varied idea, quite apart from any belief in matter and material conditions, is what constitutes the true identity. Spiritual man is always the same spiritual man that the creator has known and will know forever. The spiritual reality is, of course, thoroughly different from any mortal suppositions as to the nature of man, and yet is neither vague nor merely speculative in any way. It is entirely practicable to live in accord with the Life which is Spirit, because any counterfeit sense of living is not genuine existence at all. Suppositional opposite of the divine manifestation has no identity, since it never has had any entity whatever. The absolute fact is that the only actual living must be spiritual doing in the now. In all circumstances, what has to be discerned and demonstrated is the identity, or spiritual sameness with eternal variety, of idea in place of any human sense of things.

There is an interesting letter of Thomas Jefferson to Colonel Carrington in which, after admitting that what is considered the good sense of the people may sometimes be led astray, he declares: "The way to prevent these irregular interpositions of the people, is to give them full information of their affairs, through the channel of the public papers, and to contrive that those papers should penetrate the whole mass of the people. The basis of our government being the opinion of the people, the very first object should be to keep that right; and were it left to me to decide whether we should have a government without newspapers, or newspapers without a government, I should not hesitate a moment to prefer the latter." In Christian Science, each one must learn for himself that the only true news is of the divine idea manifesting the government of Principle. As this is disseminated and understood, the right opinion necessarily unfolds under the control of divine intelligence. This is the truth of government. What Thomas Jefferson was striving to say Mrs. Eddy has presented with the unerring sureness of metaphysical understanding, so that to-day it is possible for all, through the patient demonstration of Christian Science, to turn together to Principle as the governing power of the genuine democracy. Timid hesitation to recognize that the spiritual identity of government and democracy is the reality which satisfies forever is overcome through the irresistible unfoldment of divine Love, so totally different from any human sense of things that may have been mistakenly called loving.

Only by identifying man and all real activity as the harmonious effect of "Our Father which art in heaven," quite apart from any supposititiously discordant materiality, is one winning the battle of the present. The appreciation of the true spiritual identity, in place of any spurious sense of things, is the acceptance of the healing gospel, or good news, of to-day. On page 46 of "Unity of Good" Mrs. Eddy says: "Jesus said, 'I and my Father are one.' He taught no selfhood as existent in matter. In his identity there is no evil. Individuality and Life were real to him only as spiritual and good, not as material or evil. This incensed the rabbins against Jesus, because it was an indignity to their personality; and this personality they regarded

as both good and evil, as is still claimed by the worldlywise." A little later on the same page she continues: "The Pharisees fought Jesus on this issue. It furnished the battleground of the past, as it does of the present. The fight was an effort to enthrone evil. Jesus assumed the burden of disproof by destroying sin, sickness, and death, to sight and sense." That is, of course, the right line of action for to-day; for as sin, disease, and death are replaced, in every sense of the word, with purity, health, and Life manifest, the battle is won in each one's own experience.

Mrs. Eddy ends that remarkable chapter in that remarkable little volume just quoted, with the sentences: "Nowhere in Scripture is evil connected with good, the being of God, and with every passing hour it is losing its false claim to existence or consciousness. All that can exist is God and His idea." This is the reason why every student of Christian Science is constantly encouraged to go forward in his demonstration of the infinity of good. He looks to Principle for the good news of ceaseless unfoldment as the truth, instead of any human sense of affairs. He rejoices evermore by praying without ceasing. He knows that the practice of Christian Science is glad living under the government of Principle. Thus he knows that what Mrs. Eddy says on page 383 of "Miscellaneous Writings" is true: "The elements of earth beat in vain against the immortal parapets of this Science. Erect and eternal, it will go on with the ages, go down the dim posterns of time unharmed, and on every battle-field rise higher in the estimation of thinkers and in the hearts of Christians." GUSTAVUS S. PAINE.

[Written for the Sentinel]

"Comfort ve"

MARY A. BLOMFIELD

Comfort ye, comfort ye my people, saith your God. Speak ye comfortably to Jerusalem, and cry unto her, that her warfare is accomplished. Isaiah xl. 1, 2.

> OMFORT ye, O my children, But be quick to hear and do, For Love is calling, calling, Love is calling unto you.

The hour is upon us To be angels unto men, Guarding and upholding His banner once again.

That his way may be made perfect So the hearts of men may know He is living—He is present Wherever they may go.

And His grace it is sufficient, His peace is theirs to know; His voice is speaking to them-A still, small voice and low.

Comfort ye my people— I am with you, lo, alway. Arise and shine in power! Love claims its perfect day.

Arise! Arise! Stand upright, Ye sons of men, for, lo, The Son of God is with you. Each shall his stature know.

Testimonies of Healing

In 1911 I left England for the far coast of the Pacific and there met, for the first time, a student of Christian Science. I had from early girlhood turned from the teachings of a denominational church, and after some years of careful reading drifted into agnosticism, but all the time hungering for something that would prove the existence of a wise and directing intelligence outside myself. After much wandering up and down bypaths I thought I had at last discovered the means by which I could interpret life in spiritual terms. I plunged into the study of theosophy and became a very close student for a number of years. By the time I left England I thought I had gathered the best from various schools of religion and that the sum total of them would meet my needs; so when the subject of Christian Science was presented to me two years later and I bought a copy of Science and Health, it was not for any help I expected to receive through the study of it, but merely, as I thought, because the subject was an unexplored field and therefore one not to be passed over. How great my needs were and how wrong my viewpoint concerning my true self and the real universe I never realized until I began to study the textbook. I discovered that in the past I had been trying to spiritualize matter, clearly shown by Mrs. Eddy to be an impossibility. The only man there ever had been or ever will be I found was the man made in God's image and likeness; that the human or mortal man, full of ills and doubts and uncertainties, was not that man and that his testimony was always false.

That the real man is coexistent with Mind, God, I had to prove only a few days after buying the book. I was out with a party of friends, and while I was running down a steep incline my foot went into a hole. I could not lift it quickly enough to avoid severe injury to my ankle. For the moment it seemed as if I would fall and faint, but following close on this suggestion came the words I had been dwelling on that afternoon, "In him [God] we live, and move, and have our being." Fortunately not one of the party knew what had happened, for they had all gone on. At first when I tried to walk I could not seem to control my foot, but, still clinging to the thought of living in divine Mind, I made good progress, and when the foot of the hill was reached I walked without any pain. The party waited for me some little way up the trail and no questions were asked. That night I walked over seven miles without pain or inconvenience. When I reached home I related the happening to my mother and sister and we examined the ankle. I was too young in the study of Christian Science to know that in examining it I was making a reality of the accident. When I saw the condition fear crept in. I went to bed, but the ankle and leg became so swollen and the pain so intense that I could not bear the bedclothes to touch them. The next afternoon my sister got in touch with the student who had introduced Christian Science to me. She came the moment she was free and whilst talking she pointed out on page 475 of Science and Health the answer to the question "What is man?" also to the twelfth verse of the fourth chapter of Hebrews: "For the word of God is quick, and powerful, and sharper than any twoedged sword, piercing even to the dividing asunder of soul and spirit, and of the joints and marrow, and is a discerner of the thoughts and intents of the heart." Once more I turned to my books (I had been reading all day) and within two hours I was able to get up from my bed and walk. The ankle was a little stiff but there was no pain whatever. The following day I was not inconvenienced at all, although I had to wear a low shoe because the swelling had not quite gone. This happened while I was on a summer holiday and every day I walked many miles exploring rough country. A certain stiffness remained, however, which seemed to be due to either a broken or displaced bone. I went to a practitioner and after treatment the stiffness disappeared. The evidence of a displaced bone, however, did not disappear to my knowledge until two years ago, but it never troubled me at any time.

The healing efficacy of Christian Science was so clearly proved that both my mother and sister accepted Mrs. Eddy's teaching without question. As I began to understand more of the science of being I experienced a mental freedom I had never dreamed possible, and with it came a corresponding freedom from stomach, throat, and chest troubles. No words can express my gratitude for Christian Science. Gratitude is akin to prayer, and "true prayer," writes Mrs. Eddy on page 39 of "No and Yes," "is not asking God for love; it is learning to love, and to include all mankind in one affection. Prayer is the utilization of the love wherewith He loves us." My hope is that I may learn better how to draw at all times upon this inexhaustible source of love.

(Miss) GERTRUDE E. M. SAUNDERS, London, England.

It is with a deep sense of gratitude that I am testifying to the benefits received through my study of "Science and Health with Key to the Scriptures" by Mrs. Eddy. I believed very strongly that God is all-powerful, but this study soon gave me a clear insight into the truth. As at that time we had only the English edition of the textbook and I had no knowledge of the English language, I and other people of the community who were interested in Christian Science had to translate our first lessons with the help of an English-French dictionary.

Several times I was taken ill with a disease called the grippe, which was very prevalent last winter in our community. I at once sought the help of a practitioner in Christian Science and was healed instantaneously. Several of my relatives were also healed. I thank God for all these healings and for the light which has been revealed to me, and am also very thankful to Mrs. Eddy for her great help to humanity.

MRS. L. NORMAND-PILET, Gryon sur Bex, Ct. de Vaud, Switzerland.

With a heart full of gratitude to God I give my testimony, hoping thereby to help some one else. Through the teachings of Christian Science I have gained a better understanding of God and man. I have proved again and again God's promise as found in Isaiah, "When thou passest through the waters, I will be with thee; and through the rivers, they shall not overflow thee: when thou walkest through the fire, thou shalt not be burned; neither shall the flame kindle upon thee." Every seeming error is but another opportunity to prove God's allness. Instead of being filled with fear and dread I now have peace and joy in realizing the saving power of the one Mind, God.

About twelve years ago I went to a practitioner and asked for help and within two weeks the discord was overcome, but I did not then think of studying Science and Health and not until 1911 did I get a Quarterly and study the Bible lessons. Two years ago I had an attack of paralysis. The doctors were called, as the rest of the family did not understand Christian Science, but they gave me no hope, so my husband called a practitioner. I had lost the power

of speech and my side was entirely helpless, but with faithful perseverance and encouragement from the practitioner I began to improve, but very slowly. Sometimes it was dark and cloudy but at last the clouds disappeared and now I am using my hand in writing.

Over a year ago something affected one of my eyes. I could only discern a small streak of light. I went into the nouse and declared the allness of God and repeated the scientific statement of being, and did not have the least fear. In a short time I opened my eyes and my sight was restored. My gratitude to our revered Leader, Mrs. Eddy, cannot be expressed for giving to us "Science and Health with Key to the Scriptures." I am grateful for some spiritual understanding and for peace of mind. How true the promise, "Before they call, I will answer; and while they are yet speaking, I will hear." The periodicals help me so much; there is always something in them that meets a need.

Mrs. Charles M. Howard, Fresno, Calif.

4

"Ye shall seek me, and find me, when ye shall search for me with all your heart," and "Call upon me in the day of trouble: I will deliver thee, and thou shalt glorify me." The beauty and truth of these passages from Scripture have been wonderfully fulfilled for me, and impelled by a deep sense of gratitude I wish to give testimony to all the blessings which have come to me through the knowledge of God as an ever present help.

When I first heard of Christian Science over seven years ago, the statements made seemed unbelievable. Still I gasped at this ray of hope joyfully for release from an intestinal trouble of eighteen years' standing, which had annoyed me since my fourteenth year. Many physicians pronounced the trouble incurable. A dear friend who visited me in Paris advised me to try Christian Science, and during my vacation, which I invariably spent in Berlin, I attended a meeting and had treatment from a practitioner. My hope for instantaneous healing was not fulfilled. The next year lagain had several treatments, but again the desired results were not attained. Now I realized that I must work earnestly in order to reach the goal. I gave up my position in Paris, returned to Berlin and commenced to study the Bible and the textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy. My condition improved slowly but steadily. After six months I could express gratitude for my healing with a joyful heart, although I did have several relapses to overcome until I attained that understanding where I knew that health is a complete, spiritual gift, which I possessed in proportion to my conscious at-onement with God. I was healed of blood poisoning and a painful inflammation of the eyes in a very short time.

The greatest and most wonderful proof that God made man spiritual, harmonious, complete, and eternal was proved to me in May, 1919. After the sudden passing on of a member of our family, this same claim tried to overpower me also; then suddenly it became so clear to me that God is eternal Life, omnipotent and omnipresent; I knew that as God's image and likeness I could not be separated from Him for an instant. Again and again I repeated this passage from Scripture: "And this is life eternal, that they might know thee the only true God, and Jesus Christ, whom thou hast sent." When I realized this clearly, the attack was overcome. To satisfy themselves, my family called a physician, who was unable to find anything wrong, the heart action being perfectly normal. The attacks recurred frequently, but were always overcome through Christian

Science treatment from a practitioner, who kindly made clear to me man's true being as God's image and likeness, and that as such he could not sin, be sick, or die.

Words are inadequate to express what I owe to God for the knowledge of this truth, which is Love and Life. With deep gratitude I think of our Leader, Mrs. Eddy, who showed us anew the way to release from bondage; I am also deeply grateful to the dear Scientists who so lovingly helped me.

(Miss) Emma Jonas, Berlin-Schöneberg, Germany.

٠

I wish to express my gratitude for the many healings I have received in Christian Science. About a year and a half ago I believed myself very sick, with little or no hope of recovery. I had suffered from a stomach disorder for more than thirty years, for which medicine of many kinds had been used all the time but with only temporary results. Heart disease had also developed to such a degree that the doctors I consulted told me there was no cure, but that by being careful I might live for a long time; at the same time they warned me that the end might come at any moment. I kept taking medicine regularly, according to prescription, for several months without any noticeable improvement; then upon a visit to some relatives of mine an elderly lady who was somewhat interested in Christian Science urged me to take up the study of that healing religion and lent me the textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy.

I began my study by reading the chapter "Fruitage" first, which made such an impression on me that I felt convinced that this book must contain a wonderful power. So starting at the first page I kept reading every day, doing practically nothing else for about two weeks, and in that time gained courage enough to quit taking medicine, and ate different kinds of food which had been strictly avoided before, and felt no worse for it. The study was continued, but it seemed as if I could make no further progress, so a practitioner was consulted and I received Christian Science treatment. Three months after my first visit to the practitioner I went back to work. I have also been healed of a stiff neck which at times was so bad that I could not look around without turning my whole body. I also got rid of worry, a hasty and resentful temper, the use of profanity and otherwise foul language, and many other ailments, for which I am truly grateful to God, Jesus the Christ, and to Mrs. Eddy, whom God so graciously endowed with wisdom and strength to establish anew this eternal truth which heals sickness and sin.-H. Johnson, Chicago, Ill.

4

In love and gratitude to God, to Mrs. Eddy, and the Christian Scientists who have lovingly helped me, I wish to tell of some of the benefits received. In the spring of 1917 I had an attack of what the neighbors called apoplexy, or paralysis. The morning when the illness came on, I had arisen very early, as I wished to put up a crate of berries before the arrival of a certain train. The work moved along more smoothly than usual, and I was grateful that, through the knowledge that Mind directs, there was no sense of confusion or hurry. Fruit was taken care of, kitchen in order, then I was ready for breakfast, with books at hand to read the lesson. I had failed to heed the command, "Seek ye first the kingdom of God," but had first given several hours to material duties. After reading half a page in Science and Health a strange feeling of inaction came over me. Mentally I declared God is here. On the way to the back porch I passed a canary and made an effort to speak to the bird, then learned that the power of speech had gone. There was no one with me at the time, but immediately a relative came around the house and said, "Good morning." I tried to speak, but could not; he asked if I were ill. I nodded assent. He assisted me to a couch (he was filled with fear, I was not), and asked whom I wished to see. I motioned for pencil and paper, could spell the name mentally, but could not write it. My relative mentioned the name of the Christian Science friend I wished to see, and went to get her. All this time there was an unspeakable stillness. I declared God is Life, and that Life is Mind. In a short time my Christian Science friend came in, saying joyfully, "I brought my Quarterly and will read the Lesson for you." After she had read two or three sections, I sat up; and when the lesson was finished I stood for a moment, then started toward the kitchen to get a drink. The friend said, "Why didn't you let me get the water for you?" I thanked her, and said I could wait on myself; my voice was natural and normal. Surely she had been giving me "living water." I was up and about all day, and the next day enjoyed a birthday dinner at a hotel. The healing was not complete at the time, as a sense of weariness seemed to follow. But at this time, some fourteen months later, there has been no return. Does any one ask why I am a Christian Scientist? Does any one doubt the healing power of Truth? Only the power of God could do for one what has been done through Christian Science demonstration. My heart overflows with gratitude for God's loving care, and my prayer is, "Show me Thy way."

(Miss) EMMA SHEPARD, Portland, Ore.

4

In "Retrospection and Introspection" by Mrs. Eddy, we read (p. 21), "The awakening from a false sense of life, substance, and mind in matter, is as yet imperfect; but for those lucid and enduring lessons of Love which tend to this result, I bless God." Whenever Christian Scientists are taunted with failure to make a demonstration of their Leader's teachings with that old cry of the rabble, "He saved others; himself he cannot save," I remember my early study of Mrs. Eddy's writings and quote the above paragraph.

The student of Christian Science who was overseas had every opportunity to test the practicability of his lessons in Mind healing. In a nine months' service as director of women in the Dauphiné Leave Area in the Y. M. C. A. I found my knowledge of the all-presence and the all-power of God a very present help in time of trouble. In the midst of a severe epidemic of influenza, the one other Scientist at our station and I were able to continue our severe and long labors of assisting in the care of twenty-five hundred men each week. Although constantly exposed to the rigors of an Alpine winter, living in buildings insufficiently heated, always overworked, with little time for sleep and no time for rest, we were able to keep going and to accomplish much for the health and happiness of our soldiers.

Stricken with the disease myself, I worked for a week in spite of an abnormal temperature, and then, with indications of severe illness, was compelled to make a forty-mile trip in an open car over the mountains to Aix, in the dead of winter. My coworker telegraphed to Paris to a practitioner for aid. I started on my journey, swathed in furs, amid the dire predictions of my friends. Arriving at my hotel, after three hours of exposure, I was put into a damp bed in an enormous room warmed only by a small wood fire, and commiserated by the companions of the journey as a very sick woman. I lay quietly and finally became

warm and felt a sense of protection and of joy in the knowledge that this experience was another opportunity for proving God's power over every form of error. I slept, and awakened in six hours perfectly healed. All disfiguration and discoloration had left my face; all fever, cough, and discharge had vanished like a cloud in the rays of that Sun of righteousness that had arisen in my consciousness "with healing in his wings."

Day by day, in all the complications that arise I have cause to be grateful for the lucid lessons taught us by our Leader and am endeavoring to put into practice the knowledge that God alone governs, and does not divide that government with any other power; that, as an idea of the Mind that is all-powerful good, I can neither give nor receive anything but good. In the proportion that I am able to demonstrate this knowledge and put it into practice in my daily life, I find that all belief in discord fades away.

(Mrs.) Louisa Cooke Don-Carlos, Lawrence, Kan.

"Bless the Lord, O my soul: and all that is within me, bless his holy name. Bless the Lord, O my soul, and forget not all his benefits: who forgiveth all thine iniquities; who healeth all thy diseases; who redeemeth thy life from destruction; who crowneth thee with lovingkindness and tender mercies." I wish to add my testimony of healing and gratitude to the words of the psalmist, for God's infinite love and goodness have also done much for me, through Christian Science. Several years ago I suffered from a severe case of heart trouble and typhoid fever. All medical remedies were in vain. Acquaintances called our attention to Christian Science and we requested assistance, which was lovingly given. Even after the first treatment I felt that the thoughts of fear had left me, and the more I understood of the teachings of Christian Science the more rapidly I improved, and consequently after a short time was able to resume my work again. Daily, yes hourly, we have proofs of God's loving care when we trust in Him. Glory and honor be to God for all His love and blessings. It is impossible to relate here all the proofs we have received of God's love, and are still receiving daily.

I also wish to mention an instance which thoroughly convinced us of the power of Truth. About three years ago our dear mother suffered from a severe case of typhoid fever. We requested a practitioner's help, and absent treatment was given. After a short time the healing came. We all know that those who abide, in full confidence, in God's protecting power cannot suffer want in any way. The greatest value of this beautiful teaching lies not in the healing of visible and material conditions, but in the knowledge that God does not abide in unattainable remoteness, but is ever present and good is attainable by all. For this knowledge we owe divine Love endless thanks, also deep gratitude to our beloved Leader, who taught us to know God as Life, Truth, and Love.

(Miss) Lina Meier, Kreis Springe, Germany.

I have had many proofs of God's love since taking up the study of Christian Science some nine years ago. Up to that time I had for many years previous been using an excessive amount of alcoholic drinks in all forms, until I had practically become an invalid. Doctors had told me that I could not continue the habit and live. I had spent a fortune in trying to stop it, besides giving up a lucrative business, but to no avail, until I found myself in the depth of despair with all the chances of life against me and no way

to turn for relief. I then began reading the Bible, but with no apparent results, and it was then that my wife spoke to me about a book which she had, which she said was a key to the Scriptures and that it helped one to understand the Bible better and would no doubt help me. Only those who have had a similar experience with the liquor habit can appreciate the condition my health was in at the time. The lining of my stomach had been destroyed; besides I suffered from asthma, eczema, rheumatism, nervousness, constipation, and many other troubles brought about by this habit. I am glad to state, however, that I was healed of the desire to use liquor in any form after reading the book "Science and Health with Key to the Scriptures" by Mary Baker Eddy, and through the continued study of Christian Science and the loving help of Christian Science practitioners I have been healed of all the diseases to which I was in bondage, and of the use of tobacco, and many other bad habits. One of the remarkable things about the healing of a bad habit in Christian Science is the fact that all desire to return to it is entirely removed, and in its stead is a desire to know more and more about this beautiful truth.

I am truly grateful for the many blessings my family and I have received since taking up this study, grateful for the understanding I am able to get of the teachings of Jesus, for the spiritual uplift which comes to me daily, and for the help so often received from loving practitioners. I am especially grateful for the help so often found in the periodicals. They are so full of the truth that I could not think of doing without any of them. I am very grateful to God and to Mrs. Eddy for this truth which is bringing such joy and happiness into so many lives to-day.

JOHN I. FRANKLIN, Los Angeles, Calif.

To me Christian Science is the most wonderful thing in the world. My first knowledge of the healing power of Truth came when I turned to Christian Science in physical need, and found immediate relief. It has been my only physician and comforter at all times and under all conditions for the past twelve years. Before that time my life was filled with sorrow and sickness, but since then I have hardly thought of fear or sickness. The physical healing is good, but small when compared with the spiritual understanding of God as revealed to us through Christian Science, and knowing what Jesus meant when he said, "If ye continue in my word . . . ye shall know the truth, and the truth shall make you free." This truth gives us power to conquer bad habits; it quenches the love of sin; it takes hate out of the heart, and brings joy, gladness, peace, and love.

I desire to give the following testimony of healing in Christian Science that it may be read by others who perhaps are facing something of the same condition. On September 3, 1919, my baby girl was born. A Christian Science practitioner had been called by telephone to give absent treatments, which she continued to give during the week preceding the birth. The baby was born without pain. The first day I remained in bed but sat up a good part of the time. The second day I was up and dressed, the third day and thereafter I took entire care of the baby and was about the house as usual and ate every meal at the table with the family. From the first I felt perfectly well and ate all the food I cared for, with no bad effect. The fifth day I was out on the piazza, the only pleasant day of the week. During the week's treatment several demonstrations were made. bowels and kidneys were in natural condition, and one demonstration which seemed the greatest was the healing of

a deformity of the breasts of about twenty years' standing. No medicine or material means were taken or used at any time. My heart overflows with thankfulness to God and gratitude to our Leader, Mrs. Eddy, for all that Christian Science has done for me and mine, and I am grateful for our literature and the Lesson-Sermons and for the privilege of membership in The Mother Church, also that I have had the privilege of helping others. And my greatest desire is so to live that I may be worthy to be called a Christian Scientist.

(Mrs.) Teresa M. Y. Whitmore, North Haven, Me.

After years of bondage to materia medica, I was healed in 1917 of chronic stomach and bowel trouble, in four treatments, in Christian Science. Knowing nothing of "Science and Health with Key to the Scriptures" by Mrs. Eddy, at that time, I had an earnest longing to know what had brought about the change. During this period of searching I was instantaneously healed of defective sight. This healing came to me through such a wonderful revelation of the truth that the experience has been an inspiration on many occasions. One evening my mother wanted me to read to her but I wanted to be alone, thinking I could get more out of studying alone and I did not want to read aloud, but immediately came the thought, "Selfishness." I picked up a Christian Science Journal with a great desire to help, and as I read down the pages the print became so large, clear, and black I could scarcely believe I was seeing correctly. I reached up to see if by magic something had been done to my glasses and I discovered I had forgotten to put them on. And right there this wonderful truth dawned upon me that all the healing that is necessary is a correction of thought. And since then, no difference what the aches or pains may be, I know it is a wrong thought that needs correcting and not a physical condition to be healed, and, with an earnest longing for perfection, God has never failed me. I am grateful for merited rebuke. I wish also to express my gratitude for the loving-kindness and patience of a practitioner, also to Mrs. Eddy for her loving sacrifice to help humanity. I am grateful for the literature, membership in The Mother Church, and for the knowledge which I have of Christian Science. In the words of the psalmist, "I shall be satisfied, when I awake, with thy likeness."

(Miss) Josephine Fuller, Elroy, Wis.

Although words cannot express my heartfelt gratitude for Christian Science, I feel it my duty to tell of the many blessings that have come to me and my home in the past ten years through the study of that wonderful book, "Science and Health with Key to the Scriptures." We have proved in many instances how quickly God's word heals both physical and mental discords. I had suffered for years with stomach trouble and had found no relief in material remedies, but was healed in a short time by the faithful reading of Science and Health and putting into practice the understanding I had of Christian Science. That was ten years ago, and there has been no return of it.

I have had a recent healing which makes me feel I must not delay longer in adding my testimony to those of others. During the recent epidemic I was stricken with acute lung trouble. A practitioner was called and I was healed quickly and effectually. For this and all other healings I am most grateful, and I am grateful for all the Christian Science literature. My desire is to know more of the truth that makes us free.—(Mrs.) MARY D. SOLLENBERGER, Chicago, Ill.

Signs of the Times

["The Christ"-The Christian Science Monitor, Boston, U.S.A., Jan. 3, 1920]

Every reader of the Bible remembers the famous occasion, at Cæsarea Philippi, when Christ Jesus put to the disciples the question, staggering in its implication, "Whom do men say that I the Son of man am?" and every one remembers equally well the indeterminate nature of the reply, "Some say that thou art John the Baptist: some, Elias; and others, Jeremias, or one of the prophets." The answer, in any case, made it perfectly clear that the "common people" had failed utterly to grasp the teaching of the Christ, and were accounting for the mighty works of the carpenter of Nazareth on a purely superstitious or necromantic basis, in accordance with much of the popular thought of the day. Then it was that Jesus turned suddenly to the disciples themselves, with the same question, "But whom say ye that I am?" a demand which brought from Peter the instantaneous answer, "Thou art the Christ, the Son of the living God."

The Christ, then, it is quite certain, is the Son of God, is the infinite idea of divine Mind, and thus is the reality of everything which seems to exist in a material form, from a blade of grass to a star. It is generic man, for as Mrs. Eddy has written, on page 475 of Science and Health, "Man is idea, the image, of Love; he is not physique. He is the compound idea of God, including all right ideas; the generic term for all that reflects God's image and likeness; the conscious identity of being as found in Science, in which man is the reflection of God, or Mind, and therefore is eternal; that which has no separate mind from God; that which has not a single quality underived from Deity; that which possesses no life. intelligence, nor creative power of his own, but reflects spiritually all that belongs to his Maker." Thus it is that the woman in Revelation, equally with Christ Jesus, symbolizes the divine idea, as Mrs. Eddy, in turn, explains, on page 561 of Science and Health, "The woman in the Apocalypse symbolizes generic man, the spiritual idea of God; she illustrates the coincidence of God and man as the divine Principle and divine idea."

It argued no slight spiritual insight to gain this vision of the Christ in the first century, before the resurrection had finally demonstrated the nothingness of matter, and the eternity of Life; and there is little to be wondered at, therefore, that Christ Jesus should have answered Peter with the words, "Blessed art thou, Simon Bar-jona: for flesh and blood hath not revealed it unto thee, but my Father which is in heaven." It was not, in other words, human intellect, much less the sensuous intelligence of flesh and blood, Christ Jesus quite obviously was insisting, that had torn the veil off the face of matter and exposed its nothingness; it was, on the contrary, the fact that Peter had so far divorced these things from his consciousness as to have gained, to the extent Jesus realized that he had, the vision of the Christ.

For the Christ, it must be obvious, is the truth about and the reality of everything, though the beginner in Christian Science, always limiting himself, unconsciously, to verbal definitions, does not readily comprehend this. As he goes on, however, from demonstration to demonstration, as he must if he is to make Christianity a living Science, and not an intellectual or a dogmatic theory, the marvelous simplicity of the unity of good begins to dawn upon him, and he sees how every lesser idea is contained, of necessity, in the infinite idea, so that the Christ is the reality not only of generic man but of individual man, just as there is the generic idea tree, including all trees, and fish, including all fishes. Thus the reality of Abraham Lincoln is the Christ, though the human

Lincoln was not the Christ, and thus the reality of Science and Health is the Christ, Truth, though the print, paper, and binding of Science and Health are not the Christ, though indicating, to those with eyes to see, the presence of the Christ. And thus the realities of Abraham Lincoln and Science and Health are amongst those ideas which go to make up the infinite idea, generic man, or the Christ.

The individual man or woman, then, is an immortal idea of divine Mind, not really dwelling in matter at all, though to the human senses seeming to do this, but having his life "hid with Christ in God." This individual, consequently, is a child of God, and until he claims his divine sonship and repudiates his life in the flesh, he can never realize his own, man's, spiritual perfection, much less that of a tree or a fish, a book or a paper, each of which is, in its degree, a lesser idea contained in the infinite idea, or the Christ, Truth. This, of course, is what the writer of Hebrews is insisting upon in that often quoted passage, "Now faith is the substance of things hoped for, the evidence of things not seen." There is no substance but the substance of Mind, God; therefore the faith of the individual in the fact that substance is spiritual is, in turn, the evidence of his belief that spiritual substance, invisible to the human senses, is the only reality. This fact, in the proportion in which it is grasped and understood, is the human being's assurance of his own, man's, spiritual perfection, and, in proportion as he demonstrates it, the proof also. And thus, in the Revised Version, is the text translated, "Now faith is the assurance of things hoped for, the proving of things not seen."

Thus, ultimately, in Christian metaphysics, everything is reduced to a demonstration. The world is tired of much preaching, it demands more and more practice. The attempted deification of Jesus of Nazareth has not healed mankind of serrow or sickness or sin. The understanding of the Christ is doing this, for men and women are beginning to discover that that which healed in the first century is healing now, the Mind that was in Christ Jesus.

[Breaking the Mesmerism of High Prices]

The practicality of the recent action of a large automobile manufacturing company in reducing the price of its car, notwithstanding the fact that nearly one hundred and fifty thousand unfilled orders were still on its books, recalls to the student of Christian Science Mrs. Eddy's words on page 15 of "Science and Health with Key to the Scriptures." where she says: "We must pray without ceasing.' Such prayer is answered, in so far as we put our desires into practice." This putting our desires into practice is the test of sincerity and is the most effective blow that could be delivered to break the mesmerism of the senses, whether such mesmeric belief is labeled profiteering, high cost of living, shortage of coal, or what not.

Illustrative of putting into practice the general desire to see normal prices and business conditions restored is the action of a poulterer who, despite the protests of neighboring farmers, reduced the price of the eggs he sold to a figure which his conscience agreed represented a fair margin of profit. Still another instance is that of a woman who, resisting the temptation to profiteer in rentals, advertised furnished rooms to let at a figure so low that the average seeker for such accommodations immediately classified them as undesirable. "You can't get anything decent at that price nowadays," was the comment. The investigator, however, received a surprise, from which a lesson was probably learned as to mastering the housing problem.

"The war is over," said the official of the automobile

manufacturing company referred to, "and it's time war prices were over. There is no sense or wisdom in trying to maintain an artificial standard of value. For the best interests of all, it is time that a real, practical effort was made to bring the business of the country back to normal." Last spring the popular "practical effort" along this line was a general refusal to buy goods at the prevailing exorbitant prices. The "Wear Old Clothes" and the overalls brigades, though extreme and generally classified as fads, were effective in that they instituted a curtailing of expenses on the part of the public which finally resulted in a substantial reduction in prices of clothing. The fall season finds in full swing a "Carry your own luncheon" campaign, the results of which, as it spreads, are easily conceived. The latest effort, however,-to force prices down by refusing to profiteer,-is so far in advance of those that have gone before that the tendency is to call it impractical. This is the rubber stamp with which it is ever the attempt to dispose of such forward steps,-a stamp which fades, however, into oblivion in remarkably short time in these swift-moving "latter days." For the leaven of Truth is working irresistibly, bringing out in human affairs square dealing, honesty, and the righteous adjustment of supply to demand.

["Religion and Science"-The Athenaeum, London, Eng., Sept. 10, 1920]

Canon Barnes, who is not only a dignitary of the church, but also a Fellow of the Royal Society, has declared that the Christian dogma of the fall of man must be abandoned, because science will have none of it. Instead of an immediate outburst of theological controversy, with the bishops and the men of science raging furiously together like the heathen, there has been a perceptible silence. The only defender of the dogma who has conspicuously attempted to break the calm is the General of the Salvation Army. He produces much the same impression as Mr. Bottomley when he comes forward as the champion of the British Constitution.

Had Canon Barnes spoken fifty, or even thirty years ago, the fires would have been blazing with a vengeance. Memories of the heroic combat between Huxley and Wilberforce, more recent recollections of the tumult caused by "Robert Elsmere," rise up to set us wondering at the change that has overtaken the intellectual world in the last halfcantury. Has it produced a race of spiritual Gallios, who care for none of these things? Or, having ceased to care about these, do they care, with an equal intensity of passion, about other things? Or is the obvious conclusion from the silence mistaken? Is it that those who care, and those who have ceased to care, have long since gone their separate ways? Have they realized that no tumult in the market place, no public victory of argument, will convince the other side?

It needs more assurance than courage to accept a single solution. That the difference is there, we feel immediately; but to conclude that Christianity is a dying faith outruns the evidence alike of fact and feeling. It is said that the war has dealt a heavy blow to Christianity, but we think that the Christianity which has gone down is that which is called official Christianity. . . .

In other words, the signs may be interpreted as showing that the appearance of indifference to religious issues conceals a conviction among religious minds that men must rend their hearts and not their garments. The war has brought with it a recognition that the essential humanities of the Sermon on the Mount are the most precious possession of

Christianity, and the most in danger of perishing. When these are in jeopardy there is no time to waste one's strength in theological battles in which victory or defeat can never enforce conviction. If this account be true, then there is room for belief that the two protagonists of fifty years ago, Science and Religion, have realized that instead of fighting each other, they have each enough to do to live up to their own ideal. If bishops made a sorry show in the war, men of science look hardly better, for both alike forgot that it is their privilege to be the guardians of a truth that is universal.

[Prohibition Lessens Use of Drugs]

The following comment in *Unity*, a religious periodical, is interesting from the standpoint of Christian Science:

"It is gratifying to read in a recent number of The Journal of the American Medical Association that, contrary to all expectation, the establishment of prohibition has resulted in a decrease instead of an increase of drug addicts. That prohibition would reduce crime and sickness, ameliorate poverty, stabilize domestic life, was taken for granted and is now being demonstrated by all statistical reports. But it was nearly everywhere feared that society would have to pay for these gains by a very real aggravation of the drug problem. If men are denied access to alcohol, it was argued, then they will inevitably seek the stimulus of something else, and drugs of course are the most effective and available resource. This expectation, however so sound in logic, is now seen to be fallacious, according to the testimony of the editor of The Journal of the American Medical Association. The fact seems to be that the drug habit, so far from being a substitute for alcoholism, is a consequence of alcoholism; for the real effect of alcohol is to lower, not quicken, vitality, and thus in the end to make further stimulus essential. Thus disappears one more bugaboo of the 'wets.' Nothing is now left to them but the ridiculous issue of 'personal liberty.' How long will it take our misguided friends to learn that the overwhelming majority of Americans have highly resolved that one aspect at least of 'personal liberty' is the right to be free from the burden and horror of drink?"

The statistics showing decrease in the use of drugs since the advent of prohibition evidently came as somewhat of a surprise to both the writer in Unity and to the physicians, for they willingly admit that the expectation of its increase, "so sound in logic," has been refuted by the facts. This expectation was indeed sound in logic when one considers the premise on which it was based, that good and evil are equally existent, and that man is finite and material. The very supposition of limitation involves the necessity for external stimulus, and the admission that evil is as real as good results not only in the conclusion that it is pleasurable but also leaves the supposer completely unprotected from its reappearance in constantly aggravated forms. What more natural, then, than that men, believing in the need for and pleasure in material stimuli, should turn, when liquor was prohibited, to the use of drugs? In explanation of the fact that they have not, Unity says that apparently the drug habit is not an alternative for, but a consequence of alcoholism.

The Christian Scientist, however, reasoning from the basis of Principle knows that alcoholism and the use of drugs are alike consequences of one indivisible false claim. He knows, as Mrs. Eddy writes on page 420 of Science and Health, that "Mind is the natural stimulus of the body, but erroneous belief, taken at its best, is not promotive of health

or happiness." Since it is true that this only "natural stimulus" is ever available and all that man, complete in God's image, needs, desires, or enjoys, the untruth that there can be stimuli other than this and a mortal man who craves them must disappear exactly as fast as the truth becomes apparent. When a lie is really destroyed by truth, it is destroyed, not merely relegated to reappear in another form. Since it is the entire false claim which is being destroyed and not merely an incidental manifestation of it, it is perfectly natural and "sound logic" that the lessening of the drug habit should follow the advent of prohibition.

[Translated from the German]

There is perhaps no problem which has occupied the thought of mankind more within the past years and brought so much error to the surface of mortal mind as the world war we have passed through. And even if it seems to outward appearances ended, its effects will not at all be annihilated through the signing of the peace treaty, for error which has ruled mortal mind so long cannot be extinguished by a stroke of the pen, but there is faithful, clear, and conscientious work needed to efface its traces, those terrible signs which showed themselves during its duration—and even to-day are seemingly obscuring the clear understanding, eliminating the boundaries between right and wrong, between good and evil, and causing great chaos of all moral concepts.

Thanks be to God, who, through Christian Science, has given us the strongest and safest means of recognizing error,-uncovering and exposing it. Thanks be to the Discoverer of Christian Science for showing us on every page of her works, again and again, how to escape the effects of error through the understanding of its unreality and through holding thought to reality, Truth, Love, and harmony. Let us rejoice that we, as adherents and students of Christian Science, are called upon to recognize error in its most insidious, most hidden, and widest spread manifestations, and uncovering it, to help work for its destruction. "For the weapons of our warfare are not carnal, but mighty through God to the pulling down of strong holds." These fine words which used to appear in each copy of Der Herold der Christian Science show that only spiritual weapons can break down the strongholds of the enemy. But who are our enemies, and what are the strongholds that they have built up, which we are to break down with the weapons of Spirit? The first question Mrs. Eddy answers in her article, "Love Your Enemies" (Miscellaneous Writings, p. 10), where she says, "We have no enemics." Men are not our enemics. Man is the idea of the one God. We live in the indestructible brotherhood of Principle, for "in him we live, and move, and have our being." And, just as a man cannot be our enemy, so nations cannot be our enemies, for the true nation is likewise idea expressing Principle. But who, then, are our enemies? Error, the lie. "He is a liar, and the father of it," says Jesus. That is the enemy we have to overcome, for it has caused this terrible world war. Before we can overcome error we must expose it. Let us follow it in all its nooks and corners, uncover it in its wretched nudity, hidden in false, borrowed robes. It appears as patriotism, faithfulness, sense of duty, before us, and speaks in big words, so that we do not become aware how it would soil those robes of pure and beautiful God-thoughts with its lie.

And what hides itself in this hell? It is egotism, miserable, horrible, self-seeking. "You must follow me," it calls; "I give you power, I make you to be lords. Do not believe that good is power; that is an ancient belief. I only am

mighty, and I give power to you if you follow me. What does it matter if you take the piece of bread from your brother with which he wished to satisfy his hunger? You only have to see that you are satisfied. What does it matter if he dies of hunger, if only you live? Then you will inherit his power and position, and you will be doubly mighty. Let him take care of himself, you only look out for yourself." So speaketh egotism, century after century, and its arguments have defiled men. They would obscure the clear understanding of God's omnipotence, omnipresence, and allsustaining love, and fill thought with concepts of material power. They would awaken lust for power, possession, and cause striving after those idols. They would put up barriers between individuals and barriers between nations, they have taught men and nations that their needs and interests are contrary, and that only through the use of material might and weapons can they attain their rights, and that the strongest in possessions and physical strength has the most power and will be the victor.

So error has fooled mankind, and wrapped itself in borrowed robes. It has said, Your country, your home, your wife, and your children are in danger; you must protect and defend them with weapons in your hands. It has wrapped itself in the robe of faithfulness and has said: Your country needs you, you must stand faithfully for it, you must sacrifice all you have, your possessions, your health, and your life; in that way you can fulfill God's command, "Thou shalt love thy neighbour as thyself." You must stand selflessly for your country and fight for your people. The men on the other side are not your brethren, they are not people like you, they are your enemies, who must be destroyed. And men believed this error, and thought they were doing right by following those erroneous statements; they sacrificed all they had to a lie.

And then the worst. As by the building of the tower of Babel error confused the language of men so that they could not understand one another, so now it speaks to one nation in its language, which the people on the other side cannot understand, and each nation believes that its cause only is the right and true one and that it is doing God's work by sacrificing everything to annihilate the opponent. Each people has believed that it had God, good, on its side, and has seen all unrighteousness, all crime, all blame only on the side of the opponent. They have forgotten that God created man in His image and likeness.

Let us not speak here of the other poisonous fruits of error, of men who only seek to profiteer, who escaped all duty, and consciously enrich themselves at the expense of others. This only shows the appearances of error, which would even deceive one into accepting as true that which is only a counterfeit.

There is something very sad in the recognition that the many who believed the lying messages of the war sacrificed their lives, their peace, the dearest they possessed on earth to an error, a lie, an unreality. On the other hand it is liberating and uplifting to realize that the cause of the terrible wrong is not real, not founded in divine Truth, that it was born in nothingness, and through divine law must return to its nothingness. God is the only cause and the only effect. In Love there is no room for the roots of war, and they cannot, therefore, be contained in the reflection of this Principle, man made in God's image and likeness. Let us rejoice and be grateful that we have gained this recognition, for now we know that we can separate this error and its destructive effect from man, however much it seems to cling to him.

Our textbook teaches us a wonderful way. "The way to extract error from mortal mind is to pour in truth through flood-tides of Love" (Science and Health, p. 201). And what a warm, liberating current comes to us through these words! They become our liberators and way-showers when we begin to destroy error. Only good overcomes evil. Only love, much love, can reestablish the confidence of man toward man. It is only by realizing that the only man and the only nation is God's image and likeness, that we can show in all our thinking and acting this Godlikeness. Only then can we be righteous, only then can we help to destroy the errors that have oppressed mankind and have found their culmination in the world war. "Let this mind be in you which was also in Christ Jesus," must be our motto. The liberation of mankind can only follow the liberation of the individual, and therefore every individual, and every adherent of Christian Science especially, must take up this work. Let us examine our thought, our feelings, our motives, and actions every day, every moment, to see that no grain of error is contained in any one, which might grow and cause wrong. When we realize how deep and far-reaching the error in this war has sent out its roots, we find no magnifying glass too sharp for self-observation, and when we honestly seek and honestly work, then error will lose its seeming power over us forever. We will become freer, we will stand above it, and then our living and acting will reflect so much Truth, so much Love, that other people will see this power and bow before it. Nothing can resist the power of good for long. It is our ally, it removes all obstacles from our way. Then let us be confident. We do the work of God when we work for the destruction of error and God worketh in w "both to will and to do."

[Address on The Methods and Results of National Health Insurance in Great Britain by Frederick L. Hoffman, LL. D.]

English sanitary progress has by every authority on the subject been considered superior to the corresponding progress attained in any other section of the civilized world. English sanitary authorities and English requirements for the degree of doctor of public health are a standard readily accepted by any country throughout the world. The lowering of the English death rate during the last thirty years challenges favorable comparison, and this has been achieved without social insurance or compulsory health insurance of any kind, but rather in response to a realized understanding of the problems fairly within reach of successful solution.

Sir James Mackenzie draws attention to the inherent limitations of instrumental methods of examination, for, he observes, "In medicine there are phenomena which the scientific instruments of to-day, however delicate, can neither register nor measure, and there are methods necessary for the investigation of disease which no laboratory experience can supply."... Referring to the practice of medical examinations he concludes that the methods employed are largely "but a species of guesswork," and that the knowledge absolutely required to determine the degree of impairment "is a kind of knowledge which nowhere exists."

[A letter in Pendleton (Ore.) Tribune]

References have been made in the columns of the *Tribune* to a case where a lower court in New Jersey pronounced a father guilty of manslaughter for relying on Christian Science treatment when his daughter is said to have contracted a fatal case of diphtheria. The case, however, has been appealed to a higher court.

Practically everywhere parents are privileged to employ

the means of healing which their consciences, their reason, and their experience direct them to choose for themselves or their children. These parents in New Jersey, like countless others everywhere, had tried medical treatment and found it wanting; they tried Christian Science treatment and found it satisfying. Naturally wanting to do what was best for their child, they turned to Christian Science in this instance.

Treatment in Christian Science is treatment through prayer, and is identical with the Christianity taught and practiced by Christ Jesus. The higher tribunals of our land have never sustained the findings of a lower court when, as in this instance, it declared reliance on prayer for the preservation of human life to be a criminal act, and the one so placing his reliance to be a criminal. If the Constitution of the United States is to stand, and if the Scriptures are valid and their requirements just, no court of last resort ever will declare a man to be a criminal for relying on prayer to preserve either body or soul.

When this same question, in slightly different form, was presented to the court of highest appeal in the state of New York, in what is known as the Cole case, a few years ago, the decision was unanimous, reversing the findings of the lower court, which were very similar to these. The New York court of appeals clearly recognized the healing work of Christian Science as healing through prayer and as being in accord with the tenets of the church. It further declared that even the legislature does not have power "to make it a crime to treat disease by prayer."

It is only just to say that thousands of children, many even in New Jersey, succumb to diphtheria from time to time under medical treatment, and we do not hear of prosecutions in these cases. Were there the remotest evidence to show that medical treatment assured anything approaching certainty of recovery from diphtheria, or any other disease, then there might be a shadow of excuse for the effort to make such treatment compulsory. But medical practice offers no such assurance.

Christian Scientists have no ill will toward the medical profession. In fact, they have the most profound respect and good will for all those physicians who are honestly striving to alleviate the sufferings of humanity, but they do oppose the attempt to force medicine and what goes with it upon them and their children.

[C. W. Hale in Greencastle (Ind.) Banner]

The ambiguous assertion that "Christian Science succeeds because it denies facts," made by a revivalist at the Nazarene Meeting recently, admits the well-known success of Christian Science, but immediately attempts to reverse the statement by alleging the impossibility that success proceeds from a falsity.

The truth is that Christian Science does not deny facts, but asserts and proves the real and absolute actuality of God's presence and power right here and now. To make this logical and demonstrable in human consciousness, it declares and proves evil and all material beliefs to be erroneous concepts of mortal mind, that "carnal mind" which is "enmity against God." In the light of the understanding of God and His power in the presence of infinite, divine Mind, these evil beliefs disappear as darkness gives place to light.

By this it is not meant that mankind is relieved "from the thought of hell and judgment" as the speaker stated, for the individual who persists in the practice of sin and the belief in the power of evil need not expect to escape the consequences of his false beliefs.

[117]

Mrs. Eddy, the Discoverer and Founder of Christian Science, says in the Christian Science textbook, "Science and Health with Key to the Scriptures," on page 37: "They who sin must suffer. 'With what measure ye mete, it shall be measured to you again," and in "The First Church of Christ, Scientist, and Miscellany," on page 160: "I am asked, 'Is there a hell?' Yes, there is a hell for all who persist in breaking the Golden Rule or in disobeying the commandments of God. Physical science has sometimes argued that the internal fires of our earth will eventually consume this planet. Christian Science shows that hidden unpunished sin is this internal fire,—even the fire of a guilty conscience, waking to a true sense of itself, and burning in torture until the sinner is consumed,-his sins destroyed. This may take millions of cycles, but of the time no man knoweth. The advanced psychist knows that this hell is mental, not material, and that the Christian has no part in it. Only the makers of hell burn in their fire."

Church Notices

Boston, Mass.—The First Church of Christ, Scientist. Sunday services, 10:45 a.m. and 7:30 p.m.; Sunday school, 10.45 a.m.; Wednesday evening meeting, 7:30 p.m., in the church edifice, Norway, Falmouth, and St. Paul Streets. The church is open to visitors Wednesdays and Fridays from 10 a.m. to 5 p.m.

Reading rooms: Little Building, corner of Tremont and Boylston Streets (fourth floor); open daily, except Sunday and Wednesday, from 9 a.m. to 9 p.m., and on Wednesday from 9 a.m. to 5 p.m. National Union Bank Building (seventh floor), 209 Washington Street, opposite old State House; open daily, except Sunday, from 9 a.m. to 5.30 p.m. Coolidge Corner Building, 1316 Beacon Street, Brookline; open daily, except Sunday, from 9 a.m. to 6 p.m.

Admission to Membership in The Mother Church

The next admission of candidates will take place on November 5, 1920, as provided in Article XIII, Section 2, of the By-laws of The Mother Church. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before Friday, October 22, 1920. Consideration of any applications received after that date will be deferred until the June 3, 1921, admission.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to June 5, 1920, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

Charles E. Jarvis, Clerk,

236 Huntington Avenue, Back Bay, Boston 17, Mass.

From the Clerk of The Mother Church

Church Tenets.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to Charles E. Jarvis, Clerk, 236 Huntington Avenue, Boston 17, Massachusetts.

From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address. Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to EDWARD L. RIPLEY, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

* * * Announcements

From The Christian Science Publishing Society

New Morocco Bound Vest Pocket Edition of the Textbook

Announcement is made of the publication of a new, morocco bound, vest pocket edition of "Science and Health with Key to the Scriptures," by Mary Baker Eddy.

This small volume, 3 1-16 by 4 5-16 inches, the same in size as issued for soldiers and sailors during the war, is bound in black morocco, limp, leather lined cover, round corners, gilt edges. Price \$3.50 for single copy and when included in lots of twelve or more copies of Science and Health in any or all bindings, \$3.25 each.

Orders for this edition will be filled in rotation.

Vest Pocket Bible

The Bible, bound in morocco, uniform in style with the vest pocket edition of Science and Health, is now on sale at \$4.75 a copy. Order by number 08X. Reading room discount 10 per cent.

New Pamphlets

Advance information will in future be given two weeks before each new pamphlet is placed on sale. This will replace the former system of standing orders.

New Pamphlets in German

There is now on sale a new German pamphlet entitled "Ein stilles, sanftes Sausen" ("A still small voice") containing the following articles reprinted from the Christian Science periodicals with alternate pages in English: "The secret place of the most High," "Never too Late for Healing," "Treatment," "Cause and Effect"

There is also on sale a new German pamphlet entitled Läuterung (Purification) containing the following articles reprinted from *The Christian Science Monitor* with alternate pages in English: "Lusting Against Lust," "The Lust of Money," "The Lust of Power," "Looking Ahead," "Sincerity."

Price of each of the above pamphlets 5 cents a copy. Reading room discount 20 per cent.

"Rudimental Divine Science" for the Blind In English Braille

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U.S.A.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U.S.A.

[118]

Letters of Appreciation

Many letters of appreciation of The Christian Science Monitor and other Christian Science activities are constantly being received. These letters express what these activities mean to different individuals in various occupations and pursuits. The favorable comment that has been received on those already published indicates that they are welcome and helpful; therefore others will be published under the above heading. Extracts from such letters follow:

APPRECIATE with every issue the qualities of truth and impartiality which THE CHRISTIAN Science Monitor presents, while its make-up, from the standpoint of type, headlines, illustrations, et cetera, is a constant source of pleasure and inspiration to the teacher of art. This fall the articles on Wood-Block Printing with the reproductions to these inspired us to attempt a very satisfactory problem in the Art Department of the University, when we tried with linoleum some similar cuts demanding several blocks. The president of the University has expressed very generous praise for the MONITOR, saying it was one of the best edited papers that he knew. The Monitor is a university education in itself, and no one who will take time to read it need be without a comprehensive knowledge of sociology, economics, history, art, music, the drama, and literature.

T may not be amiss at this time again to express my appreciation for the literature, particularly for THE CHRISTIAN SCIENCE MON-ITOR. For the past six weeks I have been visiting in the home of a brother, who is a practicing physician (allopath). Much to my surprise and delight he has read the Monitor quite regularly and without the slightest suggestion or solicitation on my part. I simply left copies with the rest of the family, included with other magazines and papers. He has expressed himself as much interested in the paper says the editorials are the sanest things he has read in a long time and refers to the paper as a daily "Review of Reviews." Of course, that last statement is not a correct one, but it is his way of recognizing the fact that the Monitor has news from the whole world.

Cloth, single copy \$2.25; six or more, each \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; six or more, each \$3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy \$5.00; six or more, each \$4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy \$6.00; six or more, each \$5.50.

Christ and Christmas. An illustrated poem. Cloth, single copy \$3.00; six or more, each \$2.50. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Unity of Good and Other Writings. One volume, containing Unity of Good, Rudimental Divine Science, No and Yes. Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science versus Pantheism, Messages of 1900. 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy \$1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy \$2.00; six or more, each \$1.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, single copy \$1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy \$1.00; six or more, each 75 cents.

Unity of Good. This book lays the ax at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy \$1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy \$1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, alias Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point, American Braille, and English Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Rudimental Divine Science and No and Yes. In one volume, French translation, with alternate pages of English, vest pocket size. Blue cloth, gray edges, single copy \$1.25; six or more, \$1.10; blue leather, gray edges, single copy \$2.00; six or more, \$1.75 each.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science versus Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy \$1.50; six or more, each \$1.15.

Christian Science versus Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy \$1.50; six or more, each \$1.25. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign. Address orders and make checks payable to

Heal the Sick

JOHN L. CARTER

TT is the business of the Christian Scientist to heal the sick, I and no other attitude is permissible. In the case of a stubborn show of resistance to healing, the would-be healer should be on guard against the temptation to upbraid the patient, against making the imputation that the lack of healing lies not at his own door and is therefore obviously the fault of the patient. Another facet of the same lie is the unctuous statement that the limited measure of the patient's healing is the measure of the patient's present understanding. The truth of the matter is that the profession of practitioner of Christian Science is legitimate and necessary, and its purpose and only reason for existing is the complete healing of sin and sickness, in spite of all that sin and sickness can attempt to interpose. To condemn a man to a degree of healing of the measure of his present understanding is to argue that the profession of practitioner of Christian Science is limited if not superfluous.

In such a case as the above the practitioner is giving into the hands of his patient the power to limit healing and the power to permit healing, and the practitioner obtains precisely the result that such an attitude expects. His healing is not true healing, but a sort of healing, in exact ratio to his belief in his patient's willingness to be healed. Partial healing is not wholeness, and self-justification and the condemnation of the patient ought not to be given by the healer one moment's thought. In blaming his patient for his own failure to heal, the practitioner is recognizing another mind besides God, and he is believing that that second mind is, upon occasion—and indeed whenever it likes to be-more powerful than God. Obviously such a practitioner would be a danger to the community, if only because he would bind heavy burdens—such as hopelessness and despair and those accursed beliefs, predestination to evil and the persistence of original sin-upon those whose only real desire is to part with confusion and be whole.

In spite of anxiety the practitioner may rest assured that the only way to treat sin, or any other form of ignorance or mental laziness, is as being wholly unreal, undesirable, unattractive, and unworthy of any man's interest. Certainly a patient is not healed—that is, relieved of the fear and folly of a material, mistaken sense of things—except by being convinced of the truth of the spiritual sense of things, in which man is no more a mass of suffering and enjoying flesh than is the wind which "bloweth where it listeth," and which Christ Jesus used as a symbol of the man that is born of the Spirit, a symbol that gives no loophole and no satisfaction to material sense.

Now there is, in Christian Science, an answer to every problem, and there is an answer for this problem of the would-be healer's belief in a seeming resistance to his recognition of the fact that Truth, which is ever present, is all that is ever expressed. But when we speak of Truth we speak of Spirit, Truth, for there is no other. It must be

known as a fact that all healing is really instantaneous, and that all healing is complete; in other words, man is whole now. This does away with the finite belief that healing can be partial or slow; it can be nothing that is unlike God. In cases of partial healing or slow healing let us beware of turning from attacking the disease to attacking the man. Let us pause and examine ourselves. Have we been trying to heal a patient instead of recognizing the allness of God? If we have fully recognized that God is the only Mind or intelligence, and that He is infinite, divine, efficacious Love, simply manifesting Himself through man, then our patient is healed, for the truth is that there is nothing but God, and that there is no mortal man and no carnal mind to displace the man of God, whose only possible consciousness is the divine consciousness. If, however, the practitioner has not really yielded up his belief that there is another mind, the mind of his patient, then he does not understand that there is but one Mind, the Mind that is infinite and is everywhere expressing itself in spite of any belief in its absence and its opposite's presence. In recognizing a permanently or partially sick or sinning man he is denying God; in acknowledging that a sick or sinning mortal has power to perpetuate sickness or sin, he is confessing his conviction that the sick and the sinning have more power than God. He is playing the devil's game, and is not practicing Christian Science. As a matter of fact there are no degrees of bondage. Bondage is entirely a lie, and it cannot remain before the honest Christian Scientist.

When Jesus said, "This kind goeth not out but by prayer and fasting," he rebuked his disciples. Let us accept the rebuke and let us also fast, for there is enough healing for all the demands that can be made upon us. Healing is not a facile trick, nor a reliance on the words of another, nor a thing of mortal sense or human authority. Healing is merely becoming conscious that there is nothing manifest but God. To be practiced this knowledge must govern a man's life and then it cannot help healing, cannot help lifting up the sense-bound to a higher sense of good.

Let us see how Mrs. Eddy puts it (Science and Health, p. 210): "Knowing that Soul and its attributes were forever manifested through man, the Master healed the sick, gave sight to the blind, hearing to the deaf, feet to the lame, thus bringing to light the scientific action of the divine Mind on human minds and bodies and giving a better understanding of Soul and salvation." Then mark what follows: "Iesus healed sickness and sin by one and the same metaphysical process." Obviously Jesus healed, not by upbraiding the person, but by recognizing spiritual individuality; he did not strive to make a man willing to surrender his belief in sin or sickness, but, instead, expected nothing but the manifestation of God through His idea; he did not beseech a man to believe, to understand, to try to be good, for he knew, with no shadow of doubt, that man is simply the conscious manifestation of divine Mind, the inevitable fact and process of limitless divine intelligence ceaselessly expressing itself. Such a knowing was unanswerable, and it is so to-day. And

Copyright, 1920, by The Christian Science Publishing Society, Falmouth and St. Paul Streets, Boston, Massachusetts. Entered at Boston post office as second-class matter. Acceptance for mailing at a special rate of postage provided for in section 1103, Act of October 3, 1917, authorized on July 11, 1918.

to-day it can find nothing anywhere willing to stand in its way.

Again Mrs. Eddy says (Science and Health, p. 280), "Finite belief limits all things, and would compress Mind, which is infinite, beneath a skull bone. Such belief can neither apprehend nor worship the infinite; and to accommodate its finite sense of the divisibility of Soul and substance, it seeks to divide the one Spirit into persons and souls." Surely that passage needs no comment. Clearly, neither at the beginning nor at the end of treatment is there anything but the one Soul or Spirit, and never on the one hand an "advanced" practitioner and on the other a "lagging" patient. Let us have the undivided garment; and let us rebuke once and for all this ignorant superstition that there can be cases which elude, or resist, the infinite sameness of spiritual unity.

True Saving FRANK BARNDOLLAR

BECAUSE of the commonly accepted meaning of the word save, humanity has become accustomed to believe in the possibility of an experience of so-called loss. Particularly during the recent war was the possibility of this experience emphasized by the innumerable admonitions from all sources to be saving of certain commodities or that we should perform stated functions in order that the possible loss of those things held most dear might be forestalled. Often have we heard it said that definite conditions must become manifest in order that a situation be saved and as often have we observed, though remedy after remedy is applied and all known precautions taken to avert a calamity, that the sense of loss seems to predominate.

When weighed down with a deep sense of loss or when in dire circumstances, it has ever been the custom of Christian people to turn to God for comfort and succor, and truly has it been proved that "man's extremity is God's opportunity." The life of Christ Jesus was one long line of proofs that, no matter how distressing seemed the manifestation of the belief in the sense of loss, God, the all-seeing, all-acting, all-loving, and eternal is ever present and omnipotent. Throughout his short but illuminant career, Jesus was ever proving the falseness of a belief of loss, through the demonstration of God's power and ever presence. One of his earliest statements records a correction of this false sense of loss. His parents, when they found him after a three-day search "sitting in the midst of the doctors, both hearing them, and asking them questions," were amazed and asked why he was so conducting himself. Jesus, turning to his mother, made answer, "How is it that ye sought me? wist ye not that I must be about my Father's business?" thus signifying that he was not lost, though human sense believed him to be so, but was even then performing his destined mission, that of saving or presenting for all the knowledge of God and God's creation. The false sense of lack, he corrected by turning water into wine; that of sight, that of hearing, of health, and finally of life itself, were all corrected through the demonstration of the saving Principle of the Christ.

Now it is recorded that Jesus admonished his followers for all time to come to perform these saving works even as he did; to heal the sick, to make the lame to walk, the blind to see, the dumb to talk, and to raise the dead; and, as in the case of the disciples in the garden of Gethsemane when their Master's hour of betrayal was at hand, the eyes of mankind have been closed and they have slumbered in the belief of loss instead of remaining awake listening to the voice of Truth and demonstrating Truth's saving mission as did the

Galilean Prophet. Thus has mankind remained unconscious of the true significance of Jesus' work, unaware of the fact that Jesus labored not to bring about physical phenomena but to demonstrate the spiritual significance of the word save, or to prove eternally the entity of God. The sleep has been deep and of many generations.

Among this great multitude of slumberers there came one day an awakening, and out of the false belief in the loss of joy, supply, harmony, and health came our beloved Leader, Mary Baker Eddy, following with patience and meekness the law of Love, that by so doing she might behold the saving Principle of all mankind. Through the manifestation of faith, hope, and profound charity she so vividly demonstrated this Principle that other slumberers were awakened and they, too, began to seek ardently after this understanding of God and His creation. Thus after a seemingly long period, mankind, again aroused from a mesmeric belief of loss, began to realize the significance of what Mrs. Eddy wrote on page 359 of "Science and Health with Key to the Scriptures," where she compares a Christian Scientist to one of two artists expressing their ideals. "One says: 'I have spiritual ideals, indestructible and glorious. When others see them as I do, in their true light and loveliness,-and know that these ideals are real and eternal because drawn from Truth,—they will find that nothing is lost, and all is won, by a right estimate of what is real."

That there is deep and most sincere gratitude expressed for this discovery of Mrs. Eddy's is not to be wondered at when one realizes the magnitude of the spiritual significance it reveals of the teachings of our Lord and Master, Jesus Christ. It has raised the banner of Truth aloft, and faithfully holds it there. Like their Leader, the true students of Christian Science are ever seeking higher than the human ways and means to clear the situation, to correct any false sense of loss that may come knocking for admission at the door of thought. Thus to-day the demonstration of this saving Principle may be accounted for. Mankind is awake to the spiritual significance of the Master's labors through a scientific understanding of his teachings as given in the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy. This understanding has uncovered the fact that the reflection or manifestation of God, who is Spirit, must be of a spiritual nature and that the true significance of the works of Jesus is the spiritual significance.

Human sense has long believed that the act of delivering mortal man from a sense of disease which would result in death, from a sense of sin which would result in cruel bondage, or from various other material conditions, was the specific purpose of Jesus' mission on this earth. believed in the reality of a condition apart from that of the spiritual, and believed that the spiritual when brought into contact with this other condition would overcome and destroy it. Yet Jesus throughout his preaching and healing work continually declared that there is but one infinite and supreme God and the spiritual manifestation of this God. He never admitted any cause or effect other than that of God and His creation. His works were a direct denial of all testimony contrary to spiritual evidence. Beginning on page 476 of Science and Health, we read: "Jesus beheld in Science the perfect man, who appeared to him where sinning mortal man appears to mortals. In this perfect man the Saviour saw God's own likeness, and this correct view of man healed the sick. Thus Jesus taught that the kingdom of God is intact, universal, and that man is pure and holy."

It is evident, then, that the true or spiritual meaning of the word save is that of preservation, maintaining above all

falsities the completeness and infinitude of God and His spiritual creation, including man, and that this preservation can only be accomplished through demonstration. Mrs. Eddy outlined what this demonstration might mean when she wrote in "Miscellaneous Writings" (p. 116): "Obeying the divine Principle which you profess to understand and love, demonstrates Truth. Never absent from your post, never off guard, never ill-humored, never unready to work for God,-is obedience; being 'faithful over a few things.'" He who is truly awake to his opportunity or his specific duty is never doing otherwise than declaring the completeness of God and His creation. He rejects as consciousness all thoughts of malice, discontent, uncharitableness, and the possibility of a so-called condition of loss. Always is he happy and cheerful, ready to serve God and his fellow men. His consciousness is thus proved so full of Truth and Love that nothing else can enter, and only in this manner can he demonstrate Truth. Through this demonstration all sense of loss is obliterated, all inharmony banished, and the real and eternal verities are alone evident. Thus is the admonition of Christ Jesus being obeyed and his mission of saving or preserving the knowledge of the goodness, the mightiness, and infinite love of God, is being carried on.

Man Is Perfect

VIVIAN M. KUENZLI

MOST of us can bear witness from actual experience to the general belief in the error so tersely expressed by Pope in the words, "Man never is, but always to be blest." This form of limitation, like all others, is rooted in the belief of the reality of matter, and seems to bind humanity before its earliest recollection. In "Science and Health with Key to the Scriptures" (p. 304) Mrs. Eddy says, "It is ignorance and false belief, based on a material sense of things, which hide spiritual beauty and goodness."

Perhaps because of our reluctance to see and acknowledge as an error this relegating of happiness or blessedness to the future, we sometimes find that even after beginning the earnest study of Christian Science, and learning that now is indeed the accepted time, we may not be freed easily nor immediately from this phase of belief in mortality. Always the falsehood is presented that we shall do or be or have-when this condition is met, that limitation overcome, or the other circumstance removed. This suggestion needs to be met promptly, patiently, persistently, yea, aggressively with the affirmations of Truth. We should not feel any sense of weariness in our effort to realize that God's creation must be like Him, although the struggle often seems as severe to us as that of Jesus in Gethsemane must have been to him; but as he emerged stronger, better able to cope with the last enemy, so we find that our true capabilities are revealed through usage of spiritual qualities. Little by little, perhaps, we find ourselves better able to solve our problems and to express more and more of the love and gentleness of true Christianity. This increasing development comes through the earnest desire and growing ability to comprehend and obey the injunction, "Humble yourselves therefore under the mighty hand of God, that he may exalt you in due time: casting all your care upon him; for he careth for you," and no effort is ever wasted.

The gladness and grandeur of Christian Science as well as the gratitude felt toward all who have part in presenting it to the world, is found to be beyond measure as the manifold trials of our faith are understood as opportunities for the application of a fixed rule. We begin to see that there is

no condition so terrible, no material thing so attractive, no circumstance so trivial that it does not demand from us the exercise of every whit of our knowledge of the Science taught by Jesus, restated by Mrs. Eddy, and "carried on" by every loyal student of to-day. As we make the necessary effort, we shall find that the beautiful promises contained throughout the Bible are more than mere words, and that Pope's satirical misconception is completely refuted by the pure, sweet clarity of the words found on page 428 of the Christian Science textbook, "The great spiritual fact must be brought out that man is, not shall be, perfect and immortal."

The Practice of Metaphysics

. ROBERT RAMSEY

THE study of metaphysics is the study of the cause of true effect. The knowledge of the truth about such a cause is true Science. The right reflection of this cause in daily life is Christianity. Therefore the true knowledge of cause and its correct expression is Christian Science. It is impossible to separate knowledge and expression, to know God as the only cause and yet commit sin, for sin is the expression of ignorance. To claim a knowledge of God as the only cause and yet believe in the reality of sin, is to accept the premise of mesmerism; namely, that an effect can be produced without a real cause. The right practice of metaphysics is action based on the understanding of perfect cause and perfect effect. The supposedly wrong practice of metaphysics, which is malpractice, is action based either on the assumption that God is both good and evil, or that an evil effect can be derived from such a cause as infinite good.

Since God is Mind, man is the intelligent expression of that Mind, and so man's practice, his words and deeds must, in reality, be the expression of that intelligence. It is therefore necessary, when a patient comes to a Christian Science practitioner for the purpose of having some manifestation of error removed, that the lack of understanding of God, which claims to be the cause of the manifestation, be removed as well as the manifestation. Any effort to persuade mortal mind to relinquish a belief in material sickness and hold to a belief in material health, is not Christian Science but mesmerism. The reason for this is that as mortal mind is the exact opposite of divine Mind it is naturally expressed in sin and sickness. To try to convince this mind that it possesses the idea of health is to try to get a good effect from an evil cause, which is as much mesmerism as expecting a bad effect from a good cause. To be healed, one must, in a degree, understand that divine Mind is the only cause and harmony the only possible effect, that the idea of health which has to be understood is an idea of the divine Mind, everywhere expressed, and that the testimony of mortal mind is never to be accepted and its beliefs are never real. The student of Christian Science, therefore, is called upon not only to understand divine Mind as the only cause, but also to refrain from agreeing with mortal mind in thought, word, or other expression.

In "Science and Health with Key to the Scriptures" Mrs. Eddy says, on page 391, "When the body is supposed to say, 'I am sick,' never plead guilty." Again on page 392 we read: "Stand porter at the door of thought. Admitting only such conclusions as you wish realized in bodily results, you will control yourself harmoniously." And on page 390 we find this instruction: "When the first symptoms of disease appear, dispute the testimony of the material senses with divine Science." The ability to dispute sense testimony, to watch thought, and to refrain from pleading guilty, depends

therefore on the understanding of divine Science. It must never be forgotten, however, that this understanding has to be put into practice to dispute the testimony of the senses. It is imperative that this practice should start at once; it cannot be safely postponed until the symptoms of disease appear. The practice of metaphysics cannot be separated from its theory, and metaphysics is as much practice as theory, although it deals with thoughts, not with things.

A Christian Scientist is like a lawyer in a case. On one side is the understanding of Truth, on the other the suggestion of mortal mind. Knowing that consciousness is filled with the understanding of divine Science, he can refuse admission to mortal suggestions, but if he has not been in the habit of refusing admission to such suggestions in daily life, how can he do well when the trial comes? What lawyer would go about pouring into every waiting ear the suggestion of his client's guilt? If he did, he would both ruin his client's case and stamp himself a hypocrite for supporting such a case. But is the student of Christian Science any different who, after accepting in theory the allness of good, goes about speaking of past or present illnesses, or the possibility of future recovery, of difficulties from climate or surroundings, or of personal likes and dislikes? Once the admission is made that evil is unreal it is necessary for the one making that admission to live up to it. He cannot admit the reality of evil as operating in himself or in another. Further, he cannot even admit the reality of the belief in evil. It is possible to say with regard to a child that he believes that two times two equals five. It would be absurd to say that the two times two of that child is five, for no belief can alter the facts of arithmetic. In the same way a Christian Scientist may say, if it seems necessary, that some individual believes that malpractice or some lesser form of evil operates and has power. It is never scientific, however, to say that such an individual is a malpractitioner, an evil or a sick man, for to do so would be to accept the reality of the belief. To admit that mortal mind operates anywhere or in any one is to admit all there is to mortal mind and so seemingly to open one's thought to the mesmerism of its suggestions. When seemingly surrounded by the expression of suppositional evil, operating in its own belief, the student of Christian Science must constantly reverse sense testimony through the understanding of divine Science. This reversal is the practice of metaphysics, is doing God's will, and is the only way which leads to further understanding of the allness of God. Jesus said, "If any man will do his [God's] will, he shall know of the doctrine, whether it be of God, or whether I speak of myself."

Oneness

MARY L. HOOPER

SOONER or later, for each one of us, all other considerations as a basis of action must make way for us to follow our Master in his acknowledgment of God's omnipotence, as he prayed, "Not my will, but thine, be done." It is in Christian Science that one is shown the way to find man as God's reflection, for it teaches us to lay down our "earthly all." In "Science and Health with Key to the Scriptures" Mrs. Eddy shows the result of such relinquishment. On page 55 she says, "The time for the reappearing of the divine healing is throughout all time; and whosoever layeth his earthly all on the altar of divine Science, drinketh of Christ's cup now, and is endued with the spirit and power of Christian healing." With this healing power comes also the satisfaction to which the psalmist referred when he said, "I shall be satisfied, when

I awake, with thy likeness." The understanding of how to attain this peace and joy comes to us step by step. "Not my will, my human way, but Thine, O God!" This prayer needs to be within our heart daily, hourly. Our lesson is to learn not to be governed by mortal mind but to reflect God, divine Mind.

Being born in a material world mortals depend upon this form of matter or that, or upon this person or that. Yet does such dependence bring contentment? No. Mortals cannot give what they have not themselves. God is the source of all supply; yet how mankind clings to the arm of flesh! Often do we need to ask ourselves, Upon which are we depending, upon the so-called human or the divine Mind? In the light of Christian Science we are taught to turn to the substantial, the real, to divine Mind, God, knowing that as His child man reflects all that God is, has, or does. In proportion as we do this we receive, here and now; our need is met. We prove this again and again.

So prone are human beings, however, to lean on what they think they see with their eyes, what they have been accustomed to, that again and again one may find himself resting on personality, on what another thinks or says or does-yielding to the human inclination to follow one who is independent, self-sufficient, and positive in thought and action. But God, the infinite intelligence, is available for all. Here is our recourse-to the divine Mind. Mind alone knows; and Mind forever governs all true thinking, speech, and action. Has our brother in his message something for us? Alone with our God, the Principle of our being, we can know. In Science and Health Mrs. Eddy says (p. 15): "In the quiet sanctuary of earnest longings, we must deny sin and plead God's allness. We must resolve to take up the cross, and go forth with honest hearts to work and watch for wisdom, Truth, and Love." Continuing on page 16 she declares: "Such prayer heals sickness, and must destroy sin and death. It distinguishes between Truth that is sinless and the falsity of sinful sense." This is being led by God, when we take the thought presented and analyze it rightly.

Another blessing which mortals often seek in the counsel of others is wisdom, the ability to fill another's present need. One may be voicing the truth ever so wisely, yet it may not seem wisdom to the listener. It may not supply his need. It may not come with the touch of the healing Christ and the command to sense testimony, "Peace, be still." Yet another listener may go away helped. The one who failed to receive help must then resolutely turn whole-heartedly to God. The message is with Him, "for in him we live, and move, and have our being." Then when earthly conditions fail us are we in trouble? No; our dependence is then found in Mind, the one infinite divine Mind. We can lean there safely, because Mind is All. Mrs. Eddy said in her "Message for 1902" (p. 15), "I leaned on God, and was safe."

God, divine Mind, knows how to bring out His own idea, have His will done, His way unfolded to man. It is God's province, not ours. Even reflection, idea, can do nothing of itself. God will take care of His idea, because Mind is the ever operative, unfolding Love, Truth, Life. Now each temptation to rest our faith somewhere else than in divine Mind, if yielded to, is only preventing us from realizing how divine Love is expressing itself in our daily lives. Then why not rest our all in Him? Why lean on what must pass away because it is temporal, unreal? And why not now, instead of later when compelled by suffering, look to Mind for all things? We yield up our faith in matter for what? That which will go with us through eternity—even immortal Truth. We are individually safe with God—

and only with God. When we foolishly rest on the human, the issue is not met, another experience awaits us—a deeper one, and the test will be greater, because from its very nature our human reliance must eventually fail us, and the longer we wait the more difficult may seem the circumstances. Only One never fails us. Let us solve our problem scientifically; Mind will impart to us that which is true, and the truth will lead us all the way to absolute good. Let us make divine Mind our friend, our companion, our all. When we really do this we find ourselves at one with Him, the divine Principle of our being. On page 491 of Science and Health we find this wonderful spiritual statement, with which we may conclude: "Matter cannot connect mortals with the true origin and facts of being, in which all must end. It is only by acknowledging the supremacy of Spirit, which annuls the claims of matter, that mortals can lay off mortality and find the indissoluble spiritual link which establishes man forever in the divine likeness, inseparable from his creator."

Presentiment and Intuition

MAUD WORCESTER MAKEMSON

EVER since the Dark Ages mortal mind has been visualizing its fears in the form of presentiments of evil. Today it is not uncommon to hear some one exclaim after an accident or other evil experience, "I had a presentiment that something awful was going to happen." In fact, indulging in presentiments of some imminent danger has probably occurred more than once in the memory of all mortals. The writer remembers being awakened from sleep one night by a gripping fear for relatives many miles distant, in a form of a voice calling for aid. The fear was not destroyed until after several minutes of contending persistently for the truth that God was just as much present in the far-away mountain home as He was with her in the city, and that His loving care and watchfulness over His beloved children were as much a fact at that time as they had always been. So real had the presentiment seemed that for several days the writer awaited a letter that would confirm and justify it, but though letters came, there was no news that any particular phase of error had been faced or met at that particular time. From this experience, the writer made several deductions. In the first place, the evil had not had existence outside what seemed her own belief. It had originated there, and there, too, it had been met and overcome by Truth. In the second place, it was easy to see that if the fear of trouble had been confirmed by subsequent events she would have declared, no doubt with satisfaction, "I had a presentiment that something awful was going to happen."

It follows then that a presentiment is not a presentiment unless it is borne out by some consequent event. So instead of being the effect of a cause, as mortal mind would have us believe, the presentiment must be only an evil belief in mortal mind afterwards manifested in experience. Now one of the things that we learn in "Science and Health with Key to the Scriptures" by Mary Baker Eddy is that evil has no power to communicate itself to the thoughts of mankind. Since evil is a lie and its only seeming power is in being believed to be true, evil is destroyed when it is seen for what it is. If, then, a presentiment of approaching sickness suddenly suggests itself, should it be taken as prophetic? Not unless one wishes to be ill. The fear should be recognized as a belief without scientific foundation, and should be banished from thought and replaced by the understanding that God never made man capable of being sick. The same process should apply to presentiments of accident, fire, famine, and all the dire inventions of mortal mind.

But what of the intuitions of good? On page 581 of Science and Health, Mrs. Eddy has given the scientific definition of angels as follows: "ANGELS. God's thoughts passing to man; spiritual intuitions, pure and perfect; the inspiration of goodness, purity, and immortality, counteracting all evil, sensuality, and mortality." Since God, good, is Allin-all, it is evident that every intuition of good must be a reflection of God. An understanding of this makes thought receptive to the heralds of Truth and Love.

An excellent illustration of how a presentiment of evil was met and mastered by a heavenly intuition with most beneficent results is found in the thirty-second chapter of Genesis, and is interpreted by Mrs. Eddy in Science and Health, on pages 308 and 309. The Bible narrative tells how Jacob went forward with his family, cattle, and household possessions to meet his brother Esau, from whom he had fled in fear many years before. It tells how the fear of Esau was so uppermost to Jacob that he first devised means of propitiating his brother with gifts of cattle, and then hid his wives and children in an isolated spot so that they might escape, in case he fell by Esau's hand. Having done all in his power to protect himself and family, Jacob "was left alone" with his overwhelming fear that the coming of Esau in the morning would bring death and destruction. "And there wrestled a man with him," the narrative continues, "until the breaking of the day. . . . And he said, Thy name shall be called no more Jacob, but Israel: for as a prince hast thou power with God and with men, and hast prevailed.... And Jacob called the name of the place Peniel: for I have seen God face to face, and my life is preserved." "The result of Jacob's struggle thus appeared," Mrs. Eddy writes in Science and Health (p. 309). "He had conquered material error with the understanding of Spirit and of spiritual power. This changed the man." Consequently as day dawned and Jacob looked and saw at a distance Esau advancing with his four hundred men, he took the women and children whom he had so securely hidden and with them went to meet his brother. The loving reunion of the two brothers has been beautifully described in the Scriptural text: "And Esau ran to meet him, and embraced him, and fell on his neck, and kissed him: and they wept.

Do not think that it was only in the days of Jacob that angels visited mortals, wrestled with them, and transformed their natures. To-day as yesterday, the angels of God's presence are ever ready to bring the "inspiration of goodness, purity, and immortality." Regarding these intuitions of good Mrs. Eddy writes (Science and Health, p. 566): "The Old Testament assigns to the angels, God's divine messages, different offices. Michael's characteristic is spiritual strength. He leads the hosts of heaven against the power of sin, Satan, and fights the holy wars. Gabriel has the more quiet task of imparting a sense of the ever-presence of ministering Love. These angels deliver us from the depths. Truth and Love come nearer in the hour of woe, when strong faith or spiritual strength wrestles and prevails through the understanding of God." Then, may not the hour of woe, the hour when fear, doubt, and discouragement seem to point to a future of terror, bring close to mankind the angels of hope, spirituality, joy, gratitude, praise, faith, resolution, love, and immortality?

+++

With a song in my heart I greet the day And the task that the day may bring. For God's dear love shines on my way: What can I do but sing?

Editorial

A Disillusioned World

ANATOLE FRANCE, unburdening himself on the subject of the great war and its immediate effects, insists that the preponderating result is the disillusionment of Europe; he might have said of the world. Never, surely, has such a miserable accomplishment followed such tremendous expectations: that is, if the whole matter be regarded superficially. And yet to the looker-on, who can see something more than in a glass darkly, is not the disillusionment, supposing Monsieur France to have diagnosed the case correctly, an absolutely necessary preliminary to the millennium of the future? While the war still lasted, it was the way of the prophets of the millennium to talk and write as if the kingdom of heaven could be taken by storm, by those who were of the earth exceeding earthy. They seemed to imagine that an enforced sacrifice of material possessions, and the word possessions is used in its broadest sense, was an indication of the "ancient sacrifice"-the broken and contrite heart. Enforced sacrifices are, however, no sacrifices.

Mrs. Eddy, speaking of the necessity in religious matters for practice rather than profession, if anything is to be accomplished, goes on to declare, on page 16 of Science and Health, "A great sacrifice of material things must precede this advanced spiritual understanding. The highest prayer is not one of faith merely; it is demonstration." Now that thousands of people made and were willing to make every sacrifice demanded of them during the war, is certain. But they made it, for the most part, without any scientific understanding of the situation, whilst they were after all only a minority. The consequence is that the world, waking up to the fact that its material lot has not been improved, is overwhelmed by this sense of disillusionment. It has not, in other words, made the necessary sacrifice of material things, because, even when it has seemed to itself to do so willingly, it has done so believing in the value and reality of matter, instead of through an understanding of its nothingness. Its sacrifice, therefore, has been a sacrifice of objective matter, instead of one of subjective materiality, and, in consequence, it has left the person making the sacrifice fully under the impression that something has been lost instead of something gained.

At the same time, Monsieur France's dictum is more superficial than he suspects. The world had to learn the instability of its material concepts, and it is learning this in the only way it is capable, at the moment, of assimilating it. Monsieur France's receipt for its healing is a hard one, and one it will find even more difficult to assimilate, since it is nothing more nor less than a supreme unselfishness. To be really unselfish, however, a man must learn to understand his own material nothingness, and so to realize his spiritual reality. Only as this lesson is learned is it possible for the individual to comprehend the metaphysical meaning of brotherhood, and so to see that he can take nothing from his neighbor without taking something from himself. All

good, to put it differently, is derived from Principle, is the reflection of Principle, and as such is infinite. Good, therefore, unlimited good, is at the disposal of every one, according to his understanding of Principle; and if a man thinks that he can withdraw something of infinity from his neighbor, it is because he is himself indulging in a sense of limitation, which sense, though it is powerless to afflict his neighbor, cannot be without effect upon himself.

Now, it is an obvious truism that a man can only learn the way he can learn. "Remember," Mrs. Eddy writes, on page 240 of Science and Health, "that mankind must sooner or later, either by suffering or by Science, be convinced of the error that is to be overcome." For upwards of half a century the opportunity of finding security against the mesmeric claims of materiality has been opened to the world in Christian Science. The world has not, however, chosen to take advantage of its opportunity. It has hugged its materiality not only as the truth about itself, but as its dearest possession; and, as a consequence, it hears Monsieur France telling it to-day that "the human tragedy continues." The human tragedy continues, of course, because the world persists in trusting the human mind, of which Christ Jesus said that it was a liar and a murderer from the beginning. The human mind, dreaming away the Adam-dream, throughout the centuries, produces its men and women of the flesh, and then sets them dancing in a universe of material illusions and inharmonies, and professes to them that this is life. Monsieur France also believes that this is life, and so he too is powerless to help them. And yet the secret was laid bare to humanity, on a Syrian hillside, almost nineteen centuries ago, and made plain again in our own time by Mrs. Eddy, when, quoting the first gospel, she wrote on page 233 of "The First Church of Christ, Scientist, and Miscellany," "Our Master said, 'He that taketh not his cross, and followeth after me, is not worthy of me . . . and he that loseth his life [his false sense of life] for my sake shall find it."

Before, then, the human tragedy can end, humanity must make the sacrifice, not of its barns and much goods, but of its material-mindedness. Until it does this, it will discover that it is merely playing the rôle of Simeon Stylites, and making matter intensely real to itself. What Christ Jesus meant when he called upon his followers to utterly deny themselves, and take up their cross, and follow him, was that they should recognize that man was spiritual and not material, and set to work to demonstrate the truth of this by every means in their power.

The truth of the matter is, of course, that except under the immediate inspiration of the teachings of Jesus, or in the light of Christian Science which was revealed to Mrs. Eddy through her study of the Bible, the world has followed its rabbis, religious, philosophic, and scientific, in mistaking effects for cause, and negations for the absolute. There is the real tragedy, and it is a tragedy of intellect and not of economics, if Monsieur France, for one, could only see it. A realization by the world that matter is nothing but the effect of a negation would go far toward waking Adam out of his dream. But an intellectual perception of this, were such a thing a merely intellectual possibility, would only be a statement of a theory which would yet remain to be demonstrated in practice. That, necessarily, was what Christ Jesus meant when he said to his followers, throughout the ages, "He that believeth on me, the works that I do shall he do also."

The real human tragedy lies in the mesmeric dream of the individual which finds expression in his selfish belief of a self apart from Principle. Therefore was it that the apos-

tle to the Gentiles, after the terrific onslaught upon the lusts of the flesh, pointed the church in Ephesus to the sacrifice of Christ Jesus, and strove to rouse it, out of its dream in the senses, with that clarion call of Spirit, "Awake thou that sleepest, and arise from the dead, and Christ shall give thee light."

FREDERICK DIXON.

Coincidence

What Christian Science teaches must unfold eternally because it is infinite in its import. It need not seem strange, then, if one finds himself questioning frequently the statements of divine metaphysics, as he begins the study, for Christian Science teaches nothing less than the entirety of infinite Principle. For every right question, it has the right answer. This answer, the spiritual fact which the divine Mind knows, is demonstrably in accord with both reason and revelation. Unquestioning acceptance of whatever is told to one is never commendable. As Mr. Thomas Nelson Page said in his address before the Phi Beta Kappa Society at Harvard University this year, "Accept no man's ipse dixit. Accept only as it commends itself to you, to your reason and to your instinct. Inform yourselves, but think for yourselves."

True instinct or impulse is, of course, the propulsion of perfect divine cause and not any supposedly physical reaction or innate propensity of a so-called human mind. The fact is that, since there is but one spiritual Mind producing all actual being, there is no human or mortal mind to have any propensities whatever. The supposition that a mortal mentality, counterfeiting the all-inclusive immortal Mind, could ever cause anything is absurd. There can never be more than all, and immortal Mind with its idea is proved in Christian Science to be all, leaving no possibility for an opposite. This true Mind is the source of the only real action, and allows no element of chance or mischance in the operation of its effect. The whole operation of Mind is neither supernatural nor mysterious in any way, but is altogether comprehensible in its rational order.

The student of Christian Science soon learns, therefore, that the good which he experiences is not merely fortuitous. The facts of real existence are arranged by divine Principle. One who informs himself as to what these are and reasons for himself as to why they manifest Principle, cannot believe that their arrangement in order for the universal good is ever what is ordinarily termed a coincidence, or happening. Spiritual phenomena simply appear together in harmony, because idea is always harmonious in all the variety of its expression. In the last analysis, moreover, idea is one, even though called by all sorts of convenient names. Thus it is inevitable for the unfoldment of good to be exactly right, with every detail coordinate with its Principle. The indivisible harmony of spiritual action is required by its source to continue forever in perfect concord.

If a coincidence is thought of, in the words of one dictionary, as a "notable concurrence of events or circumstances without apparent causal connection," it has no part in the divine realm, where the only possible event or circumstance has one cause or Principle, the divine Mind. Genuine effect is inseparably connected with its cause. Hence the real concurrence must be the relationship of idea to Mind. The circumstance which emanates from divine intelligence is in perfect concurrence with that intelligence. It is true, however, that one fact, one effect, may have no apparent causal connection with another. Indeed, an effect could never possibly cause another effect, for if it could, it would

be not effect at all but cause. The boundless activity which the divine Mind creates is not divided up into miniature causes and effects, but is entirely harmonious as idea manifesting Principle. The one great event is the continuous unfoldment of good, and this is always truly coincident with its source.

Only when coincidence is considered as immensely more than a seeming human accident, is it really understood. To coincide, in this broader sense, is to be identical. Thus, as one way of speaking, one may say that Principle and divine Mind, or God, are coincident terms, meaning that they are synonymous. Principle and Mind are identical, when rightly understood, for they are exactly the same in essence and nature. To use another way of speaking, cause and effect must always coincide. That is to say, effect must always coincide with or be like its cause, even though cause forever remains cause and effect remains effect. What each student of Christian Science needs to know, therefore, is that, whereas no true circumstance is ever really casual, irregular, undesigned, there is the fact of right coincidence which completely replaces the ordinary counterfeit sense of it. The illusory counterfeit is the very opposite of the genuine order.

The practice of Christian Science is the replacement of any belief in human coincidences with actual demonstration of Principle. Demonstration of Principle is never a mere happening. It is the sure operation of the divine Mind, of the infinite I AM, accepted as the only Ego. On page 51 of "Unity of Good" Mrs. Eddy says: "The Ego is divine consciousness, eternally radiating throughout all space in the idea of God, good, and not of His opposite, evil. The Ego is revealed as Father, Son, and Holy Ghost; but the full Truth is found only in divine Science, where we see God as Life, Truth, and Love." On the following page she continues: "This Science of God and man is the Holy Ghost, which reveals and sustains the unbroken and eternal harmony of both God and the universe. It is the kingdom of heaven, the ever-present reign of harmony, already with us. Hence the need that human consciousness should become divine, in the coincidence of God and man, in contradistinction to the false consciousness of both good and evil, God and devil,-of man separated from his Maker." Surely each one needs to prove for himself that the unfoldment of good can come about only because of the true coincidence of Principle and idea, of cause and effect, and not on account of any supposed chance. Every sense of uncertainty is overcome in Christian Science through the positive understanding and practice of what is truly causative. Thus the whole teaching of Christian Science as to why the demonstration of Principle is the coincidence of activity with its cause, involving no element of chance, unfolds as the real experience of one who is seeking the truth. The more the student sincerely inquires into the subject of demonstration, the more positive must be become of the infallible operation of Principle. His every question is satisfactorily answered by proof of the one governing divine intelligence. This proof commends itself to his reasoning and takes the place of any lingering doubts. He soen knows, therefore, the utter falsity of the belief that a demonstration of Christian Science is a human coincidence instead of rightly unfolding activity coinciding with divine Love. GUSTAVUS S. PAINE.

THE stars of Love removeless shine

Through earth's dream-drift of wrathful night,
And cascades from eternal light
O'erbrim the thundercloud of time.

DAVID FRANCIS THOMPSON.

Testimonies of Healing

I wish to express my heartfelt gratitude for blessings received through the study of Christian Science. I did not take up Christian Science for physical healing but have had many benefits. It has enabled me to overcome fear, superstition, limitation, and a sense of heat in a tropical climate. Christian Science has been called the Science of right thinking, and what I am most grateful for is that it has enabled me to correct wrong thoughts, taught me how to hold to the good and reject evil. I have had many lessons to learn, but I am thankful that man has been made capable of resisting evil and of seeing God's children as they really are, perfect. When this is seen there remains no human bitterness, no resentment to impede further progress, no matter what the seeming wrong may be.

While my husband was on a business trip to Rhodesia he contracted fever and being a government official had to submit to medical treatment. Three physicians were consulted and did everything in their power, but in vain. His hearing, speech, and sight were all affected and he could not eat any solid food. I recommended taking him to a practitioner and he agreed. In one week he was absolutely normal and was able to eat anything, and in a very short time had regained his former weight. His hair began to fall out, which was supposed to be due to the fever; we worked to know the truth, however, and in a few months his hair was thicker than ever. We are most grateful for this demonstration, which proves to us the ever presence of divine Love.

I am so grateful for all the literature which comes to supply our daily needs, and also to our dear Leader, Mrs. Eddy, for her wonderful illumination of the Scriptures, and for giving us the spiritual interpretation and application through which we can solve all our human problems. No matter where one goes, the fruits of her labor can be seen; and what shall the harvest be?—(Mrs.) J. Hunter Scott, Johannesburg, South Africa.

It is with a heart filled with gratitude that I send my testimony for publication. From infancy I was a weak, sickly child. After marriage, my health grew much worse, and indigestion, sick headache, and many minor troubles developed. I was unable to take a drink of water without suffering, and for one year lived on graham mush. I was very nervous and constantly filled with fear lest I should not live to raise my children. About this time Christian Science was presented to me. We were living in the country, fifteen miles from a practitioner or a Christian Science church. After driving this distance to ask a practitioner for help for one of our children, I found his talk so beautiful and restful that I knew at once he had something I did not have.

I asked for treatment for the child, never dreaming that I myself might be healed, as I felt my own case too far advanced. However, I bought the textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy, and immediately began to read it, searching for the Principle that had healed my child. I read almost constantly and prayed that I might know if this teaching were the truth. I read so constantly and was so eager to understand what I read that I forgot to take my medicine, one kind of which I had taken for twelve years. All at once it dawned upon me that I was healed.

Shortly after this, I was taken with a severe headache and decided that this was the time to prove the truth for myself. All at once, the words, "God is Love," came to me with such a clear realization that I knew this was the answer to my prayer and that I was permanently healed. This was twenty-five years ago and Christian Science has been our physician and guide ever since. The joy and peace which this truth has brought into my life cannot be expressed in words. My gratitude for Christian Science and to Mrs. Eddy is unbounded. I am also very grateful for class instruction and for the Christian Science literature, which we could not do without.

(Mrs.) Amy Washburn, Manhattan, Kan.

With a deep sense of gratitude I give this testimony of what Christian Science has done for me. As a child I was considered very delicate and was pampered, doctored, and pitied, until at a very early age I considered myself a semi-invalid. A violent temper went uncurbed, owing to my high-strung, nervous temperament. Four years after marriage a baby came into our lives, and when it passed away three weeks after birth, the shock and my grief were so great that I was confined to my bed for many months with nervous prostration. In the course of time two more children came to us and my fear that they, too, might pass on was so great that the strain was almost more than I could bear.

At this time a very dear neighbor gave me a copy of the Sentinel, but in a few days I returned it to her without having glanced at it. Soon after this I decided to consult a doctor as I was very miserable. I was told that I was suffering from a malignant growth, which must be removed at once. In a very panic of fear I was rushed to the hospital and underwent a very serious operation. It was months before I was at all strong again and I was in constant fear that the disease would return. Discord in our home at this time added greatly to my misery. Then one day the symptoms for which I constantly looked, with a dread that is past description, reappeared. My doctor confirmed my fears and told me to come to him again in two weeks for another examination. The thought of another operation, with no assurance of healing, was unbearable. I felt that there was absolutely no hope for me and entertained the thought of self-destruction.

A dear sister had been sending extracts from Christian Science literature from time to time. Although I enjoyed reading them, I never considered them seriously, but, happening to meet the friend who had given me the Sentinel some time before, I asked her if she thought Christian Science would help me. She was very sure that it would and gave me the name of a practitioner, to whom I immediately went and asked for treatment. I fully intended to go back to my doctor in two weeks if I were still living.

With the very first treatment black despair gave way a little, and hope—very faint, to be sure, but hope for all that—stirred within me, and banished all thought of self-destruction. Then began a bitter struggle with self. With loving-kindness that I could not understand at the time and for which I can never adequately express my gratitude, the practitioner treated me, encouraged, and helped me, day after day, month after month.

It was at the time when I was experiencing that condition which Mrs. Eddy calls chemicalization, that I had a wonderful demonstration of the protecting power of God. Many times afterwards, when fear and doubt assailed me, I looked back to that supreme moment and gained strength and courage to press on. I was spending the night with a sister, and with the exception of her little son we were alone.

拉拉

٠,

About midnight an intruder entered the house through a dining room window. He flashed his light around in a manner that left no doubt of his intentions. Leaving the dining room he walked across the kitchen floor toward my room. In an agony of fear I prayed, "My trust is in Thee, O God." Immediately I was "absent from the body" and "present with the Lord." Fear was gone. I felt the nearness of God. The intruder stopped at my door, then turned and went slowly back into the dining room and out of the house. A pocketbook and some silver dollars were lying on the dining room table, but these and everything else were left untouched. To me this is a wonderful proof of the nothingness of evil.

I did not go back to the doctor nor have I taken any medicine since the day of my first treatment. Very soon bowel trouble, headaches, and fainting spells were overcome, and gradually the assurance that God is able and willing to heal every ill of mankind grew stronger. My ultimate healing came slowly, for which I am now very grateful, as it kept me reading and working faithfully until the light of Truth dawned upon me. In the place of discord and lack, peace and love and plenty now reign in our home. Our children are robust and healthy and have accepted the truth so naturally that they are a constant source of inspiration. Colds and whooping cough have been overcome with the truth.

A year ago I laid off glasses, which I had worn constantly for ten years, and I have never felt the need of them since. Quite recently, when making the trip from Minnesota to California, our youngest son developed symptoms of Spanish influenza. Help was asked for from a practitioner and in two days the child was healed. I am now in perfect health and stronger than I ever was before, and I thank God that with the physical healings many faults have also been overcome. The spiritual uplift which Christian Science has brought to me satisfies a longing of years' standing.

For all these blessings I am very grateful, grateful to God, to Christ Jesus, and to the inspired messenger of glad tidings to this age, Mary Baker Eddy. I am very thankful for the Christian Science literature, which never fails to supply the need of the moment.

(Mrs.) LILLIAN MORRIS, Westwood, Calif.

4

Among the earliest of my childhood recollections there are none more vivid than that of my being forbidden to eat the many good things which a child delights in. The reason, of course, for this restriction was that the things I desired most were the very things that the doctor had decreed would disagree with me. From my earliest days it was said by various medical authorities who were consulted, that I had a weak stomach, and a more or less strict diet became the order of the day. Later on as I grew to manhood this condition changed from a weak stomach to a disordered liver, and by the time I was twenty years old I had suffered from jaundice and a severe attack of gallstones. I was recovering from the latter when Christian Science was brought to my notice and I commenced the study of the textbook, "Science and Health with Key to the Scriptures," because it seemed to offer an escape from a very strict diet which my physician had told me was the only means of avoiding a return of the trouble. I was also to refrain from participating in the many pastimes and enjoyments of youth and instead was to take consistent daily exercise and become subject to other objectionable regulations. The vista of this slavery and a long list of medicines to be taken at stated intervals, urged me to try Christian Science treatment. This I did and

at the end of a fortnight I was completely healed. That is more than seventeen years ago, and while in the first few years of my experience in Christian Science there were one or two occasions when a symptom of the old complaint would appear, it was invariably and quickly overcome with no other aid than that of Christian Science.

So much for the physical healing. It is, however, the moral regeneration which was the main reason for my seriously taking up the study of Christian Science. As already indicated, the cause of my becoming interested in Christian Science in the first place was my need for physical relief, but I was just at the age when most young men find themselves in the midst of the struggle against the many pitfalls of youth, and my outlook was fast approaching that point where I was beginning to be persuaded that what I regarded as evil was really a necessary experience in the world, and that chastity was an ideal impossible of attainment and entirely impracticable in the world as I then viewed it. I had not studied Science and Health twenty-four hours before I became convinced that this argument was wholly fallacious and that it needed to be no longer entertained.

Science and Health has shown God as an available presence to me and an unfailing help in any and every situation, and I am profoundly grateful for all the benefits that have accrued to me since I first began to study Christian Science.

STUART SESSIONS, London, England.

Five years ago last March I received a most wonderful and beautiful healing of neuritis, through the application of Christian Science. For a number of years previous to this time I had spent large sums of money trying to find relief through materia medica and surgery, including an examina-

through materia medica and surgery, including an examination by specialists, who told me there was no hope. After leaving them, I lay in bed six months and found that I was growing worse all the time—physically, mentally, and financially.

On the afternoon of March 23, 1916, I was advised by a business friend to try Christian Science as a last resort. After a few hours' consideration, with no other desire than to get physical relief, I invited a practitioner to come to my home. In less than thirty-six hours after the practitioner came to my bedside and explained to me that God is Love and that God was not responsible for my being down in bed in pain and sickness, I began to experience a peace of mind that I could not explain to myself or my family. In four days, with some little difficulty, I began to get out of bed, where I had been for eight weeks. In twelve days my wife wheeled me a distance of four blocks, where I superintended the closing out of a small grocery stock. In a few weeks I went to my summer's work, which meant standing on my feet sixteen to seventeen hours each day for ninetysix days. At the end of that time I was completely healed of a disease that a few months before was pronounced in-

What I have related above is a very small part of the many blessings that have come to me in my study and application of Christian Science. It has given me a better understanding of God, and an assurance in knowing how to go to God, divine Principle, and that He will supply all my needs. It has made me a better citizen, a better husband, and a better father. My family consists of four members, all of whom, prior to the advent of Christian Science in my home, were taking medicine for some reason or other. But now all the medicine is gone, and we depend entirely on Christian Science for our help of every kind. I am in-

curable by the best known surgeons in the United States.

deed grateful for what Christian Science has been to me and mine.

I am grateful to God for the Bible, for the life of Christ Jesus, our Way-shower, and for the life of Mary Baker Eddy, the author of our textbook, "Science and Health with Key to the Scriptures." I am grateful to God for *The Christian Science Monitor* and all the other Christian Science literature. I am grateful for the opportunities that come to me to help broaden the channel for Truth and Love.—John H. Hood, Long Beach, Calif.

4

I would like to express my gratitude for the help I have received from the study of Christian Science, and for the many healings experienced through the application of spiritual law as interpreted by our revered Leader, Mrs. Eddy, in "Science and Health with Key to the Scriptures." I became interested in Christian Science five years ago through curiosity, and found that reading the textbook had entirely healed me of several minor ailments; namely, sick headaches, indigestion, and bowel trouble, and upon further study and application of the truth and with the loving help of a faithful practitioner, I have been healed of rheumatism (supposedly inherited), lumbago, and congestion of the bowels.

For the removal of these difficulties, I am more than thankful, also for the peace that follows the understanding that the divine law rightly applied meets every human need. It is my sincere wish that this testimony may be of benefit to some one who may be laboring under similar discordant conditions.—(Miss) JOSEPHINE VAN HORNE BROOKS, Elizabeth, N. J.

I wish to verify the above testimony of my daughter and to express my sincere thankfulness for the great benefits I have received since I began the study of Christian Science. For many years previously I suffered with sick headaches, bowel trouble, and indigestion, which entirely disappeared while reading "Science and Health with Key to the Scriptures" by Mary Baker Eddy. There has been no recurrence of these troubles during the past five years.

About two years ago I experienced a severe fall on a highly polished floor, striking my cheek bone with the full force of my weight. I instantly declared the truth to the best of my ability, as I realized that that was the opportunity to apply my knowledge of divine Science, with the result that there was no discoloration, no swelling, or even soreness to the touch. For the ability to demonstrate my understanding of the truth, I am indeed grateful to our heavenly Father and to Mrs. Eddy. I trust that this testimony may serve to help some one to know that divine Love is an ever present help.—(Mrs.) Julia G. Brooks.

4

Filled with gratitude I wish to relate an experience, passed through during the severe warring time, which gave me a clearer knowledge of the truth. I was employed in a place where war material was being made. We had long working hours and did not have a Sunday off. As I was living alone I had no one to secure my provisions for me; consequently, there was finally nothing left, and want became manifest. As I had always been modest in expressing my wants and desires I gave this matter no thought; I neglected to work for it mentally, thinking only of the great spiritual treasures and the never failing source of supply, our Father-Mother God. During the following winter we had nothing but turnips to eat. I had no relatives living out in the country nor any other means of securing more nutri-

tious food from that source, and began to feel very miserable, my stomach failed me, and I suffered greatly without knowing the real reason. I was obliged to remain at home and consult a sick benefit doctor, this being compulsory. In the evening my sister would bring me my provisions.

One evening she found me almost lifeless. I had retired the night before and had not awakened, and, as she was not a Scientist, she became very much frightened and called all the residents of the house together. They tried everything possible, but could not awaken me. Then she called a physician. The sick benefit doctor could not come as he was engaged, for it was during the influenza epidemic in October, 1918. The doctor's efforts were in vain; I lay there with open eyes without seeing or hearing anything. He then told them to allow me to lie there quietly, for he considered help in vain. My dear sister, who did want me to remain with her, tried repeatedly to awaken me; but the doctor admonished her, telling her she should not begrudge me the rest. Then he asked my niece if the sick benefit doctor had not prescribed any medicine for me. I heard her answer plainly, "My aunt is a Christian Scientist and does not take any medicine." Nothing had before succeeded in awakening me, but the words "Christian Scientist" did it. I opened my mouth to take nourishment and gradually came to. With the help of a dear friend I soon recovered.

When I told my niece of having heard her answer she would not believe me, but on my repeating her answer word for word she was obliged to do so. The fact that I am still here and am active is due to Christian Science alone. I am so happy that it came into my life, for it has made me a buoyant, joyful person. I am very grateful for this experience, for it has enabled me to see that there is no death, that God is the only Life, and that we are never separated from Him, for God is omnipresent. I have also seen the error of limitation overcome and since that time have never been in want. I also wish to express gratitude for the War Relief work, the great work of love of which we were permitted to partake.

(Miss) Johanna Hohmann, Berlin, Germany.

4

I would like to tell the world through the Sentinel what Christian Science has done for me and my baby. At the age of six months a serious intestinal trouble set in, for which I doctored one year with three prominent doctors in my home city, during which time the baby suffered intensely and got no better but gradually grew worse. Then I took her to a renowned specialist in San Francisco, who had her in the hospital one month. He diagnosed the trouble as bacteria in the intestines. He said he thought he could bring her through, but during the fourth week in the hospital the assistant doctor told me three times not to build my hopes too high, and two days before I brought her home the doctor told me she would have to remain in the hospital for six months. She went through the most severe treatment, and suffered untold pain. When I had reached the limit of mental endurance and could not see my baby tortured any longer I told the doctor I would take her home, that her life was not worth all she was going through, and that I would bury her rather than see her suffer in that way another day. I talked it over with my husband and asked him if we should try Christian Science, since baby was to die, and he said, "Yes; try anything."

I went with very little hope in my heart to a near-by practitioner and there received encouragement and hope. Next morning my husband and I brought the baby home. She

2

:Ir

2.1

was nineteen months old, and weighed only thirteen pounds. The doctor had given me a very strict diet to follow, which I disregarded from the moment I got her home. The practitioner called for ten days, during which time the baby gained in strength, in spirits, and in weight; also her appetite returned and I fed her everything a baby of her age should eat.

I visited the assistant doctor with the baby three months later. She was walking and plump and rosy. The doctor marveled but assured me the improvement was only temporary, which of course has been disproved; there has never been a return of the trouble and it is one and one-half years since then. I cannot praise God enough nor say enough in favor of Christian Science.

MRS. HARRY E. HILL, Chebeague Island, Me.

For a long time I have felt that I should make an acknowledgment of the gratitude I owe Mrs. Eddy for giving to us "Science and Health with Key to the Scriptures," and for the marvelous understanding her writings give us of the Bible. I have been interested in Christian Science for several years, but only the last year and a half have I got down to hard study. Many physical discomforts have disappeared, including a weekly headache (sometimes more often) and backaches; also my hearing is improved.

A few months prior to the birth of my son the effects of a serious automobile accident were overcome through the loving help of a practitioner, and at the time of confinement it was proved to me, more now than then, that divine Love is an ever present help.—(Mrs.) RUTH HUNTER HENDEE, Winnipeg, Manitoba, Canada.

4

Having received so much good through Christian Science during the past few years, I wish to use this means of expressing my gratitude. Through the aid of a practitioner I have been healed of hemorrhoids of many years' standing, and eczema, for which all material remedies had offered only temporary relief. There is scarcely a trace left of an old tendency to contract colds, for through the new understanding gained of the truth as taught in Christian Science I no longer fear "taking cold." At one time a case of rheumatism which troubled me for several days instantaneously disappeared while I was reading an article in the Sentinel.

When I was just becoming interested in Christian Science, my son came home from another city very ill with a disease which the doctors whom he had called upon were unable even to diagnose. He asked for treatment from a Christian Science practitioner, and was healed. When I learned later what the after effects are under materia medica treatment my joy and gratitude for this healing were indeed great. Ever since, that healing has stood out to the members of my family as a proof of the healing power of Christian Science.—(Mrs.) LINNIE THORSEN, Chicago, Ill.

+

Christian Science was first brought to my attention about twelve years ago through the healing of a friend who was afflicted with serious eye trouble. About one year afterwards I myself was cured of stomach trouble in a few treatments. I had but a very faint idea of what Christian Science healing really was. I thought it was something after the order of mental suggestion and rather scoffed at the idea of God having anything to do with the healing; consequently I could make little or nothing out of the study and gave it up, but the healing remained permanent.

My life from a very early period had been dominated by a very great unrest. I did not understand the cause of this mental condition and sought peace and rest in travel, adventure, and even dissipation. But in every place I went I found Truth there ahead of me. Finally it dawned upon me that something was radically wrong with my thought and action. Bitter disappointment and great loss swept my life bare of everything desirable, but it was again proved that "man's extremity is God's opportunity," for then came Christian Science with its healing message, the truth about God and man. I have now learned to love the Bible, for when read with the "Key," Science and Health, it has come to be to me the Book of all books. This study has brought me great peace and joy and I find that the more I learn and understand about God the greater harmony I experience in all my affairs and daily life.

I know that Christian Science is the truth because it is demonstrable. I also have had several other physical healings besides the first one mentioned in this testimony, for which I am deeply grateful to God, to Mrs. Eddy, and to the kind practitioner whose patience and clear thought have helped to place my feet on a solid foundation, on the rock, Christ.—Fylson A. Pohlman, San Francisco, Calif.

4

With thankfulness to God and gratitude to our Leader, Mrs. Eddy, I send this testimony of the healing of my boy. One Saturday he went in swimming where poisoned vines were. Sunday morning his limbs began to break out and puff or swell. By noon it had spread nearly over the whole body. I took him to a practitioner but before we reached there his face and eyes were badly swollen. He received one treatment and on reaching home we discovered it had nearly all disappeared, and by night he was free from any sign of the poisoning. This is only one of the many proofs of God's care, and that all cause and effect belong to God, for which I am very grateful, also for the understanding Christian Science has given us.

(Mrs.) IDA PARSONS, Sparks, Nev.

4

With a heart full of love and gratitude to God for Christian Science I send this testimony to the Sentinel, hoping it may help others to know the truth. It is just five years since I took up Christian Science and was healed of tuberculosis, after a doctor had said I could not get well. Since then many demonstrations have been made in my home through this wonderful truth.

About three years after my first healing, four large growths appeared on the side of my neck and gave me much pain. I had several treatments from a practitioner and kept knowing the truth as well as I could, but they became larger, and for several months discharged. One day a member of my family, who is not a Christian Scientist, had occasion to call in a doctor who was a stranger to me. As he was leaving the house he saw me and exclaimed: "You have a very bad tubercular gland on your neck. Why don't you try X-ray treatments? You may possibly have it cured." I said to myself, "Only God can cure me and Christian Science is showing me the way." Shortly after this the discharge stopped and gradually the growths disappeared and now it is over six months and my neck is perfectly well. I have only one very small scar, hardly noticeable.

I want to say that all the literature and also the hymns have helped me greatly. I am thankful to our dear Leader, Mary Baker Eddy, for this and many other proofs of God's love.—(Mrs.) Emma Bryan, Indianapolis, Ind.

[133]

Signs of the Times

["Popularity"-The Christian Science Monitor, Boston, U.S.A., Aug. 5, 1920]

At this stage of the world's history, peasants become premiers and "poor boys" presidents, with the rousing acclamations of their peers and with wordy protestations of sympathetic support, while around those filling other posts in the world of affairs there arises at times a wave of adulation that makes what is known as popular heroes. For a brief time, in the eyes and hearts of their communities they are supreme; their every word is law; their every act unquestioned right. They are enjoying popularity, that is, the trust and esteem of the people. But the man who allows himself to rely upon mere human faith in a human being soon learns the flimsiness of it, and begins to murmur about the fickleness of the people.

Now, in fact, all that is fickle is the human mind, of which the people, as the term is commonly used, are but one manifestation. Grasping this fact ever so slightly but not understanding its metaphysical significance, officeholders seek to discover what this phase of the human mind desires. In various ways the temper of constituencies is sought, and followed, where office is considered as a prize above Principle. But no amount of seeking to understand the human mind as a reality will place a man on a firm foundation. Just as, in order to understand the mathematical fact of two times two, one studies the right result, four, and thereby any result other than four takes its inevitable place - is understood - as illusion, so in order really to deal intelligently with the varied manifestations of the human mind, the metaphysician studies to understand the divine Mind, as whose manifestation he finds all reality, which the human mind merely claims to counterfeit.

The man who can be consistently joyful in public office or at any so-called responsible post, is therefore the metaphysician, since he understands the true nature of responsibility and of popularity, and looks beyond their human interpretation. When other men despair of the fickleness of mankind, he is rejoicing in the constancy of divine Principle. When other men are accepting the illusion that "the people make and the people break," he is looking to the one builder and maker, who is God, or Truth, who breaks, destroys, by His divine supremacy of being, only the illusion of anything apart from Himself and His creation, and such falsity is forever eliminated. Thus the metaphysician is always "on the crest of the wave," buoyed up, however, by nothing so unstable as human acclamation, though grateful for every true expression of appreciation of right understanding and doing. Christ Jesus, it will be remembered, allowed himself to be carried into Jerusalem on an ass's back, to the hosannas and salutes of the people who laid the path with palms. But it was not their shouting that made him "King of Israel." While they expressed their understanding of his position among them, he entered into their rejoicing, but when their shouts had changed to "Crucify him, crucify him," the Christ still reigned as the only king, and Jesus was immovable. To Pilate's question, "Art thou a king then?" he returned the answer, "Thou sayest that I am a king," and this he followed with the declaration of his spiritual mission, "To this end was I born, and for this cause came I into the world, that I should bear witness unto the truth;" whereupon Pilate, arch officeholder and yearning interpreter of the people's will, "saith unto him, What is truth?" The verses following reveal, in the contrasting attitudes of Pilate and Jesus toward the people, the difference between human groping for and metaphysical understanding of right doing. Jesus knew the source of Pilate's so-called power and feared it not. Neither did he look to any friendliness among the people to deliver him. He had resources that they knew not of; even the crucifixion could not overcome the Life which is God.

Such is the example and such is the rock upon which the student of Christian Science builds his conception of public service. He will rejoice in a strength that the world knows not and that lifts up even where the mob expression of evil seems to roar loudest to tear down. To him the true popularity is not the enjoyment of human faith in personality; true popularity is the continually supporting understanding by Principle of the infinite oneness of God's idea. This unlimited idea is the only people there is.

The man who builds his public service on complete confidence in God, stands not aghast at sudden changes of the human mind. Since the very nature of this mind is to fear its own destruction by the demonstration of man's perfection, it cannot tolerate too near an approximation to the divine, but will aim to confound and confuse by noisy disapproval him to whom it had once given the great gift of freedom from its limitations. It may call evil good or good evil; it may cry down right activity in the name of justice and liberty with the tools of injustice and tyranny; but whatever the phenomenon, the right thinker undisturbed is learning the value of Mrs. Eddy's statement in her Message to The Mother Church for 1901 (p. 28): "It is well to know that even Christ Jesus, who was not popular among the worldlings in his age, is not popular with them in this age; hence the inference that he who would be popular if he could, is not a student of Christ Jesus." The "student of Christ Jesus" knows that his mission is, like that of Jesus, to "bear witness unto the truth," and that to the extent he does so he demonstrates the Christ which Jesus demonstrated completely and fully. Onward he goes, joyfully, confidently, without fear or favor, practicing what he knows of Truth, relying radically upon divine Principle.

[The Entry of Women into Politics]

The approach of the world to the understanding of divine Principle and the demonstration of its government as the one real power are shown in nothing, perhaps, so clearly as in the sweep of woman suffrage. Completeness is of the infinite qualities of Principle, and since all mankind must come to know true government, the entry of woman into politics is bringing into view the wholeness of governmental activity. This entry not only furthers completeness but it establishes scientific reasoning such as that which was uttered by a Massachusetts woman, who is in the forefront of the suffrage movement, in these words: "Politics is the science and art of government . . . Christian men and women are needed in politics and in government. One of the misapprehensions that has kept many of them out previously has been the misunderstanding of the word politics and the fact that it is itself government." Politics and government are indeed one and the same, for all of infinite activity is the expression of Principle.

[Roger Babson as quoted in The Congregationalist and Advance]

We look upon stock certificates, mortgages, and so forth, as if they were of real value. In themselves, they have absolutely no value. Their value depends wholly on the honesty of the lawyers who draw the papers, on the integrity of the clerks who copy the records, on the honor of the officials who sign the documents, on the courage of the courts

which must enforce the claim, and finally on the righteousness of the community, which is the basis of all. The problem of the cost of living is a religious problem rather than an economic problem, and it can be solved only as people cease to be selfish and become imbued with the spirit of service.

Never before in the nation's history has business been so good, have wages been so high, and money so plentiful. Every one is employed, the railroads have more than they can haul, and the demand for goods exceeds the supply. Yet many able men are fearful of a panic or depression within twelve months. What is the reason for this fear? This fear is due to the knowledge that people forget their religion during times of prosperity. We become extravagant, careless, and selfish during good times. We forget God and feel confident in our own strength; we seek profits rather than service and are interested in consuming rather than producing. Only a revival of religion can make our good times continue. . . . So I say that the need of the hour is not more houses or freight cars, not more factories or ships, not more legislation, education, or banking facilities, but more religion. The need of the hour is religion.

[The Christian Register]

Originality is not uniqueness, or cleverness, or the discovery of some new thing. To be original is to go back to origins. This is a farther journey than the scholastic schools of whatever sect. It is not so spectacular a task as that of some doctors, but it is right. It is the quest of the eternal, the changeless, the ultimate truth of life. Before men got ideas, God is. The origins must be found where they are, which is not in other people's books about them, but in God, in Life.

["The Nature of Matter"-The Times, London, England, Sept. 4, 1920]

Since the beginning of the century, the scientific conception of the nature of matter has radically changed. Speculative at first, the conception has now come to be accepted as fact. Last century the progress of knowledge had dispelled the bazy ideas out of which alchemists wove their dream of transmutation. New elements were discovered, but the more exact the experiment, the more certainly these and the familiar metals and gases seemed to be ultimate materials of the universe. Some eighty of them were known, ranging from the light hydrogen to the heavy thorium. A few more might be discovered, but these, identical in the distant stars and in the crust of our earth, were the ordained species of matter. Then the Russian Mendeleeff pursued an idea first shadowed by Döbereiner, and arranged the elements in an ascending scale, almost suggesting a genealogical tree. There were missing links in his series, and predictions of the properties of new elements which would fill the gaps were verified by actual discovery. Crookes, partly on speculative grounds, and partly because of his discovery of the new phenomenon which he called "radiant matter," spoke of the evolution of the elements from "proteil," a primitive stuff.

Then, suddenly, shocks from many sides assailed the notion of the independence and permanence of the elements. More exact methods of investigation showed that the atoms of an element were not all alike; elements could appear in different forms known as isotopes; elements of high atomic weight were found in process of spontaneous disintegration. Rutherford was able to break down the atoms of oxygen and uitrogen, driving out from them an isotope of helium, and Aston showed that all the elements are constituted of hydrogen atoms bound together with electrons. Finally, the hydrogen atom itself is resolved into electrons, one moving round the other in a circular orbit. A monistic interpretation of matter has displaced the older view. And what are electrons, these new symbols of the physical conception of the material universe? They are spoken of as positive and negative, the one with a mass two thousand times that of the other, and with a two-thousandth part of its diameter. They are mathematical abstractions, their properties inferences from mathematical reasoning. In the last resort matter has become number, a measure, not a thing. The metaphysician, expelled from the physics of last century, has come back to his own.

[A Refutation of False Statements]

A pamphlet refuting some of the statements made in the general propaganda for compulsory health insurance has just been issued by The National Civic Federation. In this pamphlet many of the statements are interesting in the light of Christian Science. One statement, refuting the assertion that the "Standard Bill" for compulsory health insurance "combines the features pronounced best by the practical experience of Europe," shows the disagreement on essential points among those who have interested themselves in this subject. It is in part as follows:

"Every one is entitled to express his own individual conclusions from European experience. But this pronouncement implies some such misleading notion as that the Standard Bill follows the latest European precedents (framed in . the light of experience) or that it follows a well-defined

majority opinion as to the lessons of experience.

"Neither of these notions is true. The partisans of compulsory insurance are hopelessly divided in opinions as to methods and means. For instance, at the latest International Social Insurance Conferences the majority opinion seems to have been that the insured should have a choice of insurance carriers-in other words that some insurance should be required, but that all existing insurance institutions should be preserved and that each insured person should be free to choose his insurance to suit his individual needs and preferences. . . .

"As to other features, the extension of the law (the classes subjected to compulsion), the question of whether or not there should be a medical benefit, and, if such a benefit, how it should be provided and controlled, the distribution of the cost, the question whether contributions and benefits should be level or proportionate to earnings or contributions respectively, et cetera, both the sickness insurance laws and the opinions of the partisans of compulsion are hopelessly at variance.

"Moreover, the German law, for example, contains special provisions regulating the insurance for agricultural laborers, domestic servants, casual employments, itinerant trades and home-working industries, whereas the British law leaves the modifications requisite to adapt the insurance to these special occupations to the discretion of the Insurance Commission. In application to these special occupations the British insurance has notoriously broken down (cf. The New Statesman, cited and quoted supra); whereas experience of the operations of the special provisions of the German law in question (which took effect January 1, 1914) has been shut off from our observation by the war. Consequently it cannot truly be said that the feature of the Standard Bill leaving the special regulations for the occupations above mentioned (or such of them as are covered) to the discretion of a political commission has been 'pronounced best by the practical experience of Europe."

Another interesting statement is on the subject of education of the masses in regard to health. Christian Science shows that the true education is not in regard to disease or supposed conditions of disease, but to be effective must show to all clearly that true health is the activity of divine Principle. When this is understood, the following statement is significant:

"A careful study of the various plans of health insurance either in operation or recommended for approval present little or no evidence that the education of the public as an important factor in the preservation of health and the prevention of disease is fully appreciated, or that if properly carried out would go far to render compulsory health insurance unnecessary. It is true that reference is made to the value of this means of maintaining health, but no definite or concerted action plays a part in the measures now employed or in the plans proposed for future action. It may be added that in the Davenport Bill, reference to this modern method of disease prevention is exceedingly brief and offers but little hope that any extended action will be taken under the provision of this bill to educate the classes which come under the scope of compulsory insurance.

"The proper education of the public is a powerful instrument in the prevention of disease. Contrary to statements frequently made, relative to this matter, only very slow general improvement has been made in this direction. Within the past three years a careful investigation was made in New York city to ascertain to what extent the laboring classes were informed regarding health protection, while almost all who were interviewed expressed a genuine desire to know by what means health might be preserved and disease prevented, in order to protect themselves and their families, yet very few reported that they had received any definite or satisfactory information upon the subject. It is the education of the masses which is needed to improve the health of a community rather than compulsory health insurance."

Of course the above statement may intend to encourage the ordinary medical propaganda for "health protection;" but the student of Christian Science knows that the true information which even the laboring classes need is information as to how divine intelligence governs the real man and maintains right activity. This is the one kind of education that is needed.

[From Public Opinion]

Certainly we do not have far to go to gather in the most striking evidences that times are changing. Here is an instance of it.

"The compliment of being termed 'courageous' may be very easily won. The daily press hastens to pay it to any churchman who publicly denounces a doctrine of the church. Thus The Times and the Westminster Gazette were found in agreement in calling the sermon which had been preached by Dr. Barnes, Canon of Westminster, at Cardiff, 'a courageous sermon.'"

[From the report of the British and Foreign Bible Society]

Through the activity of the British and Foreign Bible Society, the list of languages into which the Bible has been translated has this year increased by nine. Of new translations five were for Africa, one for China, one for Canada, one for Argentina, and one for the South Seas. The complete Bible is now translated into one hundred and thirty-four languages, the New Testament into one hundred and twenty-four. The total number of Bibles issued in the year 1919-1920 exceeds 8,500,000, and of these 5,250,000 were distributed by colporteurs, officials who have been made familiar to a wide public through Borrow's "Bible in Spain"

as men willing to face dangers in the interest of their work. In Colombia three colporteurs were imprisoned under a law which forbids the circulation of "immoral literature"—surely the most unlooked-for contretemps of the many which mark the way of the itinerant vendor.

4

[Introduction to a Christian Science lecture at Altrincham, England]

The mere fact that the lecturer is from the United States of America should insure for him a hearty welcome and an attentive hearing. At no time in our history as a people have we so thoroughly understood and appreciated the greatness and the qualities of the United States as at present, and we shall know better as time goes along the incalculable service which that country has rendered in the great struggle for freedom and justice in which we have been engaged. America has given us in Christian Science a greater and a more valuable gift than material and moral support in the war. To those of you who do not really know what Christian Science is, this must seem an extravagant and empty statement. But to those who will listen with open mind, Christian Scientists are prepared to substantiate the claim that it affords possibilities for human betterment—the healing of sickness, the overcoming of fear and anxiety, the elevation of thought and character, deliverance from evil of all kinds to a degree undreamed of outside the pages of the four gospels.

4

[Boston Evening Transcript, Boston, Mass., Sept. 28, 1920]

With a challenge to the churches of Boston to a new awakening of faith and a new zeal in building the kingdom of God to meet the tides of evil which are sweeping over the world to-day this three-day convention devoted to "gospel fundamentals" opened this morning in Tremont Temple under the auspices of the Evangelical Association of New England.

After reading the Scripture lesson Mr. Emery welcomed the members to the convention, sounding the keynote of the meetings by urging enthusiasm and faith in the gospel and the value of these particular meetings. He said that no salesman can be a success who does not have faith in his goods, nor can the members of the church make it successful in the world unless they have an undying conviction and an unbounded enthusiasm.

The objects of the convention were stated by Rev. A. Z. Conrad, D. D., pastor of Park Street Church, as being to magnify the truth. "We are not controversialists but advocates of the truth, the whole truth and nothing but the truth," said Dr. Conrad. "The world's difficulties are not," he continued, "primarily economic, political or social... Our danger is not from without but from within—it is a warring faith within the churches. We need a new conviction of the absolute authority of the Bible on everything in human life and the world's affairs. Our desire is to stabilize the faith of Christians by a reasonable interpretation of Christianity, of the gospel fundamentals."

"The Bible," said one speaker, "was written by forty different authors and its composition extended over a period of fifteen hundred years, yet it is one of the most unified books ever produced. It is, further, an organic unity, not a lifeless or superficial unity."

"The cause you represent," declared Governor Coolidge of Massachusetts, in the course of his address of welcome to the Odd Fellows at the recent communication of the order at Boston, "has long been cherished by the people of Massachusetts. It was faith that brought the Pilgrims here. It

was hope that sustained them in the days of bitter adversity. It was charity that mellowed and broadened them. These great principles do not change. As a foundation of correct living they grow stronger, firmer, with all human experience. They cannot be exhausted. Whatever the requirements, there is in men a faith great enough to meet them. Here men rise beyond the finite.

"There is nothing this nation so needs to-day," the Governor continued, "as the cultivation of a charitable spirit. We must have done with intolerance and with selfishness. These are the bane alike of public life and private business. What is it that distorts the true nobility of commerce and industry wherever it runs like a curse through any of the business life of the country? Selfishness. What is it that arouses the bitterness of party and factional animosities? Intolerance. We need to substitute for that vindictive spirit that is all too prevalent in American life the spirit of holy

[Ridgefield Park (N. J.) Bulletin]

There is one thing about Christian Science worthy of note, and that is that it makes some of its disciples more companionable and considerate, more charitable and kindly disposed, sweeter, better balanced, and more agreeable. In several cases that we know of, the doctrine has made for a wonderful improvement in mind and a pronounced benefit in body. Of course, it is true that all religions inculcate lessons of proper living and the necessary adjuncts, but the Christian Scientists we speak of have shown actual and marked individual improvement, worthy of passing mention.

[The Living Church]

One of the chief reasons why there is so little conventional religion among us, writes the Archbishop of Caledonia in the Guardian, is the false conception which so largely prevails as to how God works. The popular idea is that it is only as an external power, occasionally breaking in upon us and interfering with the laws of nature, like some mighty grappling iron let down from the skies, that God can be recognized as working among us. As this so seldom happens in our experience, it is no wonder that God counts for so little in our lives. God is not the author of confusion. What we call the laws of nature, including the laws of the mind and the laws of the spirit, are the discoveries we have made as to the way in which God works. There may be still higher laws, which we have not yet fully recognized, which will explain much which at present seems to us to be mysterious, but of one thing we may be certain, God will never contradict the laws which He has stamped upon the constitution of things, for He can never contradict Himself. The reign of law is universal. The variety in the universe is beyond human calculation, but the unity of the universe is supreme, because God reigns. . . . It is far more honoring to God to believe that He is constantly working in us in a natural way, than to believe that He only occasionally works upon us in a miraculous manner.

[An Evidence of Practical Christianity]

We have heard a great deal about "man's inhumanity to man," and this stereotyped expression is used thoughtlessly, with little or no recognition of man's humanity to man, which has resulted from the more frequent individual recognition and application of the Golden Rule.

One of the many evidences of the result of the practical Christianity which has, during the last half century or more, replaced in a degree merely theoretical Christianity, is the

formation in a far western city of a "Boys' Club," for homeless and friendless boys, for which a well-known benevolent organization stands sponsor, and by which the club is backed morally and financially, although the boys are not relieved of a single responsibility which is properly theirs; for the club is not a charitable institution, nor yet a boarding house, but just what its name indicates, "a club for boys." Each member pays a nominal sum for his room and board, does his share of the housework (no servants being employed), and has part in the management of the club. A library and music room add to the atmosphere a touch of refinement. Is this not an evidence of the application of the Golden Rule, and may we not add without further comment, one of the results of nation-wide prohibition-which is in turn the result of Christianization of thought?

For those who have eyes to see, there may be found in all directions activities for the betterment of mankind, of which the above is only one illustration, but surely a "sign of the times," and a foretaste of "a new heaven and a new earth" spoken of in Revelation, in which unselfishness reigns.

[Zion's Herald]

What, then, is the inner meaning of the widespread changes of our present era which thus intimately affect even the very life of the spirit? There is just one answer: The world is in the midst of an upheaval that can mean only good. Humanity is in earnest quest for truth and reality and can never rest until it rests in God. The very struggle and turmoil of the race furnish grounds for optimism. . . Man is zealous to find and realize the purpose of God. . . . It is the best age since the world began. Everywhere life is bursting the confines of ancient thinking and doing and is moving forward.

[From "Literature in a Changing Age"-Ashley H. Thorndike]

Religion and poetry are no strangers. They have long been companions. The romanticist theory of poetry viewed it as a means of revelation of God, and the poets were the evangels of divine truth. This, as we have seen, was the conception that inspired many of the Victorians. But the literary discovery of the hiding places of divinity was soon set about by many difficulties. The new age offered new problems and new doubts demanded discussion, argument, and new statements of creed and faith. What is unusual in Victorian poetry and literature is the great amount of religious discussion, the constant emphasis placed from varying points of view upon the religious problems of faith. Compare this condition with the poetry of Shakespeare. Written in an age of change and revolution in faith and church, it offers so little debate on religion that we scarcely know whether Shakespeare had a creed or not. Like the romantic narratives of Scott and Morris, his plays take religion as a matter of course rather than as a matter of concern. Victorian poetry is very much concerned about religion. Indeed, it perceives a revolution that threatens to overturn also the very concepts and

English poetry may be said to be based on Christianity. Its conceptions and its modes of expression are drawn from the church and the Bible. At least it has imagined the universe in terms reconcilable with the Christian faith. For it, God and the soul are transcendental, belonging to another world. Our world of actuality is only an appearance, a reflection Poetry has ever been trying to picture man's relation to this transcendent world. . . .

But often poetry records only unavailing search for any

supernatural sanction for man's duty. Doubt is not conquered in a moment's resolve, but persists until it forces a break from the evangelical faith. This relinquishment may cause a crisis of emotional intensity, a sort of reverse of conversion, as in Clough's "Easter Day,"

Through the great sinful streets of Naples as I passed, With fiercer heat than flamed above my head My heart was hot within me; till at last My brain was lightened when my tongue had said—Christ is not risen!

Christ has not risen, no— He lies and slumbers low; Christ is not risen!

... When the crisis is over, the way of truth sometimes leads back to the vicinity of faith. In the later stages of their spiritual search, Mill could argue for theism, Morley preach the beauty of holiness, and Clough declare,

> In the true creed, He is yet risen indeed; Christ is yet risen.

Church Notices

4 4 4

Boston, Mass.—The First Church of Christ, Scientist. Sunday services, 10:45 a.m. and 7:30 p.m.; Sunday school, 10.45 a.m.; Wednesday evening meeting, 7:30 p.m., in the church edifice, Norway, Falmouth, and St. Paul Streets. The church is open to visitors Wednesdays and Fridays from 10 a.m. to 5 p.m.

Reading rooms: Little Building, corner of Tremont and Boylston Streets (fourth floor); open daily, except Sunday and Wednesday, from 9 a.m. to 9 p.m., and on Wednesday from 9 a.m. to 5 p.m. National Union Bank Building (seventh floor), 209 Washington Street, opposite old State House; open daily, except Sunday, from 9 a.m. to 5.30 p.m. Coolidge Corner Building, 1316 Beacon Street, Brookline; open daily, except Sunday, from 9 a.m. to 6 p.m.

Admission to Membership in The Mother Church

The next admission of candidates will take place on November 5, 1920, as provided in Article XIII, Section 2, of the By-laws of The Mother Church. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before Friday, October 22, 1920. Consideration of any applications received after that date will be deferred until the June 3, 1921, admission.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to June 5, 1920, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

CHARLES E. JARVIS, Clerk,

236 Huntington Avenue, Back Bay, Boston 17, Mass.

From the Clerk of The Mother Church

Church Tenets.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to Charles E. Jarvis, Clerk, 236 Huntington Avenue, Boston 17, Massachusetts.

From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address. Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to EDWARD L. RIPLEY, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

Announcements

From The Christian Science Publishing Society

New Morocco Bound Vest Pocket Edition of the Textbook

Announcement is made of the publication of a new, morocco bound, vest pocket edition of "Science and Health with Key to the Scriptures," by Mary Baker Eddy.

This small volume, 3 1-16 by 4 5-16 inches, the same in size as issued for soldiers and sailors during the war, is bound in black morocco, limp, leather lined cover, round corners, gilt edges. Price \$3.50 for single copy and when included in lots of twelve or more copies of Science and Health in any or all bindings, \$3.25 each.

Orders for this edition will be filled in rotation.

Vest Pocket Bible

The Bible, bound in morocco, uniform in style with the vest pocket edition of Science and Health, is now on sale at \$4.75 a copy. Order by number 08X. Reading room discount 10 per cent.

New Pamphlets

Advance information will in future be given two weeks before each new pamphlet is placed on sale. This will replace the former system of standing orders.

New Pamphlets in German

There is now on sale a new German pamphlet entitled "Ein stilles, sanftes Sausen" ("A still small voice") containing the following articles reprinted from the Christian Science periodicals with alternate pages in English: "'The secret place of the most High,'" "Never too Late for Healing," "Treatment," "Cause and Effect."

There is also on sale a new German pamphlet entitled Läuterung (Purification) containing the following articles reprinted from *The Christian Science Monitor* with alternate pages in English: "Lusting Against Lust," "The Lust of Money," "The Lust of Power," "Looking Ahead," "Sincerity."

Price of each of the above pamphlets 5 cents a copy. Reading room discount 20 per cent.

"Rudimental Divine Science" for the Blind In English Braille

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U.S.A.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U.S.A.

Letters of Appreciation

Many letters of appreciation of The Christian Science Monitor and other Christian Science activities are constantly being received. These letters express what these activities mean to different individuals in various occupations and pursuits. The favorable comment that has been received on those already published indicates that they are welcome and helpful; therefore others will be published under the above heading. Extracts from such letters follow:

AS a constant reader of The Christian Science Monitor I desire to express to you my appreciation of the editorials, which I believe are not excelled by any other paper or periodical. The historical articles are interesting and of great educational value; the exposition of all important national and international problems is just and illuminating. The public is fortunate in having a daily newspaper that so fearlessly exposes evil, recognizes the good, and always stands for Principle.

.

Te:

• 7

MY son, a boy thirteen years old, gave me a six months' subscription to The Christian Science Monitor; he also gave his grandma a six months' subcription. He earned the money selling morning papers, sent in the subscriptions, and surprised us. We think he could not have selected a better present.

I FIND the Monitor a wonderful inspiration, in fact it meets many needs during the day. Its information regarding every subject is so exact and to the point that it gives one the confidence in discussing various questions that he is on the right side. This is, of course, due to the fact that the information is truthful. I am grateful for the fact that I have often received healings in national and political questions through reading the Monitor. I find it a great benefit to have the Monitor both in the home and at the office and therefore am renewing my office subscription.

THOUGH mortal mind may say I cannot afford to do this, I know no student can afford not to have this daily manna. And until I can see the way to make a longer subscription, I am so grateful to be able to get it as the need at present brings it. What the Christian Science publications have been to me during the past five years could never be told in words.

THE CHRISTIAN SCIENCE MONITOR

An International Daily Newspaper

Published by

The Christian Science Publishing Society, Boston 17, U.S.A.

Sole Publishers of All Authorized Christian Science Literature

Written by MARY BAKER EDDY, Discoverer and Founder

of Christian Science and Author of its Textbook

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each \$3.00; twelve or more, each \$2.75. Ooze leather, vest pocket size, single copy \$3.00; twelve or more, each \$2.75. Morocco, vest pocket size, single copy \$3.50; twelve or more, each \$3.25. Full leather, etiff, beveled boards, gilt edges, same paper as in cloth birding, single copy \$4.00; twelve or more, each \$3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$5.00; twelve or more, each \$4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book), single copy \$6.00; twelve or more, each \$5.75. Cloth, single copy \$2.25; six or more, each \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; six or more, each \$3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy \$5.00; six or more, each \$4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy \$6.00; six or more, each \$5.50.

Christ and Christmas. An illustrated poem. Cloth, single copy \$3.00; six or more, each \$2.50. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Unity of Good and Other Writings. One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp. round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science versus Pantheism, Messages of 1900. 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Containing the By-laws of The Mother Church. Cloth, single copy \$1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy \$2.00; six or more, each \$1.75.

German Translation. Alternate pages of English and German.

Cloth, single copy \$1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library ecution, cloth, 95 pages, single copy \$1.00; six or more, each 75 cents.

Unity of Good. This book lays the ax at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy \$1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy \$1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, alias Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point, American Braille, and English Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Rudimental Divine Science and No and Yes. In one volume, French translation, with alternate pages of English, vest pocket size. Blue cloth, gray edges, single copy \$1.25; six er more, \$1.10; blue leather, gray edges, single copy \$2.00; six or more, \$1.75 each.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science versus Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy \$1.50; six or more, each \$1.15.

Christian Science versus Pantheism. Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more. each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, merbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents

This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy \$1.50; six or more, each \$1.25. Published also in morocco, limp, round corners, give edges, uniform in style with the pocket edition of Science and Health Single copy \$3.00; six or more, each \$2.75.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign. Address orders and make checks payable to

THE-CHRISTIAN-SCIENCE-PUBLISHING-SOCIETY BOSTON · U.S.A

Christian Science Literature

"Science and Health with Key to the Scriptures" and all other published writings of Mary Baker Eddy are listed on the outside back cover page of this Sentinel.

Christian Science Sentinel

Established, 1898, by Mary Baker Eddy. Published weekly, containing articles, editorials, and special current information regarding the Christian Science movement, also testimonies of healing. Subscription price, payable in advance, postpaid, to all countries: One year, \$3.00; six months, \$1.50; three months, 75 cents; single copy, 7 cents.

The Christian Science Journal

Founded, 1883, by Mary Baker Eddy. This monthly magazine is an official organ of The First Church of Christ, Scientist, Boston, Massachusetts. Contains articles, editorials, and testimonies of healing, a directory of Christian Science Churches, Societies, and Reading Rooms; also in the January, April, July, and October issues a list of Christian Science Practitioners and Nurses. Subscription price, payable in advance, postpaid to all countries: One year, \$3.00; six months, \$1.50; three months, 75 cents; single copy, 30 cents.

The Christian Science Quarterly

Founded, 1890, by Mary Baker Eddy. Published January, April. July, and October. Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. Printed in English, English-Dutch, and English-German. English edition published also in vest pocket size. Subscription price, payable in advance, postpaid, to all countries: One year, \$1.00; single copy, 25 cents.

The Christian Science Monitor

An International Daily Newspaper. Founded, 1908, by Mary Baker Eddy. Daily, except Sundays. Its own world-wide news service is supplemented by the service of the Associated Press and of the United Press Association. Complete in its departments; unique in its Home Forum page. Full page of editorials dealing truthfully and fearlessly with vital questions of the day. Subscription price, payable in advance, postpaid to all countries: One year, \$9.00; six months, \$4.50; three months, \$2.25; one month, 75 cents; single copy, 3 cents.

Le Héraut de Christian Science

Established, 1918. A periodical published monthly in French, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, postpaid to all countries: One year, \$2.00; six months, \$1.00; three months 50 cents; single copy, 20 cents.

Der Herold der Christian Science

Authorized, 1903, by Mary Baker Eddy. A periodical published monthly in German, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, postpaid to all countries: One year, \$2.00; six months, \$1.00; three months, 50 cents; single copy, 20 cents.

Subscriptions will begin with the next issue after the receipt of the order. Information regarding bound volumes of the weekly and monthly periodicals will be given upon request.

NUMBER 8

True Liberty

HAZEL ZIMMERMAN

TIBERTY, in its generally accepted sense, means freedom L from bondage or as a dictionary defines it, "the state or fact of being free . . . opposed to bondage." Through the study of the Scriptures, where the use of the word liberty is frequent, and through the thoughtful consideration of its spiritual significance as used by Mrs. Eddy in "Science and Health with Key to the Scriptures" liberty comes to have an entirely new meaning, one which brings to the earnest student of Christian Science a realization of the dominion that is the inevitable result of apprehending the true idea of liberty. Embracing as it does only that which is real, that which is of God, good, and rejecting that which is unreal, the counterfeit of good, true liberty must be infinite—that which is, now and forever. It must be always present, because being infinite it could never be absent. It must be complete, because nothing can be taken from or added to that which is infinite; and because infinity is never for a moment without its complete and perfect expression, man, it follows that man must reflect, express, and know all there is to know about true liberty. The ever presence of liberty having been established, the consciousness of its ever presence must be apparent to man now.

When Christ Jesus sent the seventy disciples about the Father's business he gave them this instruction: "Behold, I give unto you power to tread on serpents and scorpions, and over all the power of the enemy: and nothing shall by any means hurt you." Every one of the seventy had to make that instruction his own by proving the truth of it for himself before he could demonstrate that truth in the breaking of bonds for another. Doubtless patience, perseverance, and courage were requisite in the proving, but when the seventy returned from the scenes of their labors they came rejoicing in their knowledge that the Christidea, the demonstrable truth which they practiced, gave them dominion over every false belief that attempted to call itself a reality. By refusing to entertain it as consciousness they had proved the "power of the enemy" powerless-no power. Small wonder they rejoiced in the eternal truth they had established as a law of liberty for those unto whom they ministered.

It was James, one of the twelve loved disciples whom Jesus taught, who recognized liberty as a law of God, when he wrote in his epistle to the brethren, "But whoso looketh into the perfect law of liberty, and continueth therein, he being not a forgetful hearer, but a doer of the work, this man shall be blessed in his deed." James knew that he who would prove his God-given dominion must do so by his works, not words, and continue in those works according to the direction of Principle. In the measure that he proves Principle to be in all his affairs, in that measure is he demonstrating the perfect law of liberty; and he is blessed. How simple it is to recognize and apply this perfect law after we have listened for and heard the "still small voice"

of Principle. How logically it follows that obedience to Principle always blesses. Then James' admonition is that we should never neglect or delay taking the problem straight to Principle, that we should never forget to listen for the guidance of the "still small voice"-"being not a forgetful hearer, but a doer of the work." We must continue in (be constant in) our work of proving our right to liberty to be divine. Principle does not mean that we shall rest on the oars of one demonstration, while another more subtle form of evil may be preparing to draw our boat into the whirlpool of false belief, or force it against the rocks of self-satisfaction, or draw it into the stagnant waters of ease in matter. We need to be constantly alert to the responsibilities our right to the law of liberty involves and guard it zealously so that apathy may not trick us into sacrificing it. It is interesting to see how Paul's sense of liberty is stated in his concise metaphysical way, showing his knowledge of the operation of divine law in correcting the false belief of bondage. It is significant that he says, "Because the creature itself also shall be delivered from the bondage of corruption into the glorious liberty of the children of God." Because the false belief which would call itself "I"-the belief of life in matter-is proved to be the suppositional opposite of the only "I" there is, infinite Mind and its infinite manifestation, man is found to exist in the universe of God's creating as God's perfect and indestructible idea.

Again in Paul's declaration to the Corinthians he lays still greater stress upon the necessity of understanding liberty to be a part of the kingdom of heaven, when he acclaims, "Where the spirit of the Lord is, there is liberty." Since all true consciousness is God, and, being God, is all Life, all Truth, all Love, all power, and all presence, and cognizant of all the activity there is-this consciousness must of necessity be a law of complete annihilation to any belief in a power apart from God. Glorious liberty indeed! And now let us see what a comprehensive statement of true liberty is given on page 224 of Science and Health: "Truth brings the elements of liberty. On its banner is the soulinspired motto, 'Slavery is abolished.' The power of God brings deliverance to the captive. No power can withstand divine Love." Truth and liberty then are one, inseparable, complete. Where one is the other must be. Would it be possible to have the truth about mathematics in the fact that two times two is four without the resulting liberty from the belief that two times two was ever five? And does not this truth embody the freedom to prove that two times two billions must always be four billions? We must hold fast. then, to the Christ-idea—the understanding which beholds man in God's image and likeness, reflecting and expressing the perfect activity of his perfect Principle-if we would experience liberty. In the measure that perfection is held to as consciousness will it be manifested in outward conditions, circumstances, and surroundings. For it must follow that liberation from the suppositional opposite of God includes liberation from the suppositional opposite of good, in all its phases, and harmony in all things is established.

Copyright, 1920, by The Christian Science Publishing Society, Falmouth and St. Paul Streets, Boston, Massachusetts. Entered at Boston post office as second-class matter. Acceptance for mailing at a special rate of postage provided for in section 1103, Act of October 3, 1917, authorized on July 11, 1918.

Mrs. Eddy states the mission of Christian Science and the liberty it is bringing to the world to-day when she says (Science and Health, p. 227): "Christian Science raises the standard of liberty and cries: 'Follow me! Escape from the bondage of sickness, sin, and death!' Jesus marked out the way. Citizens of the world, accept the 'glorious liberty of the children of God,' and be free! This is your divine right."

Demand and Supply

FANNIE BAKER BONNER

A REAL remedy for the present condition in the world called "lack of supply" would be welcomed by every humane individual. The daily press names it variously as "lack of coal," "lack of houses and apartments," "lack of money," and in many European countries it is "lack of food" and of everything else generally.

David sang, in the thirty-fourth psalm, "They that seek the Lord shall not want [lack] any good thing." This shows us where our supply is, but how are we to obtain it? Instances are numerous in the Old Testament showing that God supplied the needs of His people. The Israelites were fed with daily supplies of manna when in the wilderness; God commanded the ravens and they fed Elijah. The feeding of the five thousand and the seven thousand by Jesus as recorded in the gospels shows that he knew the source of supply and also how to unlock the storehouse. He also showed that the source is spiritual although manifested in a practical way, a way the common people could understand.

Scholastic theology has always taught and is still trying to teach mankind to beg and plead with God to supply human necessities. Many of us have found that method lacking in results. But David in the verse quoted does not advise us to beg, but to "seek" the Lord. The word translated as seek is found to come from a Hebrew root meaning "to tread or frequent; usually to follow." Mary Baker Eddy named her textbook of Christian Science "Science and Health with Key to the Scriptures," and this key will unlock the meaning of this verse. In this textbook Mrs. Eddy tells us many times that human methods are a reversal of the divine. The old, human way was to beg God, expecting God to do all the supplying; man demanded, God supplied. David knew better than this. Consulting our textbook we find our remedy and also a reversal of human methods. On page 183 we find this: "Divine Mind rightly demands man's entire obedience, affection, and strength. No reservation is made for any lesser loyalty. Obedience to Truth gives man power and strength." We see at once that it is divine Mind, or God, that makes the demand, and obedience to this demand will bring the supply. Beginning on page 261 we read, "Good demands of man every hour, in which to work out the problem of being."

How many of us are meeting these demands of God even partially? Until an honest effort is made to comply with the demands of God, what right has one to expect, much less demand of God the needed supply? But the honest seeking to fulfill these righteous demands will inevitably bring one into a realization of the omnipotence and omnipresence of God. A realization of this even in a degree should bring results, and these results should be manifested to the human

sense as needed supply.

In the proportion that the demands of God are met, in that proportion should the supply, according to the need, be manifested. Of course it is well understood that just to read and study about the demands of God is not enough; the complying with the demands means living them, means ex-

pressing more honesty, integrity, faithfulness, industry, tolerance, patience, unselfishness, and love. Our revered Leader proved this problem, beginning with dire struggles and ending with the fullness of a completed work. Her example of consecration, of every hour given to God, is ever before us to inspire.

This problem of demand and supply is not necessarily already solved by the apparently rich man of to-day. It is one to be worked out individually sometime, somewhere, by every one. Until the man with plenty of material wealth has at least begun to fulfill the demands of God and is proving supply by obedience, he is a poor man indeed. In I John 2:17 are these words: "He that doeth the will of God abideth for ever." A less familiar translation is: "He that works out the purpose of God continues forever." In striving to fulfill the demands of God, or to "work out the purpose of God," we find the remedy for lack, and as we are "to continue forever" as a result, the sooner we awake to the necessity and begin the demonstration, the better.

Human Will Power Condemned

GEOFFREY HAMLYN

T is doubtful whether any one outside the ranks of the 1 Christian Science movement has any proper conception of what he is doing when he makes use of what is known as will power. He may fondly imagine that he is improving his mentality, but if he only knew the baneful effects of the use of human will power, he would take care to guard himself against it. What is a man doing when he makes use of human will power? He is declaring the reality, the power of a mind apart from God; he is building up the carnal mind's belief in itself, and since the carnal mind is, as Paul declared. "enmity against God," he is separating himself from God and from all that God stands for. "Error," writes Mrs. Eddy in "Science and Health with Key to the Scriptures" (p. 537), "excludes itself from harmony," and that is exactly what such a man is doing, for he is saying that some other mind than God, divine Principle, who is infinite Mind, has presence and power; he is breaking the First Commandment, "Thou shalt have no other gods before me."

Mind is God; but the Mind that is God is not a mind conscious of good and evil, but Spirit, which is "of purer eyes than to behold evil," and which, if evil formed any part of its consciousness, would have therein the seeds of destruction. There is in reality only the one self-existence, the one Mind which men call God, infinite, eternal, conscious of naught besides itself or unlike itself, and recognizing no reality in matter or evil. This Mind is the Principle of existence, it is Life, Truth, and Love, and its will is the only will, its law the only law, and man is its idea, its reflection. Consequently, it is only as the so-called human will gives way to the will of divine Principle that God's law, the law of love, the law of health and harmony, comes into operation in individual experience. "The power of the human will," writes Mrs. Eddy, on page 206 of Science and Health, "should be exercised only in subordination to Truth; else it will misguide the judgment and free the lower propensities. It is the province of spiritual sense to govern man. Material, erring, human thought acts injuriously both upon the body and through it."

How often does one see men who have been in the habit of exercising the human will in accordance with the promptings of the carnal mind, full of fear and in constant suffering, even though they may be men of high ideals, and what the world would call good men. How has this come about?

using. They have been building up their belief in the reality and power of the human mind, of the mind whose subjective If there state is matter, and consequently they have been building up their belief in matter, and the inevitable fear of matter Her eur and evil which goes with this belief. How are they to be is ever ; healed? There is only one way in which this can be done. It is useless to deal with effects and merely to address one's self to the removal of the particular discords which this day. It. aggravated belief in mortal mind and consequently in matter has occasioned. The moment one discordant belief has disappeared another may seem ready to take its place. The only sure method is given by Mrs. Eddy, beginning on page 185 of Science and Health: "A patient under the influence of mortal mind is healed only by removing the influence on him of this mind, by emptying his thought of the false stimulus and reaction of will-power and filling it with the divine energies of Truth. Christian Science destroys material beliefs through the understanding of Spirit, and the thoroughness of this work determines health." One of the greatest services which Christian Science is rendering to mankind is in laying bare the evil effects of mortal mind methods-will power, suggestion, mesmerism, and hypnotism-and in showing the way of release from their effects through the understanding of that Mind which is Spirit, which is perfect Love, for "perfect love casteth out fear."

God's Protection

MARY M. BEASLEY

WHEN studying the Old Testament we note God's protect-ing care for each and all of the prophets, as their realiza-SER GL p04€ ... tion was on the side of infinite God, showing that the power of Principle predominated then as now, that sin and disease were healed as the prophets understood that man's life was not in or of material outlining, and did not look upon man as a miserable sinner but as the invisible spiritual idea. On page 306 of "Miscellaneous Writings" Mrs. Eddy says: "When angels visit us, we do not hear the rustle of wings, nor feel the feathery touch of the breast of a dove; but we know their presence by the love they create in our hearts. Oh, may you feel this touch,—it is not the clasping of hands, nor a loved person present; it is more than this: it is a spiritual idea that lights your path!" and this idea is the perfect love that casts out all fear and fortifies us with the truth

As we read the life of David we find how fearless he was and yet how obedient to the still, small voice of Truth, with his unlimited faith in God's protecting power, when he offered himself to Saul to fight the champion Goliath, whom the whole army of Israel feared and dreaded: "Let no man's heart fail because of him [Goliath]," David said to the king; "thy servant will go and fight with this Philistine." Saul was afraid, for David was only a youth and Goliath a trained soldier, but David had had untold experience of Gal's protection, and his faith was unbounded. Refusing the heavy armor that was offered him for protection, because he had not proved it, he simply took his sling and a few small stones, knowing that the same power that protected him from the lion and bear would protect him from this Goliath. Was it any wonder that the childlike courage, trust, and confidence of David won the battle for the Israthes? So we as Christian Scientists must go out equipped to face the Goliath of sin and disease without the matetial accompaniments, but with the assurance of our understanding that God never created sin or disease, and that our understanding of Principle will aid us in our work of prov-

ing their unreality. On page 210 of Miscellany we find this admonition from Mrs. Eddy: "Beloved Christian Scientists, keep your minds so filled with Truth and Love that sin, disease, and death cannot enter them." We must separate in our thoughts the tares from the wheat, the material from the spiritual, then we shall hear the bugle call for action, the activity of the sons of God, by making our Science practical, proving daily in every walk of life the allness of God. Jesus the Christ came in meekness to show us the narrow way that leads to the understanding of Truth, teaching that the kingdom of God is at hand, here and now, and to awaken out of the sleep of supposed life in matter.

Never lived there a man so unselfish and honest. When he said, "I can of mine own self do nothing," and, "The Father that dwelleth in me, he docth the works," he showed his oneness with the Father. Then again, he said, "Why callest thou me good? there is none good but one, that is, God," making us see clearly that it was the active thought of good that did the work, and not his material self. He was always teaching in parables by the wayside that it was Principle that did the healing. So to-day we must rejoice in giving out our gratitude, for that same Principle is here forever sustaining and guiding man. The life of our beloved Leader stands out as a monument of strength and of untiring activity and patience for the good of all humanity, and through her courage and obedience she became the transparency for the healing of sin and disease which is the establishment of Christian Science to-day. Although trials and tribulations faced her on every side, she never wavered, knowing the power of God, and through her life of consecration she has given us the teaching of Christian Science with its command to heal the sick and sinning. As we reflect the understanding of Principle, suffering humanity will seek the Christ, Truth, and find healing.

So we, like David, must learn that our armor is the purification of our thoughts in reflecting Truth. We know that unselfish activity is the strength of progress, and progress is vitally necessary to Christian Scientists. As the individual rises above every condition that is opposed to God he receives the strength and assurance of his oneness with The same protecting power that was with the prophets, with Jesus and his disciples, and with our Leader, is the one and same Principle available to all who understand and rely upon the truth.

Man Is Spiritual and Immortal

LEVI N. BLYDENBURGH

UNSATISFIED desire has been the constant companion of manking along with of mankind along with any sense of need. That such desire exists is prophetic of the progress and development of the divine idea expressed in the spiritual and immortal life of man. Busy with the object lessons of the material seeming, limited by the horizon of physical sense, one needs to understand the reason why Jesus said, "Ye must be born again." Born—that is, awakened to the truth expressed by Mrs. Eddy in the last words of the scientific statement of being, "Therefore man is not material; he is spiritual" (Science and Health, p. 468). The physical sense that would limit the existence of a man by months and years is fatal to progress, suppresses action, and seemingly blights every budding hope that awakens in the thought of mankind. What a blessing comes with the realization that man is spiritual. The bonds of limitation are broken, the physical horizon is lost in the sense of infinity, and the spirit of the Scriptures, "Eye hath not seen, nor ear heard, neither have

entered into the heart of man, the things which God hath prepared for them that love him," comes like a refreshing draught, stimulating and strengthening one and demonstrating, in natural development, the image and likeness of God.

The mission of Jesus was to rescue man from sickness, sin, and fear of that called "the last enemy," the overcoming of which he accomplished. His reply to the question of John the Baptist clearly defines the work of salvation as understood by Jesus. John asked, "Art thou he that should come, or do we look for another?" Jesus answered, "Go and shew John again those things which ye do hear and see: The blind receive their sight, and the lame walk, the lepers are cleansed, and the deaf hear, the dead are raised up, and the poor have the gospel preached to them." What is that gospel? Its basic fact is stated in the lines already quoted from the scientific statement of being, "Therefore man is not material; he is spiritual." It voices in the teaching of Jesus the doctrine of infinite good and the demonstration of perfect Love. In the gospel of John, from the thirteenth to the seventeenth chapters inclusive, we find the last discourse of Christ Jesus to his disciples before the supreme sacrifice and the final demonstration of victory over death. This is the Christ that the Christian church of all creeds and denominations professes to follow—the same Christ Jesus who said, "Thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy mind. This is the first and great commandment. And the second is like unto it, Thou shalt love thy neighbour as thyself." The Master. after celebrating the Passover, while crossing the brook of Cedron and in the garden, beheld with prophetic vision the results of disobedience to the law of Love by men and nations. It is for us to remember another saying of Jesus, "Woe unto the world because of offences! for it must needs be that offences come; but woe to that man by whom the offence cometh!"

Divine Principle and law under the law of cause and effect are self-enforcing, and punishment comes as a natural effect of the error in thought and deed. Divine Love is expressed in cooperation and in unselfishness and in the law of right action. Competition is a form of strife and war differing in degree from the simplest rivalry to brutal and destructive antagonism. The spirit of Love is mankind's only deliverer; it alone develops the spirit and purpose of salvation and goes to the cross with the thought, "Father, forgive them; for they know not what they do."

Ever Varied Opportunity

HELEN E. BRIGGS

CHRISTIAN SCIENCE is continually revealing to man the truth of the Bible, which always seemed so obscure and which teemed with mystery beyond our solution until we found that "Science and Health with Key to the Scriptures" by Mary Baker Eddy is truly what she proclaimed it to be—a "key" to the Scriptures. With the understanding of Truth as we progress in Christian Science, we find that God's message, which is changeless good, is and will always be applicable to this age and to all ages to come. In Genesis we read, "And God saw every thing that he had made, and, behold, it was very good." We naturally infer that, since God made all, He is the one and only creator, and the manifestation of His word stands as effect from this one and only cause; hence good is all.

Since God is good and all He created is good, we ask: "Why evil? From whence did it come?" Our only answer to this question is to find out more about God; and the

more we know of good the less we know of evil, and we then begin to realize that evil never had a place in the kingdom of God and is only the suppositional opposite of good. A diligent search to find a cause or reason for evil will never help us to make any headway in seeking God, for evil has no history. Good is the only history there is, and a careful study of God and His creation will usher us into the kingdom of heaven on earth and annihilate the beliefs of evil.

The mist which rose up "and watered the whole face of the ground" is the error or false sense which seems to separate us from God; but when we rise above this mist, or illusion, we get a clearer vision of Truth and this light guides us and frees us from the delusion of sickness, sin, and death. To learn the nothingness and unreality of the claims of evil is the only way to make any progress in casting off "the old man with his deeds" and putting on "the new man, which is renewed in knowledge after the image of him that created him." Mrs. Eddy says (Science and Health, p. 254), "Imperfect mortals grasp the ultimate of spiritual perfection slowly; but to begin aright and to continue the strife of demonstrating the great problem of being, is doing much."

On beginning the study of Christian Science the writer found that "man's extremity is God's opportunity," and since being able to prove this in one instance it has been more possible in each succeeding problem. One of the many blessings that come to us in Christian Science is the knowledge that opportunity is an ever present fact, because it is the presence of the one Mind which knows no limitation. So often we hear it said, "I have lost my opportunity," and with this declaration comes the thought that it is useless to try again. No good effort is ever lost, and certainly man cannot be separated from God's loving care, provision, and protection at any time or under any condition. God's changeless law protects us in spite of the countless forms of error which besiege us along the way. The suggestion that a man has failed and in consequence cannot lift himself above the limitations which mortal belief claims must follow, is not true, since the only man there is reflects God wholly, absolutely, and he is always in God's exalted presence-which is limitless opportunity.

In knowing this truth we find that we are willing to let God's will be done and not arrange or outline our problems. Outlining is limiting, and when we realize the truth in place of it, we know the infinite resource of Soul for the blessing of all. To gain an understanding of how to handle the myriad suggestions of error, a careful study of the way given by our Leader on page 242 of "The First Church of Christ, Scientist, and Miscellany" is most helpful: "Unless you fully perceive that you are the child of God, hence perfect, you have no Principle to demonstrate and no rule for its demonstration." An instant denial of the claim of any error, no matter how trivial it may seem, followed by a clear statement of truth will always heal. We usually rise to meet a problem which we think serious, but what are called little things are often overlooked or put to one side as not worth noticing; but these are the "little foxes" of which we must be watchful. After trying various ways to work out our problems of living and finding little satisfaction or result, we turn to Christian Science and prove it to be the only way. We must be willing to set aside our material beliefs and ways and accept that Mind which was expressed in Christ Jesus, and to be willing to obey his command, "Thou shalt love thy neighbour as thyself."

Mental laziness is probably one of the most troublesome diseases which confront us. The many and varying arguments set forth, such as lack of time, inability to reason

carefully, fear, and many other suggestions are the subtle errors which would deprive us of the privilege of doing our daily mental work, which is most necessary for our growth and protection. How wonderfully we are helped when we dutifully study all of our Leader's writings, for she carefully leads the way by giving us her loving guidance and instruction. In Article VIII, Section 6, of The Mother Church Manual, we find, "It shall be the duty of every member of this Church to defend himself daily against aggressive mental suggestion, and not be made to forget nor to neglect his duty to God, to his Leader, and to mankind." We may often rebel at the trials which beset us, but we are beginning to learn that, as Mrs. Eddy says (Science and Health, p. 66), "trials are proofs of God's care," and when we have overcome error by proving the truth through our understanding of and adherence to divine Principle, God's care becomes apparent to us and we rejoice and are grateful rather than discouraged because of these experiences.

During the time before the advent of Christian Science into our lives, when sorrow, disagreements, financial difficulties, and the many harassing suggestions of our daily living may have seemed present, we had no solution for these troubles but to bear them and overcome them the best way possible under the conditions. Sometimes we were told that it was the will of God, and felt that we might be weighted with these troubles forever, or until some change of luck might chance to occur. These oppressions cease when we learn how to apply the Principle of living and know immediately a problem is presented that the answer is inseparable from the problem and is always perfect.

Since problem and its answer, cause and effect, demand and supply, are spiritual they are also inseparable, and to declare the nothingness of error and the allness of God brings into our experience freedom from the beliefs of mortal mind and a full reflection of the qualities of divine Mind, —joy, courage, strength, true riches, "the peace of God, which passeth all understanding." On page 150 of Miscellany Mrs. Eddy says, "A heart touched and hallowed by one chord of Christian Science, can accomplish the full scale; but this heart must be honest and in earnest and never weary of struggling to be perfect—to reflect the divine Life, Truth, and Love."

Abundance

MARY E. ARMSTRONG

If we carefully examine the reason for the world unrest of to-day, especially the manifestation of labor strikes, we must unmistakably trace it all to one source, lack or the feat of lack, and all because of the belief that money is substance,—whereas the only possible lack there is, or can be, is lack of the understanding of God. As Christian Scientists we are commanded to go "into all the world, and preach the gospel to every creature," and to "heal the sick." Lack is a very sick belief, the thought of limiting God. Here, then, is work we all can do; but before we can heal the world we must heal every trace of lack suggesting itself as our own consciousness, and obey the command, "Physician, heal thyself," before we can help others.

Since God is true substance and is omnipresent, then what and where is lack? Lack and the allness of God are incompatible. If all is Mind, then our supply must be in Mind. If God is infinite Mind and man is the idea in that Mind, then nothing and no one can limit or control the amount or quality of our thinking or prevent us thinking infinitely and perfectly. In "Science and Health with Key to the Scriptures" Mrs. Eddy says (p. 13), "Love is impar-

tial and universal in its adaptation and bestowals." This shows us clearly that our abundance or poverty all depends upon our own reliance on the one loving, divine Principle.

Right thinking or thinking in accord with Christian Science, reflecting God infinitely, is the most profitable business that one can be engaged in, and the one that brings quickest and surest returns. If our right thinking is abundant we shall manifest abundance. Abundance and infinity are qualities of God and are to be reflected by man in his thinking, which is the only way we can reflect them. Then they manifest themselves outwardly in abundant supply for every human need. But we must be quite sure that our thinking is in accord with Christian Science practice and with what we are taught in our textbook. Mrs. Eddy tells us on page 258 of Science and Health that "man reflects infinity, and this reflection is the true idea of God." Lack is not a quality of God, so that if we are manifesting lack we are not reflecting God. In a beautiful passage on page 3 we read, "The Divine Being must be reflected by man,—else man is not the image and likeness of the patient, tender, and true, the One 'altogether lovely;' but to understand God is the work of eternity, and demands absolute consecration of thought, energy, and desire." Perfection lacks nothing; therefore we see that abundance is not a question of material income but a question of abundant and perfect thinking. Jesus everywhere denounces material riches founded on material thinking. As students of Christian Science, we never have any excuse for manifesting lack. Mrs. Eddy's works are full of help on this question, and if with the concordances we look up the words "need" and "supply" we shall never have any doubt as to the source of all supply.

In every case, we have to be very careful never to interfere with the demonstrations of others. If we see another manifesting abundance through his higher understanding of Principle and demonstration in Christian Science, let us praise God and thus help him still more. Neither should we bind another down with the belief of poverty. Poverty is not in accord with Principle, while abundance is, as Jesus manifested in feeding the five thousand. And if we would really help the world, let us banish from our thoughts and conversation all mortal mind beliefs of lack and express only God's thoughts of abundance. Lack is the lie and abundance is the truth; and if we remember that every time we use mortal mind thoughts and expressions, we to that extent seemingly forfeit our own dearest possession, our spiritual understanding of being, then we shall be more careful. Let us therefore talk scientifically and heal the world of lack by understanding abundance. If we hear another voicing lack we can always know the spiritual fact. This thought may be the means of bringing many to Christian Science for healing, until "the earth shall be full of the knowledge of the Lord, as the waters cover the sea."

[Written for the Sentinel]

Along the Way

ADRIENNE BARTO

MAKE straight His road so interlaced,
So covered o'er with self;
Let me but see amid the gloom
The vision of Thyself,
So lowly sweet
That, in the seeing, I may grasp
Something of love to help me pass
Undaunted on my way.

Protection

THE Bible is full of promises of the protection of the righteous man by God. The history of mankind, nevertheless, from the earliest recorded time down to to-day, is the story of a belief in, or at any rate of fear of, the dominion of good by evil. The professing Christian world is desirous of nothing so much as this protection. Yet the fact remains that it is just this protection that the average man is doubtful of receiving. So strong, indeed, is his doubt, that he has formulated his distrust in a series of sayings which commonly begin with the words, "It does not pay," and end with an expression of one of the virtues, such as "to be good" or "to tell the truth." Now if any one is going to define payment as a mere sensuous return for obedience to Principle, the reasoning of the world is likely to prove extremely accurate. "It is quite as impossible," Mrs. Eddy writes on page 36 of Science and Health, "for sinners to receive their full punishment this side of the grave as for the world to bestow on the righteous their full reward." If, that is to say, a man is going to weigh the kingdom of heaven against the two talents of silver and two changes of raiment Gehazi received for his lie, he had probably better avoid the truth, but if he will be satisfied with "the peace of God, which passeth all understanding" as payment, then he may possibly change his mind, and come to grasp the meaning of another of those sayings of the wise men who wrote the Bible, to the effect that "because thou hast made the Lord, which is my refuge, even the most High, thy habitation; there shall no evil befall thee, neither shall any plague come nigh thy dwelling."

What all this very simply means, though the world seems to have some difficulty in grasping it, is that you cannot separate cause and effect, or divine Principle from its reflection. There is nothing whatever haphazard in the proceeding. It is a purely scientific process in which "is no variableness, neither shadow of turning." Strict adherence to Principle brings, and must bring every time, a harmonious result. But an apparent obedience to Principle, with the intent of receiving a material reward, is not following Principle at all. It is, after the manner of Gehazi, following the chariot of Naaman, and, verily, those who attempt it will have their reward,—first, the silver and the raiment, but afterwards, the leprosy. For, as Paul told the foolish Galatians, "Be not deceived; God is not mocked: for whatsoever a man soweth, that shall he also reap."

It is this reaping, whether of the wheat or of the tares, from which no one can escape. The skeptic is incredulous, the Gallio goes his way all unconcerned, even the earnest believer is filled with doubts. But this is because the world in general persists in divorcing Science from religion, and so comes, full of doubts, to the, to it, mystery of the miracle, and thus forfeits the privilege of comprehending the miracle as the supremely natural expression of divine law. But this

so-called miracle is itself nothing but the demonstration of the omnipotence of Principle, is a man's protection against the myriad claims of supposititious evil, and of his ability to master matter through an understanding of its unreality. When Jesus fed the multitudes in the wilderness, he proved two things. First, that matter had no objective reality, but was simply the subjective condition of the human mind, and, second, that this human mind was itself only a counterfeit of divine Mind, a lie about Principle.

Now a lie is a mere negation, as Mrs. Eddy writes on page 32 of "No and Yes," where she says: "A lie is a negation,—alias nothing, or the opposite of something. Good is great and real." What this means is, of course, extremely simple. It is that every material thought or its externalized phenomenon is a lie about man, divine creation, the full image and likeness of God; and that this being so, it is nothing. The question, then, which a man has to ask himself is, Does he need protection against nothing? Speaking absolutely he certainly does not; but then it must be remembered that, in absolute Science, and there is no other, man is the image and likeness of God, Principle, and is "born, not of blood, nor of the will of the flesh, nor of the will of man, but of God." The man born of the flesh, in other words the lie of a liar, is mesmerized by the lie of material birth, and does need protection against it, and this protection he finds in the discovery that a lie, as Christ Jesus says, abides not in the truth; is, as Mrs. Eddy, following Jesus' teaching, points out, a negation, nothing.

A man, then, who wishes to protect himself against the claims of evil is not forced, as Hamlet imagined he was, "to take arms against a sea of troubles," and so run the risk of being overwhelmed by the very multiplicity of his opponents. He has only to realize that everything unlike Principle, God, is a lie, and that the way to combat this lie, in whatever guise it presents itself, is through the understanding of Truth. That is why Jesus said, "If ye continue in my word, then are ye my disciples indeed; and ye shall know the truth, and the truth shall make you free." This knowledge of the truth is the ability to judge righteous judgment, to judge, that is to say, between truth and error, so as to separate the truth from the lie. For, as Mrs. Eddy writes, on page 17 of "Unity of Good": "A lie has only one chance of successful deception,-to be accounted true. Evil seeks to fasten all error upon God, and so make the lie seem part of eternal Truth."

Protection, then, obviously consists in a man's so developing his power of righteous judgment as to be able to separate Truth from error, and so free himself from the mesmerism of matter. This he can only do by simultaneously mastering the teaching of divine metaphysics, and subjecting that mastery to the test of practice: "Only through radical reliance on Truth," Mrs. Eddy says on page 167 of Science and Health, "can scientific healing power be realized." A man must begin, therefore, by acquiring a reason for the hope that is in him. Fortunately, however, this reason is not contained in some tremendously complicated system, such as any of those of the schools of human metaphysics, but in the simple postulate of divine metaphysics set forth on page 468 of Science and Health: "There is no life, truth, intelligence, nor substance in matter. All is infinite Mind and its infinite manifestation, for God is All-in-all." In other words, nothing exists really but God and man, Mind and its idea, Principle and its reflection, Spirit and its creation, and, consequently, every material manifestation which claims, in any way, to add to or to counterfeit these, is a lie about God and man. "Literature and languages"

AFTER one has begun the study of Christian Science, one often finds, scattered here and there in the profusion of modem literature, sentences and phrases which seem to be in accord with the Principle of divine metaphysics. Yet in general reading of the work of those who have known nothing of Christian Science, such a one is usually bringing his own understanding of Principle to bear on what he reads, and thus finding a richer meaning than the various writers probably intended. In other words, one is prone to read into general literature the infinite significance of Principle, of which many modern writers have been largely ignorant. Not for that reason, however, should one necessarily desist from the consideration of what are regarded as the better books of the world. On this point Mrs. Eddy once wrote (Miscellaneous Writings, p. 64), "Literature and languages. to a limited extent, are aids to a student of the Bible and of Christian Science."

In her own works, Mrs. Eddy alludes to and quotes from many well-known authors. With her keen discernment of what is essential, she selected her quotations and arranged them in the course of her explanations in such a way as to show the unfolding application of whatever has been rightly said. Her high estimate of true scholarship and literary ability was unmixed, however, with any approval of mere scholasticism or emotionalism. Simply because she refers to various writers, both ancient and modern, is no reason for any intensive study of these celebrities and their work. Just how much each one is to study of either languages or literature is for each one to decide for himself, in accord with individual discernment of Principle. The study of the ordinary mortal literature can serve only to give one a survey of mortal thoughts and feelings, unless one consistently replaces in it all every false sense of things with the true idea. Such a process of replacement requires, of course, unbounded alertness, whether one is perusing so-called masterpieces of literature or encountering the incidents of daily

The one collection of literature which always deserves unremitting study is that group of books, in a variety of forms of prose and verse, which we call the Bible. Each one who feels the need of broadening study, and believes himself or herself at a loss as to just what course to pursue, will invariably be encouraged and invigorated by more diligent searching of the Scriptures themselves. For such a searching one does not require any elaborate critical apparatus. The average student should go to work as simply as possible, with a good, complete concordance, and Mrs. Eddy's works. The comparison of similar or even dissimilar passages gives one endless occupation, which is not merely intellectual but actually healing in its unfoldment. The arrangement of passages in the Lesson-Sermons published in The Christian Science Quarterly provides for such a comparison in a way for which no other method is a substitute. In addition to the thorough and orderly study of the Lesson-Sermons, each one will find immense profit in extensive consideration of all the literature included in the

In order to be benefited by the reading of general literature, essays, biographies, poetry, and so on, one needs always to contemplate it in the light of divine Principle. The limitation of even what may be thought of as the best human literature is that the glimpses it affords of Principle are fragmentary. Every glimmer is, nevertheless, an opportunity for one to know the fullness of Truth for himself,

and thus to prove the unfoldment of good straight from the divine source. Though various human philosophers, including some writers of imaginative literature, have used on occasion some of the same phraseology which Mrs. Eddy employed, the fact is that none of them have clearly shown and demonstrated that infinite divine Mind with its spiritual expression alone is real, and the sole healing force. As Mrs. Eddy says on page 116 of Science and Health: "Works on metaphysics leave the grand point untouched. They never crown the power of Mind as the Messiah, nor do they carry the day against physical enemies,—even to the extinction of all belief in matter, evil, disease, and death,—nor insist upon the fact that God is all, therefore that matter is nothing beyond an image in mortal mind."

The difference between the value of general literature and that of correct literature on the subject of Christian Science is due to this fact which Mrs. Eddy has explained. A casual glimpse of the truth is quite different from a deliberate declaration of the healing truth, understood because of scientific reliance on absolute Principle. Nevertheless, language which can be used to state Principle is not limited to any human sense of things. True expression constantly unfolds. The test of the correctness of literary expression, as understood in Christian Science, lies in each one's demonstration of every statement which he understands, in accord with infinite divine intelligence. In all reading, one really has to know that divine intelligence is all that can truly express itself. As one knows this, one finds Principle expressed in just the right way. There always has to be intelligent reading as well as intelligent writing. Even if a statement does not seem quite clear to a reader, it is always one's privilege to know that the divine Mind gives one perfect comprehension of Truth, in place of any belief in confusion. In proportion as reader and writer both turn together to the true source of wisdom, the infinite divine meaning is manifest to all. The student of Christian Science is entitled to bring to bear his understanding of divine Love on all that he does, whether it be the reading of classic literature or the study of divine metaphysics. In every circumstance, each one should take the broadest possible point of view, knowing that the one true consciousness is conscious of perfect expression. GUSTAVUS S. PAINE.

[Written for the Sentinel]

Awake Thou

BERTHA TRABAND MYERS

DOTH thy way seem lonely, tired heart, Thy way seem far from other men apart, No friendly far out-reaching hand, No one near to understand Thy hopes, the good that thou wouldst know? Then, tired heart, arise and go With friendly hand outstretched and give Thy very best unto each passer-by, and live So close to God that thou canst see Just what thy God would have thee be. Step from thy garment of self-pity old,-Live thou the sweetest story told. Forget thyself, thy lonely way, Give unto thy God each newborn day; Lend not to error's seeming power One moment of God's holy hour, Listen only for thy Father's voice; Awake thou! And rejoice! Rejoice!

...

Testimonies of Healing

So many cases of poverty need healing to-day, so many are looking for work and supply, that one little experience of mine may be helpful to some one. The problem of supply has confronted me several times since I started out alone in the world just eleven years ago, with but one hundred and eighty dollars left after paying my traveling expenses and freight bills, for I had to move from one city to another. I took a small apartment at twenty-three dollars a month. I never knew just where the money was coming from, but I let one room, and some other work and a great deal of embroidering gave me the necessary supply.

One evening I discovered, however, that I had but a nickel left besides the rent money, which I had put aside and which was due the next day. Great was the temptation to spend that nickel for a loaf of bread, for there was none in the house, but it was Wednesday night and I must go to church. It would be almost impossible for me to walk both ways, for the church was nearly two miles away, and I had to pass through a dark manufacturing part of the city, where it was hardly pleasant to walk alone late at night. Then, too, it was a cold, rainy day in March, with snow and slush in abundance. I decided to walk to church, and ride back, and trust divine Love to get me a loaf of bread. Had I not just been reading, "For thy Maker is thine husband; the Lord of hosts is his name"? Was He not better able and quite as willing to support and supply me as any mortal sense of husband would be? I arrived at the church early, and held fast my nickel, happy and undisturbed by fear. After the service quite a number of ladies whom I knew boarded the homeward bound car with me, and one of them insisted on paying my fare. She remarked that I was always so happy and jolly that she wondered if I had ever known what trouble meant. Trouble had sent me out into the world alone, but I resolved, then and there, that I would always try to be happy and jolly, regardless of an empty purse or an empty larder. So I still had my nickel, and in the morning I went out bright and early for my bread.

Soon the postman came, and among other letters was one registered, and upon opening it I read these three words: "From a friend," and inclosed was a ten-dollar bill. It was nearly a year before I found out where that letter came from. The next day there came a check for fifty dollars, which I never expected to get. Then more work of various kinds, and I felt that I would like a better apartment. I took one, and there I stayed for a year and a half, and never once in all this time did I fail to have the rent ready when due. At the end of that time I felt that I would like a still better apartment, so rented one for fifty dollars a month. Two very small legacies helped, and I went West, where I lived for over six years. Divine Love has been very real to me, for in all these years I have had all my actual needs met. My faith and patience have been sorely tried at times, but my heavenly Father has never failed me. As Mrs. Eddy says, "To those leaning on the sustaining infinite, to-day is big with blessings" (Science and Health, Pref., p. vii). This is the only sure and safe way. And I hear the words over and over again: "All that I have is thine."

(Mrs.) VIOLET B. SANBORN, Brookline, Mass.

For one made happy in every way through Christian Science, it is hard to pick out one thing that stands above another in the treasure house of blessings, so first I will express my gratitude for the completeness of the healing. It

is touching everything for me with transforming, beautifying power. Before I began to study Christian Science I had no hope that I or any one else could solve any life problem. I had no faith in God or man, and faith in myself was many times a minus quantity. Only those who have passed through that condition of thought can know the joy of the abiding surety that the healing Principle is. Even in the depths of suffering, or when discouragement darkens the vision, there is always the conviction that the problem is solvable.

The blessing of physical healing has come to me through Christian Science; but I know that if the change had been only physical I would not have the joy of gratitude I now have, for when I found Christian Science I did not know how to be grateful. The first physical healing came through reading the textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy. That was a healing of constipation that had bothered me all the years I could remember. More slowly, yet just as surely, came relief from other ailments incident to that condition, among them indigestion, gastritis, hemorrhoids, and sick headaches. That first healing was more than six years ago, and since then the material remedies to which I had previously resorted almost every day for many years have not been used once. The healing efficacy of Christian Science has been proved for me many times since then, in overcoming acute stomach trouble, tonsillitis, grippe, rheumatism, influenza, and other discordant conditions.

(Mrs.) Essie W. Morris, Long Beach, Calif.

4

With a grateful heart I wish to testify to the help received in Christian Science. For twenty years I suffered periodically from severe articular rheumatism, which appeared with great severity every three or four years, lasting for months at a time and in 1914 lasting eight months. During the illness heart trouble also became manifest, and the use of mineral waters did not effect the slightest results. The trouble reappeared suddenly last November, and all medical skill, as usual, was of no avail. In January, 1920, I heard of Christian Science, read several copies of Der Herold, gained confidence in this teaching, and went to a practitioner, who treated me. After several weeks' treatment I was restored and was able to resume my duties once more. The reading of "Science and Health with Key to the Scriptures" by Mary Baker Eddy has also brought many blessings to my family and myself. I am grateful to God and to all those who helped me to understand this healing truth.

FRITZ ACKERMEIER, Bielefeld, Germany.

>

I wish to give testimony to the healing power of divine Mind as taught in Christian Science. In the year 1917 a friend, knowing the physical condition I was in, asked me to try Christian Science. I was invited to go to a lecture, and I was much interested in what I heard. The following Wednesday I went to a testimony meeting and was healed the same night of the habit of dieting to which I had been tied down for two years, and this gave me encouragement, but I had to be healed of many more things. Science and Health was lent to me and I was amazed at thoughts it revealed to me. I made the declaration that if Christian Science could not heal me, nothing else could.

At that time I was suffering from what the doctors called Bright's disease and rheumatism and had been for over four years. I spent most of my time in bed and in convalescent homes, and was unable to do my work. After studying the

tertbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, for about two months I was unable to grasp the meaning of "minds," so I asked help from a practitioner, and the next morning the truth was revealed to me that there is but one God, one Mind, one Life. This one Mind anchored my attention, my thought was uplifted, and at once all pain left me, and I knew I was healed. I got up from my bed to which I had to be carried the night before. That was the healing of rheumatism. Bright's disease still clung to me, owing to a certain symptom the doctor told me to notice. Again help was lovingly given by the same practitioner, and the error was immediately uncovered, and I was able to go to business the following morning. That is now nearly three years ago, and I am grateful to say I have enjoyed good health ever since.

I am grateful to God for these healings, also to Mrs. Eddy for the beautiful thoughts expressed in her textbook, and my desire is to know more of this truth that makes man free, also to help others as I have been helped.

HARRY BOOTH, Halifax, Yorkshire, England.

4

I have long been reading the many fine and helpful testimonies in the Journal and the Sentinel, and in every instance have been helped in some way. I now wish to add my testimony, which may be of help to some one. The fact that I am strong and healthy I attribute solely to Christian Science. Six years ago I was in a very deplorable condition mentally and physically. I have been healed of torn kidneys, heart trouble, hemorrhoids, and extreme nervousness. I had also worn glasses for sixteen years, and have been able to lay them aside. Last winter I fell on the ice and struck the back of my head so forcibly it threw that portion of the thyroid cartilage called "Adam's apple" out of place so that it was enlarged to about the size of a hen's egg, but the truth has never failed me, and by faithfully applying it I was perfectly healed in a week's time. I have seen blind fistula of thirty-five years' duration healed, and a paralyzed tongue and many other ailments overcome in my family. I am truly thankful to God for all my blessings and grateful indeed to our revered Leader, Mrs. Eddy, for the spiritual understanding that has come to me through her consecrated and loving work for all mankind.

(Mrs.) CHRISTINE CHRISTENSEN, Red Bank, N. J.

+

The study of Christian Science was taken up about three years ago, apparently through curiosity. That was not because my need was not great but because I did not at that time connect Christian Science with my needs. Almost immediate relief from various chronic ailments followed; the most pronounced were constipation, indigestion, bronchial difficulty, weak lungs, and extreme nervousness. For all of these I had doctored for years and had reached the point where the doctor said medicine could not help me; it never had afforded any but temporary relief. Then came the desire to tell every one what a wonderful thing Christian Science is. Many beginners have doubtless had that same lesson to learn and I soon realized that my understanding was as yet insufficient to meet the arguments of the so-called mortal mind. My first exalted state disappeared; but I had gained a glimpse of Truth which enabled me to hold fast the little understanding I possessed.

My blessings have indeed been many and though never before in my experience has so much error been presented to me, neither has there ever been so much cause for gratitude. The freedom from fear and worry have meant so much and the daily increasing ability to know that "with God all things are possible" is making smooth many of the rough places. The interest in Science shown by my husband has indeed been a source of joy, and our little daughter, brought up in Science, is a veritable sunbeam in our home. When she was born a most beautiful demonstration was made,—a painless birth,—and that under what seemed very unfavorable conditions.

The literature has been of so much assistance, a real haven of rest in this day of sensationalism. My gratitude to God for His goodness and for the noble, earnest efforts of Mrs. Eddy can only be truly expressed by living the teachings of the truth.—(Mrs.) W. L. Breslich, Elgin, Ill.

Christian Science is indeed the greatest blessing that can come into the life of a human being. I did not seek this religion for physical healing but because my previous faith had seemed so unsatisfying and had failed to comfort when comfort was most needed. There had been in my family so much of sickness and suffering which the kindest and ablest physicians had been powerless to relieve, that I felt if God was all-powerful as the Bible said, and sent or even permitted such torture to His children, I wanted nothing to do

with Him. Life seemed just a series of calamities. I had tried to read Science and Health to please a dear relative. My thought evidently was not ready, for I didn't grasp its wonderful message. Finally I met an earnest Christian Scientist who, seeing my need, invited me to attend church and very patiently helped me to understand what Christian Science really is. It seemed too good to be true. I was wearing glasses which I had thought necessary for some time. A new pair, stronger than any previously used, had just been fitted by a leading specialist of one of our large cities. He said I should not leave them off for a moment, but I did take them off in less than two months and have never needed them since, even though I have used my eyes more than ever. Heavy colds, coughs, weariness, lumbago, and influenza are a few of the ills which have been healed for me by Christian Science. I have seen diphtheritic throat, pneumonia, erysipelas, and other so-called serious diseases yield to the power of Truth, in some instances almost instantaneously.

While more than grateful for harmonious physical conditions, the spiritual awakening is the real healing. It is wonderful to know and prove that God is good and sends only good to His children, lovingly supplying their every need. To be freed from fear and unlovely traits of character is better than silver and gold. Even while much remains to be overcome, the knowledge that ultimately everything unlike God must vanish into its native nothingness, is cause for rejoicing. What can one want more than to know there is Principle, the understanding of which if applied will solve every problem? Words are inadequate to express my gratitude to God, to Mrs. Eddy, and to all the loving Scientists who have helped me along the way.

(Miss) Florence D. Garlock, Pomonkey, Md.

*

I wish to express my gratitude for the help I have received through "Science and Health with Key to the Scriptures" by Mary Baker Eddy. After suffering with my back for a great many years I was completely healed by reading this wonderful book. At one time I suffered severely from a fall, while camping, and was told by physicians that they could do nothing for me. I was sent home unable to walk without crutches. I was in that condition eighteen months

when through Christian Science I was completely healed. This occurred fourteen years ago.

Twelve years ago I had a severe attack of erysipelas in my head. With the help of a practitioner I was completely healed in a short time and have never had a recurrence of that disease. Two years ago pneumonia was overcome, also by the aid of a practitioner. From childhood I suffered from sick headaches but these have long since been overcome. A nervous disorder of long standing and numerous other troubles have all departed through the spiritual understanding gained from reading our textbook. To say that I am grateful does not fully express my feelings toward Mrs. Eddy for her wonderful understanding of Truth which she so generously gave to mankind, and with the help of God I hope to show my appreciation and sincere gratitude by my living, and in doing the work she has so plainly shown us how to do.

(Mrs.) IDA STORMFIELD, San Francisco, Calif.

4

About seven or eight years ago, I was taken sick very suddenly. The doctor pronounced it acute indigestion or ptomaine poisoning. For a long time I suffered severely with my stomach. I took all the kinds of medicine prescribed by the doctor and also patent medicines, but all to no purpose. It was then I turned to Christian Science. After taking treatments from several Christian Science practitioners and studying Science and Health, I can say to-day that I am entirely cured of all stomach trouble, for which I am very thankful.—W. S. Campbell, Brawley, Calif.

Gratitude for the knowledge of Christian Science impels me to send this testimony. In the latter months of 1918 I was in a very weak and critical condition, almost a decline, and put it down to fear, as in the previous year, in November, 1917, I was operated upon for a growth in the stomach. As pain started a short time afterwards on the other side I had the morbid fear that there would be another one. I was not examined again, although in pain, and once I arrived in Cape Town relied solely on Christian Science and was healed, to the surprise of all who knew me.

I shall always be grateful for the knowledge of Christian Science. The way seems hard sometimes but as I persevere I grow stronger in every way. There have been many testing times and even failures but I know it is only because all fear has not been eradicated.

(Mrs.) Doris M. Fennell, Transkei, South Africa.

.

I have been wonderfully benefited by Christian Science, and wish to give my testimony, thereby helping others who are seeking the truth. Three years ago, upon the recommendation of friends who had been benefited, I commenced to read, wishing to know what a dear cousin's religion was who always seemed so loving and good. I had not received the help I had hoped to from medical treatment, and was not able to eat any food with starch or sugar without discomfort. I suffered from severe headaches, diseased nerves, catarrh of the stomach, and other ailments. Most of the help I have had has been through reading and applying the truth myself, which I have always found applicable to the many problems that have arisen.

I also have been able to help our little family over many seemingly hard difficulties. Our supply has been greatly increased. Mrs. Eddy tells us, "God gives you His spiritual ideas, and in turn, they give you daily supplies" (Miscellaneous Writings, p. 307). This truth has often been realized. Surely the knowledge of God's presence gives us courage, and turns all foes away. I have memorized two hymns from The Christian Science Hymnal and find them very inspiring and helpful as I go about my daily tasks. So many of my prayers have been answered, and I am truly grateful to God, to Christ Jesus, and to Mrs. Eddy.

(Mrs.) Bessie Eygnor, Wolcott, N. Y.

4

When I first looked into Christian Science I had no thought of physical healing but simply read Science and Health because a relative gave it to me to read. The book so appealed to my reason that I kept on reading. After a few days I decided that I would go to a practitioner to see if I could get help for constipation, a trouble I had had from childhood. I was completely healed in two treatments. Seeing the results in my case, my husband had treatment and was also healed. From then on I began to study in earnest and was soon able to make demonstrations for myself. About two years after this our baby son was healed instantly of convulsions caused by ptomaine poisoning. Our little daughter was also healed of pneumonia in one treatment. In both of these instances the practitioner was miles away, showing that distance is no obstacle to Mind.

We have had countless demonstrations of the power of Mind over physical ills of every sort, and I am very grateful for these, but much more grateful for the freedom from fear that this study has given me, and the sense of perfect trust that no matter what trouble comes, physical or otherwise, there is always the perfect remedy, divine Principle, right at hand. To know that it never fails gives the peace that passes understanding.

(Mrs.) HORTENSE BEAN, San Jose, Calif.

Þ

I wish to express my gratitude to Christian Science for the healing of my little girl. She was taken very ill one day and as she had a high fever a doctor was called in. After a careful examination he said he must have a second opinion at once. After the consultation I was told there must be an operation within half an hour as the child had appendicitis. Gangrene had set in and the body was quite rigid, but I was not given much hope that the operation would be successful, so I refused to allow the child to be touched. A Christian Science practitioner was sent for and within two days the child was up and out of doors and is better now than she has ever been before. I am indeed deeply grateful for this proof of God's care and protection and to Mrs. Eddy for having revealed to this age the Christhealing.—(Mrs.) I. S. Peacock, Hove, Sussex, England.

As I have received so much peace and comfort from the Sentinel, I would like to use that channel for good in which to express my gratitude for Christian Science, hoping it may help some one struggling in the dark. Four years ago I believed myself dying of some incurable disease. A constant pain in the side, loss of appetite and sleep, and an emaciated condition of the body, for over a year led me to think it a malignant growth of some kind. I was too frightened to consult medical aid and I was rapidly becoming a physical and mental wreck. No one but those in a similar state of mind can comprehend this condition of fear. I had so many blessings, a tender loving family, but I could think of nothing but my wretched self.

When Christian Science was suggested I grasped it with

the sole idea that it would help me to be more resigned to die. The first healing I received was from the knowledge that God is Love and does not send sickness and misfortune to His children. This was a joy. Then all superstitions under which I had been held in bondage for many years left me. In three months from the time I started Christian Science treatments I was absolutely freed from all misery. During this time I read the Christian Science textbook almost constantly, scarcely understanding one word, yet realizing in a way its power for good. My disposition, too, has changed and I see everybody and everything from a different viewpoint. The unfoldment of spiritual understanding seems slow but I know that understanding will come to me, for the promise to Daniel is also for me, "Fear not, Daniel: for from the first day that thou didst set thine heart to understand, and to chasten thyself before thy God, thy words were heard." My gratitude to God, to Mary Baker Eddy, and to the dear, patient people who have helped me find the truth is unbounded.

(Mrs.) LISBETH BELLE SCOTT, Stamford, Conn.

4

It would be impossible to enumerate the many blessings which I have received through Christian Science. I have had the benefits of Christian Science the greater part of my life, my mother having become interested in it when I was a child; however it is only within the past ten years that I have been able to do much through my own application of the truth. I have had many physical healings, among which are typhoid fever and a very severe case of inflammation of the bowels. I have been healed of what seemed at the time to be a great sorrow, but through the constant realization of the truth about man's relation to God this has been entirely overcome. I have also been able in several instances to overcome a feeling of resentment due to what I considered injustice to me; for this I am very grateful. I think that for which I am most grateful is the ability to apply Christian Science to the little problems which present themselves in our daily life; just to be able to know and to understand that God and His idea is all there is. Absolute Christian Science is applicable to every circumstance. My gratitude to Mrs. Eddy for her untiring efforts in our behalf is immeasurable. I am very grateful for class instruction and for the Journal, Sentinel, and Monitor, which are daily helps.

(Mrs.) Ella Washburn Sands, Manhattan, Kan.

4

I once heard a gentleman who had just come from a Wednesday evening testimony meeting remark that the Christian Science people had some sort of a charm. For nine years I have been studying to find this charm. I know now that it is the charm of right thinking, right acting, right living, the charm of loving and giving, of true prayer, and of walking and talking with God. I found this great truth in the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy.

Through the earnest study and application of Christian Science, I have found the peace that passes all human understanding. I have been healed of almost total blindness, of stomach trouble, constipation, headaches of many years' standing, heart trouble, and of physical exhaustion so severe it seemed as though I would pass away. From an almost hopeless and helpless invalid I have been restored to perfect health and soundness. My waking thought is one of gratitude, praise, and thankfulness to God for what He has done for me, and for His wonderful goodness to the

children of men. I am indeed grateful to Mrs. Eddy for her writings. I am grateful for membership in The Mother Church, for our church service, our beautiful hymns, and grateful for all the authorized literature. I pray that I may be more worthy to be called a Christian Scientist and live in closer communion with God, divine Principle.

(Mrs.) GRACE D. WARREN, Los Angeles, Calif.

4

Christian Science was first brought to my attention thirteen years ago, when a sister was healed of what the doctors called tuberculosis. Not until about seven years ago did I take much interest in it, when my dear mother, who was confined to her bed pending a serious operation, was healed of cancer. I at that time was a sufferer from nervous prostration. Following the healing which I received several months later, my husband was, through the faithful work of a practitioner, healed in five days of blood poisoning. Last winter my husband was healed of influenza, and my father also experienced a healing, for which we all rejoiced. My son has been a Sunday school pupil for seven years. He has especially proved the unreality of limitation, and was promoted to the eighth grade at the age of eleven years.

We are constantly reaching out for a clearer understanding of Christian Science, which daily teaches us that divine Love meets all our needs and is a very present help in time of trouble. We apply our understanding of Christian Science to every need and I am grateful for all it has done and is doing for all mankind.

(Mrs.) MAUDE EATON, Oak Park, Ill.

Through these lines I hope to help others, that they may overcome discouragement, even though life may appear useless and comfortless to them. Ten years ago, through a Christian Science practitioner, I first became acquainted with the omnipotence and omnipresence of God and the unreality of evil. In my great extremity, while lying in bed helpless, suffering from heart and lung trouble, I became acquainted with Mrs. Eddy's teachings and was healed with only a few treatments from a practitioner.

My trouble was so far advanced that I could not expect help from doctors. How wonderfully did divine Love work then! One trouble after another vanished, and material needs were met. My husband filled a very uncertain, poorly paid position as engineer, and all efforts to obtain something more desirable were in vain, but through reading the textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, and *Der Herold*, we gained an understanding of the complete provision made by our Father-Mother God, and soon he was given a most desirable position, one such as we had never dreamed of. And so our life became an unbroken chain of proofs of the infinite love and goodness of God.

Divine wisdom enabled us to solve seemingly most difficult problems easily. When at times an error did not seem to be easily overcome, a practitioner helped us, and very soon all was again sunshine and security in God.

We thank God heartily for all His spiritual gifts, also for Mrs. Eddy, who so lovingly showed us the way to divine Love, and we are grateful for all the dear Christian Scientists who comfort and console so many tired children of men and lead them to the blessed assurance that God is Love. We are unspeakably grateful that we can apply the power of Truth ourselves, and occasionally are able to help others in their growing understanding of God, Love.—(Mrs.) Käte Kutschwalski, Swinemünde i/Pommern, Germany.

3

Signs of the Times

["'Mere Motion' versus 'Divine Energy'"—The Christian Science Monitor, Boston, U.S.A., Aug. 2, 1920]

In these days of active construction and reconstruction in almost every branch of the world's work, much is heard about the need of increased energy in every direction,—energy in the workman to produce a larger output, energy on the part of the employer to dispose of this output for the general good, energy in all the branches of reconstruction work in devastated regions, and above all, energy in achieving a right settlement of the multitudinous questions demanding adjustment.

Now the true student of Christian Science, because he is essentially a metaphysician, knows the necessity always to look above the false testimony of physical sense to the metaphysical fact, the Science of being. The Science of being has revealed the eternal fact that Mind and its idea is Allin-all, that whatever is not of Mind does not exist, and that man as the compound idea of Mind, its full and perfect expression, inevitably reflects every quality of Mind, and only the qualities of Mind. Energy, then, to exist at all, must be a quality of Mind, reflected in its idea, man. But the human or mortal mind, the suppositional opposite and the would-be counterfeit of divine Mind, would claim that energy is a property inherent in itself,-in other words, human energy; but immediately we build on supposed virtues inherent in the human mind, we are building on the sand of human fallibility, and whatever is built on such a false foundation assuredly cannot stand.

In so far as energy is conceived of as being material, it is a part of the false belief of life, substance, and intelligence in matter, which must be annihilated and replaced with the understanding of what Mind includes. So-called material energy is mere physical motion; it certainly cannot accomplish the only achievement worth while, the only sure basis on which to work,-spiritual knowing and right thinking. In an article entitled "Improve Your Time," on page 230 of "Miscellaneous Writings," Mary Baker Eddy, the Discoverer and Founder of Christian Science, shows clearly the folly of such mere physical motion. She puts it definitely and practically, as is her custom: "Three ways of wasting time, one of which is contemptible, are gossiping mischief, making lingering calls, and mere motion when at work, thinking of nothing or planning for some amusement,travel of limb more than mind. Rushing around smartly is no proof of accomplishing much." It is interesting here to note that Webster defines this word "motion" as "opposed to rest," while Christian Science has revealed that, as Mrs. Eddy says, "God rests in action" (Science and Health, p. 519). And since "God rests in action," self-evidently God's idea, man, also rests in action. This statement is perhaps the best definition of true energy that can be given.

Of course, the very term "human energy" is self-contradictory, just as the term "mortal man" is self-contradictory, for, God being the only Mind, there is really no human or mortal mind, and there can then be no mortal man, no human or mortal energy. Man, the image and likeness of God, self-evidently is not mortal; he is spiritual and immortal, and reflects the spiritual and immortal qualities of God, divine Mind. The action of this divine Mind, in contradistinction to the counterfeit action of the so-called human mind, is defined by Mrs. Eddy on page 445 of the textbook, "Science and Health with Key to the Scriptures": "Christian Science silences human will, quiets fear with Truth and Love, and illustrates the unlabored motion of the divine

energy in healing the sick." We find, therefore, that true energy, the only energy there is, is expressed in healing.

Jesus expressed this "unlabored motion of the divine energy" in healing disease in all its forms,—the sick of the palsy, the lame, the dumb, the blind; in cleansing the lepers, casting out demons, and raising the dead; in healing the belief of limitation, as when he turned the water into wine, fed the multitude, and found the tribute money in the fish's mouth; when he walked on the sea, and through the closed door; in healing the false beliefs of the human mind, as when he stilled the tempest, when he taught in the temple, and when he gave the Sermon on the Mount. Truly it was "unlabored motion," because it was the natural, spontaneous effect of the constant operation of divine law. Jesus himself expressed this when he said, "The Son can do nothing of himself, but what he seeth the Father do: for what things soever he doeth, these also doeth the Son likewise." His whole ministry was an exemplification of this truth, and, as Mrs. Eddy states on page 51 of Science and Health, "His purpose in healing was not alone to restore health, but to demonstrate his divine Principle." In other words, while healing is a proof of the operation of "the unlabored motion of the divine energy," this healing is merely incidental; it is inevitable that man express his divine Principle, God, that he reflect the eternal qualities of this divine Principle; and this reflection of the divine qualities,—in other words, the expression of what is true, -is seen in the destruction of that which is not true, or, more accurately speaking, in the destruction of the human misconception, and it is this destruction of the human misconception which is interpreted as healing.

When the elementary truth is learned that man exists as the reflection, the spiritual image and likeness, of God, and that therefore he necessarily reflects every quality of his divine Principle, it will be seen that energy cannot be humanly produced, cannot be increased, nor diminished; that it is the inherent power of Mind, and reflected by man as God's idea. This is why the "motion of the divine energy" is "unlabored,"—because it is natural and inevitable. Man cannot help expressing the divine energy, for the simple reason that he exists eternally as the reflection of his divine Principle, God, eternally controlled by this divine Principle. When this is more fully recognized and demonstrated, the healing of the world's problems will be permanently established.

[The Lambeth Conference]

Amongst the resolutions formally adopted at the recent conference of Bishops of the Anglican Communion held at Lambeth, the following is worthy of special note:—

"The Conference reminds the church that intimate communion with God has been the privilege and joy of the saints in every age. This communion, realized in union with Christ through the Holy Spirit, influences the whole personality of man, physical and spiritual, enabling him to share his Lord's triumph over sin, disease, and death. We therefore urge upon the clergy of the Anglican Communion the duty of a more thorough study of the many-sided enterprise of prayer in order that they may become more efficient teachers and trainers of their people in this work, so that through the daily practice of prayer and meditation the corporate faith of the church may be renewed, and the fruit of the Spirit may be more manifest in the daily lives of professing Christians, and the power of Christ to heal may be released."

Notwithstanding the fact that the next resolution goes

on to urge thankfulness for, and the conscientious use of material means for healing the sick, Christian Scientists will gratefully recognize this evidence of awakening, remembering Mrs. Eddy's words on page 22 of Pulpit and Press: "All Christian churches have one bond of unity, one nucleus or point of convergence, one prayer,-the Lord's Prayer. It is matter for rejoicing that we unite in love, and in this sacred petition with every praying assembly on earth,--'Thy kingdom come. Thy will be done in earth, as it is in heaven. If the lives of Christian Scientists attest their fidelity to Truth, I predict that in the twentieth century every Christian church in our land, and a few in far-off lands, will approximate the understanding of Christian Science sufficiently to heal the sick in his name. Christ will give to Christianity his new name, and Christendom will be classified as Christian Scientists."

[Rev. Dr. James L. Gordon, San Francisco, Calif.]

I like the Christian Scientist, last, and best of all, because he is honestly trying to produce and reproduce the life of Jesus, here and now. The Christian Scientists believe that the life of Jesus can be realized, in doctrine and practice, in modern times. So they give themselves to thought and daily con the pages of Holy Writ and smile as though they were billionaires in spiritual blessings. I like the Christian Scientist. If this be heterodoxy, make the most of it. I like him best of all because he would bring Christ from the skies and enthrone him in the affairs of our modern life—here and now.

[Some "Next Steps" proposed by the Compulsory Medication Propagandists]

It is interesting to note the different phases of the widespread propaganda throughout the United States and Europe for what is guardedly termed "a socialized medical system," but which is really a tremendous effort to establish legally compulsory medication and examination, regardless of the preference and protests of citizens. In an article entitled "What Doctors Must Do," the mid-September number of The Survey quotes as follows:

"That the work done on behalf of the community, plus the work accomplished by private medical practitioners, is not equal to national needs, is obvious to any one considering the vast amount of unavoidable disease in our midst. Why is this and what is the remedy? . . . The medical provision made in a large proportion of cases is belated and inadequate; it commonly does not include the full resources of medicine; and in perhaps a still larger proportion of cases medical advice is not obtained, or being obtained is not being followed. This applies even more to hygienic than to clinical medical advice."

As a remedy for this admitted inefficiency of medical methods and for the lack of confidence and obedience on the part of the public, the writers of the article referred to give a series of "Next Steps" for the physicians, conspicuous among which are the following:

"The extension of clinic and dispensary medical facilities on a pay basis for wider groups in the population—a further socialized use of the clinic method.

"A great extension of organized, age-group diagnostic and advisory work, including full-time medical, dental, nursing, and clinical personnel and equipment for school children, industrial workers, et cetera, and providing for routine medical examinations.

"Organized efforts to provide annual medical examinations for the population at large, through such agencies as the Life Extension Institute, medical examination clubs, national medical examination campaigns, et cetera. "The development under state or federal auspices of expert traveling advisory and consultant service for the general practitioners on diagnosis and treatment, covering difficult and doubtful cases in many of the specialties such as tuberculosis, infant welfare, internal medicine, et cetera.

"Possibly the districting of medical service immediately, at least to meet epidemic emergencies, leading perhaps to the setting up of competitive standards of excellence, graded on a basis of disease prevented and health maintained.

"The reincarnation of the 'old family physician' as the guardian of the family's health and the teacher of family hygiene—the treatment of the family to be carried out on the 'keep well' basis, a practice erroneously said to be common in China, but one which shows definite signs of development in this country."

A note of truth is sounded, however, in the paragraph which pleads for cooperation with—or rather submission to—the compulsory medication propagandists. The paragraph closes with this: "The object of medicine is a healthy community life. Up to the present time, however, the doctor has been expected to do all the work, either individually or through the gradually developing medical-social organizations. The time has come for the education of every individual with regard to the . . . work he must do himself" in order to express health.

On page 60 of "Miscellaneous Writings" Mrs. Eddy says: "Every material belief hints the existence of spiritual reality; and if mortals are instructed in spiritual things, it will be seen that material belief, in all its manifestations, reversed, will be found the type and representative of verities priceless, eternal, and just at hand. The education of the future will be instruction, in spiritual Science, against the material symbolic counterfeit sciences." And on page 4 of the same book she says, "Thought imbued with purity, Truth, and Love, instructed in the Science of metaphysical healing, is the most potent and desirable remedial agent on the earth."

[Idealism and the Phi Beta Kappa Society, by Thomas Nelson Page in The Harvard Graduates' Magazine]

Young gentlemen, trained as you have been, elected to become members of the great intellectual society of the Phi Beta Kappa—the life guards of scholarship and idealism—you will, I know, go to history and to the original sources filled with that fervor for the truth which is your heritage. Accept no man's ipse dixit. Accept only as it commends itself to you, to your reason and to your instinct. Inform yourselves, but think for yourselves. . . . The ancient motto of your Alma Mater is "Truth." The sentence carved over the entrance of the main hall of my Alma Mater, the University of Virginia, is, "Ye shall know the truth, and the truth shall make you free."

[From Current Opinion, September, 1920]

The utter accuracy of the universe is appalling.... Even music can be mathematically expressed. A Mozart sonata is governed absolutely by the law of numbers. And if all these things are under the rigid rule of exact law, why are not the things of the mind and heart and soul governed also by the same exactness?... It is no mere figure of speech, then, to say, "Be sure your sins will find you out," or "Whatsoever a man soweth, that shall he also reap." Also, your goodness will find you out.... The Ten Commandments do not foozle any more than does the multiplication table. Once we get this conviction deep in our mind, it ought not to alarm us but to give us a great and unshakable peace. For it gives us the feeling that our destiny is not the play-

thing of chance but is the result of a precise and intelligent purpose. . . . Few people actually take as their working creed the moral and spiritual accuracy of the universe. They admit the rule in physics and astronomy and in the assayer's office, but in their human relations they persist in the suspicion that life is rather a game of cards, part luck and part shrewdness. Whoever will renounce this superstition acknowledges once for all that justice and mercy are as reliable as the rule of three.

[Rev. Thomas Lutman in Zion's Herald]

The New Testament never credits an impossibility. There is no room for God and the impossible in the same world. We shall either have to dispose of one or the other. We can't believe in God and the impossible. There is no perhapsology in the Bible. . . . An officer commanded a private to do a certain thing. "It is impossible," the private said. The officer replied, "I did not ask for your opinion but for your obedience." God doesn't ask for our opinion but for our obedience. . . . Christ taught and lived [what seemed to be] the impossible. He knew that the ideal was the real and the impossible possible. . . . The kingdom is not impossible-it is inevitable. God's will can be done on earth as it is in heaven. . . . The desert can blossom as the rose. The hills can be brought low, the valleys exalted, the lame can run, the deaf hear, the blind see.

[Introduction to a lecture, First Church of Christ, Scientist, San Diego, Calif.]

One of the most prominent features of this age is the tendency to seek the practical things. If anything is invented the question is, What will it produce? In contemplating a purchase the first inquiry is, Will it be useful? In regarding a possession the constant thought is, Will it yield further possessions? This feature applies as well to religion. One of the striking characteristics in the life of Jesus is the fact that his religion was always available and practical in cleansing the sinful, relieving the distressed, and healing the sick. Paul says of this religion in his epistle to Titus, "And let our's also learn to maintain good works for necessary uses, that they be not unfruitful."

Then it is no wonder that there is a marked tendency to make religion practical, and this tendency should be to learn to maintain good works that they may bring mankind practical benefits in the necessary, everyday uses of life, in order that religion may not be unfruitful but increase to the pulling down of the strongholds of entrenched erroneous beliefs. Such a system of right thinking, or religion, is Christian Science.

[Service Enterprise Proved Successful]

Success and intelligence are in reality inseparable from purity of purpose, and the student of Christian Science will notice more and more events which are evidence of this truth. One such is chronicled in a recent article in The Congregationalist and Advance which tells of the sustained success over a period of many years of clubs in California cities designed to supply the social opportunities and amusement which many men were finding only in saloons. The article says in part: "Here is a social experiment which is no longer an experiment. It is a success. If the saloon was a workingman's social club and met a real social need, here is a substitute which works. If it can succeed in California why not in Kentucky and Kalamazoo? . . . It is an association whose purpose is to provide social centers free from degrading influences, where light refreshments are served at a nominal cost and social life with amusements is provided

free. The idea was to provide all the social attractions of the saloon without a bar, to run the business as a service rather than for a profit. A few public-spirited citizens thought it could be done. They set about doing it and succeeded. . . . These clubs are now in successful operation in Stockton, San Jose, Lodi, Modesto, Santa Rosa, and San Luis Obispo. A second club was organized in Stockton, September 22, 1919. These two clubs are visited by about fifteen hundred men daily. In San Jose the attendance is about the same, . . . In spite of the high cost of living the Stockton Club offers a bill of fare in which are twenty items at five cents each. This they do and make money. . . . The winning feature of the -- Club is the fact that it is a self-respecting, self-supporting institution."

The commonly accepted belief that well-meaning enterprises must often fail because of lack of wisdom in the conduct of them, while others founded perhaps upon quite unworthy motives succeed because of clever management, is the direct result of the supposition of mortal mind that being is a composite of good and evil. So long as this supposition-that good, or what is, can be united with evil, or that which is not-is entertained it is possible to believe and suffer the consequences of the belief that weakness and philan-

thropy, selfishness and intelligence can combine.

Mrs. Eddy tells us, however, on page 269 of the Christian Science textbook, "Science and Health with Key to the Scriptures," that "from first to last the supposed coexistence of Mind and matter and the mingling of good and evil have resulted from the philosophy of the serpent. Jesus' demonstrations sift the chaff from the wheat, and unfold the unity and the reality of good, the unreality, the nothingness, of evil." When one begins to understand something of "the unity and the reality of good" he sees that no quality of good can exist apart from any other, and the correlative fact that all qualities of good necessarily exist forever apart from and unhampered by "the unreality, the nothingness of evil." He therefore confidently expects to find it more and more apparent in his experience that evil is inseparable from failure and good from success.

["Prohibition in India" from Everybody's Magazine]

India, too, is awake, and we rejoice that Britain's ward seeks, with Britain and the rest of the world, to remedy evils and remove those things that destroy the life of nations. The reports which come to London from India indicate that particularly in the case of the native population, there is a rapidly growing demand for the abolition of the traffic in alcoholic debauchery. Last year the Imperial Legislative Council considered a resolution demanding prohibition, and, while the resolution was rejected, twenty out of twenty-two of the native members of the Council voted for it.

Recently the fifteenth All-India Temperance Conference was held at Delhi and prohibition then got another lively hearing. . . . The matter of prohibition was at the forefront of the proceedings and the first of the resolutions adopted

Resolved, That this conference, representative of temperance opinion throughout the Indian Empire, reiterates its convictions that the momentous historic events of the passing hour and the temperance sentiment and aspirations of a large majority of the Indian people, demand the adoption of a policy of total prohibition as the only satisfactory solution of the drink and drug problem in India. For the care of the poor and the protection of the weak in a period that in large areas of the Empire borders on famine conditions, for the prevention of economic waste in a period of short-

age of cloth, food, and clothing, and in order to secure a permanent diminution of poverty and crime and a corresponding increase in the physical efficiency and moral welfare of the Indian people, this conference appeals to the government to issue an official declaration that they accept and affirm as a wise ideal the policy of total prohibition of alcoholic drinks and intoxicating drugs throughout the Indian Empire.

That started things. Shortly afterwards another great rally was held at Lahore, chiefly of the Mohammedan population.... The resolution adopted requested the government to enact a law similar to that of America, forbidding the manufacture and sale of intoxicants, and also requested temperance societies throughout all India to take similar action....

Commenting on the action of the Mohammedan gathering, The Hindu, of Madras, one of the most influential native journals in India, said: "The great majority of the Hindu population would rejoice to see drink banished from the country, and that being the case, there is no excuse, except the sacrifice of revenue, and it may be the self-indulgence of the majority of the Europeans, to whom liquor in some form appears to be a necessity. . . ."

The Christian Indians were also close on the heels of their Mohammedan and Hindu brethren in their demand for protection from the dramsellers. A great meeting of natives was held at Teynampet with Hon. Rao Bahadur B. N. Sarma in the chair. . . . The chairman also declared that the aim of mankind should be to completely eradicate the evil of drinking, and hoped that one of the results of the reconstruction of the Empire would be to free the countries from the drink habit.

["Prison Democracy" by Frank Tannebaum in The Atlantic Monthly]

The prison must actually become a self-governing as well as a self-sustaining community in an economic sense. It must provide the means of learning a trade as well as that of earning sufficient money for self-maintenance and the care of dependents stranded in the world outside. This is not an impossible task. There is no visible reason why scientific organization of the working and economic aspect of the prison community should not be capable of carrying full support of the individual, as well as of the group beyond the prison dependent upon the inmate for an income. It would be the means of maintaining intact such family ties as the prisoner may have had. The work, to be fully successful, must be so organized as to make possible the entrance of the criminal into an economic grouping in which he can function, and which will at the same time contain the possibilities of continuing his newer democratic experience. This can apparently be done only by organizing the prison work in contact with, and under terms acceptable to, the labor unions, and thus providing for the entrance of the freed man into a labor group . . . and at the same time making possible the continuance of the method of democratic self-determination by participation in the problems and interests of the democratic labor organization.

[Stanley A. Cook, M. A., in The Hibbert Journal]

I wish to suggest that the future of our progress outside the sphere of religion depends vitally upon religion, indeed upon a further development of religion itself, and that the latter will rest upon an advance in those realms which our science and criticism jealously shield from religious, confessional, and subjective entanglements. In other words, the separate aspects which we dichotomize into "religious" and

"nonreligious" are so united that progressive development cannot be partial or one-sided. What I submit is that we are at the stage where, if we are to maintain our position and make a further advance—and the two aims are one—only a religious development will stimulate and unify our research, and only an advance in our research will bring religion into harmony with the best thought of its day. The advance, in a word, will turn upon a further development in man's relationship with the God of whom it has been said that "in him we live, and move, and have our being."

[London dispatch in Watertown (N. Y.) Times]

American bishops attending the Lambeth conference of the Episcopalian church occupied pulpits in many London churches yesterday [July 11]. Right Rev. William Crane Gray, bishop of the Missionary District of Southern Florida, who preached at Chelsea, spoke despairingly of the work of the conference, saying that nearly three hundred bishops who were "trying to deal with the world's problems felt they were inadequate for the job," and added, "The world apparently is thinking the same." Dr. Gray said he felt the Episcopal church should meet Christian Scientists and "extract the truth from their doctrine, for there is much truth in it."

[From "The Despoilers," by J. Edmund Buttree]

Contentment is a state of being. Health is a state of being. Happiness is a state of being. A scientific authority states, "You cannot be healthy if you are seeking health;" meaning that you cannot be healthy while you are seeking health; that health is a condition that simply is. It follows that you cannot be happy while you are seeking happiness; that happiness is a condition that simply is . . . because contentment is a state of being; raise in salary, shorter hours will not change that state of being. The change will have to come from within; from within the men themselves. "For as he thinketh in his heart so is he."

٠

[Movement Toward Prohibition in Scotland]

The Old World is awakening to the fact that control or prohibition of the sale of liquor is one that will not burke delay. In November, Scotland will have an opportunity of giving expression to its opinion on local option under the "No-License Resolution" of The Temperance (Scotland) Act. 1913.

"Whatever our views on temperance," says Blackwood's Magazine, "we cannot afford to face the social and industrial problems that have come on us as an aftermath of the war with the old incubus of drink pressing upon our shoulders. Yet though all lovers of their country are agreed on the necessity for reform, we would point out that reform will not come automatically next November. Unless the electorate are sufficiently awakened to the needs of the situation to go to the polling booth and to record their votes, we shall sink back into pre-war conditions. 'He trespasses upon his duty who sleeps upon his watch, as well as he that goes over to the enemy.' . . .

"Already, with the removal of the war restrictions, criminal prosecutions and prosecutions for cruelty to children have gone up by leaps and bounds. To return to our old drinking customs is unthinkable. Liberty, temperance, self-control are the normal ideals of our faith, and prohibition is itself a compromise. Yet liberty may become a mockery, and such restrictions as are offered by the No-License Resolution of the Temperance Act may give us back more than they take away. "Daily, too, the problems of the labor world

become more difficult and more menacing. Opponents of the Act would scare us by a propaganda of posters into the belief that we are arbitrarily closing the doors of the public-houses, and by so doing are making these problems only more dangerous. But the argument is not true to fact, for this precisely is what the Act does not do. On the contrary, it gives the keys of the drinking bars into the hands of the people of the country, so that they, if they will, may close these particular doors for themselves."

Church Notices

Boston, Mass.—The First Church of Christ, Scientist. Sunday services, 10:45 a.m. and 7:30 p.m.; Sunday school, 10.45 a.m.; Wednesday evening meeting, 7:30 p.m., in the church edifice, Norway, Falmouth, and St. Paul Streets. The church is open to visitors Wednesdays and Fridays from 10 a.m. to 5 p.m.

Reading rooms: Little Building, corner of Tremont and Boylston Streets (fourth floor); open daily, except Sunday and Wednesday, from 9 a.m. to 9 p.m., and on Wednesday from 9 a.m. to 5 p.m. National Union Bank Building (seventh floor), 209 Washington Street, opposite old State House; open daily, except Sunday, from 9 a.m. to 5.30 p.m. Coolidge Corner Building, 1316 Beacon Street, Brookline; open daily, except Sunday, from 9 a.m. to 6 p.m.

Admission to Membership in The Mother Church

The next admission of candidates will take place on November 5, 1920, as provided in Article XIII, Section 2, of the By-laws of The Mother Church. Application blanks may be obtained by addressing the Clerk of The Mother Church, and should be returned to him on or before Friday, October 22, 1920. Consideration of any applications received after that date will be deferred until the June 3, 1921, admission.

An application sent to the Clerk does not constitute the applicant a member. Notice of election will be sent to those who are admitted to membership.

Those who have made application for membership prior to June 5, 1920, and have not received notice of election, may communicate with the Clerk if they so desire, and are especially requested to do so before sending in a second application.

CHARLES E. JARVIS, Clerk,

236 Huntington Avenue, Back Bay, Boston 17, Mass.

From the Clerk of The Mother Church

Church Teners.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to Charles E. Jarvis, Clerk, 236 Huntington Avenue, Boston 17, Massachusetts.

From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church

dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address. Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to EDWARD L. RIPLEY, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

Announcements

From The Christian Science Publishing Society

New Morocco Bound Vest Pocket Edition of the Textbook

Announcement is made of the publication of a new, morocco bound, vest pocket edition of "Science and Health with Key to the Scriptures," by Mary Baker Eddy.

This small volume, 3 1-16 by 4 5-16 inches, the same in size as issued for soldiers and sailors during the war, is bound in black morocco, limp, leather lined cover, round corners, gilt edges. Price \$3.50 for single copy and when included in lots of twelve or more copies of Science and Health in any or all bindings, \$3.25 each.

Orders for this edition will be filled in rotation.

Vest Pocket Bible

The Bible, bound in morocco, uniform in style with the vest pocket edition of Science and Health, is now on sale at \$4.75 a copy. Order by number 08X. Reading room discount 10 per cent.

New Pamphlets

Advance information will in future be given two weeks before each new pamphlet is placed on sale. This will replace the former system of standing orders.

New Pamphlets in German

There is now on sale a new German pamphlet entitled "Ein stilles, sanftes Sausen" ("A still small voice") containing the following articles reprinted from the Christian Science periodicals with alternate pages in English: "'The secret place of the most High,'" "Never too Late for Healing," "Treatment," "Cause and Effect."

There is also on sale a new German pamphlet entitled Läuterung (Purification) containing the following articles reprinted from *The Christian Science Monitor* with alternate pages in English: "Lusting Against Lust," "The Lust of Money," "The Lust of Power," "Looking Ahead," "Sincerity."

Price of each of the above pamphlets 5 cents a copy. Reading room discount 20 per cent.

"Rudimental Divine Science" for the Blind In English Braille

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U.S.A.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U.S.A.

Articles and Testimonies

Available articles from Christian Scientists and good testimonies from those healed by Christian Science are always welcomed for consideration by the Editors. Manuscripts for publication in the Sentinel and Journal, whether articles, poems, or testimonies, and correspondence relating thereto, should not be addressed to individuals, but to the EDITORIAL DEPARTMENT, THE CHRISTIAN SCIENCE PUBLISHING SOCIETY, Boston 17, U.S.A.

[158]

Letters of Appreciation

Many letters of appreciation of THE CHRISTIAN SCIENCE MONITOR and other Christian Science activities are constantly being received. These letters express what these activities mean to different individuals in various occupations and pursuits. The favorable comment that has been received on those already published indicates that they are welcome and helpful; therefore others will be published under the above heading. One such letter follows:

PLEASE find inclosed nine (9) dollars for one year's subscription to The Christian Science MONITOR. It is with much gratitude that I renew for this wonderful paper. A little more than two years ago I sent my first six months' subscription for the Monitor. In a short time after receiving it, or after the first few weeks, a period of transforming experiences began that have completely changed my whole life. I then found myself able to renew only for a couple of months at a time, and part of the time since then I have been without the Monitor. However, I have never ceased to look forward to a time when it would be a daily arrival at our home again. Its very appearance suggests purity and cleanliness, and living as we do in a new country, where many think it too isolated to enjoy life, we feel that we cannot afford to be without such reliable world news as the Monitor furnishes. that the Monitor is doing much to establish universal brotherhood. In fact, its influence for good can scarcely be estimated.

WORKS ON CHRISTIAN SCIENCE

Written by MARY BAKER EDDY, Discoverer and Founder

of Christian Science and Author of its Textbook

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each \$3.00; twelve or more, each \$2.75. Ooze leather, vest pro ket size, single copy \$3.00; twelve or more, each \$2.75. Morocco, vest po ket size, single copy \$3.50; twelve or more, each \$3.25. Full letther, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy \$4.00; twelve or more, each \$3.75. Morocco, limp, round corners, gid edges, Oxford India Bible paper, convenient for pocket, single copy \$5.00; twelve or more, each \$4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book), single copy \$6.00; twelve or more, each \$5.75. Large Type Edition, designed especially for the use of First Readers. Large type (18-point) on Oxford India Bible paper, bound in leather. Size 8 by 10.4 inches. Single copy \$7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

FRENCH TRANSLATION. Alternate pages of English and French. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Moro.co, one to five copies inclusive, \$5.50; six or more, each \$5.25. Orders for the French translation in lots of six or more may include both bindings.

German Translation. Alternate pages of English and German. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each \$5.50; six or more, each \$5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, French, and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy \$2.25; twelve or more, each, \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; twelve or more, each \$3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy \$5.00; twelve or more, each \$4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 366 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy \$2.25; six or more, each \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; six or more, each \$3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy \$5.00; six or more, each \$4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy \$6.00; six or more, each \$5.50.

Christ and Christmas. An illustrated poem. Cloth, single copy \$3.00; six or more, each \$2.50. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Unity of Good and Other Writings. One volume, containing Unity of Good, Rudimental Divine Science, No and Yes. Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science versus Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy \$1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy \$2.00; six or more, each \$1.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, single copy \$1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Curistian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy \$1.00; six or more, each 75 cents.

Unity of Good. This book lays the ax at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy \$1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloch, 90 pages, single copy \$1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, alias Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

Printed in the New York point, American Braille, and English

PRINTED in the New York point, American Braille, and English Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Rudimental Divine Science and No and Yes. In one volume, French translation, with alternate pages of English, vest pocket size. Blue cloth, gray edges, single copy \$1.25; six or more, \$1.10; blue leather, gray edges, single copy \$2.00; six or more, \$1.75 each.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science versus Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy \$1.50; six or more, each \$1.15.

Christian Science versus Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy \$1.50; six or more, each \$1.25. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign. Address orders and make checks payable to THE CHRISTIAN SCIENCE PUBLISHING SOCIETY, BOSTON 17, U.S.A.

Work

FOLLETTE BROTHERTON

PROBABLY there is not a word that is more misrepresented or less understood than the word "work," and more than likely it is most frequently used as a verb-I work, you work, he works, et cetera. Work is a noun as well as a verb, and, when understood, stands for and expresses the beautiful creation of God. Work stands for and expresses continuous activity directed to an ideal. Work does not stand for or express toil and struggle; on the contrary toil and struggle express ignorance of work. As the ideal is always beautiful and joyous, the activity or work leading to the realization or demonstration of the ideal is equally beautiful and joyous. That which is ideal expresses joy and freedom, and that which is not ideal expresses ignorance of the ideal, heaviness, bondage, and servitude; so when work brings a sense of heaviness, of bondage, and of servitude, it means that there is ignorance of the truth of work and the truth of the ideal. There is need then to know the truth.

An ideal is not a vague, unknown something; it is a standard of perfection and is never formulated as that which is finite or limited. It stands for the highest standard of excellence, and is always conceived of as that which is boundless, unlimited, infinite. Work, the activity expressing this infinite, unfettered standard of excellence, cannot be taken in a finite or limited sense, but must be understood as the excellent standard of activity which the ideal brings; and as the ideal is joyous and free, activity or work gives only the greatest realization of joy and freedom. Work is not confining; on the contrary work is liberating activity that leads out of bondage and brings the realization of freedom.

There is just one action, the action of God; therefore there is just one work, the work of God. Christian Science consistently proves that there is one God, one creator. As Mrs. Eddy says, "All is infinite Mind and its infinite manifestation, for God is All-in-all" (Science and Health, p. 468). Work is the creation, the manifestation, the emanation of God, and as such it is inseparable from Him. Work is not a creation of man, for there is just one creator; and as the creation of God work is the spiritual idea of God, known by God and by man as that which God created and ended. Man, then, does not struggle with work but rests with God in the finished work or action of God.

In her Message for 1900 to The Mother Church, Mrs. Eddy writes (p. 2), "The song of Christian Science is 'Work—work—work—watch and pray.'" Work, then, is the song of Christian Science. In Science and Health (p. 22), Mrs. Eddy says, "'Work out your own salvation,' is the demand of Life and Love, for to this end God worketh with you." Since work is the song, the command then is to sing out one's salvation. Salvation is God expressed and man will forever sing out his God through eternity; that is, man continues forever to work, to act, and his work, his action, is free and unlabored. It is necessary to know this harmony of work; since work is activity that leads to the ideal it is well

to know God, the only ideal, and work, His finished creation, His perfect idea. Work is the action, the song of Truth and of Life and of Love. To understand this fact is to lift all sense of burden from a man and to enable him to know that he is now singing and working in God's kingdom—eternity. Song and work are the same harmonious activity, the activity of God; and man is here and now rejoicing in this only activity or work. Man expresses to-day, just as he has always expressed and as he always will express—since God created man in His image and likeness and ended His work—the glory and richness and fullness of God's freedom; and freedom knows not toil and bondage; freedom knows work and song.

Song is the melodious utterance of musical composition, and brings forth harmony, joy, and freedom. Song is unconfined and unfettered, is always ready and willing to be used under any and all conditions. Since work is the song, work is just as free and just as opportune as song, just as ever present. To learn that work is a harmonious composition is to learn the joy of work and to be able to rejoice in this wonderful creation of God. This man always does, for work is the finished creation or action of God.

To-day the world is supposed to be laboring under a burden of readjustment work of gigantic proportions; readjustment of labor, of capital, of politics, of governments, and so on and on. The true world, however, goes joyously on its way undisturbed and untrammeled by all of these suppositions. The true world rests each moment in its action and is always working or singing out the glory and dominion and government of God. Men have satisfied themselves that they can never readjust this world-action, that there is a Science that governs the action of the world, and they rest satisfied in this fact; they may not, however, have learned that this Science which they leave alone because it is too big for them to readjust, is God. They do, however, leave this work to God, and the result is perfect, harmonious action expressed. One needs to learn to-day that God is not going to readjust anything. He cannot, for His work is ended, His manifestation complete. Man can never readjust anything, for everything is orderly and complete to-day. One needs to put off the old belief that he has to readjust something and pretty nearly everything and to learn the perfect order that exists everywhere to-day. One can no more readjust labor, capital, politics, governments, et cetera, than he can the world's action; but he can know that God is the only government. The need to-day is to learn the labor of God, the capital of God, the politics of God, the government of God, and as this is learned, one not only learns how to but does sing out his salvation.

Through the study of Christian Science, first one truth and then another unfolds and man learns to know God, to know himself, and all of God's ended work as it is; the truth of work is learned, the broad and infinite signification of the word "work" is gained, finite personal sense vanishes, and the spiritual fact is understood. As the truth of work is revealed, all sense of "I work, you work, he works," et cetera,

Copyright, 1920, by The Christian Science Publishing Society, Falmouth and St. Paul Streets, Boston, Massachusetts. Entered at Boston post office as scond-class matter. Acceptance for mailing at a special rate of postage provided for in section 1103, Act of October 3, 1917, authorized on July 11, 1918.

all sense of toil and of drudgery ceases and the true harmonious work of God is understood and rejoiced in. Man knows that he does not toil and struggle with any readjustment work, but that he conforms with the spiritual law of finished work in every instance and he rejoices in that which is righteous before God. That which brings a sense of toil is not work but is ignorance of the truth of work,—that all action is God and that man rests in work with God. It is just as necessary to know the truth of work as it is to know the truth of God. When this truth is learned there is rejoicing in all activity.

In Science and Health (p. 123), Mrs. Eddy says, "Divine Science, rising above physical theories, excludes matter, resolves things into thoughts, and replaces the objects of material sense with spiritual ideas." Through the study and understanding of Christian Science the physical theory of work is resolved into thought and replaced with the spiritual idea, and man no longer struggles with material work, but rejoices in the fact that work is spiritual, not material. Mrs. Eddy again says in Science and Health (p. 269): "Human philosophy has made God manlike. Christian Science makes man Godlike. The first is error; the latter is truth. Metaphysics is above physics, and matter does not enter into metaphysical premises or conclusions. The categories of metaphysics rest on one basis, the divine Mind. Metaphysics resolves things into thoughts, and exchanges the objects of sense for the ideas of Soul." Thus it becomes evident that labor, capital, politics, governments, can be seen in their perfectness, given their proper premise and conclusion as mankind understands that work is spiritual activity that God has already ended, and that man rests in the finished work with God.

Proving the Power of Truth

B. M. PARMENTER

AT one time the writer was assisting in the defense of a Christian Scientist charged with manslaughter because no physician had been called in the case of the sickness of a child and Christian Science alone was relied upon. It was in a community that, at that time, knew but little about Christian Science, and an extremely hostile and antagonistic public sentiment had been aroused. The court room was large and filled with local people, nearly all of whom were very much opposed to what they thought Christian Science to be, and believed that stern punishment should be meted out to the Christian Scientist being prosecuted. Public sentiment was at white heat. Those interested in the cause of the defense had requested Christian Science churches from various towns to send one or more Christian Scientists to be present at the trial. The result was that there were a number of Christian Science practitioners present. During the latter part of the second day of the trial, a very pronounced feeling of unrest, a spirit of antagonism to Christian Science, and aggressive impatience with the proceedings was manifested. Up to this time the trial had proceeded with comparative quiet and very little manifestation of disrespect. Very suddenly the writer was impressed forcibly with the change of thought in those present. Only a few moments elapsed, however, before the ever presence and power of divine Truth and Love were realized. Anger was hushed, impatience stilled, hate destroyed, and from then on there were no storms of passion, no beating waves of revenge. Ultimately, without strife or struggle on behalf of the Christian Scientists, the case was dismissed.

This experience demonstrated to one comparatively

young then in Christian Science, that whatever discordant condition may arise, Christian Science furnishes an antidote for that condition, and a remedy that quiets every fear and smooths every rough place. In "Science and Health with Key to the Scriptures" (p. 276) Mrs. Eddy says, "The realization that all inharmony is unreal brings objects and thoughts into human view in their true light, and presents them as beautiful and immortal." To bring about these happy results, the silent, mental work is an efficient remedy. It requires no manipulation and must be done without fear and with no doubt what the results will be. It removes the anxious thought, destroys the "noisome pestilence," removes the "load of care." Then "ills have no weight, and tears no bitterness." But in order to accomplish these results the perfect image, the knowing that there is but one power, and that good, and that we must yield all to perfect Truth and boundless Love must always be kept in thought. It is only by keeping up the standard, whether in mathematics or in Christian Science, that we get right results. We must know and apply the correct rule. Just the moment that we see, hold, or acknowledge as consciousness any distorted, discordant, or imperfect thought or condition, then there is destruction of harmony and we are in error's chains. So long as that condition of thought prevails, we are blind to the truth, shorn of spiritual strength, worshiping other gods, and we thereby bind ourselves helpless at the pool, the vision of Truth; the recognition of Love and perfection is gone, the standard has been lowered and is trailing in the dust of carnal mind.

When we fashion in thought the perfect image and recognize nothing but Truth and God's omnipotent and unerring government, wherein there is no discord, we have reversed our mental action, regained our vision of things divine; harmony is seen where discord seemed to be and beauty blossoms "where blight and mildew rested;" then we have ceased pulling down the temple and have been lifted by Christ, Truth, into the beautiful realm of peace, Truth, and Love.

To doubt would be disloyalty, To falter would be sin,

so run the words of a familiar hymn.

At the trial referred to, the presence of the seamless garment of harmony was understood. The workers in Christian Science knew that there is but one Mind; they were realizing the "unity of the Spirit in the bond of peace" and seeing all as right ideas, living, moving, and having their being in God. The rule is equally effective whether applied in the countinghouse or the court room, in speaking or in writing, in the church or on the tempestuous Galilean sea. Working by this rule, experience becomes a calm and constant proving of God's presence and power. Prosperity in health, body, mind, business, and church follows as a necessary consequence of the continued and correct application of the rule. No power can stay the march of Truth and Love. Divine Love can be trusted to remove whatever is false, revengeful, hateful, or painful.

In the "Rule for Motives and Acts" found in Article VIII, Section 1, of the Manual of The Mother Church, we are told that "in Science, divine Love alone governs man; and a Christian Scientist reflects the sweet amenities of Love, in rebuking sin, in true brotherliness, charitableness, and forgiveness." Notice the word "alone." Nothing can be added to the power of divine Love, and nothing taken away. It is just that, no more, and nothing less. To attempt to add to it is to create a babel of confusion, a multiplicity of human beliefs and thoughts, and lead us into a wilderness of "gods many." So long as we consistently work in accord

2.7

with the divine Mind, there is little or no chance for making a mistake. The clearer in thought we are, and the greater the spiritual peace and activity with reference to any situation, the surer we are that all is, in reality, right. Ultimately we arrive at that point where we know full well that this is the easiest, safest, and best way; in fact, the only right way.

By application of the rule of healing as taught us by Mrs. Eddy, the spirit of antagonism against Christian Science in a community can be exchanged for one of love and quietness, and our cause will prosper in the proportion that the mental work is faithfully done. Christian Science practitioners, destroying their own beliefs of limitation, will find their own practice increasing, demonstrations more quickly and easily made, and a constantly enlarging field of activity for good. The universality of God and the powerlessness of evil should be actually known and demonstrated under all conditions and in all circumstances. Love and Love "alone" is the Redeemer. In the words of one of our hymns:—

Make channels for the streams of love, Where they may broadly run; And love has overflowing streams, To fill them ev'ry one.

But if at any time we cease
Such channels to provide,
The very founts of love for us
Will soon be parched and dried.

Awake

ERNEST A. S. WHITTARD

PHROUGHOUT the Bible, the word sleep constantly is I used in a symbolic sense, frequently conveying the meaning either of death or a deadness and dullness of apprehension of things spiritual. It was during the deep sleep that fell upon Adam, as recorded in the second chapter of Genesis, that the delusion regarding the material so-called life originated, when woman was supposed to be formed from one of Adam's ribs. This false belief arising from a condition equivalent to self-hypnosis was the reversal of the previous account of the true and spiritual creation in which God made man in His own image and likeness, giving him dominion ever all, after which He pronounced His creation finished, and further, "saw every thing that he had made, and, behold, it was very good." It is the supposititious perpetuation of this dream of material creation, but in slightly changed form, that to-day causes, as it has all down the centuries, the belief of life and intelligence in matter and of man as a creator producing and reproducing his own species,

When one awakes from this Adam-dream, he recognizes and acknowledges that supremacy of the spiritual creation which destroys all mortal sense and sets thought and understanding firmly on the rock of spiritual existence, the only existence, and from which point alone we can in reality find the true sense of Life. Mortality and materiality are opposed to and are the reverse of Life, which is Spirit, God, infinite and eternal. Mary Baker Eddy writes in "Science and Health with Key to the Scriptures" (p. 529), "Another change will come as to the nature and origin of man, and this revelation will destroy the dream of existence, reinstate reality, usher in Science and the glorious fact of creation, that both man and woman proceed from God and are His eternal children, belonging to no lesser parent."

Sleep produces oblivion, darkness, whereas God, Spirit, is light; and as one awakes from the false dream sense,

Truth, light, and Life unfold. When Christ Jesus was told that Lazarus was dead he said, "Our friend Lazarus sleepeth; but I go, that I may awake him out of sleep." Again, when called to the house of a ruler whose daughter, to human belief, lay dead, he said, "Give place: for the maid is not dead, but sleepeth." In both cases the power of the Christ, Truth, awoke the so-called dead from the false dream and the light of spiritual sense dawned for them through the clear vision of Jesus of the true man, created by God, eternally perfect and spiritual. This spiritual awakening annulled the false claim of death, which is the underlying fear that produces almost every form of discord and inharmony. Jesus' teachings and demonstrations were not only for those who actually heard his sayings and witnessed his deeds, but are equally for us to-day and for all future generations to recognize as the correct application of the spiritual Life-laws which alone now and eternally govern man. Let us, then, accept to the utmost of our capacity the truth regarding man and his relationship to God, the only creator, utilizing this knowledge daily, and by constant righteousness-right thinking-arrive at the full realization of Paul's words which he wrote to the Colossians: "For ye are dead, and your life is hid with Christ in God. When Christ, who is our life, shall appear, then shall ye also appear with him in glory."

Recognition of the Christ, Truth, lifts one out of all false material beliefs. The real man is truly the divine reflection, manifesting spiritual power far above all human concept. He who experiences this desideratum is enabled to follow Christ Jesus in the demonstration of man's dominion over all forms of error, sin, sickness, and even death, for all are the same falsity in a varying degree of human belief, produced by the hypnotic sleep of the Adam-dream and as easily dispelled by a knowledge of their unreality as is fear dissipated when we awake from sleep and exclaim, "After all, it was only a dream." As morning dawns and we open our eyes after a night of sleep all sense of darkness is destroyed and replaced by light. In like manner, with the dawn of spiritual sense as consciousness, all error, falsity, and materiality disappear. The morning breaks, light and truth are revealed, an understanding of God is gained, and man is free, casting aside corporeality and knowing nothing as real excepting God, infinite Principle. Mrs. Eddy in Science and Health (p. 465) writes, "Principle and its idea is one, and this one is God, omnipotent, omniscient, and omnipresent Being, and His reflection is man and the universe." This scientific definition of God is accepted only as spiritual light destroys the darkness of material sense.

Christian Science teaches us how to awake, insists on the allness and reality of Spirit and the spiritual creation, builds absolutely and entirely on Spirit, not matter, setting forth man's relationship to his Maker, the one Father-Mother God, sets metaphysics clearly above physics, discarding all belief in and every so-called evidence of any power apart from God. This supremacy of God, good, rightly understood and utilized actively in the manner learned through careful study of the Bible in conjunction with Mrs. Eddy's writings, is all-sufficient to accomplish healing as demonstrated by Jesus. As one is faithful in the study and application of this wonderful truth, so is he enabled to prove at least in part the truth of Christ Jesus' promise, "Verily, verily, I say unto you, He that believeth on me, the works that I do shall he do also; and greater works than these shall he do; because I go unto my Father." Paul, in his letter to the Ephesians, writes, "Awake thou that sleepest, and arise from the dead, and Christ shall give thee light." This

ı

:1

sleep, this death, from which we all must at some time awake, is the false belief of life and intelligence being contained within and as a part of matter, whereas God, divine Principle, alone is Life and All-in-all.

The Storm

EUGÉNIE PAUL JEFFERSON

STUDY of the words and works of the great Exemplar, A in the light of Christian Science, reveals certain incidents in the life of Jesus applicable to the solution of every human problem. Confronting present world conditions following the great upheaval caused by the fiery storm of war, we seem to be surrounded by clouds of error, tempest tossed, and adrift upon a seething sea. The seeming is but the supposed opposite to the real, however, and its mesmeric effects with all accompanying doubts and fears can be scientifically dispelled by applying to present conditions the lesson of the storm upon the Sea of Galilee as given in the eighth chapter of Matthew. To the disciples this storm appeared very real, and they were fearful of destruction, even though their dear Master whom they had seen perform so many wonderful works was with them in the boat. They were terrified. He on the contrary calmly rested, unconscious of fear or danger. The Son of man was unafraid of wind-for that was all there was to it, a sudden storm of wind, which frequently occurred upon the Lake of Gennesaret, as the Galilean sea was often called. Christ Jesus was vitally conscious of peace and security, even while his companions reproached him with carelessness of their safety.

In divine metaphysics, any supposedly material element is recognized as audible error, or rather a belief in evil making itself heard, as well as seen and felt. Jesus had taught these very disciples to pray, "Thinc is the kingdom, and the power," and had proved by divine authority that there could be in truth no power apart from God. The Master knew that material elements were without power to destroy and that by the process of reversal, to which every false claim is subject in Christian Science, this supposed power of wind must yield to the spiritual fact. This is shown on page 597 of Science and Health in the definition of wind: "That which indicates the might of omnipotence and the movements of God's spiritual government, encompassing all things." Then, continuing, she defines the counterfeit of this true wind as "destruction; anger; mortal passions."

But the disciples of Jesus failed upon this occasion to apply their knowledge of metaphysics. To their material senses the giant waves and the shrieking winds appeared very real, so that when the boat filled with water and began to sink they were consumed with terror. Yet in spite of the great tumult, their Master was calm. Christ Jesus knew no element of danger; the divine consciousness was and is eternally at rest in the security of omnipresence. Human consciousness, however, believing in the evidence of the material senses, indignant at the supposed unconscious sleeper careless of its safety, cried out, "Save us: we perish." Jesus awoke. To this man who understood God the material evidences of storm and danger meant nothing. How often had this evidence of the material senses tempted him to believe in it as real! At one time in his very presence it had thrown to the ground an epileptic boy, as though to say, "I will show you if I am not real!" Again it had tempted him through a withered arm, and even in the death of his well beloved friend Lazarus. But every effort of error to prove the evidence of disease or death to be true was rendered null and void by his supreme knowledge of reality.

The lesson of the storm reveals the fact that before rebuking the raging elements, the Master rebuked the lack of faith of his disciples: "Why are ye fearful, O ye of little faith?" Not until he had rebuked their fears did Jesus speak the "Peace, be still" to the winds and the waves. His voice was heard above the storm, for there followed "a great calm." The sea became as glass, the stormy winds as gentle zephyrs, the waves subsided, and the perfect day of God's creating was made manifest.

The lesson of the storm was not alone for that occasion, or period of time, neither was it given especially for that group of disciples. Its significance is proved as well as its application to present day conditions, through the spiritual understanding made possible by Christian Science. The solution of all problems is to know God, to realize Him as the source and condition of all. The belief in mental or physical disturbances has in truth neither reality or power because God is not the creator of evil; therefore evil has no origin and is not to be feared. To-day Christian Science utters the same gentle rebuke of the Master, "O ye of little faith,"—look beyond the evidence of the material senses, cast away the false witness, and believe only the true evidence of Spirit. Truth forever silences the untrue.

If the storm on the lake had been a condition created by God, could His beloved and obedient Son have annulled those atmospheric conditions against the divine will? The voice which spoke the word and stilled the storm is heard again through Christian Science. The wise are listening. The listening, translated by divine Science, is found to be a mental attitude, that element of humility and love which quells the storm invoked by pride, will power, and greed. Our boat upon the sea of experience will find a safe harbor against the shipwrecks of faith without understanding. As our dear Leader so faithfully points out in Science and Health (p. 203), "The foam and fury of illegitimate living and of fearful and doleful dying should disappear on the shore of time; then the waves of sin, sorrow, and death beat in vain." When fully understood, the truths of Christian Science prove that the real, spiritual man is already safely landed upon the golden shores of opportunity.

The Experience of Balaam

HANNAH WEBSTER WELCH

N the Bible there is much about a condition of thought called rebelliousness, stiff-neckedness, or as we to-day think of it, willfulness. It is interesting to study this quality of the human mind through the dictionary, where it is allied to witchcraft, to hypnotism, to sedition, and organized lawlessness, also to lust. Mary Baker Eddy, in her writings, has many times pointed out the subtle nature of it, the danger of yielding to its influence, and has warned her students to be ever on guard against this stumblingblock. On page 446 of "Science and Health with Key to the Scriptures" we read: "The exercise of will brings on a hypnotic state, detrimental to health and integrity of thought. This must therefore be watched and guarded against." On page 206 of the same book she says, "The power of the human will should be exercised only in subordination to Truth; else it will misguide the judgment and free the lower propensities."

Numerous unhappy experiences of the children of Israel in their journey from the bondage in Egypt to the promised land resulted from this quality of thinking; and those who were victims of it were inevitably led into fearful conditions and often to destruction. It is directly opposed to that meekness, or receptivity to Truth, which is willingness to

learn of God and to be obedient to divine Principle, to the possessors of which quality Jesus referred when he said, "They shall inherit the earth."

Among the many Bible narratives illustrating the operation of the human will is that of Balak and Balaam, a wonderful lesson to every student of Christian Science. When we are introduced to Balak, King of Moab, in the twentysecond chapter of Numbers, he is in a state of great fear concerning the appearance and evident purpose of the children of Israel to overrun and conquer his kingdom. In order that he may be sure of destroying them he has determined that they must be cursed—which is the first impulse of fear, superstition, and human will. He therefore sent messengers to Balaam, who was reputed to be a diviner. Balaam is pictured as having an earnest desire to do what God wanted him to do. The first messengers from King Balak found Balaam undisturbed and he was able to hear clearly, through his highest sense of good, what God said to him: "Thou shalt not go with them; thou shalt not curse the people: for they are blessed." Balaam, obedient, refused to go.

King Balak was not satisfied with this answer, and did what human will usually does-sent more honorable messengers, with promises of personal preferment. Then Balaam began to feel the confusing influence of human will and greatly desired to go. He lost sight of God's command, though he was very earnest in his desire to say what God wanted him to say. Nevertheless, he seemed to hear what he wanted to hear instead of God, as in the first instance. "If the men come to call thee, rise up, and go with them; but yet the word which I shall say unto thee, that shalt thou do." As he journeyed, human will still at work prevented Balaam understanding his faithful ass, and not until his difficulties increased so that he could not proceed farther, did he waken to the truth; he heard it through a most humble channel-his ass. Still confused, again he thought he received permission to go, but he was unwavering in his prayer to say what God wanted him to say. In her Message for 1900, Mrs. Eddy writes (p. 8), "When God speaks to you through one of His little ones, and you obey the mandate but retain a desire to follow your own inclinations, that is not obedience." And on the next page she continues, "Strong desires bias human judgment and misguide action, else they uplift them."

When King Balak heard that Balaam was come, he went to meet him and human will began to upbraid Balaam because of his delay in coming. Balaam's reply to the tyrant was uncompromising: "Lo, I am come unto thee: have I now any power at all to say any thing? the word that God putteth in my mouth, that shall I speak." The narrative next finds Balaam and the king in the high places of Baal offering sacrifices, to what? Not to Spirit, which is unchanging wisdom, but to human will, for Balak had outlined the answer and by means of incantations and formulas expected to force the diviner to pronounce the desired curse on the children of Israel. Then Balaam retired to talk with God, "And the Lord put a word in Balaam's mouth;" and he blessed the children of Israel. Again Balaam was taken to a high place of Baal that he might through seeing the enemy from a different angle be induced to curse them. The sacrifice was offered as before, and again Balaam talked with God, and He "put a word in Balaam's mouth"—a commandment to bless. Balak, still determined, took Balaam into another high place and again the sacrifice was offered. Then it is recorded that Balaam saw God's unchanging purpose to bless the children of Israel, "he went not, as at other times, to seek for enchantments, but he set his face toward the

wilderness." Then the mesmerism of human will being broken, God "put a word in Balaam's mouth," for he spoke according to his vision; he had at last seen clearly through spiritual sense. Balaam fearlessly delivered the blessing, and though human will turned in hate and anger on the spiritual idea, the truth which illumined Balaam's thought protected him and healed him of any desire to receive honors from any source but God.

How many students of Christian Science have earnestly desired to do what God wanted them to do, but through the mesmeric influence of human will have seemingly become confused and through experience have been forced to see and hear the truth. On page 496 of Science and Health we read, "You will also learn that in Science there is no transfer of evil suggestions from one mortal to another, for there is but one Mind, and this ever-present omnipotent Mind is reflected by man and governs the entire universe." Hence it is evident that Balak had no power over Balaam, but human will, influencing the thoughts of both, kept both from seeing the right idea and thinking from the standpoint of Principle. Balaam's earnest desire to say what God wanted him to say protected him through his experience and finally broke the mesmerism that prevented clear thinking.

It was indeed wisdom that gave us the by-law in the Manual of The Mother Church (Art. VIII, Sect. 6): "It shall be the duty of every member of this Church to defend himself daily against aggressive mental suggestion, and not be made to forget nor to neglect his duty to God, to his Leader, and to mankind. By his works he shall be judged,—and justified or condemned."

[Written for the Sentinel]

Thy Likeness

ETHEL E. ROCKWELL

As for me, I will behold thy face in righteousness: I shall be satisfied, when I awake, with thy likeness.—Psalms 17:15.

A SLEEP men dream, and dreaming see
A world of pain and misery.
To mist-bound eyes can naught unfold
But forms they vainly strive to hold;
Their erring thoughts make them to dread
And fear the paths they daily tread.

But they that walk by faith, not sight, Knowing they dwell in Truth and light, Can sense no ill, can fear no fall, Since God is Life and Truth and All, And He as everlasting Love Is all around, about, above.

Lord, bid my sleeping heart awake, All dreams of mortal power forsake; My thought make pure, my acts make right, Let me stand worthy in Thy sight; Knowing Thou art my God, be still And learn the secret of Thy will.

All that in aught concerneth me Perfected then, in Thee I'll see. My thought aroused from erring sleep Thy truth in perfect peace shall keep. Thy gracious image then in me Unfolding step by step, I'll see.

And I shall then be satisfied When, mortal fears and ills denied And earthly joys for heaven forsaken, In Thy dear likeness I awaken, And in my own, reflect through grace The radiant shining of Thy face.

Science

Doctor Angelicus, writing, in his philosophic way, in defense of the great order to which he belonged, declared that, properly considered, there is but one absolute Science, that of theology, and, consequently, that all the older socalled sciences are but relative to this in the theories they propound. Between the teaching of an Aristotelian schoolman of the thirteenth century and that of Christian Science in the twentieth there is, of course, a great gulf fixed. But read this passage, from Mrs. Eddy's "Science and Health with Key to the Scriptures" (p. 84): "All we correctly know of Spirit comes from God, divine Principle, and is learned through Christ and Christian Science. If this Science has been thoroughly learned and properly digested, we can know the truth more accurately than the astronomer can read the stars or calculate an eclipse." Then the wonder will grow as to why Aquinas slammed the door he seemed to be opening. The answer is very simple. Believing in matter, he was opening a door not to Spirit but to the catacombs, to death and not to Life.

Theology is the only Science, but theology is the Science of God, of Spirit, not of matter. Aquinas thought that Spirit was the ultimate of matter, that matter was somehow or other evolved from Spirit, eternal Life, and returned somehow to eternal Life through the gateway of death. Mesmerized, as he was, by the actuality of matter and death to his human senses, he nevertheless saw that if God were God, the only absolute Science possible was a knowledge of the word of God or theology. And hopelessly at sea for an explanation of the apparently inexplicable, he took refuge in the Aristotelian philosophy, and set to work to destroy unwittingly the Science of the gospel by reconciling matter with Spirit, instead of reducing it to its proper classification as a negation or nothing. Yet Jesus had made all this perfectly clear when he said to Nicodemus: "That which is born of the flesh is flesh; and that which is born of the Spirit is spirit. Marvel not that I said unto thee, Ye must be born again." The spiritual significance of these words the writer of the Fourth Gospel had perfectly elucidated, in his exordium, when he wrote, "He was in the world, and the world was made by him, and the world knew him not. He came unto his own, and his own received him not. But as many as received him, to them gave he power to become the sons of God, even to them that believe on his name: which were born, not of blood, nor of the will of the flesh, nor of the will of man, but of God."

The Science of theology is, then, though Aquinas did not know what he was implying, the absolute Science, and so the only Science. It is what the Greek text of the New Testament refers to, again and again, as "a scientific knowledge of God," though the translators, in their blindness, will translate it "knowledge of God." And this being so, it becomes immediately apparent that the only absolute knowledge there can be is a knowledge of Spirit, and that any

attempt to plumb the depths in matter is foredoomed to failure, inasmuch as it is an attempt to discover Science in a negation. "For," says the apostle to the Gentiles, with grim irony, "if a man think himself to be something, when he is nothing, he deceiveth himself. But let every man prove his own work, and then shall he have rejoicing in himself alone, and not in another. For every man shall bear his own burden." A tolerably plain hint to the world to mind its own business, and keep its hands off its neighbor, though a hint this world has shown no alacrity to take.

What then is the work the individual is commanded to prove? Obviously his scientific knowledge of God, of Principle. But inasmuch as Principle, God, is Spirit, the demonstration of the Science of Spirit entails a repudiation of the flesh. Not a mortification of the flesh, on a basis of the reality of matter, in the way understood and undertaken by Simeon Stylites or Daniel of Constantinople, by Francis of Assisi, and, in a way, by Doctor Angelicus himself, but by an understanding of the unreality of matter in the way taught by Christ Jesus, when he said, "If any man will come after me, let him deny himself, and take up his cross daily, and follow me." Now the word translated deny is more accurately to reject or deny utterly, and when a man daily makes an utter denial of the fact that man is born of blood, or of the flesh, or of the will of man, but is born instead of Spirit, God, then he truly denies the reality of matter, and knows too much to make matter real to himself by standing on a pillar or wearing a hair shirt. At the same time, he does very really take up the cross, for he discovers all the secret ways in which the flesh lusts against the Spirit, and the Spirit against the flesh, and so discovers exactly what Paul meant when he wrote to the church in Rome, in a passage which has been so finely rendered by a great translator, "In my inner self I sympathize with the law of God, but in my body I can see another law at work, conflicting with the law of my will, and making me prisoner to itself, namely, the law of sin, residing in my body. Miserable man that I am! Who shall deliver me out of this body of death?" And Paul answers his own question, quite clearly for those with ears to hear, that the clue out of the Cimmerian darkness of the ignorance of matter is a scientific knowledge of God, Principle.

The engineer does not, however, build his bridges by merely reading a textbook, nor does the chemist compound his gases in his study, but in his laboratory. Thus Christ Jesus did not expect his students to master the Science of Spirit, Principle, by simply listening to his teaching. Nobody knew better than he that faith without works was dead. So he sent out these students to demonstrate their knowledge practically, both by preaching and healing. To say there is no matter whilst acting as if there was nothing but matter, is either utter nonsense or profound dishonesty. If a man really believes matter is unreal he will begin daily to show less and less trust in or respect for matter. "Spitting," Mrs. Eddy says, on page 170 of "Miscellaneous Writings," "was the Hebrew method of expressing the utmost contempt. So Jesus is recorded as having expressed contempt for the belief of material eyes as having any power to see." But Jesus showed his understanding of the unreality of matter not merely by his contempt for it, but by proving, in the case of the blind, that sight was spiritual and

To put it a little differently, the student of the Science of Christianity must daily be proving that Spirit and not matter is attracting him. This is what Mrs. Eddy means when she writes, on page 207 of Science and Health: "Be-

ŗ.

1;

cause God is Spirit, evil becomes more apparent and obnoxious proportionately as we advance spiritually, until it disappears from our lives. This fact proves our position, for every scientific statement in Christianity has its proof."

FREDERICK DIXON.

The Equitable Price

At a time when prices are changing, there is every reason to rejoice and nothing whatever to fear. If a price is really right for one, it must be right for all concerned. Otherwise it would not be truly right. Any readjustment must be taken as an opportunity for demonstrating more clearly than ever the supreme government of Principle. Only in this way can the price nearest right in the circumstances be established. This is what every business man or woman as well as every consumer needs to know. No human phase of things can ever work a hardship on any one, if each one knows for himself that the activity of the divine Mind is all that is really manifest, with both perfect continuity and infinite flexibility, in spite of human phases. Hence a readjustment of prices in conformity with Principle must mean a wider prosperity than ever before for all. The main question is as to what is actually right for one and for all. This can be answered only through that sturdy prayer which is consecrated reasoning in accord with divine intelligence. So, in the midst of any economic situation, right reasoning on the basis of divine Principle as the only cause of true price or anything else is enough to redeem any suppositionally opposite sense of things through the replacement of the spurious with the genuine.

Divine intelligence expressed is all that constitutes true value. The manifestation of intelligence is the idea of which any so-called commodity is merely the human counterfeit. Since the divine Mind is infinite, its idea is necessarily varied eternally in its activity of unfoldment. The whole activity and exchange or interchange of activity which represents Principle cannot be limited within human concepts. To one who understands this, the fluctuations of mortal prices are of importance only as they turn attention to the boundlessness of the unfoldment which is spiritual. Spiritual value certainly transcends mortal attempts at valuation. The recognition of just how Truth manifests itself involves a precise balance in spiritual accounting, a rendering to God of all that is due

The real price which one pays to the great Giver of all gold is simply continuous right activity. This is, of course, boundless and absolutely equal to the value received. In one sense, the real man's whole living is energetic receptiveness to Principle. In another sense, it is just as correct to say that spiritual existence is the divine Mind with its expression. The two statements are after all identical in their meaning. Combining them, one sees that expression of intelligence is real receptivity. In other words, true expression and true receiving are one indivisible process. As one knows this, one realizes that immortal value and immortal price are spiritual, quite apart from any material suppositions. Only in this way can one truly keep his balance in the very face of unioreseen complications in human economy.

From such reasoning as this, we see that the understanding of Christian Science and its application to every seeming problem are entirely metaphysical. The knowing of the truth, which is Christian Science, shows one the broadest sense of price, as of anything else, in all circumstances. Thus, if one will but turn to Principle and know only what Principle knows, one need never be alarmed in the slightest by

any belief about prices. The application of genuine understanding to any problem of business proves scientifically what is of universal benefit. It blesses all equally through the giving of the true idea in place of any belief in limitation. As Mrs. Eddy says on page 252 of "Miscellaneous Writings": "Christian Science is not only the acme of Science but the crown of Christianity. It is universal. It appeals to man as man; to the whole and not to a portion; to man physically, as well as spiritually, and to all mankind."

Christianly scientific understanding is actually what one must use in order to pay one's bills and to meet adequately the constant demand for activity. That is to say, understanding of Christian Science is the true means of paying the only true price there is. The function of Christian Science Mrs. Eddy goes on to explain further, on the page just quoted, when she says: "It has one God. It demonstrates the divine Principle, rules and practice of the great healer and master of metaphysics, Jesus of Nazareth. It spiritualizes religion and restores its lost element, namely, healing the sick. It consecrates and inspires the teacher and preacher; it equips the doctor with safe and sure medicine; it encourages and empowers the business man and secures the success of honesty. It is the dear children's toy and strong tower; the wise man's spiritual dictionary; the poor man's money; yea, it is the pearl priceless whereof our Master said, if a man findeth, he goeth and selleth all that he hath and buyeth it. Buyeth it! Note the scope of that saying, even that Christianity is not merely a gift, as St. Paul avers, but is bought with a price, a great price; and what man knoweth as did our Master its value, and the price that he paid for it?"

The price of consecrated spiritual understanding is the one price that is always equitable. It is just right in its availability for all circumstances. As one applies this understanding in all his dealings, he demonstrates the equitable price in the way that is nearest right for all in the conditions of the present. He finds that he is not merely theorizing but that he is veritably experiencing the goodness of God and thus appreciating true spiritual values. The practice of Principle is not a playing with words, a quibbling over terms, but is exact expression of the divine Mind. To know this reduces worry to utter nothingness and proves that the orderly distribution of good is the accomplished fact in the omnipresent realm of the real. In this way, every false sense of price has to be healed through the revelation and demonstration of the perfectly satisfactory spiritual idea. So every student of Christian Science has the endless opportunity to do good work by reasoning rightly on whatever points present themselves as timely, as requiring here and now the ministration of Truth to supplant human error. GUSTAVUS S. PAINE.

[Written for the Sentinel]

Gratitude

CHRISTINE EMERY

I THANK Thee, Father, for the light,
That shines effulgent on my way,
Helping me see and solve aright
The problems of the day.

I thank Thee, Father, for the truth, Triumphant and eternal, That makes the voice of error mute And proves Thy way supernal.

I thank Thee, Father, for the love
That fills my every need,
And lifts my thought to realms above,—
For this is peace indeed.

Testimonies of Healing

Constant reminders of my abundant blessings, and of the bondage of ill health and wrong thinking that have yielded to the liberty of even a partial understanding of the unlimited truth as taught and lived by our revered Leader, Mary Baker Eddy, impels me to express gratitude for my healing, which will be indeed a small portion of my debt to divine Love for the knowledge of my true birthright.

As a very young girl I had fallen in with companions of discreditable conduct, and a young boy who was raised in a family with an understanding of Christian Science so pointed out the folly of my way and gently led me to see the wisdom of good thoughts, that I became a Sunday school student. Many beautiful healings resulted. Later my mother became interested and has ever since remained tried and true. Those early steps have ever remained dear to me in hours of darkness, and the Sunday school work an ever shining light through the clouds. After four years, and while yet a very young girl, I turned from all the many reminders of Truth's sustaining power, and, in another city, placed myself under the care of medical men. Let me give all credit possible to them, for they did all they could for my betterment, yet under their care I became more dependent upon medicine and even submitted to an operation. I was restless, always looking for some new form of entertainment, or excitement, until I was finally driven into a corner. That corner proved to be the best place I had been in for fourteen years, for it made me wake up.

During these years I had more or less closed my eyes to Christian Science and it grew very dark, mentally and physically, so dark that the best oculists were able to benefit me but little by the use of glasses; little by little I was preparing myself for total blindness, counting my steps everywhere, so that when that which I feared came upon me I could continue with my daily tasks, by count. For months some one else had to do all my reading and writing, and added to this was a multitude of other ailments, and I was alone in the world with two very young children.

With this mental blindness came rheumatism, heart trouble, broken arches, undesirable habits, faultfinding, lack of funds and home. At this time I began to remember the Sunday school teaching and applied what little I could recall. One day I ran the sharp end of a tack into what was termed my good eye (it was none too good). I staggered to the telephone to ask my mother to give me help as best she could with her understanding of Christian Science. The healing was instantaneous, the tears of pain gave way to tears of joy and I began to sing one of Mrs. Eddy's hymns. The opening of the eye followed and for that I am more thankful than for all else. From that day on, I never felt the need of glasses and have never used any. I now read more in a day than was ever my desire to read in a year. I was completely healed.

With many temptations, numerous struggles, and sincere endeavors to comprehend Science and Health, there were times when the words all seemed to dance before me, times when a thousand torments would try to crowd out all earnestness; still I continued. The old restlessness, the impatience, and sense of being easily influenced in the wrong direction, had all gone with the blindness, and I was able, through reading and rejoicing, to work out all the other problems that I had to face. The slowest to yield were the temptation to belittle my former companions, excusing self behind their faults, and the heart trouble. For two years these had severe returns, but when I was willing to stretch out both

hands and accept God's blessing, then I mastered that lie and was healed of both. I am indeed glad for every problem I have had to meet, for each has been a right-about-face, when I was not going in the right direction and needed to face the light; facing the light, the darkness is dispelled.

Love has provided every need for myself, husband, and two children, and we are endeavoring to live this truth as taught by Mary Baker Eddy, that by our example the world may see that, in the words of one of our hymns (Hymnal, No. 153):—

A glorious day is dawning,
And o'er the waking earth
The heralds of the morning
Are springing into birth.
In dark and hidden places
There shines the blessed light;
The beam of truth displaces
The darkness of the night.

(Mrs.) ALICE L. DUSTIN, Portland, Oregon.

I gladly verify my wife's testimony relative to the recent years and also wish to add mine. Through a desire to please my wife, I first took an interest in Christian Science and this interest has developed to the extent that I have become active as best I can in the exemplification of this great and glorious work. Having been blessed with good health I have had few ailments that required healing, but my healing has been that of wrong thinking, a purification of thought and action, and a more kindly feeling toward my fellow men. I have been healed of profanity and of broken arches.

I am grateful to our dear Leader, Mrs. Eddy, for leading me to the right idea of God, and am deeply grateful for the privileges I am enjoying in being active about the Father's business, and I am realizing more and more each day that these privileges also include our daily tasks, which we must do with a will and a desire to do right.—G. W. Dustin, Jr., Portland, Ore.

I should like to express my deep gratitude for the great benefits I have received through Christian Science. It was brought to my notice by the lady with whom I lived, who was a student of Christian Science. For some time I had been in delicate health and had constant gatherings in both ears, which were very painful. I was also much inconvenienced through deafness and noises in my head. Eventually the doctor told me that he could not help me further and that nothing could be done to relieve the condition. Naturally I was greatly depressed. It was then that this lady suggested my going to a Christian Science practitioner. This I did, with the result that I received instantaneous healing and I have had no return of any of these troubles. I began to read "Science and Health with Key to the Scriptures" by Mary Baker Eddy very carefully and grew to love the book, and through it to understand the Bible and its beautiful teachings. In my daily work I find that Science is a great help to me and a source of strength and joy. The belief in health laws was destroyed by knowing that our heavenly Father did not make them. I feel that I cannot be sufficiently grateful for all that Christian Science has done and is doing

(Miss) ENA RANDALL, Southsea, Hampshire, England.

I wish to express my sincere and heartfelt thanks for Christian Science. Some years ago I was healed of a complication of diseases, for which healing I am more than grateful. Chronic catarrh, bronchial trouble, palpitation of

the S

the heart, nervous prostration, and laceration at the birth of my third child, which left me in a very deplorable condition and was accompanied by great mental worry, were healed. Life seemed unbearable; I could hardly walk from chair to chair in an effort to do my housework. I spent a great deal of time in bed trying to regain strength. I had a number of doctors but they could not do anything to help me. Then Christian Science came into my life. Everything is different now. I have gained peace of mind and am strong and healthy, all of which I owe to Christian Science. I more and more appreciate the spiritual awakening which I have received through studying its teachings. If we will only be faithful to the Master's teachings, as revealed to us by Mrs. Eddy, we shall be able to demonstrate harmony, no matter what the obstacle may seem to be. Sorrow, limitations, disease, and other troubles which may arise can all be overcome through Christian Science. I fully appreciate Mrs. Eddy's work for mankind. She has made it possible for every one to follow in the footsteps of Christ Jesus.

(Mrs.) THERESE HANNIGAN, Detroit, Mich.

A sense of gratitude for the help received through Christian Science in time of need impels me to give this testimony. In May, 1918, I was treated by a New York specialist of notable reputation for the cure of asthma. The severe treatment was followed by a cough, hemorrhage, and extreme weakness which became worse toward morning in spite of immediate medical treatment. The accompanying sharp pains in the chest became so intense that for three weeks I spent sleepless nights. After having resorted to three different remedies without the slightest results, and the physicians being unable to give me any encouragement as to my recovery, I decided to have a Christian Science practitioner called.

Although Christian Science was not new to me, since I had heard several lectures and attended the Christian Science church frequently, the right concept was lacking, and I was superstitious. Only in this time of extremity could I decide to seek healing in Christian Science. How astonished I was when within fifteen minutes the pain completely ceased and at the end of the treatment, after three weeks' illness, I was able to accompany the practitioner to the door, expressing my gratitude. The other residents hardly believed that it was I when they saw me coming downstairs. During the following night I slept until about twelve o'clock, when I suddenly awakened with the same pain; I immediately took "Science and Health with Key to the Scriptures" by Mary Baker Eddy and read, after which it ceased. I then slept until morning, when the attack again reappeared less severely. There were several less severe recurrences, until finally it ceased completely.

I thought the worst had been overcome, but night sweats set in, and I became extremely emaciated and was unable to stand on account of weakness. Christian Science, however, again brought the desired help. After one treatment from the practitioner the perspiration ceased and my condition improved visibly. After only a week I was able to take a walk, and after a short time regained normal weight. Old acquaintances who met me declared that I never looked healthier. In spite of the fact that I had suffered from stomach trouble and asthma for over thirty years, I have now not the slightest reason for complaint and eat all that is set before me.

Once more I called for the practitioner, not because I was ill, but because I lost faith, and fear seemed to overpower me; I could not grasp the wonder of my healing.

Now, however, I am invulnerable, for I read Science and Health daily and each day experience a clearer understanding. I am very grateful for the great work which our beloved Leader has done for mankind.

ALBERT WEIGLE, Brooklyn, N. Y.

4

There is only one way in which to express one's gratitude for the glorious truth which is explained in Christian Science, and that is by making one's life a testimony to it, and by obedience to its rules; in other words, keeping the First Commandment.

When counting my blessings my heart is filled with joy because I realize that they are all gifts from a wise and ever present God. Christian Science has taught me what God is. It has taught me that He is Love, and the thought Mrs. Eddy gives us on pages 149 and 150 of Miscellany has always proved a pillar of comfort to me. "Remember," she says, "thou canst be brought into no condition, be it ever so severe, where Love has not been before thee and where its tender lesson is not awaiting thee." Having been born into a family of Christian Scientists I have never taken a drop of medicine in all my life, and have not used a material remedy of any kind. Christian Science has been my constant support throughout my school years and is continuing to meet all of my needs.—(Miss) MILDRED E. BEANS, San Jose, Calif.

I have often longed to tell the whole world of my healing in Christian Science and of my deep gratitude to God and to all who are living this practical truth. I did not come to Christian Science for physical healing but because I was heart hungry for an understanding of God that would render Him of more than emotional or theoretical help in everyday affairs. The teaching of Christian Science that God is ever present Principle and this Principle is Love, has satisfied that heart hunger and is still satisfying it.

I had not long to wait after the first glimpse of divine Principle, before the efficacy and availability of Christian Science were proved to me in a case of physical need. I was at work cutting posts in the mountains of Colorado. It was some two and a half miles from my camp to where any one lived, though another camp which was visited occasionally was within a quarter of a mile of mine. One day I became ill with ptomaine poisoning. I was alone, too ill to walk, and apparently helpless. I managed to get to my feet but fell again. Then my eye fell on the textbook, "Science and Health with Key to the Scriptures," and an old copy of the Sentinel. I picked up the Sentinel in the hope of finding out how some of the healings told of were accomplished, for I knew I must have help soon. Then I turned to Science and Health and read (p. 494), "Divine Love always has met and always will meet every human need." I clung to this steadfastly till 10 a.m. next day, when I was able to walk to the camp near me and leave a note telling of my condition. I managed to get back to my own camp again and lay down, and at nine o'clock that night help came. I was taken down to the settlements, a practitioner of Christian Science gave me one treatment, and three days later I went back to work, a well man. This proved to me conclusively that man is never alone or helpless. His God, divine Principle, is ever present and is equal to the need, whatever it may be.

The light thrown on the Bible by the textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy, has rendered it a treasure house, without a closed door, to me. Never has Christian Science failed to meet my

need when I complied with its simple rules. I feel more gratitude each day for Christian Science, and I know that my gratitude must grow still greater as I realize more clearly the ever presence of this omniactive Principle, God, that Christian Science has revealed.

CORNELIUS HEDG-PETH, Mattapan, Mass.

4

I enjoy reading the testimonies in our periodicals, and have received so much help from them that I feel it is my duty to tell what Christian Science has done for me. Through reading our textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, I was healed of constant colds, sciatica, and many other ailments. My husband has also received many blessings. I have found that by rising earlier every morning and reading the Lesson through my work is made easier and I can do much more than I used to, and am happier as the days go by. Although I am very grateful for all the material blessings I have received I am more grateful for the spiritual uplift and to know what God is.

I wish to speak of the protection and help animals get through Christian Science. When my dog was run over by a motor, I declared the truth and he was not hurt in any way. In one absent treatment another dog was healed of a rattlesnake bite. The owner, who lives about one hundred miles from here, telephoned me to treat him, as she did not know what to do. The first thing that came to my mind was what Mrs. Eddy says of serpent in the chapter on Genesis, on page 515 of Science and Health, and the "scientific statement of being." I was very grateful for this demonstration as the family all laughed at my friend for calling me up. She called on me lately and bought a copy of Science and Health during her stay, saying that she wanted to know more of this beautiful truth. I am so grateful for all the blessings we have received and for all our literature.-(Mrs.) JEANNETTE CHARBONNEL STUART, Los Angeles, Calif.

For a long time I have felt I should give my testimony through the Sentinel, that it might help some one who is suffering and in mental darkness. Almost two years and a half ago I became discouraged over the different religious beliefs in which I had failed to find any spiritual benefit. I was hungering and thirsting for spiritual food, for "the kingdom of God, and his righteousness." A friend of mine and I had talked about Christian Science, as she needed spiritual help as well as myself, so we determined to procure the book, "Science and Health with Key to the Scriptures" by Mary Baker Eddy. I soon found we could not all of us read in the one book, as there were three or four in her family who desired to read it, so I decided to get a book of my own. I started to read, and the more I read the more I wanted to; I could not find a stopping place. In about three weeks a wonderful change had taken place. First I felt as if I had not a friend left. I felt as if I were lost in a wilderness, in total darkness, but all at once it seemed as though a great and heavy cloud was lifted, and the truth that "the kingdom of God is within" was revealed to me. All I could say was, "God is Love and God is my Life, and there is none else beside Him." I was not seeking for physical healing, but I was healed of rheumatism in my ankles, also of torpid liver, constipation, and stomach trouble. My hair had been falling out till the front of my head looked bare. Now I have nicer and longer hair than before. This has all come about through the reading of Science and Health.

The following winter, when the walks were covered with

ice, I stepped out of the back door and my feet slipped. I fell on my right knee on an upturned corner of cement sidewalk and was severely hurt. I could not get up for a few minutes, the pain was so intense. Then the thought came to me, "Now is your time; prove your progress by demonstration." Just as soon as I had declared the truth and walked about ten or fifteen feet all pain had left, and I walked three blocks and a half to the post office, and home again. I was healed. I am so thankful to God, but words are inadequate to express gratitude. I want so to live that I may prove myself a child of God, and follow in the footsteps of Christ Jesus, the Way-shower.

I am also thankful to God for the life of that pure and unselfed woman, Mary Baker Eddy, for the undefiled religion of Christ Jesus, which had been lost sight of. I am also thankful for the literature, and to those dear friends who have helped me on the way. My heart is overflowing with gratitude, words can never express my happiness. I feel in my heart what our dear Leader expresses on the flyleaf of Science and Health:—

Oh! Thou hast heard my prayer; And I am blest! This is Thy high behest:— Thou here, and everywhere.

(Mrs.) Anna A. Laverty, Wichita, Kan.

٠

I wish to join the most grateful of people in testifying to my healing through Christian Science. For three years I suffered everything that a man could. Morning after morning my wife had to help me out of bed and dress me for my work. Finally I was sent to a hospital and the doctor told me there was no help for me, and sent me home to die. A short time after I reached home I grew worse, and the doctor told my wife that I might possibly live until midnight but that he did not think I could. After he left we called a Christian Science practitioner. When the doctor called the next morning I was up and had had my breakfast. I discharged the doctor and in one week went to work, and have not lost a day's work or taken a dose of medicine since, thanks to Christian Science.

My trouble was kidney trouble, the doctors took an X-ray photograph of one and said I had a fibroid kidney. It is ten years since this occurred and I am alive to tell the tale and working every day.—J. W. Bennett, Sparks, Nev.

With heartfelt gratitude to God I desire to give testimony to the great blessings which I have received through Christian Science, hoping that it may result in healing to others. In the spring of 1916 I had a severe attack of diphtheria, after which I became lame and was obliged to remain in bed for six months. I had children and a household to care for, and my husband was at the front; consequently, I

seemed alone, sick and helpless.

My throat was paralyzed, I had no strength to swallow, taking only a liquid through a straw, and it was believed that I would starve. Up to that time I had been under medical treatment, but all material remedies were in vain. But "man's extremity is God's opportunity." At this time my sister, who had been a Christian Scientist for years, visited me and told me of Christian Science. Through divine guidance conditions were to change. With complete confidence I turned to Christian Science and asked a practitioner for absent treatment. After the first treatment I was able to take some nourishment. Soon afterwards I could move my limbs, and after some weeks walk about the room. Thus through the power of God I improved daily and in a short

77.

time was completely healed. Four years have passed since my healing, and never before in my life have I felt so well. I have learned that God is Love, that only good comes from Him, that we are subject to no other power but His, and no matter how great the human misery may seem to be, divine Love as Physician and Comforter is greater, more powerful.

With sincere gratitude I think of our Leader, Mrs. Eddy, who has again showed us the way to light and Truth and taught us the divine ever presence in such a clear way that it has become practically demonstrable.

(Mrs.) Anna Lippel, Wettmar, Hannover, Germany.

"Before they call, I will answer; and while they are yet speaking, I will hear." This promise of the Father, as voiced by the prophet Isaiah, has been proved to me by the understanding of Truth gained through Christian Science. I was instantaneously healed of biliousness. Hardly a week passed without one of these attacks. Then defective eyesight vanished in three days through reading a testimony in the Scntinel; constipation, for which I took material remedies for over ten years was healed, also a displaced knee joint. I heard it snap after I had retired, and the next morning I

found that Truth had made me whole again.

At the beginning of the war every one was insuring against air raids, and this problem presented itself to me. I as usual turned to divine Love for guidance, when a thought of protection from the ninety-first psalm came to me. I was protected by Truth and during these experiences I was calm, knowing that God was with us. I could write a book on the many blessings that have come to me through the power of Truth. Only as we rely on God and imbibe the spirit of our textbook, replace material beliefs with spiritual ideas, and love our neighbors as ourselves are we truly grateful to our Leader, Mrs. Eddy, for giving to us the truth.

(Mrs.) CLARA ANDERSON, Hull, Yorkshire, England.

Six years ago I was invited to a Christian Science church by a very dear friend, who has since become my wife. I had not been to a place of worship for over thirty years. I had been knocking about the world and was heartily sick of everything. I found rest at last in Christian Science. Mentally I was a wreck, but after gaining a little understanding the truth made me free. I had worn glasses for five years, and was also a great smoker. For thirty years I took drugs for constipation. These discordant conditions were all overcome through Christian Science. I had a fall about twenty feet from a ladder and fractured some ribs and cut my arms badly. I was entirely healed in four days. About twelve years ago I had a similar accident and was under medical treatment for seven weeks. I have much to thank Mrs. Eddy for in teaching us the truth about God and man.

HENRY ANDERSON.

Through demonstration Christian Science has made the presence of God a conscious reality. After studying Science and Health on two different occasions with the idea of helping members of the family, I discovered that I needed to be healed. By the time Science and Health had been read half through I was convinced that Christian Science is God's law, the truth, and I did not need to see a physical demonstration of its power but knew intuitively that in this presence all evil vanishes. Courage and satisfaction gradually replaced the old condition of despair, fear, and discontent. One of the ways in which the truth first unfolded to me was in the conviction that the use of material medicine is idolatry. Shortly after this, constipation, for which medicine

had been taken every night, disappeared. Earache which used to last three days and nights, as a rule, was overcome. Doctors in Europe and America had not been able to heal

this last mentioned condition.

Shortly after becoming a student of Christian Science a very severe attack of kidney trouble tried to conquer me. During the struggle with this disease never once did I admit its claim to reality. Through the study of Science and Health this was overcome in about three weeks. The pain from a badly sprained ankle was overcome immediately. The exposed nerve in a tooth caused me no more suffering after I had studied Science and Health for about an hour. and the tooth was filled a few days later without any pain.

Strength and endurance have been demonstrated. Before studying Christian Science a short walk was enough to cause fatigue. Now it is possible to walk twenty-five miles or so in a day without fatigue or stiffness. Many other physical healings have been experienced. A disease of twenty-five years' standing was healed for a member of our family. Other conditions which physicians said would never be overcome have been conquered through Christian Science.

That which means most in my experience, however, is the ever growing understanding of the reality of God's creation, which endures forever. In the very place where mortal mind seems to be struggling with some phase of the illusion of the presence and power of evil, right there the conquering good is proved to be the All of activity. The works written by our beloved Leader, Mary Baker Eddy, and the periodicals established by her are continually helping me to perceive and practice the truth in a larger way.

(Miss) MABEL C. LUCE, San Francisco, Calif.

Christian Science has done so much for me in the past three years that I want to let others know of the many blessings I have received. Through Christian Science I have been healed of rheumatism, sprains, and numerous other physical ailments. During an emergency, while in the army, I was vaccinated and infection set in. It was feared that I might lose my arm, but by applying my knowledge of Christian Science I was completely healed in a very short time.

Other problems in the form of financial worries, school studies, and the choice of a vocation have been met and solved by knowing the truth as contained in the textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy.—HAROLD C. KING, West Point, N. Y.

I am so thankful for the healing, through Christian Science, of what physicians called a very bad bowel trouble. I had been operated on five times, and was told by the doctor in charge that if I did not have another operation I could not live. I have also been healed of spinal disease, kidney and liver complaint, and many other diseases.

I am so grateful to God, for I know He is a God of love and does care for His children. I want so to live that I may help others as I have been helped. I love all of Mrs. Eddy's writings and am truly thankful to all the kind friends and practitioners who have helped me to know the truth. I love the Lesson-Sermons; they are such a joy and comfort to me each day. I only need to "stand porter at the door of thought" (Science and Health, p. 392), and my joys are complete.—(Mrs.) ANNIE E. MATHISON, Wiggins, Colo.

I am glad to say my wife's statement is true. I have been healed of piles and rupture, through the help of a practitioner. I am truly thankful for all the blessings received through Christian Science.—MARCUS E. MATHISON.

Signs of the Times

["Right Decision"—The Christian Science Monitor, Boston, U.S.A., July 17, 1920]

The individual is constantly facing situations in which he must decide upon a desirable course to pursue. It may be that a decision is called for immediately, without hesitation, or that the occasion is such that it allows of further consideration. Again, it may be that the problem presented is but a small one of everyday occurrence or, possibly, it is one by which, if it is not met rightly, his whole future may be affected. In either case, he wishes to take the step that will give him the greatest assurance of good. Whatever answer he gives must, of course, be based upon what he knows about the particular question he is considering, or, if he does not know all about it, his answer is based partly upon his relative belief. It is certain, however, that to place himself in a position to receive the greatest benefit, he must decide in accordance with divine Principle; and in the degree that he understands Principle will he be able to attain to what is true and right; for, as Mrs. Eddy says on page 288 of "Miscellaneous Writings," "Wisdom in human action begins with what is nearest right under the circumstances, and thence achieves the absolute."

Perhaps the occasion is one in which a great deliberative body is in session, considering a highly important subject. Obviously, whether the action it will take is to be governed by a majority, or whether it is to be unanimous, the decision must rest primarily with the individual. And just so far as the primal decision of each individual is right, the final decision of the entire body will be right. If each of those who participate in the ruling vote has made his individual decision according to Principle, then the final decision and action of the assembly will be in accordance with Principle. But if this is not the case, if the ruling majority have, as individuals, based their decision upon mere belief, then it is likely that their combined action, as a result, will be wrong. And as nothing is settled until it is settled rightly,settled according to Principle, they have not arrived at a true and permanent decision; but, on the contrary, they have handed down a makeshift, and have simply put off the true and right decision until another season.

Here one may well pause to consider what one knows of Principle; for one must know Principle, he cannot believe it, for the simple reason that Principle is perfect, omniscient Mind, which admits no element of belief. In other words, the divine, all-knowing intelligence, which is God, has, at all times, positive knowledge. Principle contains not a single infinitesimal atom of negation. Knowledge can never become mere belief, for belief savors of doubt, and both belief and doubt are qualities of the so-called human mind and have no place or part in the divine Mind.

Mary Baker Eddy, in "Science and Health with Key to the Scriptures" (p. 226), has written, "Human codes, scholastic theology, material medicine and hygiene, fetter faith and spiritual understanding." And just below, under the marginal heading, "House of bondage," she writes: "The lame, the deaf, the dumb, the blind, the sick, the sensual, the sinner, I wished to save from the slavery of their own beliefs and from the educational systems of the Pharaohs, who today, as of yore, hold the children of Israel in bondage. I saw before me the awful conflict, the Red Sea and the wilderness; but I pressed on through faith in God, trusting Truth, the strong deliverer, to guide me into the land of Christian Science, where fetters fall and the rights of man are fully known and acknowledged."

One may gain from this that man's right is to be free. And, if one is to be free, one must know just what one's rights are, acknowledge them, and put them into practice. All through the Bible it is set forth, in plain speech and in parable, that the spiritual man is free; that he, in the image and likeness of God, is identified with Spirit. It follows. then, that man's birthright - his first-right - is spiritual identification; that is to say, his right, one might say his privilege, is, at all times, to reflect God, to express good, to be right. Mrs. Eddy has given the "land of Christian Science," referred to in the above quotation, to the world, -to those who wish to lay hold of this birthright and escape from the "land of bondage" and from the bewilderedness of material beliefs of every description. Christian Science is showing many how to overcome every trouble "that flesh is heir to" by giving its sincere student the necessary metaphysical understanding to discern right from wrong, good from evil. By Mrs. Eddy's published writings and through the channels which she established for the dissemination of her teaching, this Science is available to every seeker of

The need, then, in order that one may be in the position of deciding anything aright, is to gain an understanding of the perfect, divine Principle underlying and overlying all things. One may well heed the wise man's advice as given in the book of Proverbs: "Yea, if thou criest after knowledge, and liftest up thy voice for understanding; if thou seekest her as silver, and searchest for her as for hid treasures; then shalt thou understand the fear of the Lord, and find the knowledge of God. . . . Then shalt thou understand righteousness, and judgment, and equity; yea, every good path." And Jesus, the master Metaphysician, in his Sermon on the Mount, applicable to all generations, tells us: "Ask, and it shall be given you; seek, and ye shall find; knock, and it shall be opened unto you: for every one that asketh receiveth; and he that seeketh findeth; and to him that knocketh it shall be opened." Here it is clearly evident that there is a condition to fulfill before one obtains the reward, and one will find that as each step is taken along the way to spiritual understanding, as each new position is necessarily proved and demonstrated, the reward is received.

All of which, it will be seen after a little sincere reflection, means that as one progresses spiritually, he will increase in his ability to solve the problems presented in the course of daily living with a growing confidence of doing so rightly and in accordance with Principle. He will perceive that an erroneous decision is possible only so far as an erroneous belief concerning the question is falsely supposed to be consciousness manifest. From a metaphysical viewpoint—and there is no other true point of view—when belief ceases to be erroneous it ceases to be belief; it at once gives place to knowledge, and right then, naturally and inevitably, and in accordance with perfect Principle, the right decision is the instantaneous and harmonious result.

[From "Seventy-Five Years of Pure Science" in The Scientific American]

For the present, if we cannot say that matter is electricity, we may at least assert with confidence that the distinction between different forms of matter is wholly an electrical one. . . . A further development in line with this has come, in the immediate present, from the field of pure mathematics. It is altogether too early to attempt to place the Einstein theories in their permanent place. It is not too early, however, to say that these theories indicate a unity between different apparently diverse things such as had

never before been suspected. It shocks our sensibilities to be told that energy and matter are identical to the extent that we may write an equation showing how many ergs it takes to equal one gram; and that time and space are identical to the extent that we may write another equation showing how many seconds are the equivalent of one centimeter. Nevertheless, this is in direct line with the whole tendency of nineteenth and early twentieth century science, which has moved always in the direction of generalization, all in the direction of revealing that things previously supposed to be different are in reality not so.

[The Stage and the Problem of Faith]

A notable incident took place in London, recently, when, on the invitation of the management, ministers of various religious denominations attended a matinée performance of Mr. Somerset Maugham's new play "The Unknown" at the Aldwych Theater.

Very briefly the plot is this: Major John Wharton has returned from the war, bringing with him many military honors, but leaving behind him the orthodox beliefs in which his parents had brought him up. His new mental attitude begets consternation, grief, and worse, in his family circle, and is the cause of much controversy among their friends. It results, further, in the breaking off of a long-standing engagement to a lady who returns his affection but will not link herself with one who thinks as the young soldier has now come to think.

Practically all the characters in the play serve to bring out a religious point of view, perhaps the most striking being that of Mrs. Littlewood, a widow who has lost all her sons in the war. She returns to the little Kentish village of Stour where the scene of the play is laid, and shocks her friends by the apparent levity with which she regards the whole matter. As a review of the play in The Times puts it, she returns "to tell the people of Stour how much she had enjoyed the music halls in London, and how pleasantly she looked forward to giving parties in her great and now empty house. And when they began 'going on at her' about her heartlessness and want of faith, she said she would rather play piquet with old Colonel Wharton than discuss her love and her religion. And when still they went on at her she sprang up suddenly from the card table with a thrilling cry: 'And who will forgive God?""

At the special matinée performance referred to, a short address was given by the Bishop of Birmingham, who first read the following letter from the author of the play:—

"I should first like to thank you for coming to see my play this afternoon. Then I would ask you to believe that I wrote it with no desire to outrage the religious susceptibilities of any religious persons; I hope you will think that it is an honest attempt to place on the stage some of the thoughts and emotions which have occurred to many people during the last few years. I have put every point of view that was concerned as fairly as I could. I would ask you to remember that the persons of a play should express themselves according to their character, and it would be unreasonable to be disappointed because simple people do not exhibit the subtletics of doctors of divinity. The world is mostly inhabited by simple people, and it is the emotions and thoughts of simple people that you are asked to occupy yourself with this afternoon."

In the course of his remarks the bishop said he wanted the clergy to judge the play without considering too closely the particular representative of their profession as he was put before them. They were always being told that there was nothing in present day plays; that they were so wretched and miserable. "The Unknown" gave food for thought arising out of the very central feelings of most of them during the last five or six years. They had been stirred to the very center of their whole being, and many of their thoughts and feelings were expressed in that play. In these days, when the war was over and they were naturally inclined to get back to something frivolous, it was surely good that their thoughts should be kept still to the high level of that play. It was a very good thing, for it showed that public opinion was really healthy.

People complained, the bishop declared in conclusion, that the play did not solve mysterics. They would not solve them on this side of the grave, but they would get nearer to them by bending to the consideration of those great things. Faith in that God who was the God of love and of interest in His people would not be lessened, but rather strengthened, by "The Unknown."

This statement, of course, means, if it means anything, that, in the Bishop of Birmingham's view of the matter, God cannot be understood "this side of the grave." In other words it is an admission of the tenability of the agnostic position.

Christian Scientists, however, rejoice to know that the mystery is solved; that in the light of Christian Science, as revealed in the Bible and the Christian Science textbook, all doubts and perplexities are set at rest, and that the way can be made plain and joyous even to a woman who has lost all her sons in the war. As Mrs. Eddy says on page 494 of Science and Health, "Divine Love always has met and always will meet every human need," and on pages 149 and 150 of "The First Church of Christ, Scientist, and Miscellany": "Remember, thou canst be brought into no condition, be it ever so severe, where Love has not been before thee and where its tender lesson is not awaiting thee. Therefore despair not nor murmur, for that which seeketh to save, to heal, and to deliver, will guide thee, if thou seekest this guidance."

[Letters from Spain in The Athenaum]

The Cuban disaster of 1898 was the occasion though not the cause of a national awakening. The causes had been at work long before; the loss of Cuba merely made it possible to realize the effects.... There was formidable opposition to any kind of reform in education; the older universities and the Clerical party saw clearly that any change would be inconvenient, if not fatal to their power, and they joined forces to prevent it....

The reformers . . . did not advertise or make a fuss; they worked hard and traveled abroad. In 1901 and again in 1903 certain traveling scholarships were founded by the government, and with these, or without them, Spanish students went about Europe and saw how things were done in foreign universities. Yet they were clever enough to keep on the right side of the Spanish government; and in 1907 a royal decree was issued, approving the constitution of a Board for the completion of studies, the "Junta para Amplación de Estudios y Investigaciónes cientificas." Many of the members of this committee were university professors or lecturers; but they were constituted as a body independent of any university, and had in some ways greater powers: they might acquire property and administer it, and they had the ear as well as the financial aid of the government. . . . The conditions under which educational reformers in Spain find themselves are somewhat as follows: Though new elementary schools are being built every year, there are not nearly enough of them and the instruction provided is thin and superficial to the last degree. Any kind of teaching which tends to awaken curiosity and to lead children to ask questions is systematically discouraged. . . . It is literally true that the "vice of thinking" is discouraged along with the other deadly sins. . . .

The energies of the Junta were first directed to sending ... men abroad with traveling scholarships or at their own expense. Since 1910 increasing numbers of students have been sent to England, Germany, France, Switzerland, Italy, and the United States, from which they returned keen and competent to teach in the educational institutions being founded by the Junta... They have felt the shock of new ideals, and come back convinced not only of the international character of learning, but that it is only through mutual understanding among different peoples that the significance of modern social and economic problems can be grasped and the proper measures taken to solve them.

["Is a Tobacco Crusade Coming?" by L. Ames Brown in The Atlantic Monthly]

With the prohibition of liquor an accomplished fact, there is evidence of increasing activity on the part of those who oppose the use of tobacco. "Anti-tobacco" leaflets flit through the mails with greater frequency. New "cures" for the tobacco-user appear in the magazine advertisements. Newspaper headlines of such tenor as "Nicotine Next," or "A Tobacco-less World by 1925," recur. An organization that devotes a part of its energy to the elimination of smoking has just completed a money raising campaign. Significant indications of anxiety are to be noted among members of the tobacco industry.

In some well-informed quarters, the opinion appears that a national movement to suppress or greatly to restrict smoking may take definite form. . . . In the matter of organization the movement is in its first phase comparable to the period before the Anti-Saloon League was organized, to give real driving power and an actual programme to the prohibition movement.

The easy course is to conclude that nothing will come of it; but only careless thinking tolerates that conclusion. Thousands of persons took this pose of confident assertion in the years when the prohibition tide was rising. While it is true that the movement is only in its first phase, we should be ignoring recent political history if we relied too much upon the negative indications. The conservative view to take is that conditions have passed the stage where an antitobacco crusade was impossible, to one where it is possible.

[From address of Rev. Frederick W. Perkins at The National Federation of Religious Liberals]

Interdenominational fellowship must rest on something more substantial than a fiberless tolerance and an uncontentious good-nature. It must be rooted and grounded in a common unifying faith and a compelling common purpose. Fellowship is the organization of a creative faith and a gripping purpose. It is not manufactured; it grows by its own inevitableness. Interdenominational fellowship must have an object of loyalty more thrilling, more inciting to sacrificial devotion, than the lesser sectarian loyalties to which we naturally yield. The essence of creed is intellectual assent; the essence of faith is trust and moral allegiance. The creedal ideal is accuracy of thought; the ideal of faith is the faithful life, loyalty to the truth and the right as the life of God in the soul of man. Some sort of creed is indeed a necessity to any man who thinks, but the necessity is of the second order.

Right there is the mistake of "orthodoxy" of every sort. Orthodoxy is not a set of ideas; it is any set of ideas held as a finality. It is a spiritual disease that may infect self-styled "liberal" ideas as truly as those denominated "conservative," and is never so unlovely and unwholesome as when it takes that shape. The conceit of orthodoxy is that there is a complete, final, authoritative creedal form that faith must take, that the all-important thing is to find it and then test one's faith and loyalty by the degree of one's conformity to it.

[A Public School Protective League Urges Alertness Against Compulsory Medication and Vaccination Propaganda]

The issue of medical freedom is very obviously becoming more and more acute, particularly in the United States, somewhat less so in England, and in varyingly lesser degrees in other countries of the world. Whether all who are engaged in the effort to establish liberty in this direction realize it or not, the campaign is really one for the establishment of pure Christianity. For Christianity is monotheistic. It has one God, the divine source of all things, including well-being. This well-being is universal wholeness, or health. The perfection of the divine idea typifies the health of mankind, and is what all men are really striving for, though they may call it by various names, and may take widely varying methods of attaining it. For example, in one of the United States, where a campaign is in progress for amendments of the constitution to prohibit compulsory vaccination and totally to prohibit vivisection, a medical organization is urging the success of its own campaign to defeat these proposed amendments. It has issued a statement saying, "Success means that . . . scientific medicine can continue its normal evolution without the hindrance and distractions it has been subjected to in the past." In reality, scientific medicine is at this very moment continuing its perfect unfoldment. Mary Baker Eddy, Discoverer and Founder of Christian Science, has written on page 142 of her book, "Science and Health with Key to the Scriptures": "God being All-in-all, He made medicine; but that medicine was Mind. It could not have been matter, which departs from the nature and character of Mind, God." It is an evidence of the advancing twentieth century that the struggle of men to attain the ideal contained in this statement is coming ever more to the front and is becoming ever clearer in its meaning. An article which appeared recently in The Christian Science Monitor is an illustration of this. It reads: -

"Urging parents and citizens to stand for medical freedom and against the domination of professional and commercial medication through aggressive medical propaganda, the Public School Protective League calls attention to a bulletin issued by the County Medical Association of Los Angeles, which proposes to perfect an organization for the 'Conservation of Public Health,' the immediate objective of which is to defeat the antivivisection bill and the constitutional amendment for anticompulsory vaccination. The organization is not to be temporary, according to the bulletin, but 'permanent, efficient, and semimilitary, for the purpose of defense, offense, and constructive work.'

"'Let each old member and each new member of the league tax himself to the uttermost in this year's contribution,' states the bulletin, and continues: 'It is a crucial moment. Failure means the retardation of medical progress in California for perhaps a generation. Success means that the forces of darkness, reaction and greed, which have massed against scientific medicine, will be so curbed and chained that they will cease to be, hereafter, a serious menace in the life of the community, and scientific medicine can continue

its normal evolution without the hindrance and distractions it has been subjected to in the past.'

"In a debate on the anticompulsory vaccination amendment at the Commonwealth Club of this city, the following statements were made: 'The question of the amendment is not as to the virtue of vaccination, but whether vaccination should be forced on those that do not care for it. The amendment does not interfere with the right of people to enjoy vaccination, if they believe in it, but this is a proposition of forcing it upon others who do not care for it. So I repeat that the issue is not as to the virtue or the necessity of vaccination in any sense. The issue is on whether vaccination should be compulsory. Everybody knows that vaccination carries extreme risk to the subject. It is not a safe remedy; it is not safe in any sense. Vaccination is a debatable measure, any way you put it. The medical authorities are divided upon it; perhaps a majority of doctors agree that it is better than nonvaccination, but they all understand and everybody knows that vaccination carries extreme danger. It brings sickness, it inoculates sometimes with loathsome diseases, and incidentally it brings death to the subject. Now, a practice that carries so much danger and is debatable as to its being a good preventive certainly ought not to be forced upon people who don't want it, especially when we remember that those who believe in it may have it.

"The Public School Protective League calls special attention to the fact that the amendment is seeking exemption for all those who desire exemption, and especially the students of the universities who at present must submit to vaccination as a rule of entry, the university claiming to be above the law of exemption which obtains in the lower schools."

[Can We Still Believe in God?—By Augustus P. Record, in The Christian Register]

A few years ago Professor Eucken wrote a book entitled, "Can We Still Be Christians?" His answer was that we not only can, but must. We dare not do otherwise. . . . Similarly, during and since the terrible tragedy through which the world has come and in whose aftermath we still find ourselves, men have asked, "Can we still believe in God?" Once again the answer has come that we not only can, but must. . . "Except the Lord build the house, they labour in vain who build it: except the Lord keep the city, the watchman waketh but in vain." Or, in the words which H. G. Wells puts into the mouth of Mr. Britling, "Religion is the first thing and the last thing, and until a man finds God, he begins at no beginning and he works toward no end."

To-day there are multitudes of men and women who find it difficult to preserve their childhood faith in the face of this tragedy of human suffering which they have been called upon to witness. Some have ceased to believe in God altogether. They regard Him as the creation of priestcraft and superstition, something which may appeal to the credulity of the ignorant, but not to the conviction of thinking men and women. Happily their number is few. Only the fool saith in his heart, or proclaims from the housetops, that there is no God. Others have taken refuge in a new humanism, trying to repeat successfully the experiment in which Comte so signally failed and to identity God with the hopes and aspirations of a struggling humanity. . . . Much of our religious thinking fails of any satisfactory results because we begin at the wrong end and reason from the wrong premises. We start with the physical universe, assumed to be Godless, and then try to make it demonstrate the fact of the existence of God. We reason from effect to cause and then to some antecedent cause until at last we come to something that seems to be uncaused, and we call that God. Thus God becomes a mere abstraction, wholly incapable of entering into helpful relations with His children. Why not reverse the whole process? Why not start with the assumption that God is, and that He is just as much a fact of experience as the universe itself? . . . Why not accept this intuitive revelation at its face value, and reason it to the facts of the spiritual life? . . .

To base the conviction that we are immortal upon our instinctive yearning for another life is to indulge in a dangerous fallacy. To assume that another life is demanded in order to rectify the mistakes of this is to impugn both the wisdom and the justice of God. To consider that the existence of another world is demonstrated by the universality of the belief is to confuse religion with geography. . . . The creative activity of God cannot result in an anticlimax. The end must crown what began. Because He is, we are justified in believing that we are immortal.

4

[From British Columbia Federationist, Vancouver, British Columbia]

The article on Christian Science in your issue of March 5, while evidently written in a kindly spirit, nevertheless assumes an authority on the subject as great as that which its writer criticizes Mrs. Eddy for manifesting. It is true that she spoke with authority, because she knew what she was talking about, as much so as the man who, having proved the multiplication table to be correct, ceases to speak of it as a theory. The writer of the article shows that he was sufficiently interested in the subject to read its textbook, "Science and Health with Key to the Scriptures," although a large number of persons of equal intelligence, who have also read the book in question, would not agree with all of his conclusions, which after all simply express the viewpoint of the writer. His acknowledgement that Christian Science "is an attempt to make religion practical in this life" proves that it is at least a step in the right direction, for true religion must necessarily be practical in this life if it is ever going to be practical in any other. He might have gone further and admitted that Christian Scientists were succeeding in the attempt, at least to a sufficient degree to be helpful and encouraging.

The article appears to be frankly written from the standpoint of disbelief in any religion, so that one could hardly
expect him readily to accept the teachings of Christian
Science; but he must naturally acknowledge from his own
experience that good exists, and that it is better than evil.
To be conscious sometime only of good is the natural desire
of all men. That it is possible to become better than we are
proves that it is possible to reach that heavenly state. Christian Science is not different from other Christian religions
in that its sole purpose is to overcome evil with good, and
that describes its only method of practice. No one can
justly quarrel with this purpose or method, unless he believes that evil cannot be overcome, in which case the devil
sits on the throne of supreme power and there is no hope
for any of us.

The attempt to prove Science and Health contradictory from two passages relating to God is not successful. He should have given the whole sentence in the first quotation, namely, "God is what the Scriptures declare Him to be,—Life, Truth, Love" (p. 330). The references to God as expressing anger, revenge, and the like, which we find in the Hebrew Scriptures, only prove the very human concept which the Israelites entertained of Deity. These superstitious beliefs are disproved by the divine nature itself. The

Bible is a history of human progress toward better ideals of both God and man. Jesus once rebuked his disciples for thinking to apply Elijah's interpretation of God's will to their own time, when they asked if they should call down fire from heaven to consume the Samaritans who had been inhospitable to their Master. He implied that a better idea of God than Elijah possessed had come to men in his teachings. As John afterwards wrote, "God is light, and in him is no darkness at all."

If human beings had no consciousness of wrong conditions, it is evident there would be no need of churches or of Christianity to help them. The presence of these conditions in human consciousness, that is, the consciousness of both good and evil, no more disproves the nature of God to be wholly good, than do the numerous errors made daily in our countinghouses disprove the absolute accuracy of mathematics. Because the science of numbers, when understood and applied, corrects mistakes in computation, this science is practical; in like manner, because the law of good, obeyed, overcomes evil, the Science of Christianity, or Christian Science, is practical. If errors could exist in the truth about mathematics, there would be no law of numbers, and there would be helpless confusion. In the same way, if evil existed in the truth about God, or good, He would be on the same plane of consciousness with sinning mortals, and there would be no Savior.

Church Notices

Boston, Mass.—The First Church of Christ, Scientist. Sunday services, 10:45 a.m. and 7:30 p.m.; Sunday school, 10.45 a.m.; Wednesday evening meeting, 7:30 p.m., in the church edifice, Norway, Falmouth, and St. Paul Streets. The church is open to visitors Wednesdays and Fridays from 10 a.m. to 5 p.m.

Reading rooms: Little Building, corner of Tremont and Boylston Streets (fourth floor); open daily, except Sunday and Wednesday, from 9 a.m. to 9 p.m., and on Wednesday from 9 a.m. to 5 p.m. National Union Bank Building (seventh floor), 209 Washington Street, opposite old State House; open daily, except Sunday, from 9 a.m. to 5.30 p.m. Coolidge Corner Building, 1316 Beacon Street, Brookline; open daily, except Sunday, from 9 a.m. to 6 p.m.

From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to Charles E. Jarvis, Clerk, 236 Huntington Avenue, Boston 17, Massachusetts.

From the Church Treasurer

Per Capita Tax.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account,

the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address. Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to Edward L. Ripley, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

Announcements

From The Christian Science Publishing Society

New Morocco Bound Vest Pocket Edition of the Textbook

Announcement is made of the publication of a new, morocco bound, vest pocket edition of "Science and Health with Key to the Scriptures," by Mary Baker Eddy.

This small volume, 3 1-16 by 4 5-16 inches, the same in size as issued for soldiers and sailors during the war, is bound in black morocco, limp, leather lined cover, round corners, gilt edges. Price \$3.50 for single copy and when included in lots of twelve or more copies of Science and Health in any or all bindings, \$3.25 each.

Orders for this edition will be filled in rotation.

Vest Pocket Bible

The Bible, bound in morocco, uniform in style with the vest pocket edition of Science and Health, is now on sale at \$4.75 a copy. Order by number 08X. Reading room discount 10 per cent.

New Pamphlets

Advance information will in future be given two weeks before each new pamphlet is placed on sale. This will replace the former system of standing orders.

New Pamphlets in German

There is now on sale a new German pamphlet entitled "Ein stilles, sanftes Sausen" ("A still small voice") containing the following articles reprinted from the Christian Science periodicals with alternate pages in English: "The secret place of the most High," "Never too Late for Healing," "Treatment," "Cause and Effect."

There is also on sale a new German pamphlet entitled Läuterung (Purification) containing the following articles reprinted from *The Christian Science Monitor* with alternate pages in English: "Lusting Against Lust," "The Lust of Money," "The Lust of Power," "Looking Ahead," "Sincerity."

Price of each of the above pamphlets 5 cents a copy. Reading room discount 20 per cent.

"Rudimental Divine Science" for the Blind In English Braille

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U.S.A.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U.S.A.

Articles and Testimonies

*** * ***

Available articles from Christian Scientists and good testimonies from those healed by Christian Science are always welcomed for consideration by the Editors. Manuscripts for publication in the Scntincl and Journal, whether articles, poems, or testimonies, and correspondence relating thereto, should not be addressed to individuals, but to the EDITORIAL DEPARTMENT, THE CHRISTIAN SCIENCE PUBLISHING SOCIETY, Boston 17, U.S.A.

Letters of Appreciation

Many letters of appreciation of The Christian Science Monitor and other Christian Science activities are constantly being received. These letters express what these activities mean to different individuals in various occupations and pursuits. The favorable comment that has been received on those already published indicates that they are welcome and helpful; therefore others will be published under the above heading. Extracts from such letters follow:

AND now I want to give a few words of appreciation of The Christian Science Monitor. It is more eagerly looked for and read by our family than any other newspaper. Being called upon to help by teaching school during the war, I found it of inestimable value in the schoolroom, and just this next month sixteen of my late pupils will exhibit drawings (taken from the Children's Page) at the county fair. Even the older boys and girls clamored to draw some of those animals and birds and the younger pupils begged to do at least two copies each. The Home Forum and Editorial pages are a constant source of pleasure and we are indeed grateful for this as well as our other periodicals, which reach us promptly.

I WISH to express my appreciation of all the periodicals. I have been helped immeasurably this summer by the splendid metaphysical articles; and the Monttor, with its wealth of world-wide news, its good humor, fine interesting articles on the special pages, and withal its scientific cleanliness, has been a joy and a blessing.

LET me add a few words of appreciation for this wonderful paper. I have hesitated in writing you, but it has not been because of any depreciation of its excellence, for I consider it the finest publication of its kind in the world. I thank you for The Christian Science Monitor and all other Christian Science periodicals.

WORKS ON CHRISTIAN SCIENCE

Written by MARY BAKER EDDY, Discoverer and Founder

of Christian Science and Author of its Textbook

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each \$3.00; twelve or more, each \$2.75. Ooze leather, vest pocket size, single copy \$3.00; twelve or more, each \$2.75. Morocco, vest pocket size, single copy \$3.50; twelve or more, each \$3.25. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy \$4.00; twelve or more, each \$3.75. Morocco, limp. round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$5.00; twelve or more, each \$4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book), single copy \$6.00; twelve or more, each \$5.75. Large Type Edition, designed especially for the use of First Readers. Large type (18-point) on Oxford India Bible paper, bound in leather. Size 8 by 1034 inches. Single copy \$7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and

FRENCH TRANSLATION. Alternate pages of English and French. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, \$5.50; six or more, each \$5.25. Orders for the French translation in lots of six or more may include both bindings.

Health, and in any or all of the different bindings.

German Translation. Alternate pages of English and German. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each \$5.50; six or more, each \$5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, French, and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy \$2.25; twelve or more, each, \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; twelve or more, each \$3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy \$5.00; twelve or more, each \$4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 366 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy \$2.25; six or more, each \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; six or more, each \$3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy \$5.00; six or more, each \$4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy \$6.00; six or more, each \$5.50.

Christ and Christmas. An illustrated poem. Cloth, single copy \$3.00; six or more, each \$2.50. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Unity of Good and Other Writings. One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science versus Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy \$1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy \$2.00; six or more, each \$1.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, single copy \$1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy \$1.00; six or more, each 75 cents.

Unity of Good. This book lays the ax at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy \$1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895. and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy \$1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, alias Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

Printed in the New York point, American Braille, and English

PRINTED in the New York point, American Braille, and English Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Rudimental Divine Science and No and Yes. In one volume, French translation, with alternate pages of English, vest pocket size. Blue cloth, gray edges, single copy \$1.25; six or more, \$1.10; Liue leather, gray edges, single copy \$2.00; six or more, \$1.75 each.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science versus Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy \$1.50; six or more, each \$1.15.

Christian Science versus Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy \$1.50; six or more, each \$1.25. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign. Address orders and make checks payable to

Christian Science Literature

"Science and Health with Key to the Scriptures" and all other published writings of Mary Baker Eddy are listed on the outside back cover page of this Sentinel.

Christian Science Sentinel

Established, 1898, by Mary Baker Eddy. Published weekly, containing articles, editorials, and special current information regarding the Christian Science movement, also testimonies of healing. Subscription price, payable in advance, postpaid, to all countries: One year, \$3.00; six months, \$1.50; three months, 75 cents; single copy, 7 cents.

The Christian Science Journal

Founded, 1883, by Mary Baker Eddy. This monthly magazine is an official organ of The First Church of Christ, Scientist, Boston, Massachusetts. Contains articles, editorials, and testimonies of healing, a directory of Christian Science Churches, Societies, and Reading Rooms; also in the January. April, July, and October issues a list of Christian Science Practitioners and Nurses. Subscription price, payable in advance, postpaid to all countries: One year, \$3.00; six months, \$1.50; three months, 75 cents; single copy, 30 cents.

The Christian Science Quarterly

Founded, 1800, by Mary Baker Eddy. Published January, April, July, and October. Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. Printed in English, English-Dutch, and English-German. English edition published also in vest pocket size. Subscription price, payable in advance, postpaid, to all countries: One year, \$1.00; single copy, 25 cents.

The Christian Science Monitor

An International Daily Newspaper. Founded, 1908, by Mary Baker Eddy. Daily, except Sundays. Its own world-wide news service is supplemented by the service of the Associated Press and of the United Press Association. Complete in its departments; unique in its Home Forum page. Full page of editorials dealing truthfully and fearlessly with vital questions of the day. Subscription price, payable in advance, postpaid to all countries: One year, \$9.00; six months, \$4.50; three months, \$2.25; one month, 75 cents; single copy, 3 cents.

Le Héraut de Christian Science

Established, 1918. A periodical published monthly in French, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, postpaid to all countries: One year, \$2.00; six months, \$1.00; three months 50 cents; single copy, 20 cents.

Der Herold der Christian Science

Authorized, 1903, by Mary Baker Eddy. A periodical published monthly in German, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, postpaid to all countries: One year, \$2.00; six months, \$1.00; three months, 50 cents; single copy, 20 cents.

Subscriptions will begin with the next issue after the receipt of the order. Information regarding bound volumes of the weekly and monthly periodicals will be given upon request.

NUMBER 10

God's Way of Escape

SAMUEL GREENWOOD

PAUL'S message to the Corinthians, that God "will not suffer you to be tempted above that ye are able; but will with the temptation also make a way to escape," has comforted and heartened many a Christian pilgrim on his way to the heavenly city. Temptation naturally means the testing of one's position, and is therefore an occasion for developing strength, but does not imply any inherent power to produce evil. Its influence depends entirely upon one's own attitude, and succeeds or fails according to the response which it receives from within.

These temptations are sometimes encountered in the guise of circumstances which threaten disaster and from which there is no visible means of escape. We meet them not only in our individual experience, but in our association with others in a common cause, and they try out the nature and quality of aggregate achievement; but whatever character they assume, they always have their root and impulsion in the one evil, which the apostle designated the carnal mind. We know that it is possible under all conditions to meet evil with good, so far as we apprehend good and are willing to be loyal thereto; but the common human tendency is to crowd one's self into worse difficulty by meeting evil with evil, by opposing hate with hate, instead of letting God be the only Mind or intelligence, as we say He is. Acknowledging that God exists everywhere and is the only power, it logically follows that to express good is the privilege of all mankind, and that no other escape from evil can possibly be found.

Two scenes from Biblical history are of particular interest in this connection. The first is that of the Israelites at the Red Sea, on their way from Egypt to the promised land of Canaan. They found themselves in a narrow pass the only outlet from which was closed by the pursuing Egyptians, and to fall into their hands meant a return to slavery. What were they to do in such an extremity? According to the Talmud there was great excitement in the camp of Israel, the people being of different minds as to the proper course of action. One group favored an immediate surrender to the Egyptians, another that they meet them in open fight, another that they attack them under cover of night, and a fourth that they throw themselves into the sea. But these proposals were not prompted by divine wisdom, nor did they offer any reasonable hope of overcoming the difficulty.

Moses alone appears to have considered taking the matter to God. His first act was to calm the people. "Fear ye not, stand still, and see the salvation of the Lord, which he will shew to you to day." Stand still! They were accomplishing nothing by their excitement, nor by their disputations. The word of their leader was to be quiet, after which came the command from God to go forward into what seemed certain destruction. But every one knows the result of their obedience. When they went on, in pursuance of the purpose for which they had been so marvelously brought out

of Egypt, they found nothing there to harm them, and the threatening evil destroyed itself.

The second scene is in the garden of Gethsemane. Realizing that the culminating hour of his career had come, Jesus, accompanied by some of his disciples, had gone into the quiet of the garden to meet and overcome the hatred of the carnal mind. The gospels briefly relate how desperate was that mental struggle which he was enduring for the salvation of humanity. He had asked his disciples to watch while he prayed, a small request surely, but instead of doing this they went to sleep, and when they finally awakened, their Master was in the hands of those who sought his life. In his excitement, and zealous to do something when it was too late, Peter drew his sword and cut off an ear of one of the crowd, but Jesus rebuked his impetuosity and healed the wound.

None knew better than the Master that his enemies were not persons, and that it would not have helped his cause if all the people in that crowd were destroyed. If his only way of escape had been to meet the carnal mind as personal he would have miserably failed, and his sublime career would have closed in a futile tragedy; but he shed no blood in his defense, and when he was reviled he reviled not again. His obedience to God led him into the midst of evil's greatest efforts, but death itself made way before him and he came out of his ordeal unharmed. He had proved that the son of God, the real man, lives always beyond the reach of evil.

The lesson of these pictures is plain. Commenting on the act of Peter, Mrs. Eddy says (Miscellaneous Writings, p. 335), "The notion that one is covering iniquity by asserting its nothingness, is a fault of zealots, who, like Peter, sleep when the Watcher bids them watch, and when the hour of trial comes would cut off somebody's ears." She also writes on page 226 of Science and Health, speaking of herself as the Discoverer of Christian Science, "I saw before me the awful conflict, the Red Sea and the wilderness; but I pressed on through faith in God, trusting Truth, the strong deliverer, to guide me into the land of Christian Science, where fetters fall and the rights of man are fully known and acknowledged." And the world has more reason to be grateful than it now knows, that she did press on and on in the face of every opposition, that she might establish the cause of Christian Science for the redemption of mankind.

When we remember that the nature of the carnal mind has not changed, that it is still bent on the destruction of the spiritual idea wherever it is exalted, we need not expect that the means through which the second advent and ministry of the Christ are to-day being manifested will be smiled upon and helped forward by the so-called forces of evil. The enmity of the serpent is still directed against the seed of the woman, and will be unto the end; therefore Christian Scientists need not be surprised nor alarmed if, as the Israelites of to-day, the Red Sea has again to be faced, and the watch kept in the Gethsemane of this hour. And in that testing time, instead of becoming disturbed over the situation, instead of disputing over human ways and means, or cutting off somebody's ears, would we not do wiser to stand still and wait

Copyright, 1920, by The Christian Science Publishing Society, Falmouth and St. Paul Streets, Boston, Massachusetts. Entered at Boston post office as scond-class matter. Acceptance for mailing at a special rate of postage provided for in section 1103, Act of October 3, 1917, authorized on July 11, 1918.

for the salvation of the Lord to be pointed out, as it surely will if we are willing to walk in it.

It certainly demanded more courage on the part of the Israelites to be quiet and to trust in God for deliverance than to dispute among themselves over the solution of their difficulty. And it called for more faith and loyalty on the part of Peter to have watched during those dark hours than to draw his sword upon a fellow mortal. Christian Science makes it unmistakably plain that evil is never a person, therefore Christian Scientists have no ground for attempting to meet it that way; for, although one may be moved by the best intentions, such a course is sure to prove abortive. The Scriptural command to overcome evil with good indicates the Christian attitude under all circumstances, whereas the attempt to overcome evil with evil is the method of the carnal mind, which has always failed to accomplish right ends and always will.

If we accept the teachings of Christian Science, we should know the folly of examining persons for the source of trouble, or of turning to persons for the remedy. Looking at' evil through the lens of personality magnifies it, assumes it to have intelligence, endows it with motive and action, and arouses the sense of evil in one's own thought and intent. On the contrary, if we look at evil through the lens of Christian Science, it will be reduced to the vanishing point, the persons involved will be helped, and we shall have liberated ourselves from the temptation. We are necessarily adopting one course or the other, but only that one is right which is leading us to know and to prove that good is real and evil unreal. We cannot help the cause of Christian Science and of humanity by any other means, strive as hard as we may. Even if one conscientiously follows a wrong course, his honest desire to be right will lead him to the correction of his mistake, and he can retrace his way in humility and gratitude; for whatever may be the nature of the human problem, it must ultimately be solved by divine means.

Since God is the only Mind, divine intelligence alone can reveal the right way of escape from human dilemmas and difficulties, and that way will be orderly and safe. Before crying out upon one's neighbor, it were well to obey our Leader's injunction, beginning on page 128 of Miscellany: "Ofttimes examine yourselves, and see if there be found anywhere a deterrent of Truth and Love, and 'hold fast that which is good." In Christian Scientists' undoubted love for our cause and for the institutions founded by Mrs. Eddy, coupled with their sincere desire to be loyal to the teachings of Christian Science, there is always a wide ground upon which differences of opinion over human details may be gently and lovingly adjusted; but the turning of fellow laborers against each other is solely the work of the serpent and can produce only bad results. The belief of being divided against itself is characteristic of the household of error, but it has no place in the household of Truth, and the efforts of evil to bring this about should be detected and defeated. The right way is always the way that is right for all, and it takes us over the road of self-sacrifice, charity, and good will. Can it be that we lack the courage or the vision to walk in it, or the willingness to acknowledge that God's way may be different from ours?

Christian Science is without doubt the one hope of the human race, and it must and will be expressed to mankind in unity and peace. Paul likens the church to the human body, with Christ as the head, and the same simile applies to the Christian Science movement. While it has many departments and activities and institutions, it has only one head, and that head, as the apostle points out, is Christ. We can

all unite and help one another under this head, whatever our relative positions may be, and can work together for the kingdom of heaven to come among us. Let us do this in love and without reproach.

True and False Prophets

OLIVER BOWLES

THE early belief that a prophet was one who through some special gift of Providence could foretell future events has gradually given way to the conception of a prophet as one who by faithfulness to the highest ideals and consecration to supreme good has so cleared his consciousness of materiality that he is fitted to perceive in some measure the operation of divine law and is enabled to work out with more or less mathematical precision the results that must inevitably follow any line of activity. Such is true prophecy, and, as God is no respecter of persons, prophetic vision is attainable by all in proportion to their untiring loyalty to Principle.

False prophecy began, according to Biblical record, in the garden of Eden, and is still rampant in much the same form as when the lying serpent stated that eating of the tree of worldly knowledge would not bring death. The material world is so filled with the confusing cries of false prophecy that one must attune his ear to something higher than the evidence of physical sense if he is to discriminate between the true and the false. The course of human conduct depends in a large measure on the ability to make these distinctions, and hence it is a matter of supreme importance to every one to gain a sufficient knowledge of Truth to discern the pathway that true prophecy points out.

Every faithful student of Christian Science makes it his daily mental work to know the true idea, and to turn away from its unlikeness. This daily struggle to demonstrate the supremacy of good may seem no easy task; it requires patience and persistence. One of the surest supports for the student at times when error seems to exert an overwhelming power is a clear view of the fallacy of error's arguments. In other words, the seeming power of error is broken by uncovering its falsity. Mrs. Eddy has pointed out this important truth on page 540 of "Science and Health with Key to the Scriptures" in the following words: "In moral chemicalization, when the symptoms of evil, illusion, are aggravated, we may think in our ignorance that the Lord bath wrought an evil; but we ought to know that God's law uncovers so-called sin and its effects, only that Truth may annihilate all sense of evil and all power to sin." It is profitable, therefore, sometimes to look error squarely in the face, in order that we may clearly recognize its mode of attack, and thereby be prepared to guard against its false allurements.

As the false prophets are boldly faced, how do they array themselves? There are two distinct aspects to their arguments, one based on indulgence of physical sense, and the other on fear of man-made laws. The former argument, which had led millions astray, is the inducement to indulge in sin or purely worldly pursuits for the satisfaction to be obtained, the fear of evil consequences being allayed with soft and pleasing promises that the resultant pathways will always be smooth and easy. How much of the evil that seems to grip humanity is to be attributed to the allurements of the false prophets of mortal belief in their insistence that happiness must result from the accumulation of wealth, through winning popularity, or through gratification of physical sense! Thus the beguiling serpent said, "Ye shall not surely die," and the false prophets of whom Jeremiah

speaks advised the people to follow the imaginations of their own hearts and no evil would come upon them.

The second phase of false prophecy is the appeal to fear. Who can measure the possible height of human attainment if fear were entirely destroyed as belief? When Peter saw the wind boisterous he was afraid, and immediately he began to sink; and Paul speaks of those who "through fear of death were all their lifetime subject to bondage." Fear not only clips the wings of attainment and binds with heavy chains those who are caught under its spell, but is the direct cause of man's bondage to disease and limitation. When Iob said, "The thing which I greatly feared is come upon me," he but echoed the fact which is becoming more and more insistent in human consciousness, that fear engenders a large share of the disease and disaster that torment humanity. Thus it is evident that the false prophecies of indulgence and fear are largely responsible for the sin and sickness in the grasp of which mankind suffers to-day. Mrs. Eddy, in pointing out this truth, states (Science and Health, p. 373), "The fear of disease and the love of sin are the sources of man's

How, then, must the lying prophets be met and overcome? Obviously greater heed must be given to the words of true prophecy found in the Bible and in "Science and Health with Key to the Scriptures." The Bible contains many warning prophecies, in such words as, "The soul (sense) that sinneth, it shall die," and "Sin, when it is finished, bringeth forth death." The words of Mrs. Eddy, representing as they do the most inspired prophecy of modern times, afford a sure support in this conflict, for she was the first to point out that the seeming pleasure and satisfaction gained from sin are unreal and unsubstantial, that they lack permanence, are fleeting shadows, elusive and disappointing. The consciousness of the unreality of its pleasures robs sin of its seeming power. Furthermore, the desire for indulgence is overcome in Christian Science through a higher motive than that afforded by a knowledge of the dire consequences that must ensue from wrong activity. The fear of punishment may be a necessary step toward regeneration, but it is the lowest motive, and as the student attains higher levels of unfoldment he learns that a knowledge of the reality of the spiritual, and the daily and hourly struggle for a clearer and more exalted vision develops a stronger love for that which is pure and true, and a growing aversion for that which is material and temporal. Thus the desire for sense gratification and worldly attainment is surely, though it may seem to the student slowly, conquered through earnest prayer and a consecration of effort toward the nobler and higher

The argument of fear may likewise be met with many comforting Scriptural promises, such as, "Perfect love casteth out fear," and, "I will fear no evil: for thou art with me." Again the prophetic vision of our Leader comes to supplement the words of the ancient prophets, for she supplies the most effective weapon imaginable, namely, an understanding of the powerlessness of fear as a consequence of the allpower of God. On page 454 of Science and Health it is stated: "The understanding, even in a degree, of the divine All-power destroys fear, and plants the feet in the true path,—the path which leads to the house built without hands, 'eternal in the heavens;'" and on page 412: "The great fact that God lovingly governs all, never punishing aught but sin, is your standpoint, from which to advance and destroy the human fear of sickness."

Thus the line of demarcation between true and false prophecy is more and more clearly defined through faithful adherence to the basic Principle of Christian Science. The allurements of worldliness and the sense of fear are overcome through the understanding of their unreality and powerlessness and the all-power, all-presence, and all-activity of Spirit. A conception of existence that supersedes both fear and false desire may seem to be difficult of attainment, but each earnest effort, and each demonstration, no matter how insignificant it may seem, lifts the student to a higher level of desire, and establishes more firmly the fact that the consciousness which is divine Love casts out fear.

Knowing the Truth

MARY TUTTLE MASON

ONE must be receptive to the truth before one can stop believing that which is not true. The only thing that can be changed is the mortal thought, for truth is unchangeable; yet that is what mortal mind does not want to do, for it clings to what it thinks to be true; and even when it is rebuked with the facts, it still holds to its delusions. How often when there seems to be a case of sickness the material senses argue for the belief of sensation in matter; yet that does not change the fact that matter has no sensation. One can only be deceived so long as one is willing to believe a lie. What the material senses are declaring does not change the fact that man is spiritual and that there is no reality to matter.

The arguments of the material senses are never real. Jesus said of Satan or mortal mind: "He was a murderer from the beginning, and abode not in the truth, because there is no truth in him. When he speaketh a lie, he speaketh of his own: for he is a liar, and the father of it." It is our right to refuse to listen to these deceitful witnesses and rise to the clear perception of what the truth is, instead of giving credence to these unreliable arguments. One must take a firm hold on the truth and clearly comprehend the real condition. There is always the truth about everything, and that is what one must realize. To understand the absolute is to have ears attuned to the higher voice of Truth and be lifted to the spiritual heights that John reached in the visions of the book of Revelation.

Mortal mind, so called, is a mass of contradictions. It will accept what the physical scientist says is true regarding our material world although the corporeal senses cannot perceive that the physicists are telling the truth; but when it comes to that which really is of concern, the most important fact there is to know, the truth about man, it will not believe. Of course, as Mrs. Eddy says in "Science and Health with Key to the Scriptures" (p. 103), "In reality there is no mortal mind, and consequently no transference of mortal thought and will-power;" and again on page 186, "Mortal mind is ignorant of self, or it could never be self-deceived. If mortal mind knew how to be better, it would be better." Then in such a case it would cease to be mortal and having risen somewhat above the evidence of the senses, getting the clear vision, it would lose the material, and as it cast away the false, would find the perfect mind, the Mind "which was also in Christ Jesus."

Christian Science is demonstrable. It is demonstrating the truth about God and man. The evidence of the material senses is not real, hence they cannot tell the truth in any situation. Then is it not time for one to awake from the material mesmerism of believing a lie and to rouse one's self from this unreality? Instead of tenaciously clinging to the beliefs of the material senses, shall we not learn the truth? Let us not be discouraged if the unfoldment is not instantaneous,

but let us keep steadfastly on, knowing that as one perceives the truth in any situation it will broaden his viewpoint and it will be easier to grasp the truth about every experience that may arise. Let us be willing to receive. Do not allow mortal mind to persuade us that it is not reasonable to believe that which cannot be discerned by the material senses. We all know how deceitful these senses are, how many optical illusions they present. Take this one for an example: The two lines of steel of the railroad look as if they converge in the distance, although we know that they continue parallel. The material eyes do not tell the truth and we recognize it, so are guided in our judgment by what we are assured is the truth.

Why be deceived about the real man? One must give up the unreal and be willing to know the truth. The truth is the truth, as has been stated, but it has to be understood and applied to the situation. One cannot be off guard, for evil would deceive "even the very elect." One must have on the armor of understanding and be prepared to meet this giant of falsehood with the confidence that even a pebble of the truth can destroy this swollen manifestation of unreality. Evil cannot stand where the truth is revealed, for when the truth is declared there ceases to be falsehood. "If ye continue in my word, then are ye my disciples indeed; and ye shall know the truth, and the truth shall make you free." That is the eternal nature of truth—that when the truth is known ignorance disappears.

The truth is revealed to the world in Christian Science. It needs to be demonstrated. With understanding comes freedom from all the erroneous beliefs of the so-called mortal mind. What bound person does not want to be free? Then why not apply this remedy of Truth? If one were to go to a physician one would take his medicine even if that particular kind had never been heard of before; one would trust to the understanding of the physician. In like manner, when one goes to Christian Science one should be willing to accept the truth, although one may not be familiar with its application. If the turning is honest the results will be certain. When a mariner gets out of the true channel he does not blame his charts but knows that somewhere along his way he has left the right course. He goes to his maps and finds where he made the wrong turn, and when he discovers it he goes back and getting into the right channel comes into a safe harbor. So can all who are trying to demonstrate this truth; when they find they are believing that which is not true, they know that they are out of the right channel, and must retrace their way, until they find the mistake. When they have found and corrected it, they will enter the haven of peace and rest.

Truth is positive and unchanging and it is the privilege of each one to show himself "a workman that needeth not to be ashamed, rightly dividing the word of truth." This safe, calm harbor is for all; but many times there are encountered storms before one finds one's self safe home. We can rest secure in the knowledge that Truth is absolute and never fails. Jesus said that his words would never pass away, and those words were the truth which he gave us to apply. In one of our hymns we find this assurance and counsel (Hymnal, No. 160):—

Truth comes alike to all,
Who on Her name dare call,
With motives pure;
Then let us all unite,
With Freedom's star in sight,
Press onward in the right,
Which shall endure.

Illusion

IVAN B. MC BRIDE

THE word "illusion" is frequently used by Mrs. Eddy in her writings as a synonym for error. Upon looking up the word in the dictionary the writer found, from a scientific viewpoint, two especially helpful definitions. They were, first, "a false show," and second, "an unreal image seemingly presented to the senses." It later became clear that an illusion does not become a delusion or a deception until accounted true in human thought.

Nearly every one has noticed that optical illusion, namely, the image of an interior light or illuminated object so reflected as to seem to be on the outside of a window after darkness. The writer, until some time ago, had merely regarded this illusion as another proof of the unreliable nature of the testimony which the physical senses afford. Early one morning before dawn, however, while traveling on a train in a day coach, he was furnished with considerable food for thought both then and thereafter, concerning this same illusion.

Since it was a very dark night, the interior of the coach was reflected outside. It was apparent after some thought that this illusion or "unreal image" possessed nearly all the characteristics of error. It was finite, nonintelligent, imperfect, and changeable. Furthermore, it was in itself an attempted infringement of the law of oneness, in the sense that it was an absurd claim that there could be more than one genuine interior of the coach. Conditions remaining the same on the inside of the car, it was obvious that the illusion depended on darkness for its existence. Are not all our troubles, illusions, based on the tendency of mortal mind to make realities of them, which tendency in turn is based on darkness or spiritual ignorance? Mrs. Eddy, when referring to one of mankind's greatest troubles, namely, sickness, says in "Science and Health with Key to the Scriptures," beginning on page 393; "It is well to be calm in sickness; to be hopeful is still better; but to understand that sickness is not real and that Truth can destroy its seeming reality, is best of all, for this understanding is the universal and perfect remedy." It is significant, as she points out, that an understanding of Truth, which is surely the opposite of darkness or ignorance, is the remedy.

Again, conditions remaining the same on the exterior of the car, it was clear that without the existence of the genuine inside of the coach the reflection could not have even seemingly existed. It is an established fact that a lie proves the existence of Truth, for there can be no perversion of the truth without the existence of Truth. Mrs. Eddy writes (Unity of Good, p. 36), "The use of a lie is that it unwittingly confirms Truth, when handled by Christian Science, which reverses false testimony and gains a knowledge of God from opposite facts, or phenomena." It became evident that this illusion or "false show" was impotent. It was powerless to cause action or make laws. It lacked both ability and actuality, and possessed only appearance. The only chance that any harm could result from it was through the possibility of the beholder believing it real.

It was easy for the writer to imagine a number of very foolish things which he might have done had he believed the illusion to be real. He might have rapped on the window and tried to talk to some one seemingly across the aisle on the outside—some one who was not there. Again, he might have tried to crawl through the window to get into the other side, in which case he would have been speedily disillusioned, and the trip, which he now thought of as typifying the journey

from materiality to spirituality, temporarily delayed at least. While these supposititious actions may seem a bit overdrawn, yet they are not much more foolish than some of the things the writer has done under the erroneous impression that error is real. On page 353 of "Science and Health with Key to the Scriptures" Mrs. Eddy writes, "When we learn that error is not real, we shall be ready for progress, 'forgetting those things which are behind.' " Is not our passage out of a material belief and into spiritual understanding delayed by our believing in the seeming reality of the testimony of the material senses and acting from that basis?

However, while the knowledge of the unreality of the illusion prevented the writer from carrying out either of those supposititious actions, yet the reflections still existed to material sense. In fact, so far as the evidence of the material senses was concerned the image was nearly as real as the genuine interior. Now what was the one thing, conditions remaining the same inside the car, which would destroy even the evidence of the material senses? As the trip progressed, even as in our spiritual journey, the day began to dawn and the light to break. As the light grew stronger the illusion dimmed and certain parts faded out altogether. The writer could not help comparing this occurrence to his own experience in Christian Science thus far. As the light, a more exact knowledge of God, or spiritual understanding, dawned to some extent upon him, certain habits were gradually overcome and faded out of his experience. He then understood in some measure these words of Mrs. Eddy (Science and Health, p. 584), "The objects of time and sense disappear in the illumination of spiritual understanding, and Mind measures time according to the good that is unfolded. This unfolding is God's day, and 'there shall be no night

A little later that morning, as the destination grew nearer, the day dawned and as the sun rose over the horizon the landscape was flooded with light. When the writer now looked out of the window he was conscious, instead of the illusion, of the growing fields of grain, the green pastures, the graceful trees, and occasionally a smoothly flowing river, all revealed in their beauty by the light. This seemed to typify the occasion of the final spiritual understanding of consciousness, and then indeed must the great illusion—that life and intelligence are in matter—fade away entirely, and all things be revealed in their true light, as they really are and always have been.

[Written for the Sentinel]

Understanding God

LAURA REBECCA LONSDALE

No brighter thought sheds beacon gleams to cheer Each pilgrim journeying through earth's drear, Than this—that God is Light.

No better thought does courage, strength, and health confer To rend the mortal veil, to faith and hope bestir, Than this—that God is Life.

No sweeter thought, in purest, rapt embrace enfolds, While tender whispers of the Christ-idea are told, Than this—that God is Love.

No truer thought uplifts desire on pinions glittering bright, To see the vision, perfect, radiant, white, Than this—that God is Truth.

No holier thought pronounces benediction, far and near, As swells its anthem, Peace on earth, good will is here, Than this—that God is All.

Pure Thoughts

FRED C. PUTCAMP

IN that wonderful discourse named "The Sermon on the Mount" Jesus presented to his hearers seven distinct qualities of thought, and the corresponding blessings which would be the reward for each particular thought. Hence the thought that "shall see God" is defined as a pure thought. "Blessed are the pure in heart: for they shall see God." Now to be pure in heart is equivalent to being pure in thought. One of the definitions of the word pure is "separate from all heterogeneous or extraneous matter; free from mixture or combination; clear, unmixed." Thus to have a pure heart, or thought, it will be necessary to confine the thought to one subject or purpose. Jesus made this clear when he said, "The light of the body is the eye: if therefore thine eye be single, thy whole body shall be full of light. But if thine eye be evil, thy whole body shall be full of darkness. If therefore the light [or thought] that is in thee be darkness, how great is that darkness!" Thus if the thoughts we entertained were purely spiritual, our lives would reflect that spirituality; but if the thoughts we entertain are both spiritual and material, then our lives will not manifest complete harmony, for we can manifest harmony only in the ratio of our spiritual understanding.

Mrs. Eddy made this plain when she wrote (Science and Health, p. 492), "For right reasoning there should be but one fact before the thought, namely, spiritual existence." Through the spiritual interpretation of the Scriptures, as revealed in Christian Science, we see that the Master had a broader meaning in all his sayings than that which has been commonly accepted, for to confine the thought of purity only to that which pertains to morality would mean that the great majority of people are exempt from the necessity of thinking and living in accordance with this beatitude, and are mesmerized into the belief that they can, and will, "see God" while still thinking and living both materially and spiritually. This has been the verdict in all scholastic theology, for are we not being taught to believe that God created and knows both good and evil, the spiritual and the material, and that we can go to God for spiritual forgiveness of sin, but in case of bodily sickness we must resort to matter, and that God has endowed matter with the power to heal matter, while the power to heal sin is confined to God. Here Christian Science comes to the rescue and reiterates the declaration of the prophet Habakkuk that God is "of purer eyes than to behold evil" and that He cannot look on iniquity. To be pure in heart or thought we, too, cannot behold evil or matter as real, and in order to heal or forgive sin we must forsake or stop thinking it, and to heal sickness we must refuse to see it or behold it; for to be pure in heart is equivalent to being "of purer eyes than to behold evil."

On pages 476-477 of Science and Health Mrs. Eddy writes: "Jesus beheld in Science the perfect man, who appeared to him where sinning mortal man appears to mortals. In this perfect man the Saviour saw God's own likeness, and this correct view of man healed the sick. Thus Jesus taught that the kingdom of God is intact, universal, and that man is pure and holy."

May each one of us strive to have that Mind in us "which was also in Christ Jesus" and to see only the spiritual or real. Then we "shall see God" and know and demonstrate that God, Spirit, and His spiritual universe, including man, is all that really is. "Then," in the words of the prophet Isaiah, "shall thy light break forth as the morning, and thine health shall spring forth speedily."

On Hoeing Your Own Row

ONE of the first things which a man learns in Christian Science, if he is wise enough, is that he has his own work to do, and that no one can do it for him. Then, if he really understands, he sets out to learn how to do it, and to do it, not perfunctorily, but with all the strength that is in him. He may as well do it joyously, for in the end he will have to do it, and if he does not do it joyously, it will be a certain proof that he does not realize what life is. Life, indeed, must be to him one of two things: either it will prove a desert of wasted opportunities, which never can return, or it will be a tide taken at the flood, and leading on to victory. And any man who has carefully read the gospels, in the light of Christian Science, knows that this victory is a victory over the human self, established in a demonstrated understanding of man as the image and likeness of God, Principle. "The Christian martyrs," Mrs. Eddy writes, on page 388 of Science and Health, "were prophets of Christian Science. Through the uplifting and consecrating power of divine Truth, they obtained a victory over the corporeal senses, a victory which Science alone can explain." They hoed their own row.

Now the word martyr really means witness, and it would be a good thing if more people would remember this, and give up looking at it purely as victim. There is no necessity for a witness to be a victim; there is, indeed, every reason why he should not. A knowledge of Truth, Principle, should bring to a man occasion for victory along the whole line, and not part of it: "If ye continue in my word," Christ Jesus said to the Jews who believed in him, "then are ye my disciples indeed; and ye shall know the truth, and the truth shall make you free." The price of this freedom, be it however observed, is not a mere spasmodic realization of Principle, but a continuous demonstration of it, for it is quite impossible to continue in a knowledge of anything without giving proof of that knowledge. Paul was never tired of insisting on this. "Continuing," he wrote to the church in Rome, "instant in prayer." In just the same way, Mrs. Eddy writes, on page 360 of Science and Health: "Either Spirit or matter is your model. If you try to have two models, then you practically have none. Like a pendulum in a clock, you will be thrown back and forth, striking the ribs of matter and swinging between the real and the unreal."

The great specific against such failure is work, is hoeing your own row, and not attempting to hoe your neighbor's. The mistake of men throughout the centuries has been neglecting their own rows for their neighbors'. A man's row is always long enough and heavy enough to absorb all his energy, whilst it is a scientific fact that he lightens his neighbor's toil by confining himself to his own, whereas he adds to it by interference. "Little intermeddling," says the old proverb, "makes good friends." This wholesome minding your own business does not, of course, in any way conflict

with the command of Paul to the Galatians, "Bear ye one another's burdens, and so fulfil the law of Christ." As a matter of fact, it is only by hoeing your own row that you can find it possible to fulfill the law of Christ. Love, every reader of the Bible knows, is the fulfilling of the law, but it is impossible to love your neighbor if you are minding his business instead of your own, and interfering in his method of working out his salvation. Such interference necessitates undertaking to know what is best for him, and the ordinary man rarely knows what is best for himself, much less anybody else. The student of Christian Science who strictly minds his own business and devotes his whole time to working out his own salvation, is bound to be the one to gain most fully the vision of the Christ, and so to be able to fulfill most completely the law of Christ, when he faces the claims of evil threatening humanity, or is called upon to help the individual oppressed by the terrors of disease or sin. Such is the man who bears his neighbor's burden, legitimately and scientifically.

The only way in which this burden of disease and sin can ever be really lifted is through the realization of its nothingness. And this realization comes to the individual, and cannot be imparted by him to the mass. He can, obviously, tell the truth to the mass, that is to say, he can preach the gospel, but his power to demonstrate an understanding of the gospel by healing the sick is confined to himself. His power to heal, in other words, is limited to his success in destroying the lie of materiality for himself. Even if he could induce his neighbor to become an anchorite in his outward contempt for matter, he would find it out of his power to make him see that matter was unreal, and Spirit the only substance. The anchorite makes matter real through fear of it, as the sensualist does through love of it. But this is something a man can only learn for himself through demonstration, through hoeing his own row.

The truth is, that the moment a man begins to attempt to hoe his neighbor's row, he involves himself in a tangle of interference and criticism from which he is bound to find it increasingly difficult to free himself. Criticism in the sense of faultfinding, which is of course not its true mission, is bound to result from interfering in your neighbor's vineyard. You go there for the express purpose of telling him how to conduct his own affairs, and it is altogether inevitable that you should stop to tell him that you do not like the way in which he is doing it. Yet have the critics themselves demonstrated the healing power of Principle to an extent sufficient to justify their clamor? It is a question which they had better ask themselves; for their answer to it affects them to a far greater extent than anybody else. As a matter of fact, it will always be found that the ambition to direct is in an inverse ratio to the offender's power of demonstration. Nobody understood the conceit and foolishness of such interference more thoroughly than Mrs. Eddy, and she made this particularly clear in Article XXIII, Section 10, of the Church Manual, under the heading, "No Interference," in the words, "In Christian Science each branch church shall be distinctly democratic in its government, and no individual, and no other church shall interfere with its affairs;" whilst again, in Article XXXI, Section 3, she directed the Board of Lectureship to observe as lecturers the rule she had already laid down for them as church members: "The Board of Lectureship is not allowed in anywise to meddle with nor to disrupt the organization of branch churches."

This tendency on the part of the individual to steady the Ark of the Covenant by means of his own feeble wisdom was

...

rebuked by Christ Jesus in the case of Peter, on the famous occasion on which that disciple undertook to interest himself in the future of John. Nevertheless, the world finds it considerably easier to imitate Peter in this than in healing the sick.

FREDERICK DIXON.

Accepting the Solution

In relying upon Christian Science for relief of one sort or another, one must be willing to accept the true solution which divine Principle provides. The way of spiritual healing can never be confined to human preconceptions as to what it ought to be. In every case, the outcome is bound to be broader in its significance than any mortal could outline in advance. Absolute wholeness of right action is what is to be desired. Just what this involves, the one turning to demonstrable Principle for help may not foresee. The willingness to recognize the right action as it unfolds, though it may be quite different from one's expectation, is rational acceptance of God's will. This is not, however, a mere sense of resignation to catastrophe or suffering but an alert discernment of genuine good, often apparently novel because of its infinite source. It is a joy to prove the nothingness of any seeming limitations through their replacement with understanding of the truth. One depending on Principle finds happiness in all circumstances by working out what really is vital to immortal Life.

The fatuity of watching for material symptoms to change or disappear is clear when one understands the force of Mrs. Eddy's statement beginning on page 124 of Science and Health: "The elements and functions of the physical body and of the physical world will change as mortal mind changes its beliefs. What is now considered the best condition for organic and functional health in the human body may no longer be found indispensable to health. Moral conditions will be found always harmonious and health-giving. Neither organic inaction nor overaction is beyond God's control; and man will be found normal and natural to changed mortal thought, and therefore more harmonious in his manifestations than he was in the prior states which human belief created and sanctioned." Thus one needs to watch for the change of thought, for the unfoldment of divine intelligence and its harmonious idea, purely spiritual in substantiality, in place of human belief. On this, one's whole attention must be fixed. The state of man must always be learned from Mind. not from supposed matter.

In any case, then, a seemingly new phase of action should not be alarming. What if the pulse beat, for instance, is faster or slower than past medical experience has considered normal? Medical theories as to normality and abnormality are continually variable. The true standard of order is the spiritual consciousness of order. As long as one knows that the only consciousness there really is necessarily is orderly, and demonstrates that he is accepting only this as his experience, he need not be concerned in the slightest about the vagaries of mortal theories or mortal symptoms. There will be, indeed, a satisfactory adjustment through the disappearance of any sense of disorder. The point is that one should not be merely looking for this disappearance nor be disturbed by any unexpected developments. As Mrs. Eddy indicates on page 373 of Science and Health, "When the blood rushes madly through the veins or languidly creeps along its frozen channels, we call these conditions disease. This is a misconception. Mortal mind is producing the propulsion or the languor, and we prove this to be so when by mental means the circulation is changed, and returns to that standard which mortal mind has decided upon as essential for health."

By looking to Mind instead of to mortal, material body, one is satisfied with actual healing in the broadest possible sense of the word. One needs, however, to be awake to recognize the healing as it comes about, even though it be different from one's anticipation. To feel the consciousness of good is, of course, to feel healing. This is veritably spiritual healing, which is interpreted, then, to one in just the manner that meets the specific seeming need. What this manner is, divine Principle alone can determine. Certainly no one is justified in trying to dictate to Principle how Principle should operate. The function of man in the image and likeness of God is to enjoy the infinity of goodness, which is never limited to any human sense of things, whether seemingly good, bad, or indifferent. The right practice is actively to rest assured that Principle is governing in spite of any seeming. Thus one learns constantly more of what good actually is.

The same reasoning applies also to any other problems than those that are called physical. The understanding that infinite divine intelligence is ever sufficient supply, for instance, allows for no offering of mortal advice to the divine Mind as to how supply is to unfold. Only as one knows and rejoices in the spiritual fact, are "all these things" rightly added. The trouble with many people is that, though they think they are seeking "first the kingdom of God, and his righteousness," they like to keep one eye all the while on "these things." The fact is that the adding of whatever is needed may come about simply through the vanishing of the so-called need. The true manifestation of supply is unbounded by human concepts. In all adjustment or readjustment, the way must be God's way. To say in advance that a certain solution that seems possible will necessarily be wrong is to try to limit God. The true solution for any sense of difficulty is complete activity in accord with divine Principle. Though people may see as yet comparatively little of what this involves, there must sooner or later be a complete acceptance of the one Principle as governing man, not partly or tentatively or theoretically, but absolutely and practically. For the acceptance of this right solution, there must be, whether in a case of disease, a case of lack, or a case of discord of any sort, patience, selflessness, freedom from prejudice, and ever broadening vision. The divine Mind arranges the unfoldment of good for the blessing of all, in just the right way and at just the right time.

GUSTAVUS S. PAINE.

[Written for the Sentinel]

Yesterday and To-day

ANNA M. CHATILLON

WHEN now I think of yesterday, Its burdens, and horizon gray, When all to me was dreary, And every moment weary With fear that the to-morrow Would bring new pains and sorrow-

I thank Thee, God! Thou brought'st me light! I know Thy day is ever bright. Thou knowest naught of yesterday, Its burdens, and horizon gray; Thou knowest no to-morrow To bring me pains and sorrow; For Thou art God, eternal good! Thou madest all! Lo, all is good!

Testimonies of Healing

It was four years ago that I took up the study of Christian Science, through the request for treatment by a loved one who was declared to have Bright's disease. I engaged a practitioner and it was not long until I had assurance that my son was free. I shall not forget the day he realized the bonds were removed. I was reminded of Scriptural healings wherein the healed leaped and praised God. Since then he has not been seriously ill at any time and to-day is considered a husky boy. In working in Science for him I have also experienced many healings, and have had other beautiful demonstrations of the power of God, for which I am truly grateful.

After I had been in Science but a short time a rusty nail ran into my foot. Through my own understanding, pain and any after effects such as soreness, swelling, or poisoning, were overcome in a few minutes. I was so grateful for this healing, as I well remembered what serious times I experienced twice from the same cause, when I was a child. I was on my feet and worked hard all day and actually forgot the incident until late in the evening. Chronic bowel trouble, sick headaches, attacks of grippe, and very many other discordant experiences have been overcome. Neither my son nor I have taken a drop of medicine in the four years. Like many others I really value the spiritual awakening most of all. To me "Science and Health with Key to the Scriptures" by Mary Baker Eddy stands next to the Bible, that Book of books. I read little else than the Scriptures, Mrs. Eddy's writings, and other Christian Science literature, and strive each day to gain a better understanding of Truth.

MRS. C. H. RICHARDS, Oroville, Calif.

I thought that I should make an effort to tell some of the blessings received from the study of the Christian Science textbook, "Science and Health with Key to the Scriptures," and other writings of Mary Baker Eddy. My family and I have depended on Christian Science for more than thirty years as our guide to health and happiness. We have raised a family of seven children and they all depend upon Christian Science as their guide to the Father who heals all our diseases. I have been healed of inflammatory rheumatism and of many other things. Members of my family have been healed of scarlet fever, smallpox, measles, and mumps, and I have seen broken bones healed without the aid of a surgeon.

When I first heard of Christian Science I had just moved to Oregon, and one of our children had a very high fever. There was no doctor in the town, but there was a small drug store, so I went there to see if I could get something that would allay the fever. The druggist said he had nothing that he could recommend, and he told me to go and see his wife; he thought that she could help the child. I went to her house and the lady told me that she did not believe in taking medicine, but did not tell me that she depended upon Christian Science. I went home and told my wife that I thought I would take the first steamboat for Portland. At that time there was no way of transportation to Portland except by boat or horseback and there were no telephone lines there. While I was talking about getting a doctor the druggist's wife came in and told us about Christian Science, and that it is the teaching of Christ Jesus again made available for healing. We decided to let her give a treatment, and in a few minutes the child went to sleep and her breathing was natural. The next morning she was all right, and has been well ever since. She has married and raised a large family. without medicine, and they depend upon the teachings of "Science and Health with Key to the Scriptures" by Mary Baker Eddy for their guide to health and happiness.

When I saw the healing of our daughter I began at once to study this Science, for I knew it was the truth that makes free. Later, when I was taken down with lung fever in a very bad form I had Christian Science treatment and in a short time I was able to work again. I have not tasted any medicine since that time, which was over thirty years ago. I have seen a great many cases healed and am very

grateful for this truth.

I was asked to treat one of my grandsons, who had had his arm broken at the elbow joint. He had no pain after the first treatment, unless he bumped his arm, and in three weeks his arm was well and as straight as the other one. This the people thought was wonderful, but it was the power of God made manifest. I am so thankful to God, our Father, to His Son, Jesus Christ, to Mrs. Eddy, and to the Christian Scientists who have helped me in time of need.

WILLIAM H. KING, Corvallis, Ore.

With a grateful heart I desire to testify to the blessings which I have received since becoming interested in Christian Science. For four years I suffered from a severe rupture and bladder trouble, making it very difficult to do my own work, also causing intense pain while walking. I was going to be operated upon, but the extreme fear of an operation held me back. One day I received several Herolds from a practi-Immediately I recognized the truth contained therein, and the truth has made me free. Through the help of a practitioner I was completely healed, so that I am now better able to do my work than I was twenty years ago.

Our eight-year-old son suffered from hernia and growths in the nose, his condition often causing me hours of sadness, but he was completely healed in a very short time through my slight understanding of the truth. I could relate many more blessings received daily through Christian Science, but all could not be told. It has brought happiness and peace daily. The most important factor to me is that I have found the truth, and that no other physician than God is necessary. I would not part with the knowledge gained through the reading of the Bible and "Science and Health with Key to the Scriptures" by Mary Baker Eddy for any price. Words are inadequate to express my thankfulness to God, and gratitude to Mrs. Eddy, as well as to those who have helped me; I am also very grateful for the church services, the textbook, and Herolds. My one desire is to follow the path that leads to God, Truth, Life, and Love.

(Mrs.) Elli Steffen, Bielefeld, Germany.

.1

. [

It is with sincere gratitude for the many blessings Christian Science has brought me that I give this testimony. My whole life has been transformed by it. I have been changed from a miserable, hopeless woman into a well and happy one. My heart overflows with love and gratitude to God and to Mrs. Eddy.

I had been under the doctor's care the greater part of the time for ten years, two years of which I was unable to care for myself, much less my family, and was cared for by a trained nurse part of the time. When I took up Christian Science I had for eight months been unable to sit up except for a small part of the time, and was suffering from extreme nervous prostration. I had been treated by seven different doctors who were all very kind and worked very faithfully

to relieve me. Some of them advised an operation and the last two consulted said it was the only thing they thought they could do to relieve me, as I had taken too much medicine already. I was opposed to an operation and was so weak and run down they did not think best to operate until I was stronger, so advised my husband to try Christian Science, as they knew of some cures. We did so, as it seemed that was about all that was left untried.

At this time I was staying with a sister, hoping the change might bring some relief. The day a practitioner was called I was in bed, overcome with fear and discouragement, and told her there was no use trying to help me, as I knew I could never be well again; but the next day I was able to sit up, and was taken in an automobile to her office for treatment, and through her patient, loving work I am a well woman to-day. That was over three years ago and I am able to do anything I find it my duty to do. Our family has been helped in many ways. Last winter we were healed of influenza, and my son has been helped wonderfully during two attacks of rheumatism. I feel I owe a deep debt of gratitude to all who have so lovingly helped me to gain an understanding of Christian Science. My only hope of repaying it is to seek more earnestly the truth, that it may be given me to help some other who is in need.

(Mrs.) BEULAH MONA, Colton, Calif.

4

From infancy I was a weak, delicate child, suffering very much from severe headaches, never being able to play like other children. When Christian Science was presented to me I was almost a wreck physically and mentally. It is therefore with the utmost thankfulness that I send this testimony of its benefits to me and mine.

When my second child was born I suffered very little pain. That same evening I was able to sit up, and when the child was three days old I rode twenty miles to my home. From that time on I was able to attend to my household duties without harm to myself or the child. I could never tell of all the help this teaching has been to me in overcoming a very irritable temper, a tendency to worry over everything, and also in raising my children.

My testimony would be incomplete did I not mention the great gratitude I feel for our dear Leader and for the help of some of the loving, faithful practitioners.

(Mrs.) PEARL SMITH, New Bridge, Ore.

*

It is with a heart overflowing with gratitude that I send this testimony for the great blessing that has come to me through Christian Science. Before taking up the study of Christian Science I was an invalid with kidney trouble, catarrh of the bowels, indigestion, neuritis, and several other ailments. I had been under the care of several private doctors, as well as three from hospitals. I was three years on a milk diet and was allowed no solid food. I could not walk, was taken out in a bath chair and had to wear a kidney belt. This is how Christian Science found me. A kind friend asked me to try it and I gladly accepted. From that day I relied on God only, making a bonfire of all medicine and belts, and have not used a bath chair since. I walked more and did more each day, knowing that God was my strength. I now do all my housework and am able to help others. I am up at six every morning and on until half past nine at night. I could not express how grateful I am for what Christian Science has done and is doing for me. It meets my every need, has given me a different outlook on life, and the Bible is a different book to me. I am indeed grateful

to God and Mrs. Eddy, who opened the door to health and happiness for us all; also to the practitioner who lovingly helped me out of darkness into light. I love the reading room, and the literature, and could not put into words my gratitude for Christian Science.—(Mrs.) ADA OSBORNE, Handsworth, Birmingham, England.

.

I am grateful for the privilege of giving testimony to the efficacy of Christian Science treatment together with the study and application of its teachings in the healing of disease and all other discordant conditions. I was healed of a disease infinitely worse than cancer or tuberculosis, which the medical fraternity frankly admit they are unable to cope The disease alluded to is commonly known as the "drinking habit" or use of intoxicating liquors. As a noted journalist and ex-postmaster of California in his narrative of the healing of this disease says, "It is no more accurate to speak of a man having the liquor habit than to speak of him as having the cancer or consumption habit." It certainly is a disease, and one not easy of cure through human will power. I worshiped at the shrine of Bacchus for a good many years, beginning in a social way, and the disease progressed insidiously until I was a physical wreck. Will power, pledges, resolutions, and various cures were of no avail. The beautiful part of this healing is that there was absolutely no temptation and continual battle as with human will cures. The enemy simply departed into its native nothingness. I was convinced that the cure was absolute and complete, for I was, as it were, "born again." I was also healed of a throat and bronchial condition that gave me much concern from early childhood, especially in the winter season. A specialist some years ago advised me to seek a semi-tropical climate.

The admonition of the great Way-shower of nineteen centuries ago, "If ye continue in my word . . . ye shall know the truth, and the truth shall make you free," has been demonstrated to my entire satisfaction through the elimination of much that is worldly and material and its replacement by that which is spiritual. The study and application of the Science of Christianity as taught by Mrs. Eddy has brought complete harmony into my life, destroying discordant conditions, physical and mental, and giving me a fuller realization of my true being as the son of God, having dominion over and not being in subjection to the beliefs of evil. The scientific statement of being, as given by Mrs. Eddy on page 468 of Science and Health, has proved to me that "the flesh profiteth nothing," that matter has no power, that fleeting worldly pleasures are only temporal. I have discarded them for the spiritual, real, and eternal, which means heaven within, and the attacks of error are lessened day by day.

In reading "Science and Health with Key to the Scriptures" the first time, the first line of the Preface made an indelible impression upon me, "To those leaning on the sustaining infinite, to-day is big with blessings." The much misunderstood old saying, "Self-preservation is the first law of nature," has been replaced by the Golden Rule toward my fellow man. The better understanding of the truth has brought peace, happiness, health, contentment, and prosperity into my life. The peace that the world can neither give nor take away is my abiding possession. The "pearl of great price" has been found. My chief concern now is spiritual living, and my prayer the desire to help others to better living.

If you, dear reader, or any members of your family, friends, or relatives are in bondage to or handicapped by this or any other false appetite, do not despair; there is heal-

ing for all who earnestly and sincerely seek and practice this great truth as revealed by Mary Baker Eddy in "Science and Health with Key to the Scriptures," for "man's extremity is God's opportunity." No worldly or material influence can turn me from the straight and narrow path of good to which Christian Science has led me. I am profoundly grateful to God, and to Mrs. Eddy, for all the blessings I have received.—WILLIAM E. DIXON, Chicago, Ill.

4

Words can never express the gratitude and love I feel for the knowledge of Christian Science which came to me when every material remedy I tried had failed to relieve me of a serious nervous breakdown. Since then, over seven years ago, this blessed truth has met and mastered many discordant physical and mental conditions, when I have been obedient and God's word has been faithfully applied to the problem. Many times a most loving and patient practitioner has helped me to realize my God-given dominion, and many times I have had the joy of demonstrating this glorious truth for myself and others. To be able to comfort others as I have been comforted and to see sin and sickness fade into nothingness, is cause for deep gratitude to God, the only Physician and ever present help in trouble.

(Mrs.) Etta Gross, Brooklyn, N. Y.

4

I have long felt that it was my duty to testify to the blessings that have come into my life through the study of "Science and Health with Key to the Scriptures" by Mary Baker Eddy. Four years ago my husband was told by a physician that he would pass on soon if he did not have an operation performed, and when I asked the physician if the operation would heal him he replied, "He cannot live the way he is, and he stands a chance if he goes to the hospital." About this time a friend told me of several cases of healing through Christian Science and gave me some copies of the Sentinel to read. We were quite skeptical at first but after reading the testimonies we decided to borrow a copy of Science and Health from the library. It proved so interesting to us that we read it constantly, and in a few days I was able to do away with a remedy that I had used daily for several years for bowel trouble, and I have never needed it since. After that proof of the healing power of divine Love, I destroyed all the medicine and medical books in the house, and neither we nor our children have used any material remedies since.

An account of our healings, moral, physical, and financial, would fill a good sized book but I should like to mention a few for which I am most grateful. By realizing the truth of the "scientific statement of being" (Science and Health, p. 468), I was instantly healed of a severe pain in my lungs, which I had had medical treatments for in vain before taking up Christian Science.

Not long ago my two-year-old baby became suddenly ill with very high fever. I was very fearful as there was no practitioner near and we had no telephone, but the thought came to me that God is near me and I have only to realize His presence. Then I gladly thought, "He is not mine, Father, but Thine, and I know he is safe," and immediately the fever left the child and he was well. We were led to rent land and start farming this year, with the promise of financial help to get the necessary tools and horses. We later found that we could not accept the help under the conditions imposed and we had to learn that "vain is the help of man." At first we were quite discouraged and thought we would have to give up our plans. As soon as we realized that God

is the giver of all good, and saw clearly that He is the only source of supply, that His children can lack nothing, we were offered from an unexpected source all the money we needed to go ahead with, without asking for it.

Before taking up the study of Christian Science we kept a Bible in the house only because it was considered the proper thing to do, but since its meaning has been opened to us through the pages of "Science and Health with Key to the Scriptures," its daily study gives us great joy. We feel most grateful for the Journal, Scntinel, Monitor, and Quarterly, and to Mrs. Eddy for her great labor of love for humanity.—(Mrs.) Leona Tognazzini, Santa Maria, Calif.

4

I should like to express my gratitude for Christian Science. Some seven years ago I met with an accident and it meant all but passing on. At that time I was altogether unsettled in religion, and from then I never seemed to have health for any length of time, one of the seeming difficulties being loss of memory. I frequently prayed, "Show me Thy will and help me to do it." For another four years I tried different remedies and then an operation seemed the only thing in order to get relief. At that time I relied implicitly on the promise, "Thou wilt keep him in perfect peace, whose mind is stayed on thee: because he trusteth in thee." With that I came through the operation splendidly, but only to have a seeming collapse again at the end of four months.

At this time the thought came to me to try Christian Science. I got a copy of the textbook, "Science and Health with Key to the Scriptures," and studied it, attended the church services for some weeks, and then asked a practitioner for help. For that healing words cannot express my gratitude, for it came about right away and was just a revelation, for through it I found God. Later on, the need for wearing glasses was overcome, and to my great joy memory was restored,—for that I had never thought possible again. I have had many other healings and am grateful for every one. Since taking up the study it has met every need in our home. I should like also to express my deep gratitude for all the literature and all the blessings it carries with it.

It has just been Love as we learn it in Christian Science, that makes all things new, but the great thing that stands out is the better understanding of God, which can be best expressed in living. My one desire is to be able to share with others the blessings I have received.—(Mrs.) Florence G. Croft, Bradford, Yorkshire, England.

٥

I am very thankful for the healings we have had through Christian Science. When I first heard of it I was certainly in need of help, for I seemed to have many diseases. Stomach trouble, liver complaint, nervousness, constipation, and headache, which I had most of the time, have been healed. I had to take medicine every night, and if I failed I would get up the next morning with a headache. We had several different doctors prescribe for me and I had taken all kinds of patent medicine without much help, and I had given up all hope of ever being any better by taking medicine. I could not eat anything without distress, not even bread and milk.

A friend sent my sister some Sentinels as she had been ill for several years. She wanted to try Christian Science and began to read "Science and Health with Key to the Scriptures," and also had a few treatments. In a short time she was feeling so well she wanted me to try it. I also bought Science and Health and began reading. I had a heavy cold on my lungs and coughed excessively. I had Christian Science treatment and in six weeks I was feeling well, was able to eat any-

thing, and could do more work than I had for ten years. In a few treatments my baby was healed of croup. Many ills have been overcome for our five children, one of which I would like to mention.

Our young son began complaining one Sunday about stiffness in his back. I did not write for treatments for a day or so, thinking that through my understanding it would be overcome. In two days he could not walk or move himself on account of swelling and inflammation in his knees and ankles. He cried and fretted and would not allow them to be touched. On Thursday I sent a note to my sister, which she said expressed fear. She came over that evening and wanted me to go and see the Scientist who was treating him. I went the next morning and she helped me to overcome fear. That evening when I got home the boy was much better. The next morning he walked with the aid of two sticks, into the front room, and before night was walking all around the place. He has had no trouble since. The disease was supposed to be inflammatory rheumatism. I am very grateful for the literature. I am grateful to God, the giver of all good, and to Mrs. Eddy, for the truth that makes us free, and also to the practitioner who has helped us so lovingly .- (Mrs.) REBECCA ELLIOTT, White Salmon, Wash.

It is with loving gratitude that I give this testimony of what Christian Science has done for me. I did not come into Christian Science for physical healing, but became interested through reading our periodicals. I had passed through a great sorrow, but a great sense of peace came to me after reading the Journal or Sentinel. I had found the truth, and rejoiced. I have received many blessings through Christian Science, having been healed of fear, worry, limitation, unhappiness, colds, and quinsy. I had suffered from quinsy since childhood and was healed through absent treatment in twenty minutes. That was over four years ago and the trouble has never returned. No matter what problem has to be worked out I always find just the right help in our periodicals. Mrs. Eddy says in "Science and Health with Key to the Scriptures" (p. 342), "If Christianity is not scientific, and Science is not of God, then there is no invariable law, and truth becomes an accident." The knowledge that Christianity is scientific gives us a demonstrable understanding of truth which results in healing, supply, and in intelligent, right activity in all things.

I have found that gratitude to God is a most potent means of loosening the bonds of a self-limiting sense. It opens the door of thought so that the light can enter. I am very grateful to God and to our Leader, who has given us this understanding of divine Principle. I am grateful for the Journal, Sentincl, Quarterly, and The Christian Science Monitor, which brings a blessing to every home it enters.

(Mrs.) M. A. ZIMMERMAN, Chicago, Ill.

Deep thankfulness to God for my son's and my own wonderful healing through Christian Science causes me to praise God. Thanks to the beneficial teachings of our revered Leader, Mrs. Eddy, I have gained an understanding of God as ever present, divine power and Love. Since childhood I had suffered from fear, and since my twelfth year was frequently troubled with nosebleed, headaches, and insomnia. This weakened me to such an extent that in my twenty-first year my nerves were in such a state that I was to be sent to a sanatorium. Even at that time God heard my mother's prayer. Upon the advice of the attending physician I remained at home and was obliged to stay in bed. When I

had so far recovered that I was able again to perform household duties, I requested the physician not to come any more. After six years, useless worry, pain in the back, and hysterics drove me to the physician again, who gave me a medical prescription. For twelve years this seemed to help me. The fear, however, increased to such an extent that my entire family suffered as a result, especially my seventeen-year-old son. He had chosen the life of a seaman and through a misfortune returned home, becoming a mental and nervous wreck. For the sake of the other children and acting upon the advice of a physician, we sent him to a sanatorium. He was not given medicine either in the sanatorium or at home, requiring only rest.

At this point a kindly friend called my attention to Christian Science. I became absorbed and gained confidence in it, and requested the help of a practitioner, which was lovingly given to my son and myself. After a few treatments I felt that this only was the correct way; our son also became brighter. Thanks to the further treatments and explanations of the practitioner, our son was soon able to leave the sanatorium. Since that time he has resumed his seaman's work, in perfect health, under God's protection and guidance. Now I can see that we all grew in the happy knowledge of divine Love through these proofs. Since that time I have applied Christian Science to all my problems, whether in connection with the children, the home, the barn or the garden, and with good results. I am thankful to God and to Mrs. Eddy for the blessing of Christian Science.

(Mrs.) Anna Krohn, Tangermünde, Germany.

I do not know just where to commence or to leave off in telling of the wonderful change Christian Science has wrought in my life, and also in the lives of other members of my family. I came into Christian Science four years ago. For over thirty years I had been what the world terms a semi-invalid and in the words of Scripture had "suffered many things of many physicians," and was only worse because of it. I had passed through many critical operations, was a nervous wreck, and seemed to have almost every ill the flesh is heir to. In the first few weeks of study I was healed of a lameness in my back from which I had suffered for ten or twelve years, so that if I stooped over it was difficult to raise myself up again without taking hold of something for support. I have also been healed of chronic bowel trouble.

For these and many other demonstrations of the power of Truth I am indeed grateful, but most of all for the mental change, the spiritual uplift which I have come to know I needed most of all. I have been healed to a great extent of a hasty temper, of hatred, envy, jealousy, and all the terrible brood of wrong thoughts so common to mortals. I am trying each day and hour to express more love, to be obedient to our revered Leader's teaching as far as I understand it. I am more grateful than any mere words can express, to God and to Mary Baker Eddy who made it possible for me to understand Jesus' teachings.

Four years ago I would not read the Bible, did not believe it. Now it is my daily food and I am trying to discern the deep spiritual meaning hidden in its teachings. I want to make my daily life prove my gratitude, for in no other way can I hope to repay the debt I owe to every one who has helped me to make Christian Science practical in my daily life. I am grateful for membership in The Mother Church, for all of our dear Leader's works, and for all the periodicals.

(Mrs.) JENNIE ESTELLE WELTON, Highland, Calif.

Signs of the Times

["Versatility"-The Christian Science Monitor, Boston, U.S.A., July 13, 1920]

Certain individuals turn with readiness and grace to new tasks or occupations, and are apt therefore to be the admiration of human society,-indeed not only the admiration but even the envy, since the human mind is so limited in outlook that it is astonished at what seems to it the spectacle of more than two or three excellent qualities manifest together. Those who combine such qualities are said to be versatile, and are considered to be especially favored of a God who apparently deals out sparingly to His children from His abundance. To the human mind, not to be versatile is a rule which it accepts resignedly as one of the normalities of what it calls human nature. Such a limited outlook did not blind the emancipated Paul, who exposed its fallacy when he wrote joyfully to the Philippians: "I can do all things through Christ which strengtheneth me." Paul spoke of withstanding torturous trials and persecutions, many and various, but always he bore witness that he could do all that was demanded of him. So proved he the power of the Christ, Truth, to free human capacity, and so, eighteen centuries later, proved Mary Baker Eddy, Discoverer and Founder of Christian Science.

On page 385 of her book, "Science and Health with Key to the Scriptures," Mrs. Eddy gives to him who reads a message revolutionary to human systems: "Whatever it is your duty to do, you can do without harm to yourself." In these statements of Paul, and of Mrs. Eddy, there opens for those who strive to understand them the door to real versatility. What is it but the latent fear either of harm to one's self or others, or of lack of strength or ability to succeed, that stifles most impulses to ventures seemingly new? And what is it but the mastery of fear of consequences, and the assurance of strength to win, that has made mankind plumb the sea, fathom the air, and circle the globe with many wonders of great usefulness? Only, however, when such mastery proceeds upon the understanding of Principle, God, who alone is All-power, can it be enduring and applicable to every department of endeavor. Only when a man learns that all that performs is the one, infinite, divine Mind, real consciousness, or God, whom the compound idea, man, reflects as infinite, perfect, spiritual activity, does he find freedom to achieve in "fresh woods and pastures new," and thereby to attain infinite variety of spiritual achievement in the way best suited to his individual development.

The sincere student of Christian Science is proving daily for himself what versatility really is. He knows that "with God all things are possible" and that "the government shall be upon his shoulder," and that therefore when new demand for activity presents itself, it constitutes simply one added opportunity for him to reflect infinite intelligence. He will beware of the subtle suggestion, that wolf in sheep's clothing, that would whisper that he does not have to reflect all of the divinely active Mind, and that he can content himself with manifesting those qualities of infinite Mind that have already been proved to him. Certainly he will be content with and unceasingly grateful for every step in the continued unfoldment of the infinity of the kingdom of heaven; but for him to attempt to limit that unfoldment would be to deny the spiritual fact of Life and of God's spiritual creation, and to set himself up as a creator hedging about with "Thou shalt nots" the limitless possibilities of divine reflection.

Certainly there are "diversities of gifts." To Paul's testimony on this point Mary Baker Eddy adds that axiomatic declaration in Christian Science: "All is infinite Mind and its infinite manifestation, for God is All-in-all" (Science and Health, p. 468). But for the student of Christian Science to accept a limit to the unfoldment of this "infinite manifestation" would be to reason falsely that the compound, unlimited idea, man, could be made up of limitation; that infinity could be an aggregate of finities; and that the oneness of Spirit could be subdivided in reflection. Such a suggestion, once bared and brought to light, must be instantly repudiated by the student of Christian Science, who is learning through deliverance from evil the essential oneness of God as All-in-all.

Since there is one perfect, infinite Mind completely reflected, all there really is for a man to do can be accomplished. There can be no endeavor difficult, remote, untried, to divine Principle, which is the law of the only real success,—flawless reflection of Mind. What then becomes of the fancied idol of versatility? The student of Christian Science knows that versatility is not a human attribute to be attached to one or a handful of human beings in a world barren of perfection. He knows that versatility is not to be possessed through heredity, chance, the "gift of God" to one more than to another, or through the supreme effort of ambitious human will. What he does know is that "the law of the Spirit of life in Christ Jesus," of which Paul wrote to the Romans, when understood, breaks human limitation and releases capacity for expression wherever and however the need for it may be manifest.

Whether his work seems to be healing the sick, reforming the sinner, or applying his understanding of divine Principle to business, professional, or domestic affairs, a man will be joyfully aware that his understanding of the Christ-man heals any sense of wrong endeavor, replacing it with buoyancy, spontaneity, and certain success. Called to new fields, he will no more think of limiting his capacity for demonstration there than he would think of calling God finite. Because God, Principle, is infinite and man is His reflection, the demonstration of what man is is limitless, not to be circumscribed. The ability to prove this limitless possibility of man in divine Science constitutes true versatility.

["Do You Use the World's Best Textbook?" in The American Magazine]

With all the competition in this age of books, the Bible is "the best seller" in the world to-day. More than thirty-five million copies are distributed annually. The Bible is millions and millions ahead of its nearest rivals among books, in spite of their advantages in novelty and in advertising. . . . The man who turns his back on the Bible is deliberately neglecting to consult the best specialist on how to live, how to work, and how to be happy. The best set of business rules anybody could devise might be taken verbatim from the Bible. The same thing is true of the other relations of life. How to meet adversity or prosperity, how to get along with your friends and your enemies, how to be well in body and contented in mind—whatever your problem, the Bible can give you the right [information] on how to meet it.

[From "Parliament and Revolution" by J. Ramsay McDonald]

Now, nothing can take the place of intelligence. . . . Furthermore, we can by an interesting academic analysis show how complicated is modern society, how difficult it is to create one sovereign authority in the State effectively claiming both political and economic allegiance, but none of them, nor all of it put together, helps us to get away from the difficulty which the absence of wisdom in the use of power creates. Where there is no intelligence there will be no unity. Where there is no comprehension of unity and no

conception of how political action can secure it, a mere change of systems of government is like a change in style of architecture without discarding the rotten bricks which made the previous building uninhabitable. Socialists, revolutionary or evolutionary, can never get away from this. ... If the people do not understand Parliament, better government is not secured by splitting up its functions.

["Adequate Pay for Teachers"—Read before the National Education Association, by P. P. Claxton]

Teachers worthy of places in the schools in which American children are prepared for life, for making a living, for the duties and responsibilities of democratic citizenship, and for eternal destiny, can never be fully paid in money. Men and women worthy of this highest of all callings will not think first of pay in money or in any other form. For teachers, as for all other workers, Ruskin's saying holds: "If they think first of pay and only second of work, they are servants of him who is the lord of pay, the most unerect fiend that fell. If they think first of the work and its results and only second of their pay, however important that may be, then they are servants of Him who is the Lord of work. Then they belong to the great guild of workers and builders and saviors of the world, together with Him for whom to do the will of Him that sent him and finish His work was both meat and drink." . . .

Teachers who do their work well and who, either in fact or by faith, see the world made better as a result; individuals made healthier, wiser, happier; sin and suffering made less; the common wealth made more; social purity and civic righteousness increased; public laws made more just; patriotism broadened and purified; state and nation made stronger and safer against attack from without and decay from within; and the world lifted on to a higher plane and into a brighter sunshine and a purer atmosphere, are possessed of wealth unseen and, for most, unseeable. All true teachers will think on these things, and many of the best will be attracted to and held in the profession by them. It will be all the worse for the profession and the world when it is not so.

But this should not be made an excuse for putting public or private education on a charity basis, nor for paying teachers the miserably low wages they are now paid. It should not be made an excuse for paying such wages as will not permit school boards and superintendents to fix reasonable minimum standards of qualifications for teachers because young men and women who expect to teach cannot afford to incur the expenses necessary to prepare themselves to meet the requirements of such standards. It should not be made an excuse for failing to increase the pay of teachers, as the pay in other professions is increased, in recognition of proved merit and in proportion to increasing ability gained through experience, continued study, and constant devotion to duty....

With such proper and useful economies, as may be easily brought about, including consolidation of small rural schools and the adoption of a well arranged work-study-play plan in the city schools, the total number of teachers in the public elementary and secondary schools of the United States need not exceed 750,000 within the next five or ten years. At an average wage of two thousand dollars, it will take a billion and a half dollars to pay 750,000 teachers. Increase this by fifty per cent—a liberal amount—to pay for administration, supervision, buildings, equipment, and supplies, and we have a total of two and a quarter billions . . . only \$140,000,000 more than the amount the Department of

Labor reports that we paid last year for tobacco in its various forms. Our part in the world war, in which we fought for freedom and democracy, cost us not less than fifty billions of dollars all told. At five per cent the annual interest on this amount is two and a half billion dollars. Without education there can be neither freedom nor democracy. . . .

Will the people pay? The wealth is theirs, the children are theirs, the schools are their agents, owned and supported by them for the education of their children and for the attainment of all that this means and can be made to mean for their own happiness, for the individual welfare of their children, for the production of material wealth, for the individual and common good, for the public welfare, for civic righteousness and social purity, for strength and safety of state and nation, and for all that patriotism means and all that supports life and makes life worth living. I have faith to believe that when the people are made to understand this they will respond. They have never failed. They will not fail now.

[Dr. Doremus Scudder at The National Federation of Religious Liberals]

"Men who experience the Father as the very life of their life, and as a result are born into the world of brotherhood, have passed into a realm where considerations like Nicene or Apostles' creed as faith's minimum, or baptism and the Lord's Supper as sacraments rather than as symbols, or episcopal ordination or nonordination, do not count," said Dr. Scudder in an address on "Christian Unity Through Finding the Father."

"This experience not being limited to the Christian church embraces in the wider religious brotherhood men of all religions who hear and obey the still, small voice. If we ever have organic union in the Christian church, the universality of this culminating experience of God as personal Father and Companion will certainly furnish the appropriate ground for it. It is significant that as this experience deepens in the individual soul and as a constantly enlarging company of men share it, the obstacles to union are progressively disappearing. Some day we Christians, dwelling in the Father and He in us, will awaken to find ourselves one. That will be the most blessed moment in all human history."

[Jew and Christian Scientist]

That Christian Science is becoming widely known and accepted is admitted by the writer of a critique upon a recent play who for that reason suspects the author of introducing the subject for purely commercial reasons. Whatever may have been the motive of the playwright in creating a hero who was both Jew and Christian Scientist, the critic, as reported in the Brooklyn [New York] Eagle, thinks that he made a dilemma by doing so and that in order to extricate himself without offending adherents of both faiths he was obliged to "glide around" the difficulty "by showing his hero to be undecided about Science" and by having him describe himself as a "Jewish Christian Scientist." Whether the playwright realized it or not, the student of Christian Science knows that there is no real difficulty to prevent a Jew from becoming a Christian Scientist—and one who is not undecided-without giving up anything that is good and true in his former beliefs. Mrs. Eddy explains this, beginning on page 360 of the Christian Science textbook, "Science and Health with Key to the Scriptures," where she says, "The Jew believes that the Messiah or Christ has not yet come; the Christian believes that Christ is God. Here Christian Science intervenes, explains these doctrinal points, cancels the disagreement, and settles the question. Christ, as the

true spiritual idea, is the ideal of God now and forever, here and everywhere. The Jew who believes in the First Commandment is a monotheist; he has one omnipresent God. Thus the Jew unites with the Christian's doctrine that God is come and is present now and forever. The Christian who believes in the First Commandment is a monotheist. Thus he virtually unites with the Jew's belief in one God, and recognizes that Jesus Christ is not God, as Jesus himself declared, but is the Son of God."

[Health by Statute-The Times, London, September 14, 1920]

The impossibility of making people virtuous by statute has long been recognized; a perusal of the first annual report of the Ministry of Health, to which we made reference yesterday, suggests that the hope of making them healthy by law is equally remote, especially when the disease belongs to a category associated with the darker aspects of human nature. We quoted some dismal statistics yesterday, which say little for the efficacy of propaganda, conducted with a liberal expenditure of money, and the abundant literature of national regeneration. Eloquence on paper is no substitute for the extirpation of disease, and we believe that the public is aware of its weakness.

[Rev. E. A. Miller, Ph. D., in Zion's Herald]

Good will is a law as truly as gravitation. That is, it is absolute. It is not dependent upon time or place or any given conditions. Good will worked long before Jesus formulated the Golden Rule or the great Commandments. The law of good will is a part of the constitution of the universe. It is more than an appended by-law, although some people act as though they considered it quite optional. It is universal, operating within the church and without, operating in pagan lands as well as in civilized. Whosoever breaks the law of good will, wheresoever, whensoever, he shall be broken by it. Just as the law of gravitation demands absolute obedience, so does the law of good will. He who breaks either law must expect to suffer serious consequences of misery and defeat. . . .

We must never forget that good will is good effort. Good will inevitably expresses itself. It is not merely a latent quality of the inner life. It leads to cooperation in every effort for the well-being of society. Unless we can join hands with our brother in a good work our professed good will is a delusion. We are just trying to make ourselves believe that we have what we should like to have. Genuine good will would dissolve all industrial, economic, social, and international disputes. Good will believes in the unity of mankind and believes that what is for the good of one is for the good of all, and what is for the harm of one is for the harm of all. . . . Good will lies at the very center of the Christian system. Good will is God's will.

[From "Trading with the Far East" by Irving National Bank]

Friendship, which includes confidence, counts for much. Once obtained it must not be abused. Sharp practice, poor packing of shipments, the sending of substitutes instead of the goods ordered—any one of these is fatal to commercial friendship in Asia. And good will cannot be retained if the just and proper interests of the customer, actual or in prospect, are ignored. The house which would do business in the Orient must prove it has dependability, that it is in the market to stay, and is willing to meet any reasonable conditions. . . .

Despite his reputation for conservatism, the Japanese, Chinese, or East Indian seems to make definite response to American promotion methods when the product satisfies a want and the appeal is intelligently made. . . . In the preparation of copy the advertiser should tell the plain, unvarnished truth. Exaggerations will work to his ultimate harm. The Far Eastern customer demands that the goods he buys be exactly as they have been represented. Once his confidence is lost, it can be regained only by great effort, if at all. . . . Courtesy, clearness, and completeness are qualities that must be regarded as indispensable in every business communication to the Orient. Consideration of the viewpoint of the person addressed must be kept ever in mind. . . . More and more American exporters are teaching their men to think of work in the foreign field as permanent. They emphasize the importance of moral as well as mental qualifications and fitness.

[Introduction to a Christian Science Lecture at Centralia, Ill.]

To the most casual thinker it must be evident that the restless state of the people of the world to-day is an indication of a desire for something that will serve as a guarantee of better conditions, or in other words, of peace and happiness. It is as if the human mind was awakening to the fact that if its desires are to be realized, its calculations must be based on something different and more permanent than that which it has heretofore employed. Over nineteen hundred years ago, in speaking to a people in a somewhat similar state of thought, Jesus of Nazareth said: "Come unto me, all ye that labour and are heavy laden, and I will give you rest. Take my yoke upon you, and learn of me; for I am meek and lowly in heart: and ye shall find rest unto your souls." Herein he prescribes that which is most needed to insure an improved condition.

Christian Science teaches how to apply this doctrine in our everyday activities, and in so doing brings that peace and happiness into the lives of those who practice its theology. It proves itself to be true by healing the sick, reforming the sinners, and making straight all sorts of discordant conditions. The lecturer is going to tell us about this practical everyday working theology.

[Partial Prohibition Cannot Be Enforced—Manufacturers Record]
William G. McAdoo recently issued a statement . . . in
the course of which he said:—

"I know from my experience as Secretary of the Treasury that no law which provides for a drink containing a certain percentage of alcohol can be successfully enforced. If the law should permit thousands of breweries and wineries to be reopened throughout the land and to manufacture beverages with a specified alcoholic content, it would be impossible to prevent the manufacture of those beverages with a larger percentage of alcohol than prescribed or to prevent adulteration after manufacture, and the effect would be to nullify the prohibition amendment.

"Even if the saloon itself were not reopened, light wines and beer would be sold at every soda fountain, at every lunch counter, and in every restaurant and hotel. It is a notorious fact that drunkards begin by drinking light wines and beer when young and as the appetite grows, the desire for strong drink is developed. If we turn loose upon the country light wines and beer, we have destroyed the prohibition amendment and brought back upon humanity a curse greater than war itself. The greatest victory ever achieved for helpless women and children would be thrown to the winds.

"It required a two-thirds vote of the Congress to submit the prohibition amendment to the states. It then required

know this fact."

realize that it is useless.'

three-fourths of the states to put the amendment in the Con-

"If Congress can, by mere majority, vote with the ap-

proval of a favoring President to license beer and light wines,

then prohibition, which required a two-thirds vote and a

Presidential approval, plus the consent of three-fourths of the

states, can be nullified by a majority of the Congress with the

approval of the President, and the breweries and wineries

Dr. Herbert Snow, speaking of vivisection in The Starry

Cross, a publication devoted to the cause of antivivisection,

says: "I would . . . strongly urge that advocates who

earnestly seek the success of our great cause . . . will do

well to acquaint themselves, so far as may be, with the sci-

entific arguments on which it securely rests. . . . It is never

enough to denounce the cruelties of the vivisection and there

to stop. . . . But when you proceed to prove—as it is al-

ways easy to do—that vivisection is not only cruel, but also

futile-that it has never produced benefit to man, or im-

proved his knowledge in the faintest degree, that on the con-

trary it has commonly wrought him the greatest harm and

continues still to do so; then you stand on sure ground. . . .

Vivisection will not be put down until the world has come to

As the above article states, however often it may be re-

iterated that vivisection is cruel, that argument avails very

little, for even many humane people indignantly denounce it

as a sentimental attitude and point with sincere conviction to

the fact that, as they think, the "greater good" is served by

letting animals suffer when humanity is thereby saved suffer-

ing. Sheer cruelty is not difficult to get rid of. It is not only the cruelty of vivisection, but the belief that through that

cruelty certain good results are obtained that must be at-

tacked before real progress can be made. This belief held

quite generally not only in connection with this particular

evil, but with others, is in turn the fruit of the "tree of the

knowledge of good and evil." Christian Science alone has

proved that knowledge is only good, that causation is only

good,-as its Discoverer and Founder, Mrs. Eddy, writes on page 93 of "Science and Health with Key to the Scriptures":

"Good never causes evil, nor creates aught that can cause evil. Good does not create a mind susceptible of causing

evil, for evil is the opposing error and not the truth of crea-

tion. Destructive electricity is not the offspring of infinite good. Whatever contradicts the real nature of the divine

Esse, though human faith may clothe it with angelic vest-

[Vivisection Being Proved Futile]

stitution. Forty-five states have ratified the amendment.

ments, is without foundation." The "scientific arguments" against vivisection, then, must rest upon the fundamental fact of the allness of good in theory and practice; upon the

fact that evil is not "part of God's plan," a means toward good, a phase of good, or anything which the human mind has claimed in its efforts to explain the supposed existence of

evil. Christian Science practice is making it more and more apparent that health has its origin in God and not in the suftering of animals, or as one writer in The Starry Cross puts

it in speaking of serums, in "the products of disease." As this truth about health is more and more seen, it will become evident even to the so-called human mind, and any supposed

tend to decrease. The latest report of the Registrar-General of England, as quoted in a recent article in The Animals'

Defender by Stephen Coleridge, is proof of this:-

of smallpox, one of whom was undoubtedly vaccinated. This

"Two persons in the last recorded year, viz., 1918, died

success which may have seemed to follow its methods will

[197]

ward for the dogmatizers about vaccination, but their discomfiture is completed when we learn that five people in 1918 died from 'cow pox and other effects of vaccination.' So that half those who died of smallpox were vaccinated, and twice and a half times as many people died of the preventive as died of the disease; and this is not all, for the Registrar-General told us in 1915 that persons who really die of vaccination are sometimes registered as having died of other maladies.... "If we turn to the most prevalent diseases which have so

practical disappearance of the disease in this country syn-

chronizes, as we all know, with a larger proportion of the

population refusing to be vaccinated themselves or to allow

their children to be vaccinated. As the preventive is more

and more abandoned the disease disappears. This is awk-

far escaped being treated by the vivisectors with their serums and their antitoxins . . . the death rates generally show a decline in the last ten years. . . . Some diseases that have never been the subject of the vivisectors' attentions show an extraordinary tendency to decline . . . whereas in the case of 'diseases of the thyroid body' . . . which the vivisectors say they have practically abolished, the death rate had gone up from seventeen in 1909 to twenty-two in 1918. . . ."

Mr. Coleridge then comments: "In the affairs of mankind cruelty does not pay. The greater the cruelty to animals the less the benefit to mankind. The infinite Power that ordains the causes and effects of the world does not allow man to attain benefits to himself by the infliction of merciless suffering upon the innocent creatures which are placed defenseless in his hands."

[Religion Essential to Popular Government-The Christian Register]

"Without religion, popular government cannot survive," says William Howard Taft, chairman of the Unitarian Campaign, in a statement defining the religious convictions of an American citizen as he interprets them, made at the request of Unitarians who are about to observe the Pilgrim Tercentenary with a united denominational forward movement.

"The study of man's relation to his creator and his responsibility for his life to God," says Mr. Taft, "energizes his moral inclinations, strengthens his self-sacrifice and restraint, prompts his sense of fraternal obligation to his fellow men, and makes him the good citizen without whom popular government would be a failure."

This observation is based upon experience which the former President says that any one who has studied the life of a people from the standpoint of a responsible administrator must recognize. Four years as Governor-General of the Philippines,-chief executive of seven million Orientals, among whom were Christians, Mohammedans, and pagans,-and four years more as President of the United States led Mr.

Taft to say:-"The longer and more intimate my knowledge of their political and social lives, the more deeply impressed I have become with the critical importance of the part that the church and religion must play in making popular government what it ought to be, and in vindicating it as the best kind of a government that an intelligent people can establish. A people without religion is lacking in the greatest aid to the progress of society through the moral elevation of individuals and the community."

[A True Test of Bible Interpretation]

The following extract from an article in The Congregationalist and Advance evidences an increasing realization that the Bible cannot be at the same time the source of the many religious doctrines which completely contradict each

other, and that there must be some way of determining what

is correct, beyond mere opinion:-

"The Bible is a wonderful book. It still exists in spite of much maltreatment by its friends. It teaches Presbyterian, Baptist, Methodist, Episcopal, Dunkard, Holy Roller, Roman Catholic, Christian Science, and Mormon doctrines, and the doctrines of all the other sects. At least all these claim to found their teachings upon the Bible and are likely to insist that their teachings are the most important and result from the truest interpretation of the Book. . . .

"Why is the Bible held responsible for all the hobbies and fantastic, divisive isms of the various denominations? What false emphasis and point of view made it teach outrageous things in direct contradiction to the spirit and teaching of Jesus? The Bible grew. Thus there is in it that which was outgrown. Failure to recognize this fact and to test all by the spirit and teaching of Jesus is responsible for much of the distortion."

Since the works of Jesus were the inseparable result of what he thought and taught, it would seem that the only thorough test—the only one not open to argument and dispute—of a correct understanding of the Bible would be proof that it results in the same way as did Jesus' understanding and the understanding of prophets and apostles,—in healing works. This test Christian Science can stand.

Church Notices

Boston, Mass.—The First Church of Christ, Scientist. Sunday services, 10:45 a.m. and 7:30 p.m.; Sunday school, 10.45 a.m.; Wednesday evening meeting, 7:30 p.m., in the church edifice, Norway, Falmouth, and St. Paul Streets. The church is open to visitors Wednesdays and Fridays from 10 a.m. to 5 p.m.

Reading rooms: Little Building, corner of Tremont and Boylston Streets (fourth floor); open daily, except Sunday and Wednesday, from 9 a.m. to 9 p.m., and on Wednesday from 9 a.m. to 5 p.m. National Union Bank Building (seventh floor), 209 Washington Street, opposite old State House; open daily, except Sunday, from 9 a.m. to 5.30 p.m. Coolidge Corner Building, 1316 Beacon Street, Brookline; open daily, except Sunday, from 9 a.m. to 6 p.m.

From the Clerk of The Mother Church

Church Tenets.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to Charles E. Jarvis, Clerk, 236 Huntington Avenue, Boston 17, Massachusetts.

From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account,

the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address. Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to Edward L. Ripley, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

Announcements

From The Christian Science Publishing Society

New Morocco Bound Vest Pocket Edition of the Textbook

Announcement is made of the publication of a new, morocco bound, vest pocket edition of "Science and Health with Key to the Scriptures," by Mary Baker Eddy.

This small volume, 3 1-16 by 4 5-16 inches, the same in size as issued for soldiers and sailors during the war, is bound in black morocco, limp, leather lined cover, round corners, gilt edges. Price \$3.50 for single copy and when included in lots of twelve or more copies of Science and Health in any or all bindings, \$3.25 each.

Orders for this edition will be filled in rotation.

Vest Pocket Bible

The Bible, bound in morocco, uniform in style with the vest pocket edition of Science and Health, is now on sale at \$4.75 a copy. Order by number 08X. Reading room discount 10 per cent.

New Pamphlets

Advance information will in future be given two weeks before each new pamphlet is placed on sale. This will replace the former system of standing orders.

New Pamphlets in German

There is now on sale a new German pamphlet entitled "Ein stilles, sanftes Sausen" ("A still small voice") containing the following articles reprinted from the Christian Science periodicals with alternate pages in English: "The secret place of the most High," "Never too Late for Healing," "Treatment," "Cause and Effect."

There is also on sale a new German pamphlet entitled Läuterung (Purification) containing the following articles reprinted from The Christian Science Monitor with alternate pages in English: "Lusting Against Lust," "The Lust of Money," "The Lust of Power," "Looking Ahead," "Sincerity."

Price of each of the above pamphlets 5 cents a copy. Reading room discount 20 per cent.

"Rudimental Divine Science" for the Blind In English Braille

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U.S.A.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U.S.A.

4 4 4

Articles and Testimonies

Available articles from Christian Scientists and good testimonies from those healed by Christian Science are always welcomed for consideration by the Editors. Manuscripts for publication in the Scntinel and Journal, whether articles, poems, or testimonies, and correspondence relating thereto, should not be addressed to individuals, but to the EDITORIAL DEPARTMENT, THE CHRISTIAN SCIENCE PUBLISHING SOCIETY, Boston 17, U.S.A.

[198]

Letters of Appreciation

Many letters of appreciation of The Christian Science Monitor and other Christian Science activities are constantly being received. These letters express what these activities mean to different individuals in various occupations and pursuits. The favorable comment that has been received on those already published indicates that they are welcome and helpful; therefore others will be published under the above heading. Extracts from such letters follow:

HROUGH the columns of THE CHRISTIAN SCIENCE MONITOR I am learning all that one needs to know to be educated, in the everyday acceptance of what constitutes an education. Although I have been to three colleges and have held the chair of a professorship in a university, I prize THE CHRISTIAN Science Monitor as a better allround educator than any institution. I am convinced that, if as much time were spent daily on a thorough study of that newspaper as the average student devoted to his lessons, the reader, no matter how little knowledge he began with, would come out, in less time than it takes for college training, with a broader, better education. He would gather up also the added virtues of true brotherly kindness and good judgment.

adire Hen

> HAVE read many letters in THE CHRISTIAN SCIENCE JOURNAL and Sentinel, written in appreciation of the splendid articles in THE CHRISTIAN SCIENCE MONITOR and I have long felt it my duty to express my gratitude for the Moni-TOR. As I have been a subscriber and reader of it for several years, I have proved to my satisfaction that it is the best daily paper on record. I had a cousin visit me this summer from ———. She is a music teacher and has been for many years a great reader. She said she got more valuable information from the Monitor than all other periodicals she ever read. She was not a Christian Scientist. I am surely grateful that not only Christian Scientists enjoy the Monitor but also those who are not, and not only in one locality but in all the world.

WORKS ON CHRISTIAN SCIENCE

Written by MARY BAKER EDDY, Discoverer and Founder

of Christian Science and Author of its Textbook

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each \$3.00; twelve or more, each \$2.75. Ooze leather, vest pocket size, single copy \$3.50; twelve or more, each \$2.75. Morocco, vest pocket size, single copy \$3.50; twelve or more, each \$2.75. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy \$4.00; twelve or more, each \$3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$5.00; twelve or more, each \$4.75. Levant, divinity circuit, leather Fined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book), single copy \$6.00; twelve or more, each \$5.75. Large Type Edition, designed especially for the use of First Readers. Large type (18-point) on Oxford India Bible paper, bound in leather. Size 8 by 1034 inches. Single copy \$7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

FRENCH TRANSLATION. Alternate pages of English and French. Cloth, one to five copies inclusive, each 83.50; six or more, each 83.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, 85.50; six or more, each 85.25. Orders for the French translation in lots of six or more may include both bindings.

German Translation. Alternate pages of English and German. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each \$5.50; six or more, each \$5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, French, and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing-articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy \$2.25; twelve or more, each, \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; twelve or more, each \$3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy \$5.00; twelve or more, each \$4.75. Orders for Miscellations Writings in loss of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 306 pages, containing articles published in *The Christian Science Journal* and *Scntinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy \$2.25; six or more, each \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; six or more, each \$3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy \$5.00; six or more, each \$4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy \$6.00; six or more, each \$5.50.

Christ and Christmas. An illustrated poem. Cloth, single copy \$3.00; six or more, each \$2.50. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Unity of Good and Other Writings. One volume, containing Unity of Good. Rudimental Divine Science, No and Yes. Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science versus Pantheism, Messages of 1900. 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy \$1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy \$2.00; six or more, each \$1.75.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, single copy \$1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy \$1.00; six or more, each 75 cents.

Unity of Good. This book lays the ax at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Po,ket edition, leather covers, single copy \$1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedic story service of The Mother Church, January 0, 1895, and scintillations from the press of that occasion. Library edit on, cloth, 90 pages, single copy \$1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, alias Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point, American Braille, and English Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Rudimental Divine Science and No and Yes. In one volume, French translation, with alternate pages of English, vest pooket size. Blue cloth, gray edges, single copy \$1.25; six or more, \$1.10; blue leather, gray edges, single copy \$2.00; six or more, \$1.75 each.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science versus Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy \$1.50; six or more, each \$1.15.

Christian Science versus Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy \$1.50; six or more, each \$1.25. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign. Address orders and make checks payable to

THE-CHRISTIAN-SCIENCE-PUBLISHING-SOCIETY BOSTON · U-S-A

Christian Science Literature

"Science and Health with Key to the Scriptures" and all other published writings of Mary Baker Eddy are listed on the outside back cover page of this Sentinel.

Christian Science Sentinel

Established, 1898, by Mary Baker Eddy. Published weekly, containing articles, editorials, and special current information regarding the Christian Science movement, also testimonies of healing. Subscription price, payable in advance, postpaid, to all countries: One year, \$3.00; six months, \$1.50; three months, 75 cents; single copy, 7 cents.

The Christian Science Journal

Founded, 1883, by Mary Baker Eddy. This monthly magazine is an official organ of The First Church of Christ, Scientist, Boston, Massachusetts. Contains articles, editorials, and testimonies of healing, a directory of Christian Science Churches, Societies, and Reading Rooms; also in the January, April, July, and October issues a list of Christian Science Practitioners and Nurses. Subscription price, payable in advance, postpaid to all countries: One year, \$3.00; six months, \$1.50; three months, 75 cents; single copy, 30 cents.

The Christian Science Quarterly

Founded, 1800, by Mary Baker Eddy. Published January, April, July, October. Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. Printed in English, English-Dutch, and English-German. English edition published also in vest pocket size. Subscription price, payable in advance, postpaid, to all countries: One year, \$1.00; single copy, 25 cents.

The Christian Science Monitor

An International Daily Newspaper. Founded, 1908, by Mary Laker fiddy, Daily, except Sundays. Its own world-wide news service is supplemented by the service of the Associated Press and of the United Press Association. Complete in its departments; unique in its Home Forum page. Full page of piece in its departments; unique in its Home Forum page. Full page of editorials dealing truthfully and fearlessly with vital questions of the day. Subscription price, payable in advance, postpaid to all countries: One year, \$9.00; six months, \$4.50; three months, \$2.25; one month, 75 cents; single copy, 3 cents.

Le Héraut de Christian Science

Established, 1918. A periodical published monthly in French, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, po-tpaid to all countries: One year, \$2.00; six months, \$1.00; three months 50 ents; single copy, 20 cents.

Der Herold der Christian Science

Authorized, 1903, by Mary Baker Eddy. A periodical published monthly in German, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, postpaid to all countries: One year, \$2.00; six months, \$1.00; three months, \$50 cents; single copy, 20 cents.

Subscriptions will begin with the next issue after the receipt of the order. Information regarding bound volumes of the weekly and monthly periodicals will be given upon request.

"What I say unto you I say unto all, WATCH." Jesus

VOLUME XXIII

NOVEMBER 13, 1920

NUMBER 11

"Who did hinder you?"

VIVIAN WILLSON WHITMAN

THERE may be many and varied beliefs about Christian Science in the universe, but there is only one truth. Individual students of this truth are often persuaded that opposition to their exposition of it is opposition to Truth, whereas Truth has in reality no opposition. Whatever seems to be opposition to Christian Science is merely opposition to a misunderstanding of Truth. Very often this misunderstanding is aided and abetted by those of whom it may be said "that they have a zeal of God, but not according to knowledge."

The belief in opposition is, of course, a belief in other gods, and so cannot exist where omnipotence is acknowledged. Whenever we make a reality of opposition, we deny the allness of God, since reason tells us God did not create a power to oppose Himself. Mrs. Eddy's clear statement: "There is no power apart from God. Omnipotence has allpower, and to acknowledge any other power is to dishonor God" (Science and Health, p. 228), leaves no room for mismoderstanding. It points plainly to our ignoble state when we attempt to serve other minor and seemingly harmless and necessary gods for a season, always owing to our peculiarly trying environment, as we explain volubly to drown the "still small voice" of Truth.

Sometimes we explain our own lack of progress in Christian Science by painting a sorry portrait of our family group. Jesus recognized this possibility and told us how to meet it. He said, "He that loveth father or mother more than me is not worthy of me: and he that loveth son or daughter more than me is not worthy of me." If Jesus had heeded the mere reprimand of his mother, when he remained in the temple about his Father's business, the world would be without a Way-shower. If Mrs. Eddy had placed the seeming criticism of family and friends above Truth, we might still be without Christian Science. There is a vast difference between the meekness of might and right, which is that indicated in the dictionary definition, "submission to divine will," and the so-called meekness which is merely a weak concession to human will, a sacrifice of good motives to placate false gods.

Yet we are not required to ignore our family ties. Pure family affection is blessed of the Father, who "setteth the solitary in families," and of the Son, who restored the widow's son and the ruler's daughter, and, as his final act on the cross, placed his mother in the care of John. But pure affection ever places God, good, first and foremost. It does not overlook error in the effort to gain peace, knowing that affection founded on anything less than good is a house built on the sands.

We are sometimes tempted to assert that a certain person is "bitterly opposed" to Christian Science, and even to go still further and claim that such will always be the darkened state of this person. Thus we constitute ourselves judges of who will enter the kingdom of heaven. It is always possible

that other Christian Scientists before us viewed our own acceptance of Christian Science with doubt and surprise. It was even so in Jesus' time, that Truth found those least expected to understand it; for did he not say, "I thank thee, O Father, Lord of heaven and earth, because thou hast hid these things from the wise and prudent, and hast revealed them unto babes. Even so, Father: for so it seemed good in thy sight." Not only that, but there is that still harder saying for the chief priests and scribes-representing the spirit of self-righteousness that is ever busy about the mote in a brother's eye, ever complacently unaware of the beam in its own orb-"Verily I say unto you, That the publicans and the harlots go into the kingdom of God before you." We need to watch a conviction of opposition to Truth lest we commit the sin of those who, in the words of the seventyeighth psalm, "tempted God, and limited the Holy One of Israel." We should also remember that Mind's law of eternal progression governs all alike.

We often hear the anxious query: How should opposition be met? As a matter of fact, opposition is met in exactly the same way that sickness is met,-by denying its reality, and affirming the allness of God. No headway can be made in recovering from the delusion of measles so long as we hug the delusion. We realize this easily with reference to the physical condition, but self-pity often deludes us into hoarding opposition as a peculiar treasure, to be taken out and looked at and explained and made much of, whenever opportunity offers. We complain that we cannot read our periodicals, cannot attend church or lectures because of this opposition, this wrong thought about Christian Science. So long as we enjoy the privilege of boasting of the many problems we have to meet, we shall very probably have many opportunities to bewail our lot. But when we are persuaded that "neither death, nor life, nor angels, nor principalities, nor powers, nor things present, nor things to come, nor height, nor depth, nor any other creature, shall be able to separate us from the love of God," we are ready for the blessing.

It is well to remind ourselves that often the only knowledge which those who make our so-called "uncongenial environment" have of Christian Science is obtained from our lives, our daily conduct, and so to question ourselves as to how much of good we are making manifest. If we lack the courage of our own convictions, is it not rather unreasonable to expect others to adopt them?

The way to overcome opposition is the same now as always. Paul's query, "Who did hinder you that ye should not obey the truth?" is as timely to-day as when uttered. There is no opposition to growth in good, since the eternal fact remains that the power of God, of infinite Mind, of Principle, is with every right effort, to direct and prosper it.

"Thou wilt keep him in perfect peace, whose mind is stayed on thee: because he trusteth in thee," "And who is he that will harm you, if ye be followers of that which is good?" are demonstrable truths, but to obtain the promises we cannot overlook the conditions—"whose mind is stayed on thee," and "if ye be followers of that which is good."

Self-Consciousness

HENRY M. NEWMARK

HRISTIAN SCIENCE is teaching us how to think metaphysically. This is being accomplished by pointing the way to a spiritual interpretation of the Bible, without which it could lay no claim to being the Book of Life. As the apostle to the Gentiles so clearly put it in his second letter to the church at Corinth, in alluding to all being made ministers of the new testament, "not of the letter, but of the spirit: for the letter killeth, but the spirit giveth life." Between the acceptance of the Scriptures literally and the imbibing of their spiritual significance, there is, indeed, a great gulf fixed. Spiritual understanding lifts the veil of doubt and mystery, and reveals the Bible's true metaphysical power and practicality. This awakening constitutes the putting off of the old man "of the earth, earthy," and putting on the new man, changeless and incorruptible. This is the re-formation, the new birth. Thus we find our old misconceptions of the Bible record replaced by the joyous realization of spiritual reality, of apprehending, in part at least, that man is eternally in unity with God, and awake to his at-one-ment with divine Principle. Now, it is axiomatic that in order to gain a metaphysical concept of the Scriptures, which Christian Science demands, we must acquire a metaphysical meaning of its language. But this is not altogether easy, as Mary Baker Eddy has plainly pointed out. "The chief difficulty in conveying the teachings of divine Science accurately to human thought lies in this, that like all other languages, English is inadequate to the expression of spiritual conceptions and propositions, because one is obliged to use material terms in dealing with spiritual ideas," she writes under "Language inadequate" in "Science and Health with Key to the Scriptures" (p. 349), and then adds, "The elucidation of Christian Science lies in its spiritual sense, and this sense must be gained by its disciples in order to grasp the meaning of this Science.'

For example, let us consider that famous declaration of Christ Jesus, "I and my Father are one," which forms the basis of his teaching and his ministry of healing. This very simple statement of truth, though supported by the irrefutable and abundant testimony of good works, was itself advanced by the Jews in support of their contention that the Master claimed himself equal with God, the divine Mind. While deeply imbued with the immortality of his words, Jesus appealed to the Jews to accept him, at least for the very works' sake, even if they persisted in refuting his words. But all this was of no avail. The Jews, because of their materiality, rejected their best friend, and failed to understand the import of Jesus' life purpose, nor did they understand his selflessness and his love for humanity, for which he labored incessantly. He always gave God the entire glory. Before Lazarus had arisen from the grave, Jesus thanked the Father, knowing that, in truth, he had not died, and that his restoration was God's work alone, and therefore already complete. Likewise, when he healed the Syrophœnician woman's daughter of the unclean spirit, and directly afterwards, when he made the deaf man hear and his speech became normal, Jesus urged them to tell no man, showing, beyond doubt, that he wanted to dissociate his personality from them, in order to insure their turning unreservedly to divine Principle. As he himself insisted, "The Father that dwelleth in me, he doeth the works." He was also ever conscious of man's true selfhood, declaring his heritage as the Son of God, meaning that he saw that man, God's likeness, is at one with Him, in conformity with the record in the first chapter of

Genesis, equal in quality though never in quantity. The carnal mind, which is always enmity against God, could not even grasp this simple, spiritual truth. Having eyes it saw not, and having ears it heard not. It failed of spiritual discernment. Darkness never could see light.

Following the direction of our Leader, we, too, must turn away from the thoughtless acceptance of words perverted through long misuse, and replace these false conceptions with the spiritual interpretation. The word self-conscious serves as a good example. In the ordinarily accepted application of the term, it is definitely associated with such qualities as diffidence, bashfulness, and timidity, all conditions of thought, hampering and limiting in their very nature, which could never be found in the real man of God's creating, the immortal idea in infinite Mind. Anybody ever afflicted with what is ordinarily called self-consciousness knows only too well how distressing it is, and what freedom and joy come when the false belief about self-consciousness is replaced by the right idea, when the realization comes that (man's only consciousness must be the consciousness that he derives from the divine Mind or Principle, so that his true self is not and cannot be contaminated by mortal mind through temperamental or inherited tendencies. For man's selfhood is the reflection of God. It must be plain, therefore, to such of a one, that he never actually suffered from self-consciousness, but from a perverted belief of self-consciousness, which never existed for one moment within the realm of reality, the universe of Mind, which is completely harmonious and spiritual. Since man's only origin is in the divine Mind, he must be forever conscious, and his real consciousness lies in his realization of his true selfhood in that Mind, which is God. This is his only inheritance, the freedom of the sons of God, wherein dwelleth righteousness,-a right understanding of the eternal facts of God as Father-Mother, and man's sonship with God. Thus, a very cursory self-examination of one who has been healed of what is miscalled self-consciousness, reveals the fact that his suffering has come primarily from a false estimate of self, which Truth summarily destroys. He has learned that by seeing the truth and strictly adhering to it, he has gained some understanding of man's true selfhood as reflection. "The creative Principle—Life, Truth and Love—is God," we read in Science and Health (p. 502). And further: "The universe reflects God. There is but one creator and one creation. This creation consists of the unfolding of spiritual ideas and their identities, which are embraced in the infinite Mind and forever reflected. These ideas range from the infinitesimal to infinity, and the highest ideas are the sons and daughters of God."

The word "conscious" is derived from two Latin words, "con" meaning with, and "scire," to know, or in other words, to share in knowing or in knowledge. Hence, consciousness deals primarily with the state of sharing in knowledge, man partaking in the only knowledge which is of God, infinite Mind. Hence, consciousness must at all times and in every circumstance be wholly outside the pale of belief, for it rests forever upon the understanding of Principle. Therefore, man can never be conscious of anything claiming origin outside of the divine Mind. In reality, self-consciousness could not, for an instant, entertain a belief of a lie, but must ever be possessed of the truth, the truth about God and the universe, including man.

To be conscious must necessarily imply to be alive to man's individuality, infinite in variety and eternally expressed. Man is forever self-conscious, for were he not there would be a time when that selfhood would be unex-

pressed, when he would be bereft of his knowledge or understanding, and God, the only Mind, would be without expression, without a creation, which is unthinkable. Man is, therefore, ever conscious of his true selfhood as the son of God, the eternally awake idea, in the infinitude of divine Mind, and this alone enables him to see the perfect man of God's creating. This realization constitutes Christian Science prayer, true communion with God, the prayer of realization and affirmation, asserting man's constant knowledge of the perfection of Spirit and spiritual man, dwelling in the conscious reality of infinite Love, freedom rather than bondage, of activity rather than indolence, liberated forever from the fetters of tradition and mortal belief, and secure in the consciousness which is divine.

"How forcible are right words" PERCY PHILLIP VYLE

WHEN the sunshine of the spiritual broke through the material shadow that lay over the world, ignorance received its first jolt for many centuries. To the world's amazement, this check was administered by a woman, Mary Baker Eddy, through a book, and in being both a key to the Scriptures and an analysis of the falsity of mankind's reasoning, the Christian Science textbook contains a collection of the most forcible words and phrasings to be found in literature. While the various angles of the educational value of Christian Science convey ample food for profitable thinking, the present purpose is to consider the healing power of the textbook and its unusual vocabulary, for it is only when the study of "Science and Health with Key to the Scriptures" starts, that the student gradually begins to realize how wrong and restricted is even the best education when based on material hypotheses.

Outside the focus of Christian Science, research is on an unstable foundation; matter, as an unexplained and undefined "something," is its chief plank. Matter belief's tenacious foothold in the human consciousness permeates, influences, and molds a mortal's every thought. The effects of study and the results of applying its Principle are more perceptible in the attention devoted to Christian Science than in other branches of learning. In no other direction of inquiry is progress from problem to problem so convincing and determinate, nor is the ultimate as indisputably defined; neither is the reward for sincere endeavor so tangible as that which follows a comprehension of the logic and method of the operation of spiritual law.

Mrs. Eddy herself has told of the handicap of language in which to explain spiritual law, and the surprise of it is that she was so successful, surrounded and handicapped as she was by this restriction. In "Retrospection and Introspection" she says (p. 27): "As sweet music ripples in one's first thoughts of it like the brooklet in its meandering midst pebbles and rocks, before the mind can duly express it to the ear,—so the harmony of divine Science first broke upon my sense, before gathering experience and confidence to articulate it. Its natural manifestation is beautiful and euphonious, but its written expression increases in power and perfection under the guidance of the great Master."

It will be confirmed by all students of Christian Science that, by reason of systematic study, those words and phrases which, at first, may have seemed confusing, abrupt, abstract, and revolutionary, become clear, understandable, full-rounded, blending into a complete, harmonious unit, so that the more devotedly we study divine metaphysics, the more thoroughly we understand and are able to interpret the

truth spiritually instead of materially, and this, in turn, frees us from any handicap of language.

We now arrive at the point which discloses Mrs. Eddy's surprising command of language for the purpose of divine revelation. An example of the wisdom in her choice of words will be seen in her use of the word "error." Outside of Christian Science, error is accepted as a "real mistake." Not only does the textbook teach that a mistake cannot be real, but emphasizes that a mistake has no power to be other than what it is, error, or the absence of Truth. Etymology shows that the word error is derived from the verb errare, meaning, to wander vaguely, without definite goal. Again, the word "infinite." Outside of Christian Science, how many of us understood this word in its absolute and logical meaning? We admitted that while God is infinite, there may be much of the finite in the divine plan. Mrs. Eddy was the first to emphasize and insist upon God's allness. God, Spirit, being All, infinite, boundless, and immutable, He could not be anything but All-in-all, and could not create, control, direct, or express the finite and mutable.

Indeed, sincere and persistent consideration of each unusual word and its unusual association throughout all of Mrs. Eddy's writings is of vital importance to a clear and comprehensive understanding of Christian metaphysics. To the Bible and Science and Health, the student will add a reliable dictionary. Recognition of this aid to a correct interpretation of unusual words is noticeable in all Christian Science reading rooms, where an excellent dictionary is available. Reference to these etymological authorities to substantiate Mrs. Eddy's ofttimes revolutionary phrasings serves to clarify our own interpretation, and as we continue, the activities of this right reasoning will be manifested in the subjugation of wrong, material reasoning. Thus will the tenacity of mortal foundations yield to the spiritual. When we can spontaneously think in spiritual terms, various phases of educational lack and limitation are healed. Exaggeration in the use of words and thoughtless voicing of extravagant and glib phrases give place to temperance and conservatism. The student becomes a better thinker, a better writer, a better talker, and a more intelligent listener, and he finds himself endorsing the exclamation of Job, "How forcible are right words," "words of truth and soberness" such as Paul boldly spoke forth.

Dominion

SARAH WOODALL

In thinking over what it really means to have dominion over the body, it seemed helpful to me to analyze what it is that has dominion and what it has dominion over. The material body is the expression of mortal mind and, as such, can only be expected to express the qualities of mortal mind. As matter it is, of course, nothing but a counterfeit of the reality, and it is comparatively easy to see how great an influence mortal mind has over the body when it is seen that expressions of hate and anger, which are mental, can affect the body in the way they do. It is only logical to assume that other mental conditions, though not perhaps so pronounced, such as fear or anxiety, equally affect the material body; and Christian Science teaches that inasmuch as the cause of all discord is mental, so the cure for all discord must also be mental.

In "Miscellaneous Writings" (p. 16), Mrs. Eddy says, "But, as one grows into the manhood or womanhood of Christianity, one finds so much lacking, and so very much requisite to become wholly Christlike, that one saith: The Principle of Christianity is infinite: it is indeed God; and

this infinite Principle hath infinite claims on man, and these claims are divine, not human; and man's ability to meet them is from God; for, being His likeness and image, man must reflect the full dominion of Spirit—even its supremacy over sin, sickness, and death."

In this passage Mrs. Eddy expresses with wonderful terseness the source of the power that gives one dominion over not only the body but every other condition of socalled material life. Man, being the image and likeness of God, is spiritual; and it therefore follows that as Spirit is All and matter is nothing but a belief, there can be no material condition that could possibly have dominion over Spirit. A student of Christian Science is constantly finding in his progress out of materiality hitherto unsuspected lurking errors and it may even seem sometimes that instead of a more harmonious state of existence, some discord still is apparent in the surroundings of one who is striving to practice Christian Science. This, however, is not always a bad sign, and there should not be the slightest reason for discouragement or self-pity if such a condition manifests itself. The only occasion for discouragement is when, in consequence of this, instead of rising higher in the scale of being, one yields to the temptation to sink into mental apathy and despondence because the conditions seem to be too much for one's understanding of Christian Science to overcome. Then, instead of having dominion over the material senses, there seems to be a reversal of the desired result and the individual is instead under the seeming dominion of material sense.

We are told in Science and Health (p. 307) that "the divine Mind is the Soul of man, and gives man dominion over all things." It follows that the real man already has dominion over all things, and one no longer need be subject to material laws, but in proportion to his understanding of the power of Mind, he will prove for himself that Mind and not matter governs the body. It will be seen that the so-called material body is inert, mindless, and only through the action of Mind does man manifest activity. Then that activity, being the result of the action of divine Mind, must be perfect action, harmonious in every detail.

It will be seen, moreover, that no problem can present itself to a student of Christian Science that is beyond his present understanding, for Mrs. Eddy says on page 574 of Science and Health, "Note this,-that the very message, or swift-winged thought, which poured forth hatred and torment, brought also the experience which at last lifted the seer to behold the great city, the four equal sides of which were heaven-bestowed and heaven-bestowing." Surely this passage should bring comfort to every one who is struggling to gain a better knowledge of God, and in so doing to eliminate any belief in or fear of that which is not of God, and therefore has no power. What can be more encouraging than this knowledge that no difficulty or inharmony of any sort can come to any one that is beyond his understanding to overcome. And as each problem is solved by the help of Principle, so a solid foundation is laid on which the bigger shocks of mortal mind fall in vain.

It may be that the difficulty to be overcome is self-consciousness or nervousness, and one student, who had to battle with this condition, found that it was only after a long and severe struggle that the fear was sufficiently overcome to give a testimony at a Wednesday evening meeting. Each time subsequently that the desire to express gratitude at a Wednesday evening meeting was present, this erroneous material sense seemed to rise up again in force and try to keep the expression of grateful thanks for

help received from being voiced, but in every case when the material senses have been silenced by the truth of spiritual sense, there has come, with the knowledge of another victory won, a sense of dominion over material sense, which was indeed worth the struggle. In the same way, the overcoming of small physical troubles gives to the student a firm foundation, and when the storms come and beat against the rock, there will be found to be a sufficient accumulation of proofs of the all-power of good to enable the larger victory to be won. This victory, however, can only be won as a right understanding of the nothingness of mortal man is gained in the progress of the student out of false beliefs, and the dominion thus achieved by the realization that the spiritual man is the only man, is the only real dominion any one can have.

The Star of Bethlehem

LOUISE FANNY BODMER

In his simple, direct, yet beautiful way, Matthew relates the narrative of the earthly advent of him whom the prophets of old had foretold, whose coming the Israelites awaited. They expected a king, a personal savior, their Messiah, and his appearance was to be ushered in with befitting material splendor. Is it any wonder that their eyes, befogged with material theories, were holden, so that they could not see the light of that "star" that guided the "wise men from the east" to Bethlehem "where the young child was"? Their honest desire for good had caused their diligent search for God, and singleness of purpose had given them a vision. Being of one Mind they could perceive and journey together in the light of that wonderful star.

The desire for good is innate in man, because good is man's inalienable right by virtue of reflection. How could it be otherwise, since God, the Father of man, is infinite good? Then to experience good, one needs to know God. Man, as God's child, God's expression, is now at the standpoint of all good. It is his divine inheritance. What, then, could separate one from this true knowing and cause him to wander in the bypath of material ways? Man, God's idea, can never be conscious of anything but true being, God. For every true idea, error claims a suppositional opposite. The counterfeit of divine knowing is human knowledge. Mrs. Eddy defines this knowledge in the Glossary of "Science and Health with Key to the Scriptures" on page 590, where she says: "Knowledge. Evidence obtained from the five corporeal senses; mortality; beliefs and opinions; human theories, doctrines, hypotheses; that which is not divine and is the origin of sin, sickness, and death; the opposite of spiritual Truth and understanding." This knowledge, the basis of all error, has led men to seek out "many inventions" which, as the wise man says, are all vanities. Human theories have ever detracted attention from the spiritual to the material, from the infinite and eternal to the finite and temporal. Through them man's natural tendency toward God, the only good, would seem to be checked by an opposite attraction, the human and material belief of good.

But the very fact that those theories and this human knowledge never could and never can satisfy the craving of the human heart, has awakened in mankind the desire for spiritual good, the true knowing of God, or divine consciousness. Then, as it seeks its way out of the chaos into which theories and mortal beliefs have led it, it will, as did the wise men from the East, behold and follow the guiding star of Bethlehem, which leads it to find the Christ, Truth. At first the Christ may seem but a babe, but as one follows un-

deviatingly in the course pointed out by Truth, one can realize the joy the angels heralded to the shepherds in the fields. Mary Baker Eddy saw this illuminating star, which enlightened her understanding so that she could know Him who is Life eternal. Her earnest desire and diligent search led her to the revelation of Christian Science, the salvation of mankind, which illuminates and demonstrates the sayings of our great Master, Christ Jesus.

Christian Science replaces every erroneous concept with the true idea and takes away the shroud of mystery which human theories have woven around every event of Jesus' earthly career. It reveals the beauty and simplicity of the Christ-teaching and ushers in the day foretold in the Bible, when "they shall all know me, from the least of them unto the greatest of them, saith the Lord." No theory, be it ever so attractive, can ever equal the fact about anything. While the truth uplifts thought and leads it to joys that are eternal, that bless one and all, theories have a downward tendency and theories built upon theories ever lead farther away from Truth. What have theories done to reveal God?

Take, for instance, the celebration of Christmas, of which the real purpose is to uplift thought to God and His spiritual idea, the Christ. For ages past children have been taught to love and look forward to that as a feast of feasts. Sweet stories are woven around the advent of Jesus and very familiar is the picture of the baby Jesus born in the manger at Bethlehem, to whom they think they owe, in some wonderful manner, the joys and gifts that they associate with their beliefs about Christmas. In some European countries they listen eagerly to the tales of the Christmas angel that goes from house to house, leaving presents everywhere. When seen in the light of Christian Science, where we learn that angels are not superhuman beings floating on clouds, but true, loving thoughts, passing from God to man, we can tell the children a far more beautiful and profitable story of Christmas. In the Glossary of Science and Health Mrs. Eddy gives the following concise definition (p. 581): "Angels. God's thoughts passing to man; spiritual intuitions, pure and perfect; the inspiration of goodness, purity, and immortality, counteracting all evil, sensuality, and mortality." Understanding the truth about these angels they will find them present everywhere. Then Christmas will become a living, demonstrable fact. Jesus said, "Suffer the little children to come unto me." How can we do that if we cloud their pure thoughts with tales that mystify, attractive as they may seem?

Jesus' advent on earth revealed God's love for man. His earthly career was a demonstration of the Love that comforts the sorrowing, heals the sick, and replaces every erroneous belief with the true idea, that blesses all that are within its radius. Learning to know the true source of every loving deed and kindly gift will turn the children's thought to the Father-Mother God. Their Christmas joys will increase, for they will learn that they are not limited to one day of the year, for every thought of love expressed will be an angel that heralds the Christ. A new understanding of Christmas will dawn for them, for they will entertain those angels, loving thoughts-which will be expressed in loving, kindly deeds, in healing, comforting, and in divine joy. They will understand that the true gift is the expression of Love; and children and parents and all will rejoice in the understanding of God that blesses all mankind, for all can know Him and, knowing, be blessed. All will rejoice in the truth about Christmas, which wakens echoes of gratitude and joy in every heart. And best of all, we will know that Christmas is not only one special day, but all the time.

Whenever the truth about anything appears to thought, it is the bright appearing of the star that reveals the Christ, God's manifestation. Every healing in Christian Science is Christ with us,—Christmas,—and this blessing blesses all, through the very fact that the true spirit of Christmas, the revelation of Christ, has freed men from material theories, the human knowledge that seems to hinder them from knowing God, the Father-Mother. Mrs. Eddy says in "The First Church of Christ, Scientist, and Miscellany" (p. 260) in an article entitled, "The Significance of Christmas": "The basis of Christmas is the rock, Christ Jesus; its fruits are inspiration and spiritual understanding of joy and rejoicing,—not because of tradition, usage, or corporeal pleasures, but because of fundamental and demonstrable truth, because of the heaven within us."

"Why are ye fearful?"

WILLIAM A. BALL

HE statement in "Science and Health with Key to the Scriptures" (p. 377) where Mrs. Eddy says, "The cause of all so-called disease is mental, a mortal fear, a mistaken belief or conviction of the necessity and power of ill-health; also a fear that Mind is helpless to defend the life of man and incompetent to control it," is well worth studying carefully, and by so doing the Christian Science student will be fully repaid for his diligence. We find that the Master many times used the words, "Be not afraid," or "Why are ye fearful?" This was the keynote of harmony, then as now. Christian Science teaches us not to fear, and to claim our God-given dominion over all the earth. If we are afraid, there is a great mental disturbance going on, and this state of mind shuts out or obscures the fact that we have nothing to fear. On page 425 of Science and Health Mrs. Eddy says: "Correct material belief by spiritual understanding, and Spirit will form you anew. You will never fear again except to offend God, and you will never believe that heart or any portion of the body can destroy you."

When we realize that the truth about God's creation can never be changed and that man, as His expression, is perfect even as He is perfect, then we are beginning to lay claim to our birthright-dominion, harmony, and immortality. The Master's words to Peter, "Lovest thou me?" were answered in the affirmative; then Jesus said, "Feed my sheep." This in other words was a command to give to others what he had received from the Savior. Our beloved Leader, Mary Baker Eddy, has now given to suffering humanity this same doctrine of Love. On page 391 of Science and Health she says: "Mentally contradict every complaint from the body, and rise to the true consciousness of Life as Love, -as all that is pure, and bearing the fruits of Spirit. Fear is the fountain of sickness, and you master fear and sin through divine Mind." When we are downcast and everything seems dark, we have only to know that this is only illusion, and that just as surely as the sun will appear from behind the cloud, divine Love manifests itself in exactly the right way. These teachings are so beautiful and simple and demonstrable that a child can understand them; in fact, the children sometimes grasp these simple truths more quickly than do their parents. This explains our Master's love for little children. Children, trained to think rightly in Christian Science, reflect the love of God, and in their fearless bearing often put to shame others not instructed in this beautiful doctrine. We must all become as little children, and then we shall be able to accept the blessing of our Father in heaven, which includes all good things.

The Hope of the Machinists

THE decision of the machinists of the United States to call an international conference of the machinists throughout the world, for the purpose of rendering future wars impossible by the curtailment or nonproduction of the engines of war, is an indication of the growing solidarity of human thought, a phenomenon capable of many extraordinary possibilities. For the present purpose the political aspects of the case are entirely without significance, even when those aspects touch so vital a point as the capability of the national elements to put aside their international prejudices and jealousies and to work together not for the nation but for humanity. What is interesting is the manifestation, which is spreading over the entire world, of a realization of the fact that if you break down the spirit of unity at the frontier lines of the nations you repudiate Christianity in its very inception. Mrs. Eddy quoting, on page 340 of Science and Health, the famous words from Exodus, "Thou shalt have no other gods before me," goes on to comment on them with this wonderful insight, "The First Commandment is my favorite text. It demonstrates Christian Science. It inculcates the triunity of God, Spirit, Mind; it signifies that man shall have no other spirit or mind but God, eternal good, and that all men shall have one Mind. The divine Principle of the First Commandment bases the Science of being, by which man demonstrates health, holiness, and life

This being so, it is more than interesting to watch the means, however crude and formless, by which the instincts of good are endeavoring to give expression to ultimate truths. The resolution of the International Association of Machinists is the expression of just such striving. It is, of course, to everybody with a clear metaphysical perception, an attempt to put the cart before the horse. But that, in a world which has not yet grasped the significance of spiritual causation, is inevitable. None the less, however, is it the effect of an aroused spiritual understanding, which is causing Adam to turn uneasily in his sleep. One day he will, of course, awake and sit up, and then he will no longer see in a glass darkly, but will gaze face to face into reality. In the meantime it is the ever-broadening influence of Truth which is causing Adam's restlessness. "God," Mrs. Eddy writes, on pages 223-224 of Science and Health, "will overturn, until 'He come whose right it is.' Longevity is increasing and the power of sin diminishing, for the world feels the alterative effect of truth through every pore."

If, then, the world is wise, it will begin to regard every decision such as that of the machinists from a very different point of view to that which it does at present. It will see behind such movements the inspiration of Truth, and instead of hurrying to take sides in a political line-up, it will endeavor to probe the matter a little deeper, to sift the chaff from the

wheat, in other words, to side with Principle rather than with men, lest haply it "be found even to fight against God." The effort to do this must, of course, be an individual one, and if the individual is wise it will be made without reference to his neighbors, but rather in the spirit of Paul's great simile, in his letter to the church in Philippi, taken presumably from the Isthmian games, "Forgetting those things which are behind, and reaching forth unto those things which are before." It is thus and thus alone that the individual can become a good citizen, and it is only out of an individuality of good citizens that a great nation can be resolved.

This idea of the machinists, therefore, is not a mere counsel of perfection to be set aside for some time in the millennium when it will be of no interest to mankind, nor is it a mere political expedient to be grabbed at for party or class purposes, and ultimately to be discarded as impracticable. It is rather a half-formed ideal shot into a world which has not yet discovered the futility of playing with effects while leaving their causes unaffected. None the less is it an indication of the meaning of that passage in the Gospel of John, so mystical to those who do not hold the key to the method of the writer, "The wind bloweth where it listeth, and thou hearest the sound thereof, but canst not tell whence it cometh, and whither it goeth: so is every one that is born of the Spirit." The object of the individual's and so of the world's inquiry, then, is to rest demonstration on cause, and not to lose time in muddling over effects. This comes out very clearly in Christian Science healing. It is impossible, for example, to remove the symptoms of disease, which are effects, until the cause of disease has been first eliminated. And as this cause is invariably a mental cause, to look for it in matter, which is itself a subjective condition of the human mind, is to seek cause in effect.

Turn from this to the dilemma before the machinists, and the limitations of their good intentions become apparent in a moment. War is the result of certain passions in the human mind, the most powerful of which is lust. To imagine, then, that by curtailing or controlling the mechanical devices for killing men it is possible to put an end to the results of jealousy, greed, envy, hatred, and all the other manifestations of lust, is, as has already been said, to put the cart before the horse. Men found a way to fight before iron or steel was manufactured, before the chemists compounded gunpowder or high explosives, or the engineers had built submarines or airships. An economic war is only different from a military war, and so long as men are greedy and treacherous, envious, passionate-lustful-they will continue to fight, just as they will continue to be sick. That is where the machinists are counting without their host, but it does not affect the fact that the glass is clearing before them, and that they have, all unconsciously, touched the hem of the garment of divine causation.

The quest of human effort, then, is the consideration of spiritual causation. As that quest is successfully pursued the individual, and necessarily ultimately the nation, must arrive at a metaphysical understanding of the words of Moses, "Hear, O Israel: The Lord our God is one Lord." Peace is to be found only in a common understanding of Principle, a common love of Truth, a common pursuit of purity and unselfishness, which destroys, in the human consciousness, all that is unlike Principle, and so demonstrates the at-one-ment. "One infinite God, good," Mrs. Eddy continues, on page 340 of Science and Health, "unifies men and nations; constitutes the brotherhood of man; ends wars; fulfils the Scripture, 'Love thy neighbor as thyself;' anni-

hilates pagan and Christian idolatry,—whatever is wrong in social, civil, criminal, political, and religious codes; equalizes the sexes; annuls the curse on man, and leaves nothing that can sin, suffer, be punished or destroyed."

FREDERICK DIXON.

Friendship in War and Peace

In some respects, there is not so much difference between a condition called war and a condition called peace as has been popularly supposed. In all circumstances, there must be activity. Peace is not lethargy. It does not mean a reversion to the ways of human selfishness which were even partly and temporarily put aside for the sake of cooperation in a righteous cause. The real activity for Principle, whether it be called war or peace, must continue eternally. In spite of any seeming human discord or human concord, the true relationship of man to God forever remains the same. This fundamental relationship is one of consecration, since the activity which constitutes the genuine man is wholly consecrated to its cause, to the one Principle which is infinite intelligence.

As to this fact, there can always be complete agreement. Even the one who seemingly knows nothing about Christian Science must admit, if he stops to reason at all, that there must be some cause for being alive. This cause is divine Life, true Mind, Spirit, and does not depend in the least upon any supposition of matter. The whole function of man is to express this Life harmoniously. Really he cannot do otherwise, since infinitely right cause invariably produces right effect. The basis of Christian Science is that there is only the one cause, the divine Mind, maintaining harmonious activity as its effect, the real man. All who know anything whatever of Christian Science agree as to this basis, and sooner or later every one will have to accept it as the one demonstrable truth of being. Already the many are seeing something of the fact that this is the foundation for all unity. In the presence of the one Mind and its idea or activity, every human difference of viewpoint must

The only eternal friendship rests on this spiritual basis. If one thinks of friendship as other than activity in accord with divine intelligence, one is mistaken. In other words, the true friend must always be found as infinite Mind expressed, never as matter. The way in which friendship is preserved in peace or in war is the way of dependence on this one Mind. What this Mind knows of brother, sister, or friend is all there is to the spiritual fact. The divine Mind, of course, knows nothing of any supposed differences of opinion, discords of belief, struggles of error, but rejoices in the eternal oneness of its idea. In place of any sense of human differences, true Mind knows unlimited unfoldment of variety in action. The belief in misunderstanding has to be replaced with absolute spiritual understanding, nothing less. This understanding is the knowing of Principle and its idea as the only reality.

Many volumes and many pages have been written on the subject of friendship; but the student of Christian Science finds his chief encouragement to true friendliness in his ever renewed study of the Bible and Mrs. Eddy's works. Complete corcordances show all the passages on the subject. A comparison of these passages is exhilarating work. In Proverbs, for instance, is the famous statement, "A man that hath friends must shew himself friendly: and there is a friend that sticketh closer than a brother." Compare that with what Mrs. Eddy says on page 151 of "Miscellaneous"

Writings": "Brother, sister, beloved in the Lord, knowest thou thyself, and art thou acquainted with God? If not, I pray thee as a Christian Scientist, delay not to make Him thy first acquaintance." Sometimes one may argue that it is for some one else to make advances. The true advance is already made when one turns gladly to the divine Mind and finds there all that is real. Spiritually it is easy to be acquainted with the one divine intelligence which is infinitely expressed. It is only to human sense, which is an imposter anyway, that the everlasting friendship may seem difficult. The one Mind "sticketh closer than a brother" to idea, and the spiritual idea or activity sticketh closer than a brother to Mind as its source. This relationship can never be separated for an instant. Through a study of the subject of friendship in the light of the Bible and Mrs. Eddy's works, one necessarily finds how boundless it is. Its freedom from limitation is to be demonstrated with patient consecration. Of course, no meaningless human makeshifts of action on a basis of policy suffice for the demonstration of Principle's unity, but the sincere knowing of the truth does suffice in the eternal present.

As Mrs. Eddy says on pages 80 and 81 of "Retrospection and Introspection": "There are no greater miracles known to earth than perfection and an unbroken friendship. We love our friends, but ofttimes we lose them in proportion to our affection. The sacrifices made for others are not infrequently met by envy, ingratitude, and enmity, which smite the heart and threaten to paralyze its beneficence." The reliance on Principle replaces the human sense of love with the indestructible idea of divine Love. As this replacement goes on, the belief in envy, ingratitude, and enmity is overcome with joy, and the one spiritual friendship of divine intelligence and its manifestation stands as the actuality. On pages 11 and 12 of "Miscellaneous Writings," Mrs. Eddy says again: "I would enjoy taking by the hand all who love me not, and saying to them, 'I love you, and would not knowingly harm you.' Because I thus feel, I say to others: Hate no one; for hatred is a plague-spot that spreads its virus and kills at last. If indulged, it masters us; brings suffering upon suffering to its possessor, throughout time and beyond the grave. If you have been badly wronged, forgive and forget: God will recompense this wrong, and punish, more severely than you could, him who has striven to injure you. Never return evil for evil; and, above all, do not fancy that you have been wronged when you have not been." Mrs. Eddy's iteration and reiteration of this kind of advice throughout her writings are for the blessing of all. These precepts she herself ever lovingly practiced.

GUSTAVUS S. PAINE.

[Written for the Sentinel]

Just a Look

MARY A. MACOMBER

And the Lord turned, and looked upon Peter.-Luke 22:61.

JUST a look, but, oh, the sweetness— Patience with a brother shown; Forgiveness without touch of censure— Fruit of struggles, prayer, alone.

Just a look, but, oh, the glory!

Love, the depth and breadth and height,
Pierced the mask and saw God's image,
Honest, noble, pure, upright.

Just a look, but, oh, the triumph! Mind always regenerate; Now, to follow in his footsteps,— All God's works to contemplate.

Testimonies of Healing

It is with heartfelt love and gratitude to God that this testimony to the healing and saving power of Christian Science is written. Some years ago through two friends, Christian Scientists, whose changed condition and health compelled notice, I, in seeking healing for another, found my own. A practitioner was sought and her loving, true, and consecrated work enabled me to see the light. few days after examination by a specialist I was quickly and permanently healed of an internal growth, for which an operation was pending. At another time influenza was overcome in a few hours. Christian Science has prolonged my life by healing a supposedly inherited weak heart. It is many years since either a drop of medicine has been used or a single day passed in bed, and through Christian Science I have been given a measure of health and strength otherwise impossible. Merely reading the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy, cured me of the lifelong habit of nervously biting my nails.

Christian Science enabled me to start and support jointly a home and business for some years, on a small capital, although I had no knowledge at first of the means of livelihood selected. The truth has never failed to meet the need whether mental, physical, or financial. Everything I have to-day of life, health, home, and happiness is solely due to Christian Science. It has healed me of many faults of character, including a very hasty and quick temper, hatred, impurity, jealousy, resentment, selfishness, criticism, pride, fear, meanness, dishonesty, ingratitude, greed, and false appetite. In two instances of acute illness it healed me quickly, giving me a more abundant sense of life and strength each time. One could never express in words sufficient gratitude for such healings, and above all for the spiritual unfoldment of God as ever present Love, and the true understanding of the Bible, also for the satisfying answer the truth reveals to every true desire-prayer. Christian Science is the only real solution of the problems of daily life. It brings heaven to earth, here and now, and can be proved immediately whenever and wherever honestly applied and willingly obeyed.

Innumerable instances of healing could be quoted which have resulted from the church services, lectures, the study of all Mrs. Eddy's works in conjunction with the Bible, the Lesson-Sermons, and the authorized literature. For all the years of joyous life and activity and the glorious opportunity to help others, also for the privilege of membership in The Mother Church and the branch church to which I belong, I am deeply grateful. For all Christ Jesus did for the world's salvation, and for Mrs. Eddy's selfless life of love, for all The Mother Church activities, also for all the Christian Science literature, for the privilege of class instruction, and for all the true friends Christian Science has given me, I thank God. I have been enabled to join that ever growing multitude who can say, "I know that my redeemer liveth."

(Miss) D. VIOLET CLAIRE LE MESSURIER, London, England.

Words seem inadequate to express my gratitude for what Christian Science has done and is doing for me, and only by living its teaching can I prove that gratitude. Over six and one-half years ago I turned to Christian Science and the first treatment resulted in an instantaneous healing of appendicitis and gallstones, after I had been under the doctor's care for three months preparing for an operation. I

was in the hospital all ready for the operation, but the physician postponed it on account of complications that might arise, as I had been under treatment for years for acute Bright's disease. This healing was indeed a revelation to me and I was most joyful as first one condition after another righted itself under this new understanding of God and man's relation to Him. A discordant condition of the knees, which had been a drawback since I was a girl, has been met, also headaches have been overcome, glasses have been laid aside, and there have been many, many other healings. These seem small, however, compared with the spiritual uplift and the joy of having overcome, in a marked degree, self-pity, with which I had had a struggle for over two years. This has been the real healing and words cannot express the joy I feel.

I have the privilege of being a member of The Mother Church, also an active member of a branch church, and my prayer is that I may gain a greater understanding of the truth. I am grateful to God, the giver of all good, to Christ Jesus the Way-shower, and to our dear Leader, Mary Baker Eddy, who gave to hungering humanity this wonderful truth which to-day is awakening the world to its rightful heritage. Of her works we can but repeat a verse of one of our hymns:—

The watchword has been spoken, The light has broken forth, Far shines the blessed token Upon the startled earth.

To hearts and homes benighted The blessed truth is giv'n, And peace and love, united, Point upward unto heav'n.

(Mrs.) GRACE S. HOUGHTALING, Chicago, Ill.

٠

Deep gratitude impels me to write this testimony that my fellow men may be helped thereby. In the year 1909 I became ill with tuberculosis of the lungs, was treated by many physicians, and was often vaccinated. Frequently I was obliged to lie in bed with high fever. Because of my belief in excellent care I was soon restored to such a degree that I was able to help myself; still work seemed very difficult. This sickness was followed by another. I became so nervous that all surrounding me suffered as a consequence.

At this time I received some Christian Science literature from an acquaintance. I gained new courage and went to Berlin and sought a practitioner, who explained the Science of being to me in a simple manner. After two treatments I did not notice a trace of my former trouble. May it be noted that I only mentioned to the practitioner an extreme itching of the scalp and an abnormal loss of hair. I did not mention the tuberculosis; neither did I mention that I had lost my husband as a result of that disease, and that during my stay at a sanatorium my child passed on from tuberculosis of the brain. Upon returning to my former surroundings, the condition again became noticeable. Then I studied Der Herold and the textbook by Mary Baker Eddy a great deal, and noticed that-after reading I felt much better. Gradually it became clear to me that understanding of this religion is necessary, and that we must allow ourselves to be guided by the truth. Through this understanding of the truth I was completely healed of tuberculosis and nervous trouble.

3

۲,

When the war broke out all my brothers were compelled to go to the front. I was the only support of my parents at that time, and was able to execute all the agricultural work without any difficulty whatever. I am so happy and thankful

that God revealed the way of the truth to me. Science and Health has been my only counselor. With the exception of the two treatments, I have had no other Christian Science treatment. My mother, brothers, and sisters gradually approached the truth through reading *Der Herold*.

In July, 1918, my mother experienced severe pains in the abdomen. We called a physician, who gave her an injection, and the next day she was examined. It was pronounced an incurable liver trouble, and the physicians gave us no hope. We asked a Christian Science practitioner for help, which was willingly given. My mother immediately felt better, although there still appeared many doubts and much error, which, thanks to the truth, had to vanish. She has been completely healed for some time. I shall prove my gratitude to God by trying to grasp the truth and by living it. With a grateful heart I think of our revered Leader. Through her faithfulness she has explored the way of Truth, and has made it so clear to us through her work "Science and Health with Key to the Scriptures" that we may walk in it.—(Mrs.) MARY BARSKE, Kügenwalde a/Ostsee, Germany.

I wish to add my testimony in loving gratitude for what Christian Science has done for me. It healed me of sciatic rheumatism after I had been told by a doctor that there was no cure for that disease. At this time I was in the employ of a Christian Scientist who interested herself in me and encouraged me to try Christian Science. As I was willing to do anything that might bring relief, I accepted her help. She began treatment and showed me how to study the Bible. I began to improve and in two years was absolutely free and have remained so for more than six years.

I am also very grateful for the understanding of God as divine Principle, the only healing power, which has come to me through the study of the Bible and "Science and Health with Key to the Scriptures," by Mary Baker Eddy.

O. Martin Lawrence, Boston, Mass.

I am not a Christian Scientist although I have been reading Science and Health for more than five years and would like to give my testimony as one of gratitude to God and love to Mrs. Eddy, who was, I believe, ordained by God as the messenger of liberty to the captives of sin, disease, and death for this age. Mrs. Eddy tells us that "the All-wise does not bestow His highest trusts upon the unworthy. When He commissions a messenger, it is one who is spiritually near Himself" (Science and Health, p. 455). Judging by the fruits we cannot but acknowledge His commission.

The blessings which have come to me, just through reading "Science and Health with Key to the Scriptures" would require more space to tell than I would feel justified in asking. First I was greatly impressed, upon opening the book, by the sentence, "To those leaning on the sustaining infinite, to-day is big with blessings" (Preface, p. vii). Feeling a response in my own consciousness, and with the eagerness of a child for a new-found joy I began my search. I had had medicine in my home every day in the year and had either to call or consult a physician every few weeks, as I seemed to be the victim of a complication of diseases, among which were rheumatism, malaria, and chronic stomach trouble of seventeen years' standing, which was accompanied by sympathetic heart trouble. All these ailments left me before I had finished reading the book. Of course I did not hurry through it, as I was doing my own work, when I was able to, and many of its statements perplexed and puzzled me, and I would and myself lying awake late at night trying to understand

some of them. All this time the truth was doing its work without my understanding how it was being done. In a short time I found myself freed from the thought of limitation, and wanted to present all my people with a copy of Science and Health, but I had to learn a lesson. I found that while I was ready and willing to give, others were not prepared to receive.

I am grateful to God for all His manifestations of good, —to Christ Jesus, the Way-shower, and to Mary Baker Eddy. (Mrs.) Mary A. Ackman, Indianapolis, Ind.

٠

For more than ten years I have enjoyed the benefits resulting from the application of my understanding of Principle attained through the study of Christian Science. In the degree that I have been willing to know and obey Principle as taught in "Science and Health with Key to the Scriptures" by Mary Baker Eddy, I have in that measure seen and felt the power of demonstration.

In 1902, after vainly seeking spiritual understanding through the teachings of the church of which in my youth I was an active member, I became an avowed unbeliever. The succeeding seven years were spent in following the course of my own will and pleasure, resulting only in disappointment. Finally, to please my wife, I consulted a Christian Science practitioner, without hope that he could help me in my tangled business and social affairs, but told him to go ahead, that I did not see how he could possibly do me any harm. At that time I was a consistent user of liquor and tobacco, the latter to the extent of about fifteen cigars a day. While under treatment, the desire for liquor left me at once and the desire for tobacco left me very soon afterwards.

At the time I took up the study of Christian Science, in 1909 (for I became interested as soon as I began to see there was really something to study), I had worn glasses constantly for thirteen years, my work as a practicing lawyer requiring constant application. After a few weeks' study, I removed my glasses, which before that I had never been able to lay aside for an hour without suffering. Since that time I have never worn glasses, and I was accepted by the United States Army as an officer of artillery in the war and saw several weeks' service at the front without question as to my eyesight or ever suffering an inconvenience therefrom, although I had to make minute measurements from battle maps and prepare reports and data in the darkness of an underground dugout with only the light of a carefully shaded candle.

Since 1909 I have had no physician or drug in my home or personal experience, and, although comrades near me were killed or wounded at the front, and two officers with whom I was on post in an advanced artillery position were sent to the hospital, one gassed, the other on account of shell shock, through my own mental work and the help of others working for me at home, I escaped being selected for medical treatment while in the army, though I was greatly emaciated from loss of sleep and the shock of exploding enemy projectiles during four continuous weeks on the line.

Such things as ordinary colds have not been anything more than a temptation to me for several years. I am meeting with some success not only in overcoming sin, but in attaining freedom from a sense of sin, and personality, which it seemed never would be overcome. I am learning, too, that happiness is a quality of Mind; that it is not what one is doing, so much as the way one views what one does, that constitutes whether he is about his Father's business or not; the necessity being to know that we live in eternity now, which is knowing the scientific truth.

I am grateful for the words and works of Mary Baker Eddy and for her noble life and unselfish devotion to the establishment of the Christian Science cause,—for the Christian Science periodicals, for the good I have already received from the study of Christian Science, for the established knowledge and renewed faith in God and in the teaching of the Bible resulting from an understanding of the meaning of the Old and New Testaments, and for the knowledge that I, too, can share with the Revelator his realization of citizenship in the city that "lieth foursquare."

C. A. S. Frost, San Francisco, Calif.

٠

It is with gratitude for Christian Science and to Mrs. Eddy for again making the teachings of Christ Jesus practical to a hungry and sin-sick world that I write this testimony. I know Christian Science is "the pearl of great price" spoken of in the Bible. The blessings which I have received since coming into Science are too numerous to mention. For the last seven years it has been our only help in time of need.

When our little daughter was four months old she was healed of whooping cough. A year or so later she fell against a hot stove, burning both hands and arms from the elbow down. Christian Science treatment was given and in less than an hour all pain was gone and she was resting nicely. The healing was very quick and no scars remained. At another time she seemed a little feverish, and as it was near her bedtime I put her to bed. She complained of being tired and suddenly became delirious. The fear of pneumonia was so great that I asked for help from a Christian Scientist; the next morning the child got up perfectly well, after sleeping all night. Is it any wonder I am grateful for God's ever present help in time of trouble?

(Mrs.) MINNIE REEDER, Shaniko, Ore.

4

In gratitude for the wonderful help received through Christian Science I would like to tell of a physical healing which I experienced a few years ago. It was a case of blood poisoning, believed to have resulted from contact with what is commonly known as poison oak. I was serving on the flower committee of the church of which I was a member at the time, and it was my duty to see that flowers and foliage were provided each Sunday for the foyer of the church. Many times I gathered them myself, as I was then living where I was surrounded by everything beautiful that nature provides, and I often took long rambles through the woods in search of flowers for my work. This disease first manifested itself upon my hands and arms in a very pronounced form and they were soon badly swollen and discolored. I immediately asked for help from a Christian Science practitioner and the work was at once taken up. All pain was soon destroyed, but the swelling and discoloration seemed very persistent and soon manifested itself on my face. This condition, however, was soon overcome.

On the following Sunday it seemed best to ask some one to relieve me of my work in looking after the flowers; the sense of fear was not entirely destroyed. I reached the church a little early that morning and immediately went to the little room provided for arranging the flowers and there found a most beautiful bunch of flowers and autumn leaves, most of them being oak leaves, but there was no one to look after them. I hesitated just a moment and wondered what I should do, as they seemed too beautiful to leave. Almost instantly a quotation from Science and Health came to my thought. I hastily removed my gloves, all sense of fear absolutely gone, realizing all the while that there was nothing

in those beautiful leaves that could possibly harm me, and I soon had them in their proper places. As I went upstairs and listened to the beautiful service that morning I was filled with gratitude for the understanding of this wonderful truth that meets every human need and frees mankind. Since that time I have handled all kinds of wild flowers and leaves with no sense of fear whatever, and have never had any return of this trouble. I am truly grateful for this experience as I realized that it was just another opportunity to prove the omnipotence and omnipresence of God and the protecting power of divine Love.

I wish to express my gratitude for all the blessings received through the knowledge of the all-power and infinite love of God as taught in Christian Science, and I am grateful for the privilege of class instruction. I am also grateful for all of our periodicals, which continually cheer and encourage us, and for our Lesson-Sermons each week, and it is my aim and earnest desire to strive to live daily my gratitude for Christian Science by reflecting and radiating more love, and to become a clearer channel for good. I am thankful to God and grateful to His messenger, Mary Baker Eddy, who has revealed to mankind this demonstrable truth.

(Miss) ETHELYN I. BRONSON, Minneapolis, Minn.

٠

I feel that I must tell others of all the blessings I have received since I first heard of Christian Science and especially since I began to study it earnestly. I made inquiries about it of relatives, who told me God could heal all our physical and mental infirmities, and that the understanding of Christian Science was preventive as well as curative. That was enough, for I knew that no remedy I had ever tried had ever prevented different sicknesses. When I began to read it I never doubted a word I read, although it was some time before I understood well enough to apply the truth for myself and family. A fear of total deafness left me from the first, and as I have gained in understanding, the sense of deafness has left me to a remarkable degree. I no longer fear to meet and talk with others; indeed, I feel I have been born again to experience such freedom, and I have had no abscesses in the ears since I first began to read Science and Health, whereas before they were quite frequent each winter.

When our two children were born I had Science help, a practitioner and nurse being employed in each case. Many obstacles had to be overcome in the first instance, but God was with us and I was saved from possible surgery. The first child seemed to cry so much until she was two months old that my neighbor who was a Scientist came in and told me such crying was not natural and that I should have help. When I saw I could not meet the need I took the baby that morning to a practitioner and she was healed then and there of colic. Oh, the happiness to see her smile and not cry. She gained steadily in weight and others often remarked what a happy child she was. Many man-made, so-called laws were broken when the second child came. It was a very quick delivery and I sat up the same day and each day until the fourth day, when I arose, dressed, and took my meals at the table with the family. I also assisted with the general work and cared for the baby until the tenth day, when I took full charge of the home and children. I shall never forget the spiritual uplift and firmer conviction that God is Love and ever present. I am happy to say our children do not know of material remedies and there have been many healings of different physical illnesses, sometimes through my own application of the truth gained through the study of Science and Health, which is indeed the "Key to the Scriptures." are two instances which stand out clearly as to the power of God to heal. Our little girl fell and broke her collar bone when about three years old. We did not reach the practitioner by telephone until the next morning, but through my realization of the truth the child slept well all night. We were advised to follow Mrs. Eddy's directions given on page 401 of Science and Health. The child played about all day very happily, as the surgeon did not arrive until evening. We kept the bandage on just a week; the child made no complaints at all. When the bandage was removed we knew she was perfectly healed and she has had perfect use of her arm ever since.

Just recently a felon appeared on one of my fingers, which almost entirely covered the finger. I declared the truth the first two days and experienced no pain; then I asked for help and on the fourth day it began to disappear. In about a week the old skin had all peeled off and was replaced by a new one. I am so grateful to say that anger, hatred, selfishness, and resentment have vanished like a dream from our home.

I am grateful for the periodicals, for Mrs. Eddy's writings, the Sunday school, and every avenue for freedom and peace which Christian Science affords the whole world.

(Mrs.) MARY MUNDY, San Gabriel, Calif.

*

For many years I had been a firm adherent of the Church of England; but gradually began to see that it did not fulfill all that the Bible promised as the outcome of a church founded on God, so I set out to find a church that promised to provide that full salvation which life in God must bring. I sought through many schools of thought, but found them of no avail, until I was led to the study of Christian Science. As I studied I began to see that this was the church for which I had been seeking.

"Our church," our Leader, Mrs. Eddy, tells us in Science and Health (p. 35), "is built on the divine Principle, Love. We can unite with this church only as we are new-born of Spirit, as we reach the Life which is Truth and the Truth which is Life by bringing forth the fruits of Love,—casting out error and healing the sick." This explanation of church has given me the understanding of these words in the Bible: "Neither is there salvation in any other: for there is none other name under heaven given among men, whereby we must be saved," but by the name of Christ, which Mrs. Eddy tells us in the Glossary of Science and Health (p. 583) is "the divine manifestation of God, which comes to the flesh to destroy incarnate error." I have proved this to be true, for the demonstration of Christian Science has saved me through the darkest and most difficult experiences of sorrow, sickness, and despair. I can only express my most heartfelt gratitude for this salvation by standing more firmly in this true Church, "the structure of Truth and Love; whatever rests upon and proceeds from divine Principle" (Science and Health, p. 583)—this Church of Christ, Scientist, which is founded on the rock of Principle, against which the gates of hell shall not prevail.—(Mrs.) ADELA ANSON, Manchester, England.

With gratitude for the blessings of Christian Science I give my testimony. Following a cold, I had articular rheumatism, and for several winters was obliged to remain in bed for three months. In my need our attention was called to Christian Science by a dear friend, and my mother requested a practitioner's help. Loving work was done for me, and after two months' treatment I was healed. This was several years ago and the trouble has not returned. Later inflammation of the eye was manifested. As I was entitled to

an allowance from a sick benefit fund I had to go to a physician, who opened the lachrymal duct, but there was no permanent improvement. I now requested a practitioner's help, and the eye was healed in two treatments. Then I became ill with tympanitis and was again obliged to go to the sick benefit doctor. My ear did not improve, but became worse. Then man's extremity proved to be God's opportunity. I read the Bible and became more and more absorbed in *Der Herold* and other Christian Science literature. Truth was victor; the error vanished.

Christian Science not only helps us to overcome bodily ailments, but strengthens us spiritually. Words are inadequate to express my gratitude; I shall endeavor to prove it through deeds. God knows how grateful I am for the blessings. With reverence I think of our Leader, who worked with self-sacrificing love to make her discovery intelligible to her fellow men.—(Miss) ELISE LUX, Berlin, Germany.

4

I was very ill for a year, had no appetite, could not eat anything, and had pains in all parts of my body. For three months I lived on crackers and a little milk, and even that diet caused distress. A physician was called at last and he stated that a surgical operation would be necessary. I concluded to call a Christian Science practitioner and after two treatments I was completely cured, leaving the practitioner's room a well woman. I ate a hearty meal, slept well, and am certainly very grateful for what Christian Science has done for me.

MRS. JAMES McCormick, Los Angeles, Calif.

4

I wish to express my gratitude for all that Christian Science has done and is doing for me. Up to May, 1917, when I came to Christian Science for healing I had never read any of Mrs. Eddy's writings nor any Christian Science literature. I was advised to try it for healing as everything else had failed. I was directed to a Christian Science church where one of the ushers introduced me to a practitioner, who invited me to stay for the service, as it was then time for it to begin. Now I know that "Truth has a healing effect even when not fully understood," as our Leader tells us on page 152 of "Science and Health with Key to the Scriptures."

I called on the practitioner the next day; treatment was given and I began to realize freedom from nervous prostration which at times partially paralyzed my lower limbs, so that I could walk only with difficulty. Headache, scalp disease of twenty years' standing, the tobacco habit, which I contracted twenty-five years ago, paralyzed lower bowel, constant eye trouble, for which I had undergone treatments in the hospital, but had received no benefit whatever, have all been healed. With the help of practitioners and the Christian Science literature, I am realizing my true birthright as the son of God. Christian Science is indeed meeting my every need, physical, moral, spiritual, and financial, for which I am very grateful to God, to Christ Jesus, the Wayshower, and to our Leader, Mary Baker Eddy. On my journey out of materiality The Christian Science Journal, Sentinel, and Monitor have never failed to direct me to the mansions in my Father's house.—CHARLES WALTER SEILER. Brooklyn, N. Y.

I have long wished to express my gratitude for what Christian Science has done for my husband, therefore I am indeed very grateful that I can vouch for his testimony. I, too, have been benefited through the study of Christian Science.—(Mrs.) Helen A. Seiler.

Signs of the Times

["Matter"-The Christian Science Monitor, Boston, U.S.A., Oct. 7, 1920]

"In the last resort, matter has become a number, a measure, not a thing. The metaphysician, expelled from the physics of last century, has come back to his own." So does a writer in a recent issue of The Times, of London, conclude an able consideration of the steady breakdown in the accepted recognition of matter as a fixed fact which has taken place during the past twenty years. The closing years of the last century found the earth and the heavens triumphantly resolved into some eighty elements. Natural scientists admitted that possibly some more might be discovered but, to all intents and purposes, the great resolution was regarded as complete. So the question rested for a time, and then there began an effort to develop a theory of evolution amongst the elements themselves, to arrange them on an ascending scale, and by the time that Crookes had discovered his "radiant matter" the attempt to trace all the elements to some "primitive stuff" was well under way.

The next step was the collapse of the element. Elements under more drastic examination were found to appear in different forms, until, finally, it was shown quite conclusively that the constitution of all elements is hydrogen atoms, bound together with electrons. "And what are electrons, these new symbols of the physical conception of the material universe?" asks the writer in *The Times*. And then, immediately answering his own question, adds: "They are mathematical abstractions, their properties, inferences from mathematical reasoning. In the last resort, matter has become a number, a measure, not a thing."

In other words, matter has been "explained away," has been proved unreal. For this last, of course, is the inevitable inference, although it is an inference such as will never be made to any purpose by those uninstructed in Christian Science. As far as the layman in such matters is concerned, such theories are regarded as amiable speculations. To the world as he knows it, sees it, and feels it, it makes no difference to be told that, after all, it is only so many hydrogen atoms bound together with electrons. It is all very interesting, and may be all very true, but he cannot see how such knowledge can change his position one whit for the better or for the worse. And of course it cannot. For the great fact revealed in Christian Science, the unreality of matter, has not been apprehended. All that has been done is to exchange one human theory for another, a belief in eighty elements for a belief in hydrogen atoms bound together by electrons.

It is nearly two thousand years since Jesus of Nazareth explained matter in the only way it is to be explained, in the memorable words, "It is the spirit that quickeneth; the flesh profiteth nothing." He took into account no scholastic explanations of matter, although there were many prevalent in his day. He simply made the declaration of its utter unreality, and then proceeded to prove his statement. And he did prove it, at every turn, beyond all possibility of doubt. In walking upon the water, in stopping a storm at sea, in feeding five thousand people with five barley loaves and two small fishes, in healing the sick and raising the dead, he annihilated, one by one, the so-called laws of matter, and proved their unreality. If any consideration be given to the works of Jesus, with this point in view, it will be seen that the power he demonstrated deprived matter of all form, place, and power, and showed it to be nothing more than error of belief.

And what is an error of belief? It is, of course, an unre-

ality which cannot affect the reality. By understanding this, and demonstrating it, Jesus proved the allness and ever availability of Spirit. This is Christian Science. As Mrs. Eddy, the Discoverer and Founder of Christian Science, has written in her book, "Unity of Good," on pages 9 and 10: "What is the cardinal point of the difference in my metaphysical system? This: that by knowing the unreality of discase, sin, and dcath, you demonstrate the allness of God."

Now Mrs. Eddy, on page 591 of Science and Health, defines matter thus: "Matter. Mythology; mortality; another name for mortal mind; illusion; intelligence, substance, and life in non-intelligence and mortality; life resulting in death, and death in life; sensation in the sensationless; mind originating in matter; the opposite of Truth; the opposite of Spirit; the opposite of God; that of which immortal Mind takes no cognizance; that which mortal mind sees, feels, hears, tastes, and smells only in belief."

"That which mortal mind sees, feels, hears, tastes, and smells only in belief." Outside the belief, that is, of the five physical senses, matter has not even a suppositional existence. And yet even the mortal uninstructed in Christian Science is eager to admit that the things, above all others, that he most desires he is quite unable to apprehend with these five senses. Love, joy, peace, happiness, health, and so on, he recognizes as states of mind and not states of matter. He finds his senses betraying him and deceiving him, branding themselves, at every turn, as false witnesses, until at last he acquiesces, if he ventures to think of it at all, in the belief, either that there is no solution of the enigma or that the solution will not be revealed until "hereafter." It is just here where Christian Science comes to the rescue, and with one simple declaration of eternal Truth reveals the way. Not by proving, step by step, that matter is really hydrogen atoms bound together with electrons, or even that it is merely a number, but with the simple declaration recorded by Mrs. Eddy on page 468 of Science and Health, "There is no life, truth, intelligence, nor substance in matter. All is infinite Mind and its infinite manifestation, for God is All-in-all."

[From an editorial in The New York Times]

Society is not made up of labor and capital, but of human beings. . . . When the meddlers cease from meddling, society in all lands will stratify according to goodness and badness, rather than according to property or lack of it. In that day the good will triumph, for the seeds of destruction are born with evil as surely as the sparks fly upward. That is not "preachy" nor a counsel of perfection. It is the height of worldly wisdom, born of experience, and is better worth preaching than false morality or humanitarianism.

[The True Basis of Brotherhood]

Of no uncertain significance is the fact that individuals in certain localities are coming more and more to reach out to one another and are not merely thinking, but are speaking openly, of that kingdom which is without doubt close at hand. Thus an ancient military organization in the United States goes on a friendly visit to Canada, where in a meeting between the Americans and Canadians, one of the former says: "In the future I see a vision of the red Cross of St. George on the one hand, and the star-spangled flag on the other, marching side by side. So may it be forever, that we stand together, hand in hand, heart by heart, as faithful soldiers. There is something in our blood that keeps us in the forefront of the battle, fighting for the kingdom of right." When men think rightly they are drawing near to the reign of good-

ness which underlies all things at this very moment, and which is more and more revealing itself because men are indeed coming into fuller understanding; for "the wise shall understand."

Principle is the basis of the kingdom of right, or heaven, and therefore it is the comprehension of divine Truth as the only satisfying origin of happiness and right for which mankind must strive. Those on a common road to the realization of this perfection must of necessity find themselves together as brothers, just as Christ Jesus taught. "But he answered and said unto him that told him, Who is my mother? and who are my brethren? And he stretched forth his hand toward his disciples, and said, Behold my mother and my brethren! For whosoever shall do the will of my Father which is in heaven, the same is my brother, and sister, and mother." And Mary Baker Eddy, Discoverer and Founder of Christian Science, has pointed out how those who are "fighting for the kingdom" may achieve mightily. She says on page 99 of Science and Health, "Truth has furnished the key to the kingdom, and with this key Christian Science has opened the door of the human understanding."

[Flexible, Convenient, Expeditious Tribunals the Demand of the Hour]
In moving the second reading of the Industrial Peace Bill in Melbourne, Australia, the Prime Minister of that country said in part:—

"There was a time when I, along with others, thought that industrial unrest could be, I will not say swept away, but rendered comparatively innocuous by recourse to those remedies which this and other legislatures have tried. But we have been chastened by experience, and we have come to see that industrial unrest is at once the price that the world is paying for progress and the punishment which the world is suffering from as the result of a system which failed utterly to recognize the basic factors of production.

"Production is not a matter concerning the individual only. It is primarily a collective function. Society is primarily concerned in production, and it is not competent for individuals—whether they be employers or employees is immaterial-to carry on production in such a way as to militate against the best interests of society. Under the powers given to the Commonwealth we have an Arbitration Court. . . . The hearing of the cases is very protracted for many reasons. One is that the judge is necessarily unfamiliar with the trade or industry, the conditions of which he is called upon to settle. All this delay obviously makes for industrial unrest. We are desirous of creating machinery about whose legality and constitutionality there shall be no dispute. . . . I believe that tribunals of this kind, flexible, convenient, expeditious, and economical, are much more likely to promote industrial peace and prevent industrial turmoil than the court as it exists to-day.

"It is said by many that what is necessary is that the parties should come together. I think that that is a very sound and a very wise saying. Of course, each party looks upon the other with suspicion, and I think that both parties have a perfect right to do so. The employers sometimes are in the habit of thinking that the causes of industrial unrest lie wholly with the men. Nothing could be farther from the truth. The causes of industrial unrest are inherent in society. They are inherent in something more than society—they are inherent in human nature.

"The inability of men to recognize that any cause but their own has justice has been the distinguishing trait of mankind from the beginning, and I think it may be said with safety that one of the best methods of allaying suspicion and of promoting harmony is to bring the parties together, to recognize the fact that without the hearty cooperation of Labor it is impossible to hope for industrial peace. Labor, not only in this country, but in other parts of the world, has come to a point where it will demand that recognition.

"In this bill machinery is provided for the establishment of central and district councils, composed of an equal number of employers and employees. The functions of those councils will be advisory. Their purview will cover the whole industrial sphere. They will consider the causes of industrial unrest; they will propose remedies. They will each endeavor, either by their point or by their several actions, to promote the peaceful settlement of existing disputes."

[From Unity-Published in Abraham Lincoln Center, Chicago, Ill.]

The World Christian Congress, which met in Geneva in August, was notable for its insistence upon the ideal of church unity. The congress adopted a resolution to form a league of churches whose object should be to put an end to proselyting between Christian churches and promote mutual understanding between them for Christian missions among non-Christian peoples; to promote an association and collaboration of churches . . . to help the churches to become acquainted with one another; and finally to bring together smaller Christian communities and unite all churches on questions of faith and order. The importance of this resolution arises from the fact that it represents the deliberate action of a body composed of more than one hundred and fifty archbishops, bishops, and clergy, gathering from many lands and representing many varieties of Protestant communions.

[From "What Is the Big Need," by Kennedy Crone in The Canadian Railroader]

In view of the wisdom of the counselors it is with some timidity that I ask if it might not be that what the unsettled world most needs are facts—truth that can be demonstrated, knowledge that can be verified. I don't know: I only ask what seems to me a reasonable question. . . . Might not facts lead to everything else that is desirable, be the basis and means for exact and serviceable thought and deed? Facts do not change and are the same to all people. There are few things so scarce as facts, few things more greedily desired, few things more easily provided. There is a prodigious demand and a prodigious supply to meet it.

[Excerpts from the One Hundred and Third Annual Report of the American Bible Society]

"We find an increasing demand among all foreign speaking people for the English Scriptures. . . ."

"Many of the leading men of Cuba seemed to be interested in the Bible, even though they were not connected with any church. This state of mind should be a great encouragement to us. Many missionaries have told me of their hopes and expectations and seemed to feel that a new religious era has finally come. I was met with the same words everywhere: 'We need more Bibles.' . . ."

Mexico: "The Bible is not wanted in the cheaper bindings, but in the very best leather bindings that can be had. . . . When people who are poor, or in very moderate circumstances, are willing to spend money to buy a Bible bound in leather, and on India paper, and want the size that will easily go into the pocket or traveling bag, it means that the Bible is desired as a companion and a constant friend. It is a fact that an increasing number of people in this coun-

i....

. 3

try want and will pay for Bibles that can stand the wear and grind of constant use. It seems to me, too, that this is one of the interesting indications of the great business of Bible sales in the United States as well. How much call is there to-day for the old-fashioned family Bible which had to be dusted once a month, or perhaps less often than that, and which caused so much trouble every time it was necessary for the family to move? Even if a smaller number of flexible volumes, on thin paper, and with some study helps, were being sold now, it would mean that the Bible was wanted for a different purpose."

The La Plata agency of the Society which covers Argentina, Bolivia, Chile, Ecuador, Paraguay, Peru, Uruguay, has put into circulation in the last year 45,140 volumes, in twenty-seven languages, 11,414 being whole Bibles, 11,271 Testaments, and 22,455 portions. In Brazil 19,602 volumes in twenty-nine languages were put into circulation, of which 4,267 were Bibles, 4,867 Testaments, and 10,468 portions.

4

[From a Letter in South Bend (Ind.) Tribune]

The address of the president of the Indiana State Medical Association reported in your issue of September 24 includes an unwarranted statement classifying Christian Science as a fraud from which the medical law is supposed to protect the public. It is inconceivable that this gentleman would intentionally misconstrue the law and misjudge a religion that has brought health, purity, and happiness into the lives of thousands of intelligent people by asserting that every one who disagrees with his profession on the manner of treating sickness is a fraud and that our medical laws were made to create and perpetuate a monopoly for any particular mode of treatment. The manner in which he claims for his profession full and exclusive right in such matters is surprising, and certainly should cause our citizens to pause and see what this would lead to. Surely the people of Indiana are not ready to be turned over to the control of state medicine or to compel all people regardless of their beliefs or desires or the efficacy of their present mode of healing the sick to submit to the treatment of any one school of medicine.

The methods advocated by this physician would not only deprive any citizen of the privilege of practicing the method of healing that he may have proved to be efficacious but would take from the individual his constitutional right of choice and compel him to patronize members of the Indiana State Medical Association or such persons as it may approve. Our medical laws were passed to protect the public from the medical profession itself and not to compel people to take medicine or submit to surgery. These laws should not be distorted into creating or fostering a monopoly nor into declaring by statute that any one process of treating the sick is wholly right and all others frauds. Chief Justice Clark, of the North Carolina supreme court, in construing the medical statute of that state, said:—

"The state has not restricted the cure of the body to the practice of medicine and surgery . . . nor required that, before any one can be treated for any bodily ill, the physician must have acquired a competent knowledge of allopathy and be licensed by those skilled therein. To do that would be to limit progress by establishing allopathy as the state system of healing, and forbidding all others. This would be as foreign to our system of government as a state church for the cure of souls. . . . This is a free country and any man has a right to be treated by any system he chooses. The law cannot decide that any one system shall be the system he shall choose. If he gets improper treatment for children or others

under his care whereby they are injured he is liable to punishment; but whether it was proper treatment or not is a matter of fact to be settled by a jury of his peers and not a matter of law to be decided by a judge nor prescribed beforehand by an act of the legislature. . . . All the law can do is to regulate and safeguard the use of powerful and dangerous remedies like the knife and drugs, but it cannot forbid dispensing with them."

The history of the Christian Science church, the results it has accomplished, and the character of its adherents are ample and sufficient proofs of its standing and will convince all fair-minded citizens that the accusation made is not only unkind and unfair but absolutely without foundation. Its practice of healing the sick has been sustained many times in the courts all over the United States and it is recognized as legal in the statutes of nearly thirty states of the Union. Christian Science is a religion, a spiritual teaching that reveals man's actual relationship to God, divine Mind, and demonstrates that it is the power of infinite Mind that corrects and saves the sinner and heals the sick. This has been proved to multitudes of intelligent people who have been healed in Christian Science of all manner of diseases after having been given up as hopeless by medical doctors. For more than fifty years this healing and regenerating work has been steadily growing in the face of persistent opposition and attempted restriction, and at the present time thousands of the people of this country and throughout the world are daily being healed by its ministrations. Surely no right thinking persons will concede that such practice is a "fraud" nor will they submit to any measure that would deprive any person of the right to resort to Christian Science treatment should he so desire.

[Medical Colleges Decrease in Number]

In the Philadelphia *Press* of August 14 appeared the following item in Girard's "Talk of the Day": "But the fad to have M. D. written after one's name has died down wonderfully in the past sixteen years. When Roosevelt was reelected President, in 1904, there were more than 28,100 young men and women studying medicine in the United States. Now the number is only half that. And the death of medical colleges themselves has been terrific,—now but eighty-five in the country compared with one hundred and sixty-two only fourteen years ago."

۰

[From Mayflower Universal Bible Sunday-Published by the American Bible Society]

The Bible is quoted more generally by labor leaders today than is any other book or authority, and it is generally believed by working people that the Bible is the book of the common man.

[Introduction to a Christian Science Lecture, in Peekskill, N. Y.]

Turning back the pages of history to the time of Augustus, and making note of world conditions as they were then, we are quite ready to admit that the world was then in dire need of a savior, a redeemer from the gross darkness into which civilization had developed. Nineteen hundred years later, with the awful spectacle of a world war fresh in memory, can it be questioned that mankind is still in need of a savior? Indeed the question has frequently been raised by serious men and women whether, in view of the facts of world history, Christianity can fairly be considered a success.

Whatever others may say or think about the success of Christianity, Christian Scientists have a very positive con-

viction in the matter. It is that true Christianity is to-day and always has been and always will be a sublime success. This unequivocal assertion they base on the facts of their own experience, and that of others as well, an experience which has actually undergone, in some distinct measure at least, the very salvation and redemption which Jesus brought to those around him, and which he promised to his followers, his disciples, his students,—a salvation from sickness, sin, false appetites, selfishness, poverty, fear, and a host of ills to which human flesh is said to be heir.

Furthermore, Christian Scientists know that Christianity is and must be a success not only because they have proved it to be such in their own lives but because they have learned the Principle of Christianity, because, if you please, they understand something of the Science of Christianity or Christian Science, as Mrs. Eddy chose to term her discovery.

In the words of Isaiah, Christian Science is calling to humanity to-day: "Ho, every one that thirsteth, come ye to the waters, and he that hath no money; come ye, buy, and eat; yea, come, buy wine and milk without money and without price." And in the words of the Master: "Ask, and it shall be given you; seek, and ye shall find; knock, and it shall be opened unto you."

[From Manufacturers Record]

As a matter of fact there never was a time in the history of this country when the money in the land was so widely distributed as during the past two years. . . . One of the blessings of the last two years of high prices of all products and wages has been that the farmers and the mechanics and the day laborers, who in the past never received adequate returns for their work, have had a larger income than ever before. . . . They had never received adequate recompense for their work, but money has been more widely distributed among them during the last two years than they had ever known, to their very great advantage and to the blessing of the country. Instead of wealth being concentrated in fewer hands, wealth has been more generally diffused. Instead of the rich man having a more dominating power than formerly, his power has been relatively less.

[Public Opinion in Regard to the Indispensability of Alcohol Is Rapidly Changing]

Until the discovery of Christian Science it was generally admitted that evil, though very unpleasant, was nevertheless necessary and even in some of its aspects normal. A curious illustration of this belief and of the change which has come about since Christian Science has been more widely studied and demonstrated, is given in a recent article in The Pioneer, a Canadian weekly devoted to the advance of prohibition. It says: "There are men living to-day who tell of having been refused in the early days by life insurance companies because, as total abstainers, they were considered subnormal. Contrast that with . . . actuarial statistics showing the greater longevity of abstainers." These statistics prove, as the article goes on to say, that at present the total abstainer has proved himself to be not only more normal than the nonabstainer, but to be above the standard for "well selected lives generally." This is evidence to the Christian Scientist that Mrs. Eddy was demonstrably right when she said on page 200 of "Miscellaneous Writings," "Jesus regarded good as the normal state of man, and evil as the abnormal; holiness, life, and health as the better representatives of God than sin, disease, and death."

The same article gives another equally significant instance of changed thought. In 1892 a Royal Commission

appointed by the Dominion government in the course of an investigation put to the medical men of Canada the question whether in their opinion there was any equally effective substitute for alcohol. Seventy-nine per cent thought there was not—that it was indispensable. When the same question was recently propounded, only twenty-nine per cent of the doctors felt that alcohol is a necessity; this simply shows that in 1920 there is a considerably increased recognition of the truth of what Mrs. Eddy wrote in 1885, when she said (Miscellaneous Writings, p. 14): "What appears to mortals from their standpoint to be the necessity for evil, is proven by the law of opposites to be without necessity. Good is the primitive Principle of man; and evil, good's opposite, has no Principle, and is not, and cannot be, the derivative of good."

[From a Letter in Zion's Herald]

Can a finite mind and a finite plan solve this infinite strife, the strife of the ages gone and of the ages to come? That is unthinkable. The infinite problem demands an infinite mind and an infinite plan for its solution. If the social worker finds that external, human means like change of surroundings and gifts are unavailing to solve the problems and the sin of the few people he is working with, what shall we say of the strife and sin of the whole world throughout its entire history? . . . The race calls for perfect harmony and peace. Christ [Jesus] did solve the problem and he is the only one who ever laid down the method of meeting it: "I am the way"—not a way, but the only way, and from that time till now his way has been the only method ever proposed for successfully quelling this infinite turmoil.

[From the London Daily Express]

"The time is not far distant when the bottles on the doctors' shelves will be reduced to a very small number, and resort will be had to simple living, suitable diet, plenty of sun, and fresh air. I look forward to the time when people will leave off the extraordinary habit of taking medicine when they are sick."

This statement attributed to Sir Frederick Treves, was quoted by Dr. Harold Wynne Thomas in his presidential address to the British Homeopathic Congress in London yesterday. Dr. Thomas added that Sir Almroth Wright, speaking of vaccine therapy, had said: "We must cast aside all our old beliefs and admit that we have been practicing quackery."

[Rev. Robert Keating Smith in The Living Church]

The sanest spot in all central Europe, politically, socially, and industrially, is the new Republic of Czecho-Slovakia. Not a sudden invention of the peace conference, not even the result of the war, but for many years preconceived and awaited by a sanely determined, intelligent people, the northern portion of the former ramshackle Austria-Hungary takes its place among the nations of the world.

To all who know the Czecho-Slovaks in America . . . it was to be expected that any religious movement which might take place would be equally sane and fully as stable in its results. A four weeks' intensive study of the situation, many hours' intimate association with its national leaders, and frequent participation in its services, bring no disappointment to one who has counted fully on the successful carrying of the national consciousness into the people's religious expression. . . . For many years, the determination of these people, upon regaining their national political freedom, the

dream—more than dream!—for three hundred years, has also involved their national religious freedom. . . .

As soon as the spring came, evidences began to be apparent of a great religious reawakening. Unrecognized by the government until it should actually prove to be a popular movement, permanent and widespread, the leaders found that it was all that they could humanly do to carry the spontaneous arisings of the people into organization. From one village to the next the word spread, and the priest and all his people in one village, or most of the people without and in spite of the priest in another village, came into the quickly growing church. . . .

The leaders of the movement are men of noble devotion and high intellectual training. It is refreshing, for one wearied with urging people to interest themselves in religion, to associate with these priests in their tireless response to the heavy demand made by the eager people. One of the marks of spiritual integrity is the desire to avoid all religious controversy, either with Evangelical Protestant extremists who would advise joining fortunes with them, or with Roman Catholic prelates and others who invite rebellious protests against their sternly worded "excommunications." There is not time for controversy. The demand of the spirit of the people alone calls them to constructive activity, and they give themselves to their mission unsparingly.

Church Notices

4 4 4

Boston, Mass.—The First Church of Christ, Scientist. Sunday services, 10:45 a.m. and 7:30 p.m.; Sunday school, 10.45 a.m.; Wednesday evening meeting, 7:30 p.m., in the church edifice, Norway, Falmouth, and St. Paul Streets. The church is open to visitors Wednesdays and Fridays from 10 a.m. to 5 p.m.

Reading rooms: Little Building, corner of Tremont and Boylston Streets (fourth floor); open daily, except Sunday and Wednesday, from 9 a.m. to 9 p.m., and on Wednesday from 9 a.m. to 5 p.m. National Union Bank Building (seventh floor), 209 Washington Street, opposite old State House; open daily, except Sunday, from 9 a.m. to 5.30 p.m. Coolidge Corner Building, 1316 Beacon Street, Brookline; open daily, except Sunday, from 9 a.m. to 6 p.m.

From the Clerk of The Mother Church

Church Tenets.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to Charles E. Jarvis, Clerk, 236 Huntington Avenue, Boston 17, Massachusetts.

From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account,

the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address. Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to EDWARD L. RIPLEY, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

Announcements

From The Christian Science Publishing Society

New Morocco Bound Vest Pocket Edition of the Textbook

This small volume, 3 1-16 by 4 5-16 inches, the same in size as issued for soldiers and sailors during the war, is bound in black morocco, limp, leather lined cover, round corners, gilt edges. Price \$3.50 for single copy and when included in lots of twelve or more copies of Science and Health in any or all bindings, \$3.25 each.

Orders for this edition will be filled in rotation.

Vest Pocket Bible

The Bible, bound in morocco, uniform in style with the vest pocket edition of Science and Health, is now on sale at \$4.75 a copy. Order by number 08X. Reading room discount 10 per cent.

New Pamphlets

Advance information will in future be given two weeks before each new pamphlet is placed on sale. This will replace the former system of standing orders.

New Pamphlets in German

There is now on sale a new German pamphlet entitled "Ein stilles, sanftes Sausen" ("A still small voice") containing the following articles reprinted from the Christian Science periodicals with alternate pages in English: "The secret place of the most High," "Never too Late for Healing," "Treatment," "Cause and Effect."

There is also on sale a new German pamphlet entitled Läuterung (Purification) containing the following articles reprinted from *The Christian Science Monitor* with alternate pages in English: "Lusting Against Lust," "The Lust of Money," "The Lust of Power," "Looking Ahead," "Sincerity."

Price of each of the above pamphlets 5 cents a copy. Reading room discount 20 per cent.

"Rudimental Divine Science" for the Blind In English Braille

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U.S.A.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U.S.A.

Articles and Testimonies

Available articles from Christian Scientists and good testimonies from those healed by Christian Science are always welcomed for consideration by the Editors. Manuscripts for publication in the Sentinel and Journal, whether articles, poems, or testimonies, and correspondence relating thereto, should not be addressed to individuals, but to the EDITORIAL DEPARTMENT, THE CHRISTIAN SCIENCE PUBLISHING SOCIETY, Boston 17, U.S.A.

[218]

Letters of Appreciation

Many letters of appreciation of THE CHRISTIAN SCIENCE MONITOR and other Christian Science activities are constantly being received. These letters express what these activities mean to different individuals in various occupations and pursuits. The favorable comment that has been received on those already published indicates that they are welcome and helpful; therefore others will be published under the above heading. Extracts from such letters follow:

PLEASE start my subscription to THE CHRISTIAN SCIENCE MONITOR on date this arrives. I find it an indispensable help for one who wants to keep up to the moment on everyday affairs. I always read the local papers and when I read about some important event I always think, "Well, I'll wait until my Monitor comes and find out the truth of the matter."

I WOULD like to express my appreciation of THE CHRISTIAN SCIENCE MONITOR. I received a copy of the first issue and it has been a daily visitor since. I felt very grateful for it, and am so thankful that Mrs. Eddy has given to all mankind this clean daily paper which brings its blessing to every home which it enters. For several years I have sent the Monitor with the Children's Page to a little boy in the mountains. He has saved them all and enjoys having his mother read them to him.

I GLADLY renew my subscription to that wonderful newspaper, The Christian Science Monitor. The Home Forum page with its beauty and order, to say nothing of the spiritual food and inspiration gained from reading it, brings healing and peace. I went down to the Monitor office here and purchased sixteen extra copies of last Monday's Monitor, containing——'s inspiring speech. I wish I could have afforded to send out fifty more. I am very grateful not only for the Monitor but also for all the Christian Science literature.

WORKS ON CHRISTIAN SCIENCE

Written by MARY BAKER EDDY, Discoverer and Founder

of Christian Science and Author of its Textbook

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. Cioth, one to eleven copies inclusive (cloth only), each \$3.00; twelve or more, each \$2.75. Ooze leather, vest pocket size, single copy \$3.00; twelve or more, each \$2.75. Morocco, vest pocket size, single copy \$3.50; twelve or more, each \$3.25. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy \$4.00; twelve or more, each \$3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$5.00; twelve or more, each \$4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book), single copy \$6.00; twelve or more, each \$5.75. Large Type Edition, designed especially for the use of First Readers. Large type (18-point) on Oxford India Bible paper, bound in leather. Size 8 by 10% inches. Single copy \$7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

French Translation. Alternate pages of English and French. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco. one to five copies inclusive. \$5.50; six or more, each \$5.25. Orders for the French translation in lots of six or more may include both bindings.

German Translation. Alternate pages of English and German. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each \$5.50; six or more, each \$5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, French, and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1890, with revisions and additions. Cloth, single copy \$2.25; twelve or more, each, \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; twelve or more, each \$3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy \$5.00; twelve or more, each \$4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 366 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy \$2.25; six or more, each \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; six or more, each \$3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy \$5.00; six or more, each \$4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy \$6.00; six or more, each \$5.50.

Christ and Christmas. An illustrated poem. Cloth, single copy \$3.00; six or more, each \$2.50. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Unity of Good and Other Writings. One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science versus Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy \$1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy \$2.00; six or more, each \$1.75.

paper, single copy \$2.00; six or more, each \$1.75.

German Translation. Alternate pages of English and German.

Cloth, single copy \$1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy \$1.00; six or more, each 75 cents.

Unity of Good. This book lays the ax at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy \$1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy \$1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, alias Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point, American Braille, and English Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Rudimental Divine Science and No and Yes. In one volume, French translation with alternate pages of English, vest pocket size. Blue cloth, gray edges, single copy \$1.25; six or more, \$1.10; blue leather, gray edges, single copy \$2.00; six or more, \$1.75 each.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science versus Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy \$1.50; six or more, each \$1.15.

Christian Science versus Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, murbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 70 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy \$1.50; six or more, each \$1.25. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Feed My Sheep. Solo. Words by Mary Baker Eddy. music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign. Address orders and make checks payable to

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY
BOSTON · U·S·A

Christian Science Literature

"Science and Health with Key to the Scriptures" and all other published writings of Mary Baker Eddy are listed on the outside back cover page of this Sentinel.

Christian Science Sentinel

Established, 1898, by Mary Baker Eddy. Published weekly, containing articles, editorials, and special current information regarding the Christian Science movement, also testimonies of healing. Subscription price, payable in advance, postpaid, to all countries: One year, \$3.00; six months, \$1.50; three months, 75 cents; single copy, 7 cents.

The Christian Science Journal

Founded, 1883, by Mary Baker Eddy. This monthly magazine is an official organ of The First Church of Christ. Scientist, in Boston, Massachusetts. Contains articles, editorials, and testimonies of healing, a directory of Christian Science Churches, Societies, and Reading Rooms; also in the January, April, July, and October issues a list of Christian Science Practitioners and Nurses. Subscription price, payable in advance, postpaid to all countries: One year, \$3.00; six months, \$1.50; three months, 75 cents; single copy, 30 cents.

The Christian Science Quarterly

Founded, 1890. by Mary Baker Eddy. Published January, April, July, and October. Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. Printed in English, English-Dutch, and English-German. English edition published also in vest pocket size. Subscription price, payable in advance, postpaid, to all countries: One year, \$1.00; single copy, 25 cents.

The Christian Science Monitor

An International Daily Newspaper. Founded, 1908, by Mary Baker Eddy. Daily, except Sundays. Its own world-wide news service is supplemented by the service of the Associated Press and of the United Press Association. Complete in its departments; unique in its Home Forum page. Full page of editorials dealing truthfully and fearlessly with vital questions of the day. Subscription price, payable in advance, postpaid to all countries: One year, \$9.00; six months, \$4.50; three months, \$2.25; one month, 75 cents; single conv. 3 cents. copy, 3 cents.

Le Héraut de Christian Science

Established, 1918. A periodical published monthly in French, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, postpaid to all countries: One year, \$2.00; six months, \$1.00; three months 50 cents; single copy, 20 cents.

Der Herold der Christian Science

Authorized, 1903, by Mary Baker Eddy. A periodical published monthly in German, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, postpaid to all countries: One year, \$2.00; six months, \$1.00; three months, 50 cents; single copy, 20 cents.

Subscriptions will begin with the next issue after the receipt of the order. Information regarding bound volumes of the weekly and monthly periodicals will be given upon request.

NUMBER 12

The One Talent

ALICE K. METZ

ALL students of the Bible are familiar with Jesus' parable of the talents, which begins, "For the kingdom of heaven is as a man travelling into a far country, who called his own servants, and delivered unto them his goods." It then goes on to tell how he gave to one servant five talents, to another two talents, and to another one talent, "to every man according to his several ability," before starting on his journey. The narrative then describes how he that had received the five talents, by using them, succeeded in gaining five other talents. Likewise he that had received two talents gained two others. But he that had received the one talent listened to the suggestions of fear and slothfulness and, hiding that which he had received, gained nothing. The lord of those servants, in reckoning with them, said to each of those who had been faithful, diligent, and watchful, "Well done, thou good and faithful servant: thou hast been faithful over a few things, I will make thee ruler over many things: enter thou into the joy of thy lord." But for the wicked and unprofitable servant there was sharp rebuke, and an order given that the talent be taken from him and that he be cast into

Let us lift our thought of "talent" above the sense in which this word is usually used in describing some mental or physical ability or prowess, up to the sense in which Mrs. Eddy uses it when she says, beginning on page 366 of Science and Health, "If we would heal by the Spirit, we must not hide the talent of spiritual healing under the napkin of its form, nor bury the morale of Christian Science in the grave-clothes of its letter." Here we are brought face to face with the fact that as Christian Scientists we all possess this talent in proportion to our understanding of this Science, and that it is incumbent on us all to use and improve our individual ability to heal, not alone so-called disease, but every sense of discord and limitation from which the human family is suffering. Our success in doing this determines the use we are making of our God-given ability and our progress in understanding God and man's relation to Him. Throughout the Bible and our Leader's writings, we find constant reminders that only as we use or put into practice that which we already know, shall we be able to apprehend and gain more.

Now how can we best learn to use profitably that which is being unfolded to us through the study of Christian Science, so that there may be constant progress and not stagnation? Mrs. Eddy has answered this question most comprehensively on page 116 of "Miscellaneous Writings," where she says, "Never absent from your post, never off guard, never ill-humored, never unready to work for God,-

is obedience; being 'faithful over a few things.' "

On first reading this, one is inclined to exclaim that this would seem being faithful over a great many things. To be obedient to this extent would surely mean perfection, a tremendous height to have to gain. But what else does the use of the "talent of spiritual healing" already mentioned

mean but the constant reflecting of divine Mind, at all times and under all circumstances,-being always about the Father's business?

Our post of duty is not necessarily a Christian Science practitioner's office, but is always at the door of the individual human consciousness. And our duty there is always to watch every thought of ourselves or others that would strive to gain admittance, never admitting one thought about man or universe that we would not admit about God. Whether that post be exemplified to us in the office or in the home, in the street or in the field, there is never any time for idleness there. Not alone when called on to heal sickness should we be found at our post, for some thought is constantly knocking for admittance, and all must be challenged and examined, admitted or rejected.

To be always on guard is never to yield to the suggestion that if we are not giving a treatment or holding a church office or engaged in some specific Christian Science work, we may allow thought freedom to wander off into materialism of any sort. Indeed, one can less afford to be off guard then than otherwise, and there is really never any time for inactivity. "They also serve who only stand and wait." To "stand" or to "wait" seems sometimes the hardest thing for one to learn to do properly. But neither standing nor waiting means idleness, and perhaps while seemingly doing little else than calmly holding the banner of Christ, Truth, aloft, proving the sustaining, protecting, and guiding power of Principle, we may be accomplishing more far-reaching good than we dream of.

Since the same fountain cannot send forth sweet water and bitter, it is self-evident that the healing attitude of thought has no part with ill humor, the seeming effects of fear and hate, the suppositional opposite of the divine Love which is the very heart and soul of Christian healing. To be never ill-humored is indeed a high mark to aim for, but one which all students of Christian Science are striving for and will naturally attain as they grow into a fuller understanding of man's relationship to God.

How often the angel of His presence is at our side pointing us to the path onward and upward, when the claims of self-interest, fatigue, worldly cares or joys suggest reluctance to answer some call of duty. Who has not had cause for gratitude and rejoicing that we have these promised angels ever at our side to keep us in the way marked out by the great Way-shower, the way of willing, loving service to God and man? To be ever ready to work for God must mean a continual dwelling in the understanding that Life is spiritual, not material; and that because there is but one Mind there can be but one true idea on any given subject or circumstance. Thus we shall be ever ready intelligently to replace with the actual facts of the case whatever false sense presents itself to us.

There is no other way to be always ready to work for God than that of keeping constantly in thought the perfection of God's creation, right here and now, for with that truth alone can we meet and master all false claims about

Copyright, 1920, by The Christian Science Publishing Society, Falmouth and St. Paul Streets, Boston, Massachusetts. Entered at Boston post office as second-class matter. Acceptance for mailing at a special rate of postage provided for in section 1103, Act of October 3, 1917, authorized on July 11, 1918.

creation. Mrs. Eddy gives us an emphatic rule on this point, on page 242 of "The First Church of Christ, Scientist, and Miscellany," where she says, "Unless you fully perceive that you are the child of God, hence perfect, you have no Principle to demonstrate and no rule for its demonstration." To begin work from any other standpoint shows poor preparation for ever readiness, and will accomplish little in the right direction and perhaps much in the wrong. So we find that to improve the talent of spiritual healing really involves and necessitates improving every God-given talent, bringing every thought and act to the touchstone of Principle, until we, too, finally gain the benediction, "Well done." "The conscientious are successful," Mrs. Eddy reminds us (Miscellaneous Writings, p. 340). "They follow faithfully; through evil or through good report, they work on to the achievement of good; by patience, they inherit the promise. Be active, and, however slow, thy success is sure: toil is triumph; and—thou hast been faithful over a few things."

God Is Principle

JOHN C. MAC LAREN

NE of the problems that may seem most difficult in Christian Science is the ever realizing of God as what He is, divine Principle, Life, Mind, and the difficulty arises from the fact that most of us, and the world generally, and our ancestors for centuries before us, have been brought up to think of God as some glorified man. Of course this sounds absurd to Christian Scientists, but, nevertheless, unless we invariably think of God as Principle or infinite Mind, or one of the synonyms of God, the thought of an anthropomorphic God is apt to occur again and again. It is advisable that parents make a great point of this in teaching their children about God, as, if they will only do this, these little sons and daughters will start with a great advantage over those who learned the truths of Christian Science after they were grown up, in that their concept of God, Principle, will be exact from the first, and they will have no false concept to get rid of. It should be clearly taught why Principle is Father and Mother: "Father" as being all cause, the creator of the whole spiritual universe, of all that really exists in Truth; infinite Mind; Principle, governing all; "Mother" as expressing love, His tender care for us; Life;

To those who have been accustomed to trying to love God while thinking of Him as some great, loving, glorified man, it may seem difficult to love instead something seemingly so intangible as Principle; therefore, a few examples of our deep-rooted love of Principle which the world may not think of as expressing our love of God may be of help: Schoolboys are brought up to look upon fair play as the very spirit of the school and of the nation, while the antithesis of fair play, cheating, is looked down upon with contempt and loathing. Since true fair play is the expression of Principle, what is this but love of Principle and hatred of evil? Do we not all love truthfulness, and encourage it especially in children? Do we not love honesty and straight dealing? Do we not love purity, goodness, harmony? Are not all these the attributes of God? From this it appears that it is not so hard after all to love God

Again, Christians, other than students of Christian Science, do not differentiate between the human Jesus and the Christ, and so always think of the Christ in the form of Jesus; this mental picture, also, we must get rid of. When the two Marys first beheld Christ Jesus after the resurrec-

tion, Matthew tells us "they came and held him by the feet, and worshipped him." In John's gospel we read that when Jesus made himself known to Mary in the garden, he told her not to worship the human Jesus but to worship the Christ, the perfect spiritual idea of God, to which the human Jesus was giving place; and he instructed her to tell his brethren (and Jesus tells us in Matthew's gospel who his brethren are) that he was demonstrating his at-one-ment with God, divine Principle, a demonstration all have to make.

So, likewise, we must give up thinking of man, the real man, which Mrs. Eddy defines as "God's spiritual idea, individual, perfect, eternal" (Science and Health, page 115), as an etherealized human; we must remember that man is idea, and, as we read from John in our churches every Sunday, "It doth not yet appear what we shall be: but we know that, when he shall appear, we shall be like him; for we shall see him as he is;" that is, not until we have demonstrated the Christ, by working out of our materiality, claiming man's birthright as the son of God, and nothing remains but the perfect spiritual idea of God, shall we discern spiritually man as the image and likeness of God. What do we read in Science and Health (p. 465), in answer to the question, "What is God?" "God is incorporeal, divine, supreme, infinite Mind, Spirit, Soul, Principle, Life, Truth, Love."

By wholly, understandingly grasping this, and by knowing that man is God's image and likeness, with all that this means; that is, that man is not corporeal, there is no matter, there is no power but Love, there is nothing finite, all is spiritual, perfect, eternal, reflecting Principle, Life, Truth, and Love, we can instantaneously heal the sick.

The Sanctuary

M. LYDIA BUTZBERGER

WHO has never felt the need of taking refuge from the world, the need of casting off a burden, the need for healing, for rest and peace? Surely such is the longing of many a human heart and for such a one there is a promise of comfort. Help has always been at hand and the way to avail ourselves of it has been proclaimed of old by seers and prophets, and to-day is again fully revealed in Christian Science, a teaching which is giving to the world a knowledge of God through the spiritual interpretation of the Scriptures and the demonstration of Immanuel, "God with us." This enables every sincere seeker, every one that hungers and thirsts after righteousness, to enter into the sanctuary.

The word sanctuary is derived from the Latin sanctuarium, sacred, holy, and is used to designate a consecrated place. Most people to whom it is familiar connect it with that part of a religious building in which the altar is placed, or with the temple, the building itself. But in the light of Christian Science the word takes on a much broader meaning and the material symbol gives place to the true idea which gave it birth. The human is limited at all points and it is only as we acquaint ourselves with the divine decree concerning man that we begin to understand our true relationship with God and enter into our heritage of freedom.

The Bible teaches us the allness of God, His ever presence and all-power, and Christian Science is showing us how to avail ourselves of His help in all circumstances. Acknowledging God as Mind, Spirit, we cannot limit Him to any particular place, for Mind, Spirit, implies intelligence, entirely independent of matter. Matter, therefore, is no medium for the worship of God. This was made very clear by him who spake as never man spake before, when,

i

answering the woman of Samaria, he said: "The hour cometh, when ye shall neither in this mountain, nor yet at Jerusalem, worship the Father. Ye worship ye know not what . . . God is a Spirit: and they that worship him must worship him in spirit and in truth." Spirit and truth, therefore, are God's sanctuary, the place of His dwelling, and we shall always find Him and know Him through the spiritualization of our own thought. This is done by laying off the mortal, with all its limitations and false claims, the "old man" as Paul calls it, and putting on the "new man," the Son of God, the Christ. This means regeneration, or being born again, but of Spirit, a process which the Master declared was absolutely necessary in order to enter the kingdom, or realm, of God

Recognizing Spirit as Father, cause, or Principle, we shall see man as His idea. This is man in God's image and likeness, His reflection. Principle and idea, cause and effect, being inseparable, God and man are found to be forever at one. In the textbook of Christian Science, "Science and Health with Key to the Scriptures" (p. 91), Mrs. Eddy says: "Let us rid ourselves of the belief that man is separated from God, and obey only the divine Principle, Life and Love. Here is the great point of departure for all true spiritual growth." This inseparability of Principle and its idea is beautifully set forth in the one hundred and thirty-ninth Psalm: "Whither shall I flee from thy presence? If I ascend up into heaven, thou art there: if I make my bed in hell, behold, thou art there. If I take the wings of the morning, and dwell in the uttermost parts of the sea; even there shall thy hand lead me, and thy right hand shall hold me." Understanding man's true relation to the Father, which Christian Science makes so clear to us, and the demonstration of which heals the sick, we shall hold to the consciousness of good. reversing every so-called evidence of the material senses and showing forth, reflecting, the spiritual, real fact as God, Mind knows it. This is to dwell in "the secret place of the most High," and dwelling there, not wandering away, is to "abide under the shadow of the Almighty." So shall we be found to be with God and He with us, and, as Mrs. Eddy says, "If He be with us, the wayside is a sanctuary, and the desert a resting-place peopled with living witnesses of the fact that 'God is Love'" (Miscellaneous Writings, p. 150). It is possible, then, for every one to have access to the sanctuary through a correct knowledge of the creator and His creation, and this knowledge or consciousness of the reality of all things constitutes the consecrated place where we commune with God.

The word sanctuary has another meaning and was used to designate places of refuge which some nations established to afford protection, an inviolable asylum. Thus certain of their cities or temples were called sanctuaries, in which any one who came within their gates found refuge. If a fugitive was able to reach one of these he was safe and the law could not claim him while he remained there, for the right of sanctuary was held very sacred. Thus the word is equivalent to safety.

How many to-day would be glad to know of just such a place, a place where burdens can be laid off, fears replaced by confidence, sin and sickness healed, doubt and apprehension give way to a feeling of safety. Christian Science leads us to this place, to this sanctuary which is within the reach of every one because it is not a locality nor a temple made with hands: it is a state of consciousness. In it the fullness of Life is revealed, the harmonious, universal, infinite expression of Mind, life governed by a perfect, immutable, spiritual law. As has been said before, the human is limited at all points; but under the pressure of Truth, men are breaking

away from the laws of limitation which a wrong concept of the universe has imposed upon them. If the accepted laws of health had worked satisfactorily there would not be a constant seeking for something better. If the accepted theories as to what constitutes the safety of a people or of a nation had worked out in practice what was claimed for them, we would not witness the present day upheaval. The fact is, however, that whatever is based on human opinions is found to be of no value and has to yield to the demands of Principle, and the world is gradually being made to understand what these demands are and to submit to them, for in Principle alone

When mortal mind declares that an individual must suffer for having broken some false law of matter, divine Science offers inviolable asylum within the all-encircling arms of Truth and Love where it is learned that Spirit alone is power and that spiritual law alone is law. There is no problem, whatever its nature, which does not find its solution in Christian Science. As in Jesus' time, the sick are healed through its ministration, which proves that the law of God through which our Master wrought those wonderful cures is still operating and available. This surely brings hope to those who have found material means wanting. On page 494 of Science and Health we read: "It is not well to imagine that Jesus demonstrated the divine power to heal only for a select number or for a limited period of time, since to all mankind and in every hour, divine Love supplies all good. The miracle of grace is no miracle to Love. Jesus demonstrated the inability of corporeality, as well as the infinite ability of Spirit, thus helping erring human sense to flee from its own convictions and seek safety in divine Science." Thus the sanctuary as a consecrated place and as an asylum affording protection and safety is found in Christian Science, and every one who is honestly seeking the truth can enter into the holy

"My Father has my treasure"

NINA SEYMOUR KEAY

FEAR of loss is so prevalent in the human consciousness that joy in the possession of any form of good is often almost swamped by the fear of losing it. This is very apparent, for instance, in human relationships, unless they are being rectified, to some extent, by the spiritual understanding of love. This fear of loss, shown in a mother's anxious care for her child, in fears for the health, happiness, or prosperity of those we love, shown, more selfishly, by jealousy and exacting "possessiveness," is simply the inevitable corollary to the belief that good is contained in matter. All material things being subject to discord and decay, it is obvious that if we love a material thing it is only a question of time until we shall be robbed of what we hold dear. With regard to affection, however, it is generally conceded that it is not a merely material quality, and so the laws of matter, so called, cannot destroy it. The trouble is, however, that human affection, however unselfed, is in bondage to fear as long as the belief exists that the object of affection is a material being; and only the teaching of Christian Science, in its interpretation of the Bible, can afford the proof that life is not contained in matter.

As creation is understood as spiritual unfoldment, and the divine Mind is recognized as the only creator, it becomes clear that all we can possess of anything is our mental concept, our knowledge of it, and that the reality, the right identity, of it, is forever safe in the one true consciousness. In Science and Health, beginning on page 555, we read: "Truth fosters the idea of Truth, and not the belief in illusion or error. That which is real, is sustained by Spirit." Therefore, as we attain to more spiritual thinking, we attain truer concepts of all God's creation, and these concepts are the real "treasure in heaven." When we realize that it is the tender, unselfed regard we have for our loved ones that constitutes our treasure, we see that nothing can rob us except our own lowering of the standard. If we are content to let in the mists of false belief and to cloud our concepts by so doing, then we lose, temporarily, that which we love; but so long as we hold our own thought true, nothing can rob us of the joy of loving, even though the object of the love may seem out of reach, for the time.

On analysis, we admit that it is not the material thing we love, not the flesh and blood, but the good, the spiritual characteristics, and these are never in any danger, since they are the expression of Mind. In "No and Yes" (p. 26), our Leader says, "Man's real ego, or selfhood, is goodness," and, lower down on the same page: "God holds man in the eternal bonds of Science—in the immutable harmony of divine law. Man is a celestial; and in the spiritual universe he is forever individual and forever harmonious." Knowing, then, that the reality of everything is safe with God, we need but to continue to improve our own concepts, and as we do so we shall attain to the love which knows no fear, because it is the recognition of spiritual being. Then we can echo the thought expressed in a familiar hymn:—

My hope I cannot measure, My path in life is free; My Father has my treasure, And He will walk with me.

Causing Error to Cease

ADAM DICKSON

ON page 318 of Science and Health, Mrs. Eddy tells us, "We must cause the error to cease that brought the belief of sin and death and would efface the pure sense of omnipotence." Then on page 531 she informs us what that error is, in the following words: "This is error,—that mortal man starts materially, that non-intelligence becomes intelligence, that mind and soul are both right and wrong." Now, as taught in Christian Science, we find that man is spiritual, created in the image and likeness of God, Spirit. This spiritual man is immortal, and is the only man that ever was created. Mortal man, then, never was created, never started materially, in fact never started at all. What we humanly know as mortal man is now, always has been, and always will be a myth or illusion.

This false belief of man was what Paul referred to when he spoke of putting off "the old man with his deeds." The real or spiritual man is referred to in the third chapter of the first epistle of John, where we read, "Beloved, now are we the sons of God." This, then, is the error we must cause to cease; we must destroy our false views of man as mortal and material, and must learn to know him as immortal and spiritual. As we do this, sin, sickness, and death will disappear. They came with the belief of man as mortal, so will they disappear when we cease to regard him as such.

Sometime mankind will awake from this dream of materiality to the realization of spiritual manhood. This can never be done by submitting to the claims of error, but by overcoming them—not by thinking that man is mortal, but by knowing that he is spiritual. Christian Science is bringing this knowledge to thousands throughout the world today, and is enabling them to "put off the old man" with his false beliefs of sin, sickness, and death, and to "put on the

new man, which is renewed in knowledge after the image of him that created him."

As Mrs. Eddy says in Science and Health (p. 476), "Jesus beheld in Science the perfect man, who appeared to him where sinning mortal man appears to mortals. In this perfect man the Saviour saw God's own likeness, and this correct view of man healed the sick." Jesus did not look for, believe in, or see the false evidence of mortal mind; he knew man as God's perfect idea, and that this idea could not be sick. What though the seeming evidence was sickness, lack, or even death itself; he destroyed the evidence by looking beyond matter and seeing the ever present manifestation of infinite Mind, God. To him error had ceased to be. So will it cease with us when we stop accepting it. Let us, then, acknowledge Principle as the only power, and prove that this power is ever present and available, under all conditions and circumstances. As we do this, Truth is manifested, the false evidence of mortal mind has disappeared, and error has ceased to be.

Our Abiding Place

ELSA F. ANGLE

BEFORE awaking to the truth of being, through the teachings of Christian Science, we perhaps found little comfort in the statement from the Bible that "in him we live, and move, and have our being." In fact, believing in a corporeal God, as almost all of us have done, it may have seemed to us a sheer impossibility even to grasp it, and so we found ourselves supposedly shut out from this abode. But through the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy, the key has truly been given to us to unlock all the treasures which have ever belonged to man in God's image and likeness, and so we are enabled to prove possession of our true and only home.

When we learn that God is divine, all-inclusive Mind, and man is His idea, we can perceive the glorious fact that man lives and moves and has true being in Him; because we know that in any sense no idea can ever exist outside of the Mind that conceives it, nor can it do otherwise than reflect that Mind. And these ideas being expressed are the only evidence of the existence of Mind.

All that emanates from divine Mind is divine, perfect, indestructible, since this Mind could have no idea unlike itself. This shows beyond a doubt that all that God created is "very good." All seeming evil conditions have their birth in mortal mind, which is a lie, since it counterfeits the only Mind, God. Being evil itself, it sends forth only beliefs of like qualities, which accounts for the apparent existence of sin, disease, and death. Mortal mind supposedly creates a mortal man, who in turn expresses all the qualities of that mind and has no part nor place in the true Science of being. God is Spirit, Mind, and man is His image and likeness, the expression of the divine Mind in which he has his origin and existence.

To live means to be conscious, consequently to live in God means to be conscious of Him, good, only; to move in God describes the constant activity of manifesting all His attributes, as Jesus did, who was ever about his Father's business. To have true being in this all-inclusive Mind signifies the only existence there can be, since God is All-in-all. Could there be any safer abiding place? Is it not the kingdom of heaven, which Jesus said is "within you," in consciousness?

As this all becomes clear to us, we will endeavor to reflect more of our Father-Mother God and refuse to lend

ourselves as expressions of the lies of mortal mind. Every thought decides whom we would serve, the real and eternal, or the untrue and mortal, and according to one's steadfastness will one reap joy and peace as God's idea, who lives and moves and has all being in Him, eternal harmony. As Mrs. Eddy says, on page 79 of "Miscellaneous Writings": "Man's origin and existence being in Him, man is the ultimatum of perfection, and by no means the medium of imperfection. Immortal man is the eternal idea of Truth, that cannot lapse into a mortal belief or error concerning himself and his origin: he cannot get out of the focal distance of

Right Repudiation

MYRTLE NOBLE

"THE Lord is a God of knowledge, and by him actions I are weighed." Throughout all ages it has been the tendency of so-called mortal mind to dominate mortals. This claim of evil presents itself in many different phases, one being autocracy. In the book of Exodus, the Pharaoh thought by killing all the male children that he could subdue the children of Israel and get them to turn from the living God and worship other gods. This was nothing but autocracy. It was merely striking at the Christ, Truth, although it seemed to be striking at persons. Moses, we see, was delivered, and later, through his understanding of God, was protected every step of the way as he led the children of Israel safely through the wilderness and the Red Sea. He was not afraid to stand with Principle, which directed him every step of the way.

In the book of Daniel, we read that when Nebuchadnezzar the king made an image of gold and commanded that all nations and people should fall down and worship it, Shadrach, Meshach, and Abednego refused and stood firmly with Principle even though condemned to the fiery furnace for so doing. When thus put to the test they not only were delivered unharmed themselves, but by their steadfastness showed the princes, governors, captains, the king's counsilors, and the people, as well as Nebuchadnezzar, that there is but one God and that is Principle, and Principle expressed. Again, in the sixth chapter of Daniel, we read that Daniel was condemned to the den of lions by King Darius because he worshiped God according to the dictates of his own conscience, but when Daniel proved the lions harmless and King Darius saw Daniel unharmed, he also believed in "the living God" and sent out a decree to all his people to worship the God of Daniel. As Mrs. Eddy says (Miscellaneous Writings. p. 36), "The ferocious mind seen in the beast is mortal mind, which is harmful and proceeds not from God; for His beast is the lion that lieth down with the lamb."

In the New Testament we read of the persecutions of Jesus and his followers, the desertions of some of them, his crucifixion, and ascension. He knew he could have been saved from it all, but he was the Way-shower. In the birth of America, the Pilgrims came to worship God in peace and harmony and according to their highest understanding, simply because this same lie of autocracy tried to dominate them and say just how they should worship. Some years later came the revelation of Christian Science by our revered Leader, Mary Baker Eddy, which teaches the supremacy of God as Principle and man in His image and likeness. One brave woman stood alone with Principle against the whole so-called world, to reveal this same Christ, Truth, to this age. She knew that "one with God is a majority." Even relatives, friends, and some so-called students deserted her simply because they did not seem to understand the great

mission intrusted to her, but she pressed onward, swerving neither to the right, nor to the left, as the truth unfolded to her and sustained her. All through Mrs. Eddy's writings we find she never hesitated to face every phase of error, and to handle it with the greatest sense of love, which is firmness with Principle.

The Bible makes it very clear that one should "judge not according to the appearance, but judge righteous judgment;" that is, that we should see the truth about God and His creation not just once or twice a day but the whole twenty-four hours, for in doing this one sees peace and harmony. In other words, one should not judge the actions of another and set up a standard by which he should act, but should judge in accord with Principle, thereby benefiting not only others but himself as well. This is true Christian

Science practice.

Evil comes as a sick or sinful person, but Christian Science teaches that evil is neither a person, place, nor thing, but simply a false belief about God and man, and it therefore has no place in consciousness. God made man in His own image and likeness; therefore man has dominion over and is not subject to this claim, and because of this he reflects the one intelligence to think and act rightly every instant, regardless of what the senses say. One's duty as a Christian Scientist is to see immediately that right where the suggestion says that man is imperfect, is God's true image and likeness. Man is in his right place every instant.

Evil claims that it can do just what Truth has already done. It comes in the guise of good. It claims that it has a law of relapse which can undo all that Principle has already established, but Christian Science is the law of infinite progress. Christian Science is the unfoldment of Principle and its idea and fills all space. So this lie of a law of relapse is merely an illusion. It is a claim that cause and effect can be separated and that it can repudiate the action of Principle. It only comes as suggestion and has not real existence. Right action is ever operative.

In referring to Webster in regard to these two words, repudiate and action, this is what we find: To repudiate means to refuse to accept as true. Action is defined as the function or operation of that which acts. If there is any repudiation of action it is Principle that does it, and not so-called mortal mind, because Principle is all the action there is and must be expressed in just the right way. Therefore, the only right repudiation of action is in refusing to accept as consciousness anything that is unlike Principle.

Mrs. Eddy says in the Christian Science textbook, "Science and Health with Key to the Scriptures" (p. 419): "Mind produces all action. If the action proceeds from Truth, from immortal Mind, there is harmony; but mortal mind is liable to any phase of belief. A relapse cannot in reality occur in mortals or so-called mortal minds, for there is but one Mind, one God." Also on page 15 of "Christian Healing" she says, "Christian Science repudiates the evidences of the senses and rests upon the supremacy of God." So one sees it is utterly absurd for mortal mind, so called, even to attempt to pattern the infinite.

4 4 4 Notice

Inasmuch as the Thanksgiving Proclamation of the President of the United States had not been issued when this number of the Christian Science Sentinel went to press, the Editorial Department takes this means of announcing that the Proclamation will appear in The Christian Science Monitor, as well as in a later number of the Sentinel.

Editorial

Thanksgiving

THANKSGIVING is the expression of men's discernment of something better than themselves. In its earliest inception it was this. Even if the object on which the thanks were bestowed was some stock or stone, that stock or stone stood merely as the symbol of an idea which the materiality of the human mind found it impossible to explain otherwise. Gradually, however, as the carnal mind gave way more and more to the inroads of Truth, thanksgiving assumed a higher form, until its true spiritual nature was made manifest to humanity in the teaching of Jesus the Christ. "The divine nature," as Mrs. Eddy says so wonderfully, on page 259 of "Science and Health with Key to the Scriptures," "was best expressed in Christ Jesus, who threw upon mortals the truer reflection of God and lifted their lives higher than their poor thought-models would allow,thoughts which presented man as fallen, sick, sinning, and dying."

Thanksgiving, then, should be to men just as instant as prayer. That is to say, it should accompany prayer as the constant desire of the human race. Still, inasmuch as men persist, for the most part, in believing themselves to be bound by the limitations of the flesh, it has been their habit always to set apart certain days or festivals for the special acknowledgment of the love of God. Such a habit, of course, has its dangers. For one thing, these festivals are apt to become mechanical. Thus divine service has fallen from its high estate of the perpetual effort to be obedient to Principle, to that of a weekly routine; and in the same way festivals, such as Christmas Day and Easter, have become rather feast days and holidays than days of special significance in the Christian calendar of worship. Consequently, it is the duty of every one who understands anything of the demands of Principle to assist in demonstrating the true meaning of Thanksgiving, which is, indeed, the recognition of the fact that, as the image and likeness of Principle, man owes everything he has to Principle. For is it not the existence of Principle which, as the writer of the book of Job so wonderfully said, bringeth forth Mazzaroth in his season, and guideth Arcturus with his sons? "We tread on forces," Mrs. Eddy writes, on page 124 of Science and Health. "Withdraw them, and creation must collapse. Human knowledge calls them forces of matter; but divine Science declares that they belong wholly to divine Mind, are inherent in this Mind, and so restores them to their rightful home and classification."

Even to the primitive man, therefore, there was present some dim perception of the actual, which he symbolized in his worship of nature, with the result that as ignorance and superstition gradually gave way to a clearer perception of Principle, men, while still attributing the creation of the material universe with its fruits to God, set apart certain days of thanksgiving on which specially to recognize the loving providence of the creator. Meantime, in a despised and turbulent province of the great Roman Empire, there had appeared a man, who, wandering over the hills and through the cities, preached a new and a strange gospel to the fishermen and ploughmen who gathered to listen to him. The carnality which gave birth to the human race he described, in the metaphorical language of the day, as a liar and a murderer, meaning thereby the lie of the unreality of evil, whilst in his practice he showed that an understanding of God as Mind was sufficient to demonstrate the unreality of matter through an understanding of spiritual creation, of which all material creation was the merest counterfeit. "Jesus of Nazareth," Mrs. Eddy says, on page 313 of Science and Health, "was the most scientific man that ever trod the globe. He plunged beneath the material surface of things, and found the spiritual cause."

What Jesus taught of the unreality of matter, the world was slow to accept. The sensuous theology of years had to be sapped, and so it came about that Christendom itself rapidly reverted to a belief in the reality of matter, and represented the creation of the earth, as a special dwelling place for human men and women fashioned in the image and likeness of God, in the flesh, as a Christian dogma. Having settled this, the perpetuation of thanksgiving days, as recognition of what might justly be termed, from the point of view of scholasticism, the material providence of Spirit, went on unchecked. The tremendous depths of Paul's great saying to the Corinthians, "For now we see through a glass, darkly; but then face to face: now I know in part; but then shall I know even as also I am known," was entirely unsuspected. Yearly, with the rising of the harvest moon, men and women in England decorated their churches, as they still do, with the fruits of the field in token of, and thanksgiving for, God's provision for their necessity.

Three hundred years ago, a company of these English men and women set out from Plymouth, in Devonshire, to establish a new community beyond the seas. They were God-fearing people all, and what was more natural than that they should desire to perpetuate their old customs in their New England, just as they were perpetuating their old names and language. Thus was Thanksgiving Day established in Massachusetts; and out of Massachusetts there was to come, long after, the call to recognize the spiritual reality of all that seems material, which has been spread around the entire earth through Christian Science. What Mrs. Eddy taught the world about thanksgiving was something different from anything it had been taught since the days of primitive Christianity. It was to understand that Spirit sufficeth for men's wants. "The Scriptures," she writes, on page 410 of Science and Health, "say, 'Man shall not live by bread alone, but by every word that proceedeth out of the mouth of God,' showing that Truth is the actual life of man; but mankind objects to making this teaching practical." If there were no spiritual reality of bread men might yet die of starvation.

Thanksgiving, then, is the giving of thanks for a spiritual realization of the great fact that as the riddles in the mirror are read, men do see realities face to face. Such thanksgiving is perpetual and can never cease. Still, as a man goes about the world, conscious of what he is, and so about his Father's business, he may recognize the efforts of the world to express even a limited sense of this in Thanksgiving Day.

iks."

"Not as the flying"

WITH the fullness of real joy, there can be no fear. To rejoice that divine Love alone controls the true man is to be grateful to God in the only right way, without the slightest dread for either past, present, or future. Divine Love is, of course, but a name for the one Mind which is Truth and the sole source of true living. The one Mind creates and sustains right action here and now. That is how perfect cause shows itself loving. Through Christian Science one is able to prove that loving action in accord with the divine Mind is real and endures in spite of any seeming. Hence each student of Christian Science has, day by day, thorough reason to be thankful to God, as any sense of fear is replaced with the sureness of good. His day for giving thanks is each day, and his reason for giving thanks is never that he has fled from error but that he is proving the truth in his daily living. The extent to which he thus proves the truth is the extent to which he is truly grateful.

In her poem called "The Landing of the Pilgrim Fathers in New England," Mrs. Felicia Hemans pointed out that the Pilgrims crossed the ocean not because of fear but simply because of the desire for the broadest freedom in which to worship God. Though her phrasing is sometimes stilted and hardly exact when it attempts to describe New England, her meaning is sound, as in the second stanza:—

Not as the conqueror comes,
They, the true-hearted, came;
Not with the roll of the stirring drums,
And the trumpet that sings of fame:
Not as the flying come,
In silence and in fear;
They shook the depths of the desert's gloom
With their hymns of lofty cheer.

Fear can never result in freedom. So to-day, the student of Christian Science, like the Pilgrims, is sure, in giving thanks to the divine Mind as the only guiding power, that true living is good. This is the joy that does not depend on any phases of belief in matter. In spite of what may seem to go wrong, the basic fact remains always that the divine Mind is good to live in here and now. To prove this requires constant, quiet practice of Principle through all the seeming doings of the world.

On a certain Fourth of July, Mrs. Eddy referred to the poem of Mrs. Hemans, when she said, in a passage which now appears in "Miscellaneous Writings" (p. 176): "The day we celebrate reminds us of the heroes and heroines who counted not their own lives dear to them, when they sought the New England shores, not as the flying nor as conquerors, but, steadfast in faith and love, to build upon the rock of Christ, the true idea of God-the supremacy of Spirit and the nothingness of matter. When first the Pilgrims planted their feet on Plymouth Rock, frozen ritual and creed should forever have melted away in the fire of love which came down from heaven. The Pilgrims came to establish a nation in true freedom, in the rights of conscience." This true freedom is to be gained for to-day not through any fleeing from what is wrong but through the knowing of the divine Mind as the only present Life and source of real action. Thus the student of Christian Science proves for himself that what was true for the Pilgrims is true now with greater force, for good unfolds without limit to the one who accepts the one Mind as the sole cause which the real man can know.

Before the calm joy that the boundless Mind which is Spirit is good now and always, any sense of fear, injured feelings, hatred, or revenge must vanish. To subdue wrong

[229]

feeling once and for all with the glad knowing of the truth is the way in which to prove one's self grateful to God, in deeds as well as in words. This, of course, is the way of strength and not of weakness. Complete healing in Christian Science means the giving way of any false sense of things to the fact which the divine Mind knows. The broad outlook produced by divine Love takes in no trace of discord. In turning to the truth, one needs always to go humbly the whole way, rather than, with frightened pride, to flee from the truth as it appears. No matter what some one else may have seemed to do or not to do, the turning firmly to the divine Mind and what it knows proves that the way of joy is ever open. Merely mortal feeling of any sort is no part of the real living. In ceaseless gladness that real Life is God, in whom true man lives and moves and has his being, one is able to forgive freely, forget those things which are behind, and "press toward the mark for the prize of the high calling of God in Christ Jesus." The prize is the whole understanding of the one Mind expressed as man in the divine image and likeness. As false beliefs, whether of disease or envy or bitter turmoil of any sort, subside before the knowing of the truth, one proves that the real man is the only man there ever has been or ever will be. Thus one achieves the prize of active peace of Mind, or Life. This is what there truly is to rejoice in and to be grateful for.

So, as once more we recall how the Pilgrims gave special thanks at the end of their first harvest in the new land, let us ponder anew what Mrs. Eddy says on page 19 of her Message for 1902: "Brethren, even as Jesus forgave, forgive thou. I say it with joy,-no person can commit an offense against me that I cannot forgive. Meekness is the armor of a Christian, his shield and his buckler. He entertains angels who listens to the lispings of repentance seen in a tear-happier than the conqueror of a world. To the burdened and weary, Jesus saith: 'Come unto me.' O glorious hope! there remaineth a rest for the righteous, a rest in Christ, a peace in Love. The thought of it stills complaint; the heaving surf of life's troubled sea foams itself away, and underneath is a deep-settled calm." The true joy in right doing is not human emotionalism, which never succeeds in anything, but is sureness of the complete control of the one true power. With this sureness, one can face any seeming wrong instead of fleeing from it, replace the false belief with proof of the truth, forgive, and rejoice. The fact is that man in the image and likeness of God has always lived in the free realm of the real. GUSTAVUS S. PAINE.

[Written for the Sentinel]

A Thanksgiving Testimony

MAUDE M. CLARKE

O GOD, accept our sacrifice of praise
Continually, and may we ever give Thee thanks
For this: That Thou didst send
Thy well beloved Son
To show the way.

How long we struggled in the dark
To see the way,
Till Thou didst send another
Pure and holy as Thy Son,
And fittingly she bore the name of Mary.
The fragrance of her life is wafted o'er the world,
And through the clearness of her vision
Light has come—
A light that casts no shadow—
Christian Science.
For this, O God, we give Thee thanks continually.

Testimonies of Healing

Brought up and educated in the home of grandparents, where one member was a well-known practicing physician, another a nurse, and two daughters were well versed in the medical practice, I developed into a very fearful and sensitive child with a vivid imagination. My early religious training was such that I grew to hate the ever wrathful God I had been taught to worship, and to love those humanly near and dear to me more than ever. Having lost two brothers as the result of tubercular trouble, I nourished the fear of that disease until it became a hideous nightmare in my waking hours and later manifested itself in enlarged glands, a cough, and morbidity, reaching a climax with the desire to do away with myself. In that condition I turned to Christian Science, between ten and eleven years ago, for healing. The way out was not an easy one, but I pressed on, knowing that this teaching is of God, and gradually I am being drawn farther away from personality and closer to Principle.

Shortly after I began to study "Science and Health with Key to the Scriptures" a skin disease broke out and covered my body, only my hands and face being free. Finally, fearing it would spread to my face and that my family would want me to have medical treatment I went to a Christian Science practitioner, who treated me for about two weeks, at the end of which time I was healed, and the healing has been permanent. Headaches from which I suffered for a long period also disappeared. A year later help was needed for chronic constipation and hemorrhoids. Absent treatment was asked for and in one week I was healed.

Later on I had two hemorrhages and again asked for treatment. About an hour after calling the practitioner I arose from my bed, dressed, and went to my aunt's home for dinner, a distance of two miles, with no ill effects. I realize now that all this discord was due to what Mrs. Eddy terms chemicalization,—error coming to the surface to be destroyed by Truth. I was so full of fear, hate, and resentment that it is little wonder that later on I was taken with severe pains in the bowels and intestines and was unable to leave my bed. I cried out in agony to one very near to me to go and call a practitioner, but she at first refused to leave me, fearing as she afterwards told me, that my end was near. Finally she carried out my instructions, and the following day I was up, and went downstairs.

During the summer of 1909 a sense of depression clouded my thought and developed into such an intense fear of death that I felt I was going to pass away. Taking my Bible I turned to the ninety-first psalm and clung to its promises, and after the second day the cloud lifted, leaving me free.

Two years ago last Easter I took my little girl to the Christian Science Sunday school. While there I experienced a deep sense of love and joy upon realizing what a protection this teaching is to the little children gathered together to partake of the bread of Life, not knowing that I too, very soon, would be included in this feeding. That night I awakened a number of times finding it hard to swallow. I was so tired that I would fall asleep with a word of Truth upon my lips, only to awaken again. This continued until morning when about eight o'clock these words came to me,—words I had heard in the Sunday school which had apparently been forgotten: "In the beginning was the Word, and the Word was with God, and the Word was God." I saw as never before that the Word is not personality but infinite divine Principle, and I was uplifted. This thought

in which I had lost self brought healing,—instantaneous healing, in its wake.

I have had so many wonderful proofs during the past years of God's ever presence and protection. On Labor Day I awakened suddenly out of sleep and these words came to me as plainly as if some one had spoken: "I will be with thee, and will not forsake thee." At once my thought turned to the Scriptural text, "Lo, I am with you alway, even unto the end of the world." About eight o'clock in the evening we started out for an automobile ride of some two hundred and eighty miles. We had not gone far when it commenced to rain, and before long it was raining hard. I became conscious that those words which came to me in the morning were full of promise, and worked mentally, declaring that Love is ever present and was protecting us. My little girl was lying on two pillows on the rear seat, asleep, and I was sitting in front with my husband at the wheel. It was very dark and the road was very narrow, so we thought it best to run as close as we could to the car tracks on our right, giving the incoming machines plenty of room. We had gone about twelve miles and a half when we saw several cars, running close together, coming toward us. The first passed by, then the second, but the third, a large, heavy machine, struck ours. I was thrown from my seat, striking my knee against the front of our car, but was not hurt, and my little girl was thrown forward, pillows and all, but remained on them as if bound by a rope and did not even open her eyes until I awakened her later. Our car was crippled, but we managed to move along for nearly half a mile to an inn, where my husband worked for two hours straightening out the steering rod in order to enable us to get back home. We left the inn about eleven o'clock and arrived home at two in the morning, covering a distance of thirteen miles in three hours. Our axle was bent to an angle of forty-five degrees, the left wheel being pushed nine inches back of the other front wheel, yet we were able to ride home that way and did not break the wheel.

Another opportunity presented itself whereby I was able to realize that error could not withhold any good thing that God has in store for His children and this thought remained with me constantly for nearly two months, solving a financial problem far beyond any human anticipation. At the same time an adjustment of my two front teeth took place. They had come together in a sharp point at the bottom but now there is sufficient space between them for the full length.

I am indeed grateful for having been changed from a morbid and unhappy woman into a bright and happy one, and that I have at last touched the hem of Christ's garment. Our periodicals are such a blessing that I wonder how I ever thought I could do without them. I am deeply grateful to Mrs. Eddy, who through her unselfish obedience to God was found worthy of serving Him and giving to a waiting world that wonderful book, "Science and Health with Key to the Scriptures," which is blessing all mankind.

(Mrs.) PEARL P. N. BABCOCK, Detroit, Mich.

4

I am many times reminded of the help the Christian Science Sentinel was in leading me to God. For many years I was a great sufferer, trying many healing agencies but never getting permanent help. One day a friend gave me a bundle of Sentinels, which I accepted, though never intending to read them. I was prompted to read them, however, and through this reading I was led to take from the bookshelf "Science and Health with Key to the Scriptures" by Mary Baker Eddy, which had been in my possession for

years, though I had never opened the covers. Through the

reading of this wonderful book I was healed of several physical ailments, among which was an extreme nervous condition attended by great mental depression. From the first day of reading Science and Health it has been my daily companion; it has given me an understanding of the Bible and brought me peace.

I write this hoping that it may help some one else and inspire him to read the literature of Christian Science. By so doing any sincere seeker may be healed .- (Mrs.) HELEN E. Brown, Lowell, Mass.

Deep gratitude to God prompts me to give this testimony. In July, 1914, I was operated upon for appendicitis. From that time on I suffered from severe internal pain and frequent attacks of cramps. The physician stated that the pains were symptoms of extreme anæmia, and after a lengthy period of time would become better. As the pain became worse instead of better, however, I again turned to medical treatment, but without any result. Then, following the advice of acquaintances, I consulted a homeopathic physician, who promised me healing, which was not experienced. On account of these disappointments I gave up hope of being freed from this suffering, was thoroughly discouraged, and had become tired of life.

At this time I heard of Christian Science through a dear acquaintance, and received several copies of Der Herold. Through reading the testimonies contained therein I gained new courage and hope and sought a Christian Science practitioner, who lovingly accepted my case. After the first treatment the heavy pressure upon the intestines left, and after a fortnight I was freed from all pain.

With heartfelt gratitude I thank God for this proof of His infinite love and goodness. I am also grateful to our dear Leader, Mrs. Eddy. My gratitude can be equaled only by the gratitude of those who have passed through a similar experience. I shall endeavor to advance constantly in this beautiful teaching.—(Miss) FRIEDA MÜHLBACH, Heidenau b/ Dresden, Germany.

I wish to express gratitude for Christian Science and for what it has done for me and my family. I have been cured of the use of tobacco and intoxicating drinks through reading the Christian Science literature; also through the study of Christian Science and the practice of what I studied I have been cured of kidney and stomach trouble. It is about five years since these healings took place. Each member of my family has been healed of some phase of discord. I am most grateful for the better understanding of God as Love, and for the mental transformation that has taken place.

WARD H. DUNPHY, Buffalo, New York.

I am most grateful for some measure of understanding of the truth gained through the study of Christian Science. I have been helped in many ways. About a year and a half ago, while away from home, I was staying in a boarding house, and one morning after breakfast was sitting in front of the fire, when I suddenly became unconscious and fell forward. Two large celluloid pins and a comb which were in my hair caught fire, melted, and ran down my neck and back. I was in the room alone, and although there were several people in the house no one either heard a sound or smelled the melting celluloid. The most wonderful thing to me was that when I became conscious again the fire was out. I feel that I was most wonderfully protected. In falling I had struck a knob on the grate which made a deep cut in my forehead. I went upstairs to the bathroom to bathe the wound and met the lady of the house and another visitor on the stairs. They were quite alarmed when they saw me and sent for the doctor straight away. I was able to keep my thought perfectly clear and asked for a Christian Science practitioner, who came shortly afterwards. The doctor did not come; he was out when called, and on hearing that I did not want a doctor, word was sent that he was not

I can truly say that I did not suffer the least from shock, and, comparatively speaking, little from the burns. A kind friend whom I had met at the Christian Science church took me to her home and did for me all that was necessary. I feel absolutely sure that had it not been for the help I had in Christian Science and the slight understanding I had myself I would not be here to-day. I feel that I cannot express my gratitude for Christian Science and to God for His protecting care, also to our dear Leader, Mary Baker Eddy, for her unselfed love in giving to the world this glorious truth.

(Mrs.) B. HUTCHINSON, Bradford, Yorks, England.

It is a little more than two years since I first took up the study of Christian Science, and through it I have had many proofs of God's ever presence. One evening last summer while trying to make myself generally useful by helping to make a runway for poultry, I stepped on a long rusty nail that was protruding from one of the boards I was about to use. It went all but through the fleshy part of my foot. My sister who was with me at the time helped me to release my foot, which was done with some difficulty. I afterwards walked to the house, a short distance away, and I could hear sister repeating, "She is God's perfect child," while she walked along with me. Shortly after reaching the house I asked her to call a practitioner and ask for treatment. One hour later we drove to the village, a distance of not quite three miles. I lost very little time from duty, having a little brood of chickens and ducks to care for, which meant a lot of running around. The fifth day the wound was entirely healed and during the entire time there was very little swelling or pain.

I am very grateful to say that discontentment, the habit of occasional faultfinding, a quick temper, nervousness, and insomnia have all been entirely overcome. I also overcame the symptoms of Spanish influenza in less than a day, without the help of a practitioner.

My gratitude to God, the giver of all good, is unbounded not only for the physical healing but for the wonderful change Christian Science has made in our home. I am deeply grateful to Mrs. Eddy for what she has done for humanity, also to the practitioner through whose loving encouragement I have been able to remain steadfast. I am grateful for The Christian Science Journal and Sentinel. I have proved that with sincere prayer and continuous striving to do the will of God we can reap the harvest of good here and now .- (Mrs.) PEARL E. DENZ, East Aurora, N. Y.

Christian Science did not "come into my life,"-I did not understand what it is to live until it showed me. I had been able to go through high school and two years of college, it seemed, only by the exertion of a strong will, by forgoing almost all pleasures, sleeping many hours each day, and using my eyes simply when necessary. At the beginning of the third year in college I collapsed, will and all. During the seven months following, treatment in a sanitarium, a major surgical operation, the help of a nerve specialist, complete rest, and careful diet were all conscientiously tried. At the end of that time I was unable to be out of bed except for a few hours each day, unable to walk any distance, to see any one but the immediate family, or to read more than a few minutes at a time. As religious convictions of any kind were entirely lacking I got no comfort from that source, and spent most of my thought considering in what way I should prefer to die.

Christian Science had been presented to me several times but had been bitterly refused. When at last there seemed nothing else to do, I went to a practitioner, whom I told rudely that I had no faith in Christian Science and that while I wanted to be healed I had no use for his religion and would never go to church, even if I were well enough. I was healed. My college course was completed, and I was not only able to do my regular work easily, but to engage in other activities and enjoy the privilege to the full. For two years now I have been steadily employed and have not missed an hour from my work because of ill health.

Not only has Christian Science given me all the health I have, but all the religion. The church services, which I attend regularly because I want to, are a great joy and comfort, but far more is the daily healing of the selfishness, inertia, and fear which had accompanied years of physical limitation and dependence upon others, and also of pride of intellect through the realization which Christian Science alone can give, that Love and intelligence are one.

My thinking has been so regenerated and enriched in every conceivable way that I naturally feel very grateful for the knowledge that there is a rule of living which made possible alike the works of Jesus the Christ and the discovery of Christian Science by Mary Baker Eddy, and which gives us the ability to use her discovery.

(Miss) DOROTHY ROBERTS, Boston, Mass.

With deep gratitude, I corroborate the above testimony of my daughter. When she began to study Christian Science, I, who had often scoffed at it, resolved to study, too, with the idea of helping her, but have come to realize in my own experience the blessings of better thinking. An acute and painful illness was quickly healed by one absent treatment from a loving Scientist, and the old belief that a period of convalescence must follow was overcome in a few hours. Recently I cut my hand with a pruning knife and later bruised the wound. In a short time swelling appeared, followed by severe pain, while visions of blood poisoning came into my thoughts. I had important work that could not be put off, so I turned at once to a practitioner, through whose aid relief came, and the pain ceased, inflammation disappeared, and I was free from fear and able to do my part of the work promptly.

To Christian Science as taught by Mary Baker Eddy I owe the understanding that all intelligence and strength are of God, and are constantly available to all who honestly seek them. With this understanding I am able to carry forward many activities daily without fatigue and without confusion.

(Mrs.) OLIVE W. ROBERTS, Seattle, Washington.

I am very grateful for the message Christian Science has brought to me. It not only heals all diseases, but is a preventive of disease, and helps me to work out every problem that comes up for solution. Of the literature, I cannot say enough in its praise, it seems to grow more helpful all the time, also the Lesson-Sermons, which I love to study and search for the spiritual meaning. Soon after I took up the

study of Christian Science, I had trouble with my neck. The doctor said it was a goiter and that I must take electric treatments, and thus avoid an operation. I took the treatments, but the neck grew worse, and after several weeks it came to me that I was disobeying the First Commandment. I immediately discontinued the electric treatment, visited a Christian Science practitioner, and was healed, and healed forever.

My little daughter had an eruption on her face which I thought might be chicken pox, as there was an epidemic in town. I was treating her for that and she was very well, but the eruption did not disappear. A friend who was not a Scientist happened to see the child, and exclaimed, "That child hasn't chicken pox; that is ringworm. Don't you trust that to Christian Science, for my brother had it, and the doctors were one year curing it." I thought to myself that I would not like to have the child disfigured for a year, and visited a practitioner. The eruption disappeared from her face in two weeks, but there was a stubborn one in the hair which did not disappear for two months. I feel that I have great cause for rejoicing, for these and many other beautiful healings.

(Mrs.) LILLIAN I. EDWARDS, San Jose, Calif.

٠

In the fall of 1913 I took up the study of Christian Science. Prior to this, in fact all my life, I was considered a sickly person. When I became of age I married, and my troubles started regarding supply, as to whether I could make ends meet. I worried and fretted year in and year out until finally I became a physical wreck. I continued my religious teachings and tried to be a Christian; still I had a burden to carry. Finally I got to where it seemed I had a short time on earth, yet with all my worrying I was always able to meet my obligations. God was caring for me though I was blind to it.

About three months prior to coming to Christian Science I prayed daily for hours on bended knee, and after that period of time, seeing no change for the better, I prayed saying, "O Father, show me the true way." In about a week I got a telegram from my brother, who is a Christian Scientist, stating he was on his way to a neighboring town in my state, and would stop over a few days to visit me. When he arrived he said, "I have felt that you needed me and I see you do." "What can you do for me?" I asked, and he handed me the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy, and asked if I would read it, explaining how he had been healed. I said I would read it, and as I read, the thought came to me that this surely was the answer to my prayer to be shown the true way. I had been told by doctors I could not live in any other climate. After two years' study of Christian Science it seemed that all channels of supply were closed to me. This seemed to bring a dark cloud over me again despite the good Christian Science had already brought. My healing was going on physically, and although it was slow I could see improvement right along. One day I decided to go north, and then the thought came of the climate. It was December, and I feared going north at such a season, so went to a practitioner and told her my plans. She said, "If it is God's will you can and will go, and climate will not have any power over you; but if it is not God's will you will not and cannot go." I had not yet considered that it took a good deal of money to go so far with a wife and child to accompany me. After a struggle of three months I sold my house at a sacrifice, and at midnight, December 31, started for my

destination, arriving January 4, in extremely cold weather, and the following Sunday went to church in a blizzard. I had no prospect of employment and my few friends asked what possessed me to make such a trip, with no work assured. I said that I came here for work and was going to get it. I had no fear, and, after seventeen days, found a position, and from then on I had steady employment.

Supply has been more abundant since I have known more of Christian Science. I have been completely healed of five diseases, and this nearly four years ago, none of which has returned, and "I know that, whatsoever God doeth, it shall be for ever." I am very grateful for what Christian Science has done for me and for my family. My wife and child are also studying Christian Science. I am very grateful for the literature, to the practitioners who helped me through the wilderness, and to Mrs. Eddy for revealing to us this blessed truth which makes free.—T. O. Haves, Los Angeles, Calif.

With deep gratitude for the many blessings I have received in Christian Science, I corroborate the testimony of my husband. I took up the study of Christian Science to help him, and I have been healed of many ailments. I am especially grateful for the overcoming of fear of storms. My little girl is nine years old and does not know the taste of medicine. I am indeed grateful for all that Christian Science is doing for us and others.—(Mrs.) Mary Hayes.

*

Nearly six years ago I was led to this glorious truth, Christian Science, for which I had been seeking many years. I have been healed of headache, bowel disorder, inflammatory rheumatism, and other ailments. While talking to a practitioner, I was also healed of deafness in my left ear. I have better eyesight, and have been healed of sin, sorrow, grief, and worry. I am grateful to God for this glorious healing and for the spiritual understanding I have gained through the study of Christian Science. I am grateful to Mrs. Eddy, and to the practitioner for loving help and kindness, and also to the many loving friends who have helped me and are helping me daily.

Last summer, while at my son's home, I stepped out of doors and fell down heavily. I remained silent for a few minutes declaring the truth, and within a few weeks the effects of the fall were overcome. To-day I am a healthy and free woman. Christian Science has taught me to read the English language. I pray each day to express more of that Mind "which was also in Christ Jesus." I am especially grateful for the Christian Science Sentinel.

(Mrs.) Augusta E. Dobrinski, Chicago, Illinois.

٠

About 1916 I found myself afflicted with nearly everything that flesh is heir to and was given up to die by some of the leading heart specialists of New England. I had a wife and three children, one not yet a month old, who needed my support. I had tried every earthly remedy and all had failed. The outlook was indeed dark, when from somewhere the inspiration came to me to try Christian Science. That was enough. It seemed that I could not get to the telephone quickly enough to call a practitioner. I told her my story and she assured me that all would be well. On the fifteenth day my waistline shrank nine inches and the dropsical condition was entirely gone from limbs and body, and in ten days more I was a perfectly healed man and dismissed the practitioner. With joy and gratitude to the Giver of all good, and to our revered Leader, Mary Baker Eddy, I took up the study of Christian Science and

attended its services and took part in its Wednesday evening meetings. This brought forth many unpleasant experiences both at home and in social circles, but I clung to the truth. Many of my clients and former friends, however, refused to employ me, and I was forced to leave and go to a distant state and begin all over again.

Everything went well for a time, but being alone and away from church influences and absorbed with business cares, the mesmerism of materialism crept in and ere I was aware the sunlight of Truth and Love was shut out. Try as I might, I could not extricate myself. I then wrote to a practitioner for help. Everything remained dark and gloomy for about ten days, and discouragement was getting in its work. I was sitting in my office one evening after supper, trying to realize the truth. I had not yet turned the lights on and was sitting in the twilight when I commenced very slowly to repeat the "scientific statement of being" as found on page 468 of Science and Health: "There is no life, truth, intelligence, nor substance in matter." Here was a rift in the mental cloud and I caught a glimpse of God's man. "All is infinite Mind and its infinite manifestation, for God is All-in-all." The rift became greater and through it came more light and a clearer view of God's man. "Spirit is immortal Truth; matter is mortal error. Spirit is the real and eternal; matter is the unreal and temporal." Here I got a clear vision of God's man, pure and perfect. "Spirit is God, and man is His image and likeness. Therefore man is not material; he is spiritual." Here the mist entirely disappeared, the mesmerism was broken, perfect harmony reigned, and I saw God's man as I had never seen him before, pure, perfect, in God's image and likeness, standing as it were, on the mount, above the material world. I am grateful for this experience, for all that Christian Science has done and is doing for me and mine. I write this, trusting it may help some struggling one on his journey out of materiality. I am also very grateful for the privilege of membership in The Mother Church, The First Church of Christ, Scientist, in Boston.-W. C. Skaggs, London, Ky.

In the hope of helping some one who may desire to investigate Christian Science I take this opportunity of telling of my experiences with this new-old religion. About four years ago my little girl, aged three at the time, was taken ill. For two days she had a high fever, refused all food, and scarcely spoke. A children's specialist was called. He was unable to diagnose the case, but recommended that another specialist be summoned for consultation and that a trained nurse be put in charge. These suggestions were immediately complied with but no improvement resulted. The physicians frankly admitted that they did not know the cause of the illness or what to do for it.

In desperation I telephoned a Christian Science practitioner and asked for help. She at once gave the child an absent treatment and when I returned to my home, a distance of only two blocks, the little one was playing with her doll. In a few days the child was playing about as usual and enjoying normal health again. Since that time no medicine has entered our home and we have relied on Christian Science for the cure of such ailments as we have experienced, and it has never failed us. My home life is much more harmonious and my viewpoint of life brighter and happier.

I am truly grateful to Christian Science and to the wonderful woman who gave this beautiful religion to suffering humanity.—Mrs. Arthur A. Hay, Los Angeles, Calif.

Signs of the Times

["Promptness"-The Christian Science Monitor, Boston, U.S.A., Aug. 12, 1920]

Promptness is a quality on which the world sets a high value. Promptness in fulfilling orders, in arriving at work, and in meeting obligations, are demands of the business world. Steadily the world has sought, in its inventions and its works, to eliminate distance, and thus secure a higher degree of promptness in the communication and travel of its people.

Now this material promptness is often motived by the desire for personal advancement. Often, however, it is just the evidence in human affairs of that true honesty which is ever present in man because God, the source of all things, is never absent anywhere. But however manifested, promptness in itself is good, and the man in search of true advancement will desire it, study it, possess it.

He who perceives that the only real advance for men is the advance toward Mind, Principle, God, and that the secret of this advance is found in the Scriptures, and further revealed and explained by Mary Baker Eddy, the Discoverer and Founder of Christian Science, will search the Bible and the writings of Mrs. Eddy for the way toward promptness.

Preliminary to his search, the individual studies the derivation of the word prompt, from the Latin promere, to bring forth (to light), and Webster's definition of the word as "ready and quick to act as occasion demands . . . responding instantly; immediate." Pondering the bringing to light of that which already is, he recalls the rare instance of promptness in the so-called lightning calculator, who immediately gives the correct answer to a propounded mathematical problem. He reflects on how, without lapse of time, the thought is in Europe, or Alaska; on how, having in mind this or that page of a book, one's thought turns promptly and unerringly to it. The thinking man knows that for such promptness there must be a law, the understanding of which would make such incidents the constant, not the unusual, experience of man.

Seeking the law, he reads how "he spake, and it was done; he commanded, and it stood fast." And he reads of Jesus' promptness in all his works. There was a man "which had an infirmity thirty and eight years," to whom the Master said, "Rise, take up thy bed, and walk. And immediately the man was made whole, and took up his bed, and walked." And there was that perfect accord with Spirit when the disciples received Jesus into the ship, and "immediately the ship was at the land whither they went." Greater promptness than this one cannot conceive. No hesitation, no delay, no lapse of time, effect instant with right thought. And Jesus said, "He that believeth on me, the works that I do shall he do also."

Seeking the key to these words, one reads in "Science and Health with Key to the Scriptures" by Mary Baker Eddy (p. 313): "Jesus of Nazareth was the most scientific man that ever trod the globe. He plunged beneath the material surface of things, and found the spiritual cause." And on page 314: "Thus he found the eternal Ego, and proved that he and the Father were inseparable as God and His reflection or spiritual man. Our Master gained the solution of being, demonstrating the existence of but one Mind without a second or equal."

Since there is only the one Mind, the I AM, man, the image of Mind, cannot be other than promptly and spontaneously active, for he now knows by reflection what God knows. He is prompt not because the truth that God knows comes to pass only in the course of time. It is. Truth is

expressed. Then the metaphysician who accepts God, Mind, as All, and matter as necessarily nonexistent, sees why the action must be instant with the thought. If the thought is the substance of the action, and never begins nor ends, but is ever present here, with God, of course the ship must be "at the land whither they went." Promptness is of the very essence of action. It is a proof of the presence of God, whose promise of promptness reads, "And it shall come to pass, that before they call, I will answer; and while they are yet speaking, I will hear."

This divine immediacy a man must see as his goal. Having this aim, he sees that he lessens the distance between himself and his goal as he becomes more absolutely prompt in all his work. He knows that he cannot accept as valid any arguments that would justify hesitation, that would put off a task from hour to hour, or from day to day, that would excuse tardiness or indolence. So he recognizes the importance of instant decisions, instant performance of tasks in their due manner, instant execution of right intentions. He sees the primary importance of promptness in right thinking, the necessity of immediately replacing all false suggestions of discord, evil, and sloth, with the truth of God's presence and present grace reflected in His idea. And because he knows that when God said, "Let there be light," there was light, he becomes more prompt in expression, in the testimony of the single power of Principle, or Mind. His language becomes more spontaneous and inspired with the promptness promised by Jesus to his disciples, when he said to them, "Settle it therefore in your hearts, not to meditate before what ye shall answer: for I will give you a mouth and wisdom, which all your adversaries shall not be able to gainsay nor resist."

Hence, in the light of Christian Science, man must be prompt because Truth is prompt. True promptness is action instantaneous with thought, or pure, unselfed understanding of Mind's allness, which is the only activity there is. It means that one must truly be "absent from the body," and "present with the Lord." Since His presence is the only presence there is, a man cannot fail in this manifestation of "God with us." Promptness is being absolutely on time, it is the divine rhythm in which the true man moves. So Jesus' healing work was instantaneous, and so Mrs. Eddy writes on page 125 of Science and Health, of the time when "the astronomer will no longer look up to the stars,—he will look out from them upon the universe; and the florist will find his flower before its seed."

+

["After Suffrage What?"-Harvey's Weekly]

Now that equal suffrage has been secured, what next? We mean, what are the women going to do? For two generations they have been earnestly working for the ballot, and for several years they have had one of the most extensive, most thoroughly equipped, and most efficient organizations ever created, directed toward that end. Now the end has been attained; the immediate object of the campaign has been secured in the ratification of the Nineteenth Amendment. What is to be done with this superb organization? Is the great machine to be scrapped? Is the army to be disbanded? . . .

Now it is obvious that they have not yet gained their real end. They have not yet done with the ballot what they want to do with it. They have simply obtained the tools; the actual work is yet to be done. And while it may not be—though it may be—more arduous than the work of winning the franchise has been, it is certainly much more

complex, and will be much more prolonged. The one has taken fifty or sixty years, and is done for all time. The other will take not fifty or sixty years, but all time for the doing of it, at least as long as this nation exists. For it is to be both subjective and objective. Women voters are to serve their own interests, and they are also to serve the community and the state by securing a higher standard of citizenship and of government. That is the supreme purpose.

[Fear of Disease Enemy to Health-From the Milwaukee Journal]

For years from every available corner and boldly displayed in street cars, the scare ogre of some tuberculosis organization has haunted us. . . . We were frightened, and that fear was aggravated on every hand by continually renewed posters and slogans more terrible than those we had seen before.

At a banquet held during the first convention of the Wisconsin Hospital Association at the Hotel Pfister, September 17, these terrors were sent off into the emptiness from where they came. Some of the most eminent physicians in America were present, and doctor after doctor arose and shattered all the propaganda that ingenuity and time had devised.

Dr. J. W. Coon . . . said: "I admit that in our effort to combat this disease we have overshot the mark a long way. We have instilled in the public mind an unreasoning fear . . . until now that fear is playing a great part in filling our hospitals with cases of hysteria." Then came Dr. G. R. Earnst, a Chicago physician, who said such consoling things as: "We now know that there is little if any danger of tuberculosis being transmitted from one adult to another. . . . We physicians owe it to the public to eliminate this awesome dread."

[From Introduction to a Christian Science Lecture in Glen Cove, N. Y.]

I believe that down deep in our hearts we are all Truth seekers. How often, out of the midst of the hurry of business, or politics, or housekeeping, or typewriting, out of pleasure or out of grief, do hearts cry out, What does it all mean, anyway? Is this all of life? What is the real truth of things? Why is there not more love? And some of us find that Christian Science answers these questions for us, as nothing else does. It answers them so well that we are led to believe that if all the world could learn to know that more abundant life, that perfect Love that casts out fear, and that truth that makes men free, as Christian Science teaches them, and would but begin to use such knowledge in daily life, there would follow a great spiritual healing, and the world's sin and confusion and sickness would gradually give place to harmony.

International leagues of peace, welfare legislation, laws to prevent profiteering, and to stop the making of bombs, and so forth, are all good steps and checks, and help to keep the surface smooth. But the roots of war, the impulses to hatred and greed, as also the springs of fellowship and brotherhood, lie deeper than these palliatives go. The kingdom of heaven, which we all long to see appearing upon the earth, must be a growth from within. There must be a leaven at work in the mental and spiritual realms,—and Christian Science supplies such a leaven.

[From "Alcohol and Modern Health Ideals"—Address by Dr. Eugene L. Fisk, as published in The Pioneer]

I am optimist enough to believe that, regardless of the fact that evolution has done so little for the human race, man is gifted with sufficient intelligence to make him independent to a considerable degree of the evolutionary forces

that control the destiny of unreasoning animals....Already, in this country, an experiment is in progress in throwing overboard an ages-old custom supposed to be more or less necessary to the majority of our people, and already we are beginning to discern that the human race has been fooled for ages and that this custom is in fact apparently necessary for only a very limited number of pathological individuals. After all, there is nothing like evidence to settle debate, and even in the early stages of the prohibition experiment in this country quite a number of bugaboos have been laid to rest with regard to the supposed necessity of alcohol indulgence, and the supposed disasters that would follow its restriction.

[Can the Biblical Command, "Love thy Neighbor as Thyself," Be Literally Obeyed?]

The following excerpt from an article in *The Congregationalist and Advance* shows how honest is the desire of the average Christian to obey in letter and in spirit the teachings of the Bible. It also shows, however, how difficult it is for even the best-intentioned Christians to make these teachings practical in their everyday lives, unless instructed in Christian Science. Speaking of "The Law of Love" the writer of the article referred to says:—

"One expression of the old law is found in Leviticus 19:18. The love of one's neighbor is commanded explicitly here. Hatred of one's enemy is not; it did not need to be. Jesus gave the most searching command concerning the exercise of love that is to be found anywhere. There are no modifications to it. He does not say, Love your enemy if he becomes penitent and seeks your pardon. He does not impose any conditions on his commandment. He says plainly and explicitly that we are to love those who do not love us.

"This is one of those items in the Christian life which we affirm and approve in general, but which we seldom face squarely or apply concretely. But if Jesus meant what he said and if the command has any authority it applies without stopping at any barriers that we interpose. It means that the time to love the Austrians and Germans and Turks, even if we hate their sins, is now, in spite of any hardness that they may be showing. Let us look the whole situation squarely in the face. Jesus may have stressed the pointstrongly overemphasized it, in fact-in order to make it clear. But this strong emphasis does not make the command less valid or limit the range of its application. What does it mean, therefore, for Americans to love Germans now? We have suffered and all the world will suffer for a generation on account of their selfish and brutal action. Granted that they had no monopoly on the practice of selfish nationalism, their action has plunged the world in woe. If the war has taught us anything it is the futility and the crime of war. Germany could not conquer the world; the world cannot 'crush' Germany. Force and diplomacy have been tried in vain. Good will and confidence never have been fully tried. Jesus asked us to try what love would do. He was sure that it would finally conquer. He practiced it himself. Was his program a success? It is not difficult to practice love on far-off people who have done us no harm; but the disagreeable neighbor, whose faults are all so well known to us-and ours also known to him, let us not forget-and the German and the Turk! Can we love them? Can an Armenian love a Turk? Can a Frenchman love a German? Are we to indulge our hatreds? Can we trust love?"

When one turns to Christian Science with these questions the answer is at once forthcoming, and is as convincing as it is demonstrably true. In a beautifully clear and simple article entitled "Love Your Enemies," beginning on page 8 of

"Miscellaneous Writings," Mrs. Eddy says: "Who is thine enemy that thou shouldst love him? Is it a creature or a thing outside thine own creation? Can you see an enemy, except you first formulate this enemy and then look upon the object of your own conception? What is it that harms you? Can height, or depth, or any other creature separate you from the Love that is omnipresent good,—that blesses infinitely one and all?" Then on page 10 she says emphatically: "We have no enemies. Whatever envy, hatred, revenge—the most remorseless motives that govern mortal mind—whatever these try to do, shall 'work together for good to them that love God.'"

[From a Letter in John Bull, Jr., Vancouver, British Columbia, Canada]

The reply of "Zumphus" to my recent letter, in your issue of September 4, serves to prove at least how divergent are the views of mortals on the great fundamentals of religion and of human salvation. I have no reason to doubt the honesty of his motives, or that I would not feel as he does under the conditions which he relates, nevertheless I am still inclined to be governed in this matter by the results of my own observation and experience.

One naturally judges a tree by the best fruit which it produces. If some of its fruit is below the average, we know the fault is not with the tree, but with the culture or the soil. In like manner, it is not fair to judge a church or a religious movement by the poorest specimens among its members or adherents. Mrs. Eddy plainly states on page 448 of Science and Health, "It is Christian Science to do right, and nothing short of rightdoing has any claim to the name." It is unquestionable that the bulk of the membership of the Christian Science church are as sincere and upright and God-fearing as are the bulk of the membership of any other religious denomination. "The exception proves the rule" in this case as in any other. The attempt to discredit Christian Science because some of those who call themselves Christian Scientists are shown to be unworthy of the name, is not more just than it would be in the case of other organizations of which your contributor may

It may as well be understood that Christian Scientists are quite well aware of their shortcomings. While they accept the statement that God's creation is perfect, they do not claim perfection for themselves as human beings, nor can they be held accountable when the outsider assumes to do this for them. They are satisfied to say with Paul, when he wrote to the Philippians, "I do not say that I have already won the race or have already reached perfection; but I am pressing on" (Weymouth's translation). Your contributor is correct in saying that Christian Science does not regard matter as a reality, but in stating Christian Science the word reality or truth is used as denoting the absolute or eternal, not the ephemeral things of earthly existence. Christian Science takes its position in this respect because the Scriptures teach that God, the one source and substance of all true being, is Spirit, not matter: and because the product or effect of Spirit, or what has been called the "Great First Cause" must necessarily be spiritual, not material. Paul wrote, "The flesh lusteth against the Spirit, and the Spirit against the flesh: and these are contrary the one to the other," and it is self-evident that contraries do not come from the same cause or source.

It should need no argument to support the fact that good and evil, the sensual and the spiritual, do not express the same consciousness or intelligence, even as darkness and light are not equally substantial. John records, as a message

from the Christ, that "God is light, and in him is no darkness at all," which could be paraphrased thus, without affecting its meaning or application: God is Spirit, and in Him is no matter at all. It is frequently stated by others than Christian Scientists, that our age is too materialistic, but this could not be true if matter is of God, and therefore expresses divine quality and substance. I did not intend to imply that the theory that the material universe and man were made out of nothing was to be found in the Scriptures, but that this had been so taught. The universe would naturally include "the dust of the ground." One can hardly conceive with any degree of consistency, that a man formed of dust could express the glory of God. It is significant that dust was to be the food of the serpent, and in this instance, as is well known, the word serpent was used as a synonym for devil. This relates the dust man too closely to evil to be a credit to his origin and destiny.

Isaiah is not chargeable with irreverence toward God's creation when he said, "Cease ye from man, whose breath is in his nostrils;" nor the psalmist when he asked, "Shall the dust praise thee? shall it declare thy truth?" When the apostle said, "In him [God] we live, and move, and have our being," he could not have referred to the material concept of man, or he would not have said, "They that are in the flesh cannot please God." Jesus stated the case plainly when he said, "That which is born of the flesh is flesh; and that which is born of the Spirit is spirit." His teaching, that mortals must be born again before they can enter the kingdom of God, shows that a material concept of man is not included in that kingdom.

In Christian Science, matter is regarded as indicating a state of mental darkness, which will disappear as human thought is illumined with the understanding of spiritual truth. The Christian Science church, and all Christian churches, are here because of the human need of salvationnot from the things which God has made, but from the things which are not of God, and which are therefore not real or substantial. The whole purpose and method of the Christian Science movement is to overcome evil with good, and no other way of overcoming it is practical or possible. The Christian Science church is working toward the same end as are other denominations, the chief difference being that the former is basing its efforts on the absolute omnipotence and omnipresence of God, which leaves evil without actual or inherent power or presence, while other religious systems are attempting to meet evil as having intelligent and real existence. Since our purpose is the same, we can surely agree to differ in peace as to means and methods.

The charge that Christian Science is a cause of divorce is not well taken. If a husband or a wife is too intolerant to allow the other freedom of conscience, separation may follow as being thought the lesser evil under the circumstances. No human being has the moral right to dominate another in matters of religion, no matter how close may be the relationship. If mutual and loving consideration, and the concession of equal rights, are not found in the marriage relation, it is not due to Christianity but to the absence of it, whether it is named Christian Science or something else. I have no personal knowledge of such cases as are referred to, but I have met instances of family reunion, brought about by the study of Christian Science. Throughout her published writings, Mrs. Eddy deprecates the evils of which your contributor complains, as do all reputable Christian Scientists.

Let me add by way of correction and information that Mrs. Eddy provided for marriage among Christian Scientists

in requiring that this ceremony be performed by a clergyman. Your contributor should know that Christian Scientists are not legally empowered to perform this service. He is also mistaken in saying that Christian Scientists do not perform the burial service, when the necessity occurs. Christian Science is not "visionary," as that word is ordinarily used, except in so far as spiritual teaching is visionary to the materialist. "The hour cometh, and now is," said Jesus, "when the true worshippers shall worship the Father in spirit and in truth."

[From Galesburg (Ill.) Mail]

Condemned in debate as designed to prevent Christian Science healing, a proposal which would require all doctors or healers to pass a uniform state examination was killed in the constitutional convention to-day, fifty-seven to nine. Scores of petitioners from all parts of the state urged the action taken.

[From The Freeman]

What an intolerable deal of distortion would be corrected if the socialist had to sit up diligently o' nights with the capitalist, and forsaking all others, cleave only unto him, so long as they both should misunderstand one another. The capitalist might get-he could not help getting-a great deal of digestible information which he does not now possess about the economics of his own function. The socialist might in time, for his part, learn what capital is, and its function, and enlarge his idea about the legitimacy of both. Suppose the radical, especially the radical of a theoretical and literary turn-like ourselves, for example-should close-herd for a term with the thoughtful and pragmatic man of business; how much of fundamental social theory the business man would learn, and how the radical, "impatient for the larger scope," would gain respect for the practical difficulties that beset his program, and make progress in wisdom and patience. . . . Let the radical and the tory take one another to heart, sympathetically hear one another's troubles, and each discovers that things are going ever so much more his way than he thought they were, and he is correspondingly heartened and stimulated; and really the resultant view of the world is in each case more nearly

[From The Boston (Mass.) Evening Transcript, Oct. 9, 1920]

There are not many saints on our earth of the first rank in genius. But some of our teachers are always telling us, who have our own genius yet to prove, to imitate them. "Imitate the saints!" "Pick out the best Christian you know and do as you see him do!" That, I say, is a mistake and a misleading counsel for us in our weakness. We are not stencil plates to multiply another man's pattern of righteousness over and over again. We are living and growing men, and our religion in order to be valid in the highest way must become an expression of our own individual life and thought. Not imitation but obedience is the word of power. It is so much easier to copy the weakness than the strength of a saint, his mannerisms rather than his originalities, that we are in danger when we imitate. There is a far better chance that we may become great in religion than in art because the requirements of greatness in human character are so simple. But they require that we should look at love and duty with our own eyes and that the needs and people of our own time and neighborhood should be as real for us as they were, for instance, to Francis of Assisi or to Florence Nightingale or to Edith Cavell in their own day. Genuine simplicity and direct seeing wonderfully clear the eyesight everywhere.

We make or mar the pattern of our own lives, no doubt.

And that is responsibility enough for the strongest of us. But is there an ideal for human life and a Pattern-maker behind it who is to our work as the great artist to the pupils and assistants of his studio, who would guide and help us if we would but put our life in touch with His inspiration and His teaching? If so, and I for one have not the slightest doubt of His presence and His interest, with what keen interest and patience must He watch that pattern grow. I do not say-I do not think-that God is a mere onlooker. But even a father may take pleasure in seeing how his sons respond to his teaching and desire. And we are told that He sees the end from the beginning. That vision of the end is not for us. But we may believe in it and look forward to it and let our hearts go out toward it. For we are the helpers in God's work. This is no aimless life which we are living. We also in our little measure are makers of designs, not daubers of mere blotches of color on the wall. If we shape carefully what we do and make, at last the Great Designer will transform into the pattern of His own thought our poor arrangement and make a picture of it which shall be worthy of our immortality.

[From Zion's Herald]

All this, however—the reading of the gospel of the day in Italian, and the use of the leaflets that follow the reader—does not mean that the Bible Society, the Bible Mission, and other agencies for the distribution of the Bible in Rome is any more approved by the Vatican. Still adheres the old label that these agencies are "pests." Still the open Bible that we hold dear is not in favor. La Biblia in Italia is not free. The worshiper who at low mass follows the reader with our Bible as he reads in the vernacular, is struck with the lack of similarity between what he holds in his hand and that which he hears from the priest's lips. A worshiper with the Diodati (Protestant) version in his hand at mass would be persona non grata.

It is safe to say, however, that few having the Protestant version of the gospels care to go and hear the priest read his version. Meantime the entrance of the Protestant Word goes forward heartily. Returning emigrants are bringing it from the United States, and the Bible societies are having a circulation that shows a remarkable increase. In the last year the British and Foreign Bible Society alone circulated no less than 173,888 copies, an increase of more than 45,000 copies over the circulation of the previous year. The increase is accounted for by the fact that more people are eager to read the Scriptures, and in spite of political passion and in consonance with the revival of industry.

[What Is the Source of Wealth?]

Very frequently to-day we hear that "labor is the source of wealth." In support of this statement it is said that without the sheer physical toil of many thousands of workers in industry and agriculture there could be no capital, or wealth. It is objected to this claim by many so-called "brain workers" that it rests on a purely materialistic theory of life, which, if adhered to consistently, would result in the complete exaltation of muscle at the expense of brain. They proceed to show that what they call ability is the real source of wealth. An exposition of this point of view occurs in a recent article in the Manufacturers Record, which says in part:—

"It would be an interesting thing to find the answer to this question, 'What does land contribute to the annual income of the nation?' What does labor contribute? What does the 'canned and preserved' labor of yesterday, named

capital, contribute? And finally, what does ability contribute? Now, the land between the Atlantic and the Pacific is a fixed quantity, and it cannot be increased except here and there by deeper plowing. The labor also is a fixed quantity that can be doubled only once in forty years through immigration and the birth rate. Capital is a little more flexible, and great care can double it in from twelve to fifteen years. But ability is flexible to the last degree. Burbank with his associates and followers has increased enormously the food product; Sawyer and Edison with the electric bulb have added perhaps an hour or two hours to each man's day. . . . It is the directing mind of a general that organizes a campaign. It is a directing mind in literature that organizes a hundred thousand words into a 'Hamlet' or 'Principia.' It is the directing mind that takes thousands of tiny pieces of steel and organizes them into a wonderful whole, named an airplane, a loom, a cash register, or a Diesel engine. . . . If labor creates all wealth, why do not Lenine's factories go on? The sun shines over Moscow, the rain still falls, the earth is in its place, the coal still burns, the iron when hot meltswhat does Trotsky lack?

The metaphysician, disciplined by Christian Science, knows that what Trotsky or any one else needs is not human ability, but the understanding of Principle, the only "directing" Mind, which is the source alike of the capacity to work, or to be active, and the capacity to think.

Church Notices

4 4 4

BOSTON, MASS.—The First Church of Christ, Scientist. Sunday services, 10:45 a.m. and 7:30 p.m.; Sunday school, 10.45 a.m.; Wednesday evening meeting, 7:30 p.m., in the church edifice, Norway, Falmouth, and St. Paul Streets. The church is open to visitors Wednesdays and Fridays from 10 a.m. to 5 p.m.

Reading rooms: Little Building, corner of Tremont and Boylston Streets (fourth floor); open daily, except Sunday and Wednesday, from 9 a.m. to 9 p.m., and on Wednesday from 9 a.m. to 5 p.m. National Union Bank Building (seventh floor), 209 Washington Street, opposite old State House; open daily, except Sunday, from 9 a.m. to 5.30 p.m. Coolidge Corner Building, 1316 Beacon Street, Brookline; open daily, except Sunday, from 9 a.m. to 6 p.m.

From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,-The Mother Church,-printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to CHARLES E. Jarvis, Clerk, 236 Huntington Avenue, Boston 17, Massachusetts.

From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account,

the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address. Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to EDWARD L. RIPLEY, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

Announcements

From The Christian Science Publishing Society

New Morocco Bound Vest Pocket Edition of the Textbook

Announcement is made of the publication of a new, morocco bound, vest pocket edition of "Science and Health with Key to the Scriptures," by Mary Baker Eddy.

This small volume, 3 1-16 by 4 5-16 inches, the same in size as issued for soldiers and sailors during the war, is bound in black morocco, limp, leather lined cover, round corners, gilt edges. Price \$3.50 for single copy and when included in lots of twelve or more copies of Science and Health in any or all bindings, \$3.25 each.

Orders for this edition will be filled in rotation.

Vest Pocket Bible

The Bible, bound in morocco, uniform in style with the vest pocket edition of Science and Health, is now on sale at \$4.75 a copy. Order by number 08X. Reading room discount 10 per cent.

New Pamphlets

Advance information will in future be given two weeks before each new pamphlet is placed on sale. This will replace the former system of standing orders.

New Pamphlets in German

There is now on sale a new German pamphlet entitled "Ein stilles, sanftes Sausen" ("A still small voice") containing the following articles reprinted from the Christian Science periodicals with alternate pages in English: "'The secret place of the most High,'" "Never too Late for Healing," "Treatment," "Cause and

There is also on sale a new German pamphlet entitled Läuterung (Purification) containing the following articles reprinted from The Christian Science Monitor with alternate pages in English: "Lusting Against Lust," "The Lust of Money," "The Lust of Power," "Looking Ahead," "Sincerity."

Price of each of the above pamphlets 5 cents a copy. Reading room discount 20 per cent.

"Rudimental Divine Science" for the Blind In English Braille

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U.S.A.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U.S.A.

*** * *** Articles and Testimonies

Available articles from Christian Scientists and good testimonies from those healed by Christian Science are always welcomed for consideration by the Editors. Manuscripts for publication in the Sentinel and Journal, whether articles, poems, or testimonies, and correspondence relating thereto, should not be addressed to individuals, but to the EDITORIAL DEPARTMENT, THE CHRISTIAN SCIENCE PUB-LISHING SOCIETY, Boston 17, U.S.A.

Letters of Appreciation

Many letters of appreciation of THE CHRISTIAN SCIENCE MONITOR and other Christian Science activities are constantly being received. These letters express what these activities mean to different individuals in various occupations and pursuits. The favorable comment that has been received on those already published indicates that they are welcome and helpful; therefore others will be published under the above heading. Extracts from such letters follow:

AST year I covered twenty-four states and never missed a single copy of THE CHRISTIAN SCIENCE MONITOR, which I was able to buy, as Love guided me daily through my extensive journey. Prior to making the Monitor my bosom friend I read other dailies, but soon learned that "an ounce of prevention is worth a pound of cure." Thus as a man "thinketh in his heart, so is he." I read and then thought materially, and consequently suffered materially; now I am free, happy, and grateful for the truth which flows from our periodicals. As always, these messengers of purity are no respecters of persons, for we know the truth abides unchangeable for all time, whether we accept or reject it in whole or in part.

M Y daughter is studying in the city of ——— and because of the excellent treatment of world news in The Christian Science Monitor she has expressed a desire that it be sent her for use in her English study. May I also take this occasion to express my appreciation of the Monitor. My time seems so fully occupied that often I do not see the paper until I reach home at night; but I find the articles so very well written and the subjects so fully covered that nearly every night, even after retiring, I am able, by the aid of a reading lamp on my bed, to get a vast amount of information from your paper. article on the Home Forum Page has frequently been a source of much inspiration to me.

WORKS ON CHRISTIAN SCIENCE

Written by MARY BAKER EDDY, Discoverer and Founder

of Christian Science and Author of its Textbook

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. Clock, one to eleven copies inclusive (cloth only), each \$3.00; twelve or more, each \$2.75. Ooze leather, vest pocket size, single copy \$3.00; twelve or more, each \$2.75. Morocco, vest pocket size, single copy \$3.50; twelve or more, each \$3.25. Fu'l leather, stiff, beveled boards, gilt edges, same peper as in cloth binding, single copy \$4.00; twelve or more, each \$4.75. Morocco, limp, roun i corners, git edges, Oxford India Bible paper, convenient for po ket, single copy \$5.00; twelve or more, each \$4.75. Levant, divinity circuit, leather haed to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book), single copy \$6.00; twelve or more, each \$5.75. Large Type Edition, designed especially for the use of First Readers. Large type (18-point) on Oxford India Bible paper, bound in leather. Size 8 by 10% inches. Single copy 87.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

FRENCH TRANSLATION. Alternate pages of English and French. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket calcion, printed on Oxford India Bible paper. Moro co, one to five copies inclusive, \$5.50; six or more, each \$5.25. Orders for the French translation in lots of six or more may include both bindings.

German Teanslation. Alternate pages of English and German. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each \$5.50; six or more, each \$5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, French, and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in The Christian Science Journal from 1883 to 1896, with revisions and additions. Cloth, single copy \$2.25; twelve or more, each, \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; twelve or more, each \$3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy \$5.00; twelve or more, each \$4.75. Orders for Miscelianeous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 366 pages, containing articles published in The Christian Science Journal and Sentinel, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy \$2.25; six or more, each \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; six or more, each \$3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy \$5.00; six or more, each \$4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy \$6.00; six or more, each \$5.50.

Christ and Christmas. An illustrated poem. Cloth, single copy \$3.00; six or more, each \$2.50. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Unity of Good and Other Writings. One volume, containing Unity of Good, Rudimental Divine Science, No and Yes. Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Christian Healing and Other Writings. One volume. containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science versus Pantheism, Messeges of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Moro-co, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy \$1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy \$2.00; six or more, each \$1.75.

Genman Thanslation. Alternate pages of English and German.

Cloth, single copy \$1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy \$1.00; six or more, each 75 cents.

Unity of Good. This book lays the ax at the root of error. elucidating and enforcing practical Christian Science, thus affording inval-uable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy \$1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edicon, cloth, 90 pages, single copy \$1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, alias Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point, American Braille, and English Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Rudimental Divine Science and No and Yes. In one volume, French translation, with alternate pages of English, vest pecket size. Blue cloth, gray edges, single copy \$1.25; six or more, \$1.10; blue hather, gray edges, single copy \$2.00; six or more, \$1.75 each.

Messages to The Mother Church. volume, 94 pages, Christian Science versus Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy \$1.50; six or more, each \$1.15.

Christian Science versus Pantheism. Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more,

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, merbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy \$1.50; six or more, each \$1.25. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

NUMBER 13

Thanksgiving Proclamation

 $T^{
m HE}$ season approaches when it behooves us to turn from the distractions and preoccupations of our daily life that we may contemplate the mercies which have been vouchsafed to us and render heartfelt and unfeigned thanks unto God for His manifold goodness. This is an old observance of the American people, deeply imbedded in our thought and habit. The burdens and the stresses of life have their own insistence. We have abundant cause for thanksgiving. The lesions of the war are rapidly healing. The great army of freemen, which America sent to the defense of liberty, returning to the grateful embrace of the nation, has resumed the useful pursuits of peace, as simply and as promptly as it rushed to arms in obedience to the country's call. The equal justice of our laws has received steady vindication in the support of a lawabiding people against various and sinister attacks, which have reflected only the baser agitations of war, now happily passing. In plenty, security and peace, our virtuous and self-reliant people face the future, its duties and its opportunities. May we have vision to discern our duties; the strength, both of hand and resolve, to discharge them; and the soundness of heart to realize that the truest opportunities are those of service. In a spirit, then, of devotion and stewardship, we should give thanks in our hearts, and dedicate ourselves to the service of God's merciful and loving purposes to

Wherefore, I, Woodrow Wilson, President of the United States of America, do hereby designate Thursday, the twenty-fifth day of November next, as a day of thanksgiving and prayer, and I call upon my countrymen to cease from their ordinary tasks and avocations on that day, giving it up to the remembrance of God and His blessings and their dutiful and grateful acknowledgment.

In witness whereof, I have hereunto set my hand and caused the Seal of the United States to be affixed.

Done in the District of Columbia this twelfth day of November, in the year of our Lord one thousand nine hundred and twenty, and of the independence of the United States the one hundred and forty-fifth.

By the President:

(Signed) Woodrow Wilson. (Signed) Bainbridge Colby, Secretary of State.

Knowing God

JOHN B. WILLIS

He who accepts the teaching of Scripture that God is the Alpha and Omega of being, the only cause and creator, is prepared to accept the logic and naturalness of the Master's statement that to know God is eternal life. True consciousness can be explained only upon the assumption that God is constantly expressing Himself in and through man, and our awakening to this concept marks the beginning of our escape from the thrall of belief in organic life. This awakening is the dawn of spiritual day, it is the fulfillment in each one of us

of that ancient Scripture word, "And God said, Let there be light: and there was light."

In Christ Jesus this white light of revelation broke out in all its effulgence, and yet he taught us of the treasures of truth we were to find not only in him and in the wisdom of the wise, the teaching of the prophets and seers, but in the little as well as the larger events of everyday experience. As he certainly intimated, the sparrow and the wayside flower may make God's nature the better known to us, if we are but childlike and humble enough to be responsive to their speech, and this teaching appears again and again in Mrs. Eddy's writings, as when she declares that "the floral apostles are hieroglyphs of Deity" (Science and Health, p. 240). It is clear that, when rightly understood, all things are to be ours, as Paul declared. They are to yield us an enlarged and enriched sense of the greatness, the goodness, and the active nearness of God.

All this is quite in keeping with the fact that we usually gain the larger through the many lesser things; we reach the absolute through the concrete. As the sun is brought nigh in a thousand dewdrops and all the other sunlit things about us, so the nature of God is disclosed in the unnumbered reflections which, in the present imperfect state of our spiritual perception, may the more appealingly objectify the divine wisdom and beauty and bring us into closer touch with Him. A mother's love, a father's integrity, a friend's unselfishness, the nobility of character and the refinement of thought revealed in the lives of great men and in the pages of great books, especially in the songs of the great poets,—these all may bring us higher, finer concepts of the ideality of Him who has been expressed in some degree in all the good, the beautiful, and the true that is or ever was.

Spiritual understanding is thus manifested in discernment, and it alone supplies a basis for that correct estimate of values which is essential to what Christ Jesus called "righteous judgment." This discovery of the glimpses of God found here, there, and everywhere, as we companion with the prophets and moralists, the saints and sages of the past, can but beget a sense of grateful indebtedness to them. Like quicksilver, spiritually alert and discriminating thought is able to gather up and assimilate the grains of gold found imbedded in all great literatures and in all heroic lives, and this renders acquaintance with the foremost thinkers and the leading events of the past distinctly worth while the moment we are able to separate the chaff from the wheat, and thus enter into the larger and fuller inheritance of good.

The significance and need of this corrective and selective insight are the more apparent when we are face to face with some appealing aspect of so-called nature, such as the heart of a rose, the face of a little child, the cumulus drifts of the skyland on a summer's day, or the emblazonries of the New England hills when autumn is whispering its last call to the leaves. One is often almost startled by the strength of the tide of feeling created by these visions of beauty. Conscious of spiritual uplift, he is impelled to bare the head as if sensible of a great, undefined presence,—and yet he recognizes

Copright, 1920, by The Christian Science Publishing Society, Falmouth and St. Paul Streets, Boston, Massachusetts. Entered at Boston post office as second-class matter. Acceptance for mailing at a special rate of postage provided for in section 1103, Act of October 3, 1917, authorized on July 11, 1918.

the material order, and may be troubled by his seemingly instinctive response thereto. Jesus said, "Consider the lilies how they grow," but was it to a material wonder simply that he thus directed attention? Are we to find the handiwork of God, the evidence of His presence and power, through the study of a material manifestation however marvelous?

Here we need to remember that consciousness always contains a factor of spiritual capacity, a susceptibility to spiritual appeal which grounds the possibility and assurance of its redemption through Christ. "Beauty," writes Mrs. Eddy, "is a thing of life, which dwells forever in the eternal Mind and reflects the charms of His goodness in expression, form, outline, and color" (Science and Health, p. 247). And on page 310 of the same book she says, "Thought will finally be understood and seen in all form, substance, and color, but without material accompaniments." This discrimination between the intrusive concepts which material sense has projected, and the revelations of a beauty which despite this material handicap speaks for the activities of spiritual intelligence,—it is this which enables one to see that, rightly interpreted, these daily experiences in touch with nature may bring us increase of the knowledge of God; that spiritual discernment is the key to His kingdom, and that without the activity of Truth in us is "not any thing made that was made," for thus alone does true being appear.

From all this it becomes quite clear that the attitude of the spiritually impelled toward nature and toward life, is quickened, made alert by the realization that by virtue of inspiration and insight they have become equipped as prospectors, and at any moment may come upon the redolent footprints of Truth. This is not true of physical scientists, nor of artists and poets, in so far as they are content with materialistic philosophy. Speaking of a "flower in the crannied wall" Tennyson wrote,

... If I could understand What you are, root and all, and all in all, I should know what God and man is.

This is splendidly suggestive, and yet this great poet was lacking in that spiritual inquiry and discernment which gave the flavor of a psalm to so much of Wordsworth's verse. The nature in which the "Gentleman of Rydal" reveled, as one of his critics has said, is that "known by simple observation and interpreted by religious and sympathetic intuition." Only the idealistic thought of God and of His universe, including man, can supply the basis of, and stimulus to, that spiritual quest which always forecasts ascension. Something of intuition must always enter into our discernment of the real values of nature and of experience, and this intuitive right concept of the nature of real being is presented in the teaching of Christian Science, which recognizes and declares that the Father is ever imparting Himself to His child and hence that the more direct knowledge of God is to be gained through intuitive perception. Here is the most inspiring possibility and privilege of which one can conceive, and it is seen that our answer back to God in right concepts of truth completes the communion of at-one-ment. Socrates seems to have apprehended something of this when he voiced the thought that nothing makes a thing beautiful but the presence and participation of beauty in the beholder.

How wonderful the remembrance just here, that the relation between God and man is wholly unique, so that we can know Him as we can know no other. In human experience we communicate with each other through symbols. Something is done by one which can be seen or heard by another, and this signaling back and forth is more or less perfectly interpreted. A given sound or a series of marks awakens

a thought in the one who receives it, which is more or less identical with the thought of the sender, and by this roundabout process we get into touch with each other and establish a mental commerce. But God's thoughts may be communicated to the spiritually aspiring, to all of us in so far as we are receptive to truth, without the mechanism of signals or symbols, and this both effects and explains inspiration. In the chamber of right consciousness, "the house of the Lord," we may intuitively receive the Word of God and know for ourselves His will. How inspiringly and helpfully near this brings Him! The Comforter, said the Master, "shall teach you all things." Surely this is the acme of Christian experience, the secret of equipment for spiritual efficiency. To know God, and to know that we know Him, through the demonstration of His healing and saving presence here and now, -this is the supreme achievement, and to this each one of us is called in Christian Science.

The Mission of the Christian Science Reading Rooms

BEATRICE SESSIONS

IKE every activity in the movement, the mission of the Christian Science reading rooms should be scientifically understood if that mission is to be fruitfully fulfilled. The Christian Science reading room, as understood by the writer, was instituted by Mrs. Eddy and forms part of the activities of the Christian Science movement, and, like every branch of the work in our beloved cause, is an inspiration. Metaphysically the idea of God, the emanation of divine Mind, is the true Christian Science reading room, and no more consists of a material structure of brick or stone than does Church, which Mrs. Eddy defines on page 583 of Science and Health thus: "The structure of Truth and Love; whatever rests upon and proceeds from divine Principle. The Church is that institution, which affords proof of its utility and is found elevating the race, rousing the dormant understanding from material beliefs to the apprehension of spiritual ideas and the demonstration of divine Science, thereby casting out devils, or error, and healing the sick." The most that can be said for the brick and mortar phase of a reading room is that, like a church edifice, it represents a token of the members' gratitude for benefits derived from Christian Science.

Primarily, the rooms afford an opportunity for the public to acquaint themselves with Christian Science. They do not labor for profit as the world labors. Their profit is not in sterling or dollars. When the half year or the year ends, and there is an accounting of the stock and the receipts and expenditure, the significance of the figures is lost sight of if they only mean so much money received or expended. If a church's gift is limited in any way, it is only because of a limited view or understanding of Mind as the source of infinite good. Therefore, the profit of a Christian Science reading room is not reckoned in dollars or pounds or francs or roubles, but in the healing which is brought to mankind; for its supreme mission is to heal.

Those who are already participating in that priceless gift which the discovery of Christian Science has given them, realize its value and the magnitude of the opportunity the rooms are placing before the public. The world to-day is in need of the healing mission of Christian Science as it never was before, and to the world's cry for bread the rooms do not offer a stone. Jesus said nineteen centuries ago, "Come unto me, all ye that labour and are heavy laden, and I will give you rest," and again, "Not as the world giveth, give I unto you." These words accurately describe the attitude of the

rooms to the public. They certainly offer rest and peace, though different to the world's conception of peace and rest, for it is a permanent peace.

The members of a branch church supporting a reading room can help by the liveliness of their interest,—and their responsibility in this respect is undoubted,—but the main privilege, of course, devolves upon those in charge of the rooms, and their chief aim should be to have, above everything, a clear perception of the meaning and significance of their mission. The more the subject is studied in the light of Christian Science, the more apparent and insistent is the demand for consecration and elimination of self. If the librarian believes he or she governs the work in the reading rooms, harmony flies out at the door and the public are noticeably less interested in what the rooms have to offer.

Although nothing can stay the divine mission of the reading rooms, the human belief in evil is "going to and fro" and "walking up and down," seeking to check the spread of the Science of Christianity. If one is watchful and honest, the work must proceed apace. Finding much joy himself in the study of the works of Mrs. Eddy, the librarian insistently refers inquirers to the textbook and enjoins its earnest study. He discovers that his work is to point out that the aim of the rooms is to further the study of the literature, and in season and out of season he is working to that end.

It will develop, also, that the easier way to answer an inquirer does not always lie along the path of personal instruction. The most effectual answer is always to be found in study in the rooms, his own experience convinces him; and while always ready to extend sympathy and interest to those who enter, he invariably finds that a period of meditative study in the rooms will far more certainly rivet the inquirer's attention and satisfy the question than will personal instruction.

Of the many who enter the rooms there are some who never heard of Christian Science before they read the name on the door or saw the literature displayed in the window, and sometimes they are hardly able to formulate a reason for entering. Some of them are weighed down under some heavy burden of sorrow or sickness, and are in search of a something they are often unable to define. To the newly appointed librarian it may almost seem an impossible task to fill the need of such a hungering multitude, and so it is impossible if the librarian is laboring under the belief that he personally is going to do any of the filling of that need. His business is to stand aside in the full understanding of what the reading room stands for and conscious that the mission of the rooms must be accomplished. In any question which he answers let him do so with all attention fixed to receive the message of Principle. Let him have such a clear perception of God's goodness and providence, such an affection for Truth, that he will exercise the greatest care that the message which the rooms have to give shall not be tainted or tinged with anything of his own personal sense or opinion. If he really understands something of Truth, he sees one thing clearly above all others, and that is, that the Bible and the writings of Mrs. Eddy lead more certainly than anything else to that perfect understanding of God which heals the sick.

Christian Science reading rooms are a living witness of the presence of the Christ, that is, Emmanuel, which is "God with us," and so we should be prepared to have the rooms always thronged with people in eager search of what the revelation of Truth is imparting to mankind. The demand for the truth is already in the world and that demand is insistent, unquenchable, and will be satisfied with nothing but Truth. Its volume is overwhelming, for our Father is not reluctant to give or inspire, and if we have the Christ-vision

even in a slight degree there will be no lack in the activity of the reading rooms, for humanity is speedily approaching, if it has not already reached, that point where as one vast whole it is wanting, above everything else, the truth which the Bible and the writings of Mary Baker Eddy reveal.

Selling One's Birthright

EARL R. BROWN

BIRTHRIGHT, as explained in the dictionary, is "any right or privilege to which a person is entitled by birth." The question arises, How does Christian Science explain birth? On page 17 of "Miscellaneous Writings," Mrs. Eddy says, "A material or human birth is the appearing of a mortal, not the immortal man." In the following paragraph she continues, "With the spiritual birth, man's primitive, sinless, spiritual existence dawns on human thought,-through the travail of mortal mind, hope deferred, the perishing pleasure and accumulating pains of sense,-by which one loses himself as matter, and gains a truer sense of Spirit and spiritual man." With this interpretation, it is easy to understand Jesus' admonition, "Verily, verily, I say unto thee, Except a man be born again, he cannot see the kingdom of God." Then, it necessarily follows, one's birthright is the kingdom of God, and comes to him in proportion as he is "born again." "The new birth is not the work of a moment," Mrs. Eddy states in "Miscellaneous Writings" (p. 15). "It begins with moments, and goes on with years; moments of surrender to God, of childlike trust and joyful adoption of good; moments of self-abnegation, self-consecration, heavenborn hope, and spiritual love. Time may commence, but it cannot complete, the new birth: eternity does this; for progress is the law of infinity."

In the twenty-fifth chapter of Genesis there is a valuable lesson about Esau selling his birthright to his brother Jacob for a bowl of pottage. The bowl of pottage might be likened to "the things which are seen," which Paul declares "are temporal," and one's true birthright to "the things which are not seen," which, he continues, "are eternal." Like Esau, who sold his birthright for a temporary satisfaction of material appetite, we are tempted to overlook the sacrifice we are making by giving up our birthright. We might ask ourselves, in our eagerness to attain something: Am I doing all I can to help prove the kingdom of God here and now? Am I giving encouragement to those in need, and supporting the cause of God under all circumstances? Or am I selling my birthright for a mere bowl of pottage? Let us be careful and weigh each word, each move, each action, so that we shall not become a stumblingblock to our fellow man; let us "prove all things; hold fast that which is good."

Our seeming existence here is like one rowing a boat upstream to a promised prize—peace, contentment, plenty. The prize is for all who row the required distance. The second we stop rowing we begin to drift back, and we must cover the distance again if we would reach our goal. We cannot reach the goal blindfolded, for there might be a floating log or a derelict or a protruding rock or rapids to be passed, and we need to put more exertion into our strokes. The temptation may come to stop and drift back to our starting point; but that would never do, for we would never reach the prize, and it would be a poor example to set to our friends who are rowing the same course. We would not want to cause them to turn back because we may think the goal too hard for ourselves to reach.

In the fourth chapter of Matthew we find that Jesus refused to sell his birthright. After fasting for forty days and nights he was tempted to turn the stones to bread; but knowing his true supply he said, "It is written, Man shall not live by bread alone, but by every word that proceedeth out of the mouth of God." He knew but one birthright and nothing could persuade him to give up all that he had for a mere bowl of pottage.

Stars

MILLICENT L. SEARS

THE stars for many years have attracted me. As long ago as 1900 I began to study astronomy by myself until I became familiar with the names and movements of the majority of the stars and constellations, and was groping for some meaning in the great spaces beyond them. It was not astronomy, however, but Christian Science, which taught me to look through them and beyond them, and to recognize the Principle of the universe, the infinite power which held the wind in His grasp and controlled the sweet influence of the Pleiades and governed Arcturus with his sons. Then the material universe and celestial bodies became only a faint symbol of the spiritual universe of God's creating, even as Mrs. Eddy says in "Science and Health with Key to the Scriptures" (p. 240), "Arctic regions, sunny tropics, giant hills, winged winds, mighty billows, verdant vales, festive flowers, and glorious heavens,—all point to Mind, the spiritual intelligence they reflect."

About a year ago I read in The Christian Science Monitor an article on astronomy which described a star that appeared in 1901 as a nova, or new star, but which was known to have existed before and which could plainly be located now. Careful calculations reported that its distance from the earth was so great that it took three hundred and fifty years for its light to reach us, so that it had really appeared in 1656 as we saw it in 1906. The study of this star was like a vivid illustration of the history of that spiritual star of Truth whose effulgent light this century is beginning to enjoy. The light and warmth and healing of God, good, has always been in existence, but the world was not conscious of it in definite form until "the wakeful shepherds" of whom Mrs. Eddy speaks on page vii of the Preface to Science and Health, beheld "the first faint morning beams" which led to the Bethlehem babe "who would make plain to benighted understanding the way of salvation." To quote the passage in full: "The wakeful shepherd beholds the first faint morning beams, ere cometh the full radiance of a risen day. So shone the pale star to the prophet-shepherds; yet it traversed the night, and came where, in cradled obscurity, lay the Bethlehem babe, the human herald of Christ, Truth, who would make plain to benighted understanding the way of salvation through Christ Jesus, till across a night of error should dawn the morning beams and shine the guiding star of being. The Wisemen were led to behold and to follow this daystar of divine Science, lighting the way to eternal harmony."

The spiritual light shone upon a waiting world and brought health and healing in its path. For three hundred years, so history tells us, this healing of all manner of sickness and all manner of disease was a concomitant of Christianity, an essential element, a natural proof of its genuineness. Then came the temporary eclipse of this light, and for centuries the eyes of the world were blinded and they did not perceive the truth. It was in the world, but the world knew it not. Then, like the star which reappeared in our celestial heavens after many years of darkness, this light of Truth was one day rediscovered, and a faithful searcher of the spiritual heavens caught with her penetrating

gaze the sight of that lost element of Christian healing. Just as the nova was first found by one scanning the skies who had studied and known all the stars that were regularly visible in the sky and so could quickly recognize the new, so was the return of that light which Jesus had once before pointed out to the world recognized, in her own healing through prayer, by Mrs. Eddy, who had been studying life with the Bible as her chart, and had sounded the depths of prevalent theories.

In my own experience, Christian Science appeared as a rising star of hope upon the darkened night of a broken and unhappy life, when, in 1903, I was lifted out of what threatened to be an invalidism to which I had been consigned just when a promising future began to beckon me. Turning my eyes toward this "daystar of divine Science," and following its beneficent rays, I was led into years of activity and health and protection from evil. It next lighted my path so that I was able to see my way step by step through poverty and hunger and lack. Relying on Christian Science I came through this experience happily and was led out of it into prosperity and success and "fulness of joy." Nothing could be better than following Emerson's advice to "hitch your wagon to a star" when that star is Christian Science.

Through a study of Science and Health I am coming to understand something of what is meant in the twelfth chapter of Revelation, by the woman who has "upon her head a crown of twelve stars," which is explained on page 562 of Science and Health, where Mrs. Eddy says: "The spiritual idea is crowned with twelve stars. The twelve tribes of Israel with all mortals,—separated by belief from man's divine origin and the true idea,—will through much tribulation yield to the activities of the divine Principle of man in the harmony of Science. These are the stars in the crown of rejoicing. They are the lamps in the spiritual heavens of the age, which show the workings of the spiritual idea by healing the sick and the sinning, and by manifesting the light which shines 'unto the perfect day' as the night of materialism wanes."

Thus already in the seventeen years since Christian Science first came into my life I have been able to analyze and specify several distinct lines of blessing from its rays. In its first touch came physical healing and health and joy. The next study brought release from poverty, The next ray shed light on the Scriptures and I began to see the meaning in the Bible. Education, brotherly kindness, and peace I have found in it. And these, as I know, are but the beginnings of that infinite goodness which these foretell. Soon we shall learn to look out spiritually upon God's goodness just as Mrs. Eddy prophesies (Science and Health, p. 125), "The astronomer will no longer look up to the stars,—he will look out from them upon the universe; and the florist will find his flower before its seed."

"Give ye them to eat"

CONSTANCE L. JOHNSTONE

HOW often one is tempted, as a beginner in Christian Science, when asked for help, to be afraid that one's understanding is not sufficient, and to say, "I know so little; what can I do?" In reading the fourteenth chapter of Matthew, where Jesus fed the multitude with five loaves and two fishes, a beautiful lesson was unfolded to me which I would like to pass on, to help some one else, for there seemed in it to me a very clear command from Jesus, not only to his disciples then but to all who are his disciples now:

"Give ye them to eat." The disciples were overwhelmed at the multitude, and asked Jesus to send the people away to the villages, the five loaves and two fishes seeming as nothing amongst so many. They were accepting the mortal picture, with all its limitations. How instantaneously Jesus corrected and healed that belief of lack, when he said, "They need not depart; give ye them to eat"! and looking up to heaven, he blessed and brake what food there was, and they did all eat and were filled, and gathered of the fragments twelve basketfuls. If when asked for help, one accepts the mortal picture as the disciples did, seeing only one's lack of food (understanding), he will not be holding up the Christ in consciousness, as Jesus did, neither will he be obeying the divine command, "Give ye them to eat," but will want to send the hungry away, as the disciples did. I remember an incident which occurred when Science had been known to me but a very short time. Down in the country, where Science seemed quite unknown, I was asked by some one who had been suffering a long time from very bad eczema of the hands if Christian Science could heal her, and would I help her? I replied in the affirmative, but how fearful I felt about it she did not know. Returning to London that afternoon in the train, for quite a while I was feeling full of misgivings and fear as to my ability to help her, and such thoughts seemed to run riot as: What if my understanding is not enough! She will not believe in Christian Science! and so on. Then I began to see more as Jesus saw, and said to myself: If God has given me this work to do, He also will supply the understanding. With this comforting thought I looked up to heaven (lifted my thoughts to God) and blessed and brake what truth I had. Then a sense of peace came over me, and the whole thing went out of my thought. The next day a letter arrived, with the news that the hands were healed. I did indeed then "gather up the crumbs" that remained, for the joy and gratitude, confidence and encouragement which that letter brought me would have filled more than twelve baskets.

If, when asked for help, we bless and break what truth we have, although we do so in fear and trembling, God will indeed bless our efforts. As our Leader says on page 323 of "Science and Health with Key to the Scriptures," "In order to apprehend more, we must put into practice what we already know. We must recollect that Truth is demonstrable when understood, and that good is not understood until demonstrated. If 'faithful over a few things,' we shall be made rulers over many; but the one unused talent decays and is lost." Even if we are not asked actually for help, we shall take healing wherever we go, if we are alert and awake to keep our "lamp trimmed and burning," always dwelling in the consciousness of good, thereby following the Master's footsteps, having that Mind in us "which was also in Christ Jesus." Then consciously and unconsciously we shall heal our brother man, as our Leader says in her Message for 1900 (p. 8): "The good man imparts knowingly and unknowingly goodness; but the evil man also exhales consciously and unconsciously his evil nature—hence, be careful of your company. As in the floral kingdom odors emit characteristics of tree and flower, a perfume or a poison, so the human character comes forth a blessing or a bane upon individuals and society." A little experience proved to me the truth of these words. When purchasing something needed, the lady serving me looked very depressed and ill. I knew her to be interested in Christian Science; so a little talk on the subject ensued. On going out she remarked, "You do not know what you have done for me this afternoon. I had a splitting headache, and it has now quite gone." My eyes

filled with tears of joy, not so much for her healing, as I knew in reality there was nothing to heal, but because I appreciated and realized more fully the meaning of the words that Jesus said once to his disciples, when they had returned from the healing work he had sent them to do: "Notwithstanding in this rejoice not, that the spirits are subject unto you; but rather rejoice, because your names are written in heaven." It was joy to know that my brother man had been freed from error, but, greatest joy of all, the divine command had been obeyed, "Give ye them to eat." In sending this article, I am hoping it will encourage some beginner not to be afraid of his "little understanding," but just to "go forward," applying what truth he knows. God will indeed bless his endeavors, and nothing makes one grow so quickly as the prompt application of what is already understood. Mrs. Eddy writes in "Miscellaneous Writings" (p. 341), "First purify thought, then put thought into words, and words into deeds; and after much slipping and clambering, you will go up the scale of Science to the second rule, and be made ruler over many things."

One Mind

AUGUSTUS LONG

In humanity's search for that which is good and satisfying it misses the mark if it looks to matter. So-called material things cannot satisfy the yearning for good. The millionaire, the rich banker, the owner of stocks and bonds—has he found true peace and happiness in these? All evidence points to the contrary. The one Mind alone satisfies the hungry heart, and unless one is hungering and thirsting after righteousness he is indeed looking in the wrong direction. The belief in minds many—in a million and one different influences—has confused the world for ages, yes, for all time.

What we need most is to know and feel the ever presence of the one Mind, the one intelligence that governs man and the universe harmoniously. The belief of many sources from which to obtain knowledge and contentment is sheer folly. Mrs. Eddy says (Science and Health, p. 326), "He, who would reach the source and find the divine remedy for every ill, must not try to climb the hill of Science by some other road." Having set out to attain absolute good one must look to God, divine Mind, for health, happiness, and completeness. Contending for the human sense of things gets one nowhere, while persistently declaring the allness of good and steadfastly knowing that the one Mind is All and governs all certainly frees us from human limitations. There is no sluggishness or stagnation in Mind. The one Mind is as constantly active as the sun is in pouring out its light and heat.

Is there any belief of sickness, sin, or limitation in Mind, divine intelligence? No. Then realize that the one Mind is your guide and cast out the superstitious belief in many minds. You will then attain your oneness with the Father, your unlimited ability to reflect Him. Mortal mind is a myth. God's creation is not mortal but spiritual. Where, then, is so-called mortal mind found? The answer is, undoubtedly, Nowhere. It simply is not. In the Scriptures we read: "Do not I fill heaven and earth? saith the Lord." Is man separated, can man be separated from God's creation, from that which is? Indeed he cannot. He is one with all that is divine. We should have no fear that matter is doing anything at all. Divine intelligence is active, is supreme, is all.

Daniel

THE great characteristic of Daniel was his ability to stand alone, which really is the measure of his moral courage. "Moral courage," Mrs. Eddy writes, on page 514 of Science and Health, "is 'the lion of the tribe of Juda,' the king of the mental realm." What exactly this means Daniel must have discovered long before he entered the den of Darius' lions, or, indeed, he never would have reached its threshold. The antithesis of the mentality of Daniel is the mentality of the mob. The mob finds its courage in the mesmerism of numbers: break the mesmerism, and it fades away, under your very eyes, like the smile of the Cheshire cat. To the man in the street the phenomenon is a more or less perplexing one: to the metaphysician it is as simple as the reasoning of Euclid. The mob, in a sentence, is of the earth earthy; it has set its heart upon carnal things; and its mentality is that of the materialist, instinct with fear, which is the belief that there is life, substance, and intelligence in matter.

The metaphysician, on the other hand, has made the momentous discovery of the absolute unreality of matter. From that moment it has become the business of his life to demonstrate this; and, in proportion as he makes good his demonstration, he necessarily ceases to believe in matter, and so parts company with fear. That is the lesson the wise men of the East strove to convey through the story of Daniel and that of Shadrach, Meshach and Abednego, as a matter of fact from the beginning of the Bible to the end. It is the lesson of the evolution of the knowledge of God, the understanding of Principle, in the human consciousness. As the understanding of Principle becomes clearer and clearer to a man, the unreality of matter necessarily becomes more and more With the broadening of this understanding, fear vanishes. If, that is to say, a man, by obedience to Principle, can make bread out of stones, can multiply one loaf into thousands, what becomes of the fear of starvation? If he can find the tribute money in a fish's mouth, where is the dread of poverty? If sickness can be healed and the dead raised, then the victory of the grave is abolished. student, in short, as all this is revealed to him, finds a new and a wonderful meaning in those words of Paul, written to the church in Rome, "For I am persuaded, that neither death, nor life, nor angels, nor principalities, nor powers, nor things present, nor things to come, nor height, nor depth, nor any other creature, shall be able to separate us from the love of God, which is in Christ Jesus our Lord."

Life is, indeed, something very far removed from any belief of the flesh. Mrs. Eddy puts this with extraordinary vividness on page 75 of Science and Health, where she writes, "Jesus restored Lazarus by the understanding that Lazarus had never died, not by an admission that his body had died and then lived again. Had Jesus believed that Lazarus had lived or died in his body, the Master would have stood on the same plane of belief as those who buried the body, and he could not have resuscitated it." Neither life, then, nor death can separate man from Principle, for man is the spiritual

reflection of Principle, the image and likeness of God. The physical life of a man, on the other hand, with its sensuous passions and pleasures, the physical death of a man with its intense surrender to the belief of reality of matter, are simply phases of the belief of life in matter, that that life can be lost, and as such are mere counterfeits of Principle.

Something of what all this means must have been manifest enough to Daniel when, in defiance of the decree of Darius, "his windows being open in his chamber toward Jerusalem, he kneeled upon his knees three times a day, and prayed, and gave thanks before his God, as he did aforetime." Daniel knew well enough that the time-servers and the sensualists, with their passions bred of the belief of the reality of matter, would all be professing an admiration of the wisdom of the statute which the king had signed. It never occurred to him, however, to trouble himself as to the hopes and fears of others. He knew perfectly well the demands made upon him by Principle, and he also knew perfectly well that the only danger that could really come to him would arise from any disobedience he might show to Principle. On the time-servers and the purveyors of malice he most probably never wasted a thought. To have done so, he must have been well aware, would have been to give their malice the only influence it could exert over him, namely, his own belief in it. To believe in evil is in short to give evil the only semblance of power it can ever attain, a fact the sycophants of the court gained some inkling of when they found the fate they had planned for Daniel overwhelming themselves.

Herein, then, is seen at once the protection of Principle, and the vengeance of the Lord. God, Principle, knowing nothing of evil, does not go out like Zeus to revenge Himself on the evildoer. But the evildoer, strong in his belief in the reality of matter and the power of evil, opens the sluice gates of suffering to himself through this very belief. His salvation lies in discovering and demonstrating the unreality of all that once seemed real to him, thus finding in this unreality the spiritual fact of the infinity of divine harmony. This was the secret of Daniel, and this is the secret of every man who, like Daniel, has sufficient understanding of Principle to stand alone. Standing alone simply means an ability to grasp the fact that to the individual nothing matters in comparison to doing right.

The mental pressure to join the mob is, of course, sometimes terrific, and if the nature of it is not understood it may quite easily become overwhelming. The mob is invariably guided by the senses, and it is against such a fate that majorities have to be so perpetually on guard. History has exposed the persecuting tendency of a majority, but it has left it to the metaphysician to show how this tendency comes about. It is founded on a sensuous dislike of any change or disturbance, which is characteristic of the inherent laziness of the human mind, and which develops first into anger with, and ultimately reaches a hatred of, any one who attempts to bring such change about. When the motive of the change is itself sensuous, the storm, as a rule, evaporates in a teacup. But when it is impelled by Truth, and is resisted by error, then the culmination of the struggle is likely to be terrific, as when the greatest struggle known to man was fought out on the hill of Golgotha. "Marvels, calamities, and sin will much more abound," Mrs. Eddy writes on page 223 of Science and Health, "as truth urges upon mortals its resisted claims; but the awful daring of sin destroys sin, and foreshadows the triumph of truth."

It is here that the grandeur of the character of Daniel stands so clearly out. The cowardice, the self-seeking, the malice, the sensuality of the time-servers being absent from

his consciousness, he could not, and did not, fall under the mesmerism of the occasion. Where the time-servers saw an opportunity for personal advancement, he saw only Principle, and understanding Principle understood also its power of protection. With the time-servers it was different. Believing in malice, in revenge, in death, they paved the way to their own destruction. To them the lions were very real lions. So it came about that it was they, and not Daniel, whom the lions destroyed.

FREDERICK DIXON.

A Sabbath for the World

THE Sabbath which the world needs after a seeming period of upheaval is neither a mere truce with erroneous conditions nor a reaction into material inertia, but the true understanding of Principle which continues through all eternity. The word Sabbath means, of course, rest. Though the world of belief in matter may think it craves a repose constituted of inaction, the only real tranquillity there ever is or has been to desire consists in activity sustained by divine wisdom. This activity is not a struggle of conflicting forces. Neither is it listless monotony. What it is, however, is more important than what it is not. The Sabbath day which is truly to be kept holy, or wholly, is the day of the Lord, the eternity of indestructible consciousness, expressed with energetic variety. To explain it in this way is to put the truth in terms that may seem decidedly modern. Yet it is the same truth. whether it is stated in the figurative language of the Hebrews or in intellectual phrases of twentieth century English.

The Hebrew concept of the Sabbath was not merely of a seventh day but of a seventh year also, "and the sabbath of the land," we are told in Leviticus in connection with the plan for a sabbatical year, "shall be meat for you." The word Sabbath, however, does not necessarily mean seventh, except in so far as in figurative language seven has often denoted completeness in one way or another. Completeness of righteous action is, of course, the rest which is unceasing. The period of divine completeness, of quietness and assurance in vigorously expressing intelligence, is the forever kingdom of heaven. The words "work" and "rest" involve no essential contradiction. In fact, work of enduring value, produced by Principle, is restful in the most spiritually animated way. The keeping of the Sabbath, or day of rest, must continue on the workday as well as on the Sunday, in order to be whole or holy. In other words, one needs to rest in the very doing of righteous work. Only thus can one enjoy the boundless day of the Lord daily. This state of rest in action can be proved as one understands that the divine consciousness is all that can ever truly do anything. What infinite Mind does must be orderly, with no element of destruction, no jangle of limitations. Ever operative harmony is the divine Mind's state of rest.

On page 519 of Science and Health Mrs. Eddy declares that "God rests in action," and on page 584, under the caption Day, she says, "The objects of time and sense disappear in the illumination of spiritual understanding, and Mind measures time according to the good that is unfolded. This unfolding is God's day, and 'there shall be no night there.'" The spiritual day of the Lord is indeed as a thousand years. That is to say, the time of right doing is the eternity of infinite good. The one Mind knows this eternity now. In one of his hymns Bulfinch brought this out when he wrote of

Thy Sabbath, the stupendous march Of vast eternity.

In order to experience Mind's rest in action, one needs to rejoice that the real man lives in perfect eternity now, without looking forward to some supposed heaven of inanition as a pleasant prospect.

One cannot believe that there are two creations, one spiritual and another material. Since infinite Mind with its creation is provably all there is, there never has been any room for another creation even as a supposition. That which would call itself a material world of actions and reactions, effort and weariness, right and wrong in perpetual contest against each other, is sheer illusion, without the slightest substantiality. It is futile to plead that nothingness could ever have even temporary reality. The manifestation of Principle is the only true manifestation, always has been omnipresent, and has left neither space nor time for such a belief as matter. True consciousness, without beginning and without end, is free. It has never been tainted in the slightest by evil. It perfectly resists any supposition of error, for if error could ever really be in true consciousness, it could not be eliminated.

When one knows that man lives in the eternity of good now, he is at once invigorated. He goes forward with the work of the present cheerfully, knowing that divine Love is governing actual being, no matter what may seem. Each one who reasons and acts thus is proving the spiritual Sabbath for himself. He is also realizing that the Sabbath of cessation from evil and of unfoldment of good for the whole world consists in the practice of Principle. If humanity seems to be longing for a time of quiet after a time of agitation, all must learn that the fulfillment can come only as all turn together to the divine Mind and demonstrate that this Mind is the sole cause. The satisfying quiet is not mere lethargy nor an enduring of erroneous conditions. It is, instead, the concomitant of activity for Principle. Any reluctance to be rightly active, any opposition to the unfoldment of infinite good, is the disturbing factor, and has to be replaced with full acceptance of the divine consciousness as the only consciousness that could ever be really conscious of anything. By one's own joy in serving Principle, one can determine the extent of his service, and also the extent to which he is experiencing the day of the Lord as a continuous Sabbath. On page 215 of "Miscellaneous Writings," Mrs. Eddy says: "Christian Science demands order and truth. To abide by these we must first understand the Principle and object of our work, and be clear that it is Love, peace, and good will toward men." Principle is, of course, the cause for only the one, true, spiritual creation. Acceptance of the present oneness of Principle and its creation is the way of satisfaction, the way of proving the true Sabbath for the whole world, in accord with Mrs. Eddy's statement on page 306 of Science and Health: "Undisturbed amid the jarring testimony of the material senses, Science, still enthroned, is unfolding to mortals the immutable, harmonious, divine Principle,-is unfolding Life and the universe, ever present and eternal." GUSTAVUS S. PAINE.

[Written for the Sentinel]

Be Not Afraid

PEARL HOLLOWAY

BE not afraid. There is no harm
Can come to those who trust
The God who rules both wind and wave,
Whose laws are kind and just.

Be not afraid. Where'er thou art
His love is with thee still,
And all things in the end bring good
To those who do His will.

Testimonies of Healing

Christian Science has become the conscious mainspring of my life and I am deeply grateful to be able to give my testimony of its healing power. During my entire life I had been subject to colds and an almost chronic hoarseness,-and when grown took up a career in public life where I had to use my voice unsparingly. About eight years ago, this difficulty culminated, after constant medical attention, in my being told by a throat specialist of New York City that I had partial paralysis of the vocal cords due to a strain from using my voice while suffering from one of these colds. I visited the specialist daily and he performed a very delicate operation through which he hoped to remove the obstruction. This operation did not relieve the hoarseness at all, and after several consultations the final judgment was that my voice would never again be strong enough for public use.

This was very serious, as it seemed to mean not only my own career, but the livelihood of my mother and younger sister. I was very much depressed, but my mother, who was a courageous and hopeful woman, suggested that I try Christian Science. She personally knew nothing of it, but had heard of some of its wonderful results, and as for my-self—whenever the name Christian Science had come to my thought in the rush of my life work, it had struck me as some fad against which I had no particular prejudice; neither did I have for it time or inclination.

In some way my mother found a practitioner, and together we went to his office. He told me to get "Science and Health with Key to the Scriptures" by Mrs. Eddy, and read it, which I did. I found interest in what I called its "philosophy" but I did not take in, consciously, any part of the great revelation, nor did I experience any pronounced change in my condition, but I continued having treatments and reading the book. Almost imperceptibly, it seemed, my voice grew a little clearer, so I decided to again try its use in public. On this occasion I was still very hoarse but managed to continue my work. I also continued to read Science and Health. This reading went on intermittently for about three years.

During a Wednesday evening meeting at The Mother Church I heard several testimonies of instantaneous healing, and on my way home this question came to me: "You have heard many talk of their healings in Christian Science, but have you personally ever seen a healing?" and I was forced to admit that I did not, of my own experience, know of one. Then the question came, "What about your voice; wasn't that a healing?" and I was surprised to hear what I thought was myself say, "Well, to be perfectly honest, I think it would have got well anyway." I immediately decided I would be no hypocrite and that I would not again say Christian Science healed unless I was sure beyond question. The incident seemed to pass from my thought, but shortly after that I fell on the ice, receiving a severe sprain in my right wrist. I tried to dismiss it with a perfunctory declaration that "there are no accidents in Mind" but within an hour's time the wrist was swollen and very painful; then the questions which arose after the Wednesday evening meeting came back to me and I saw that the test of my reading and work in Christian Science had arrived.

A friend called a practitioner on long distance, but, unable to get him, left a message asking for help. I retired to my room and began my own work. I knew that Christian Science was the Science or knowledge of right

thinking and that I honestly and earnestly wanted to be led to think aright. Here something was present which was most emphatically "wrong" thinking. What could I do to be rid of that something? Then I saw that that which I thought of as "something," Mrs. Eddy had called nothing, "no thing," and until it became "no thing" to me I would not be rid of it. I saw that the reason that which is called "nothing" disappears is because that which is real or "something" takes its place, fills the mental place previously claimed by "nothing," and that this change could not possibly take place because of any will of my own to have it so but that the self-operative law of right thinking would have to prove itself omnipotent and omnipresent. I felt that this was logically true and I prayed earnestly that it might become a demonstrated fact to my thought. The first thing that occurred was that the pain seemed to become an entity, to have being, entirely apart from myself, and to be attacking me; then I realized that this was what Mrs. Eddy meant by the voice of error and I seemed to look directly at this error and refuse to allow it to make itself real to me. To my surprise the mental sensation which had been screaming, "I am in agony," grew fainter and fainter until I could no longer hear it and I became conscious of the fact that my wrist was free from pain. In another hour the swelling had disappeared and in a few hours there was no discoloration. There was no mistaking the fact of healing this time, and it filled me with a great sense of wonder and humility. From the flood of light that rushed in I could see how those three years of what had appeared to be superficial reading were really the period during which the truth was gradually thinning the evil of error to the point where I could say with Job, "I have heard of thee by the hearing of the ear: but now mine eye seeth thee." The claim of hoarseness disappeared very shortly, and since then I have had innumerable "signs following," always in proportion to my faithfulness and sincerity.

I am grateful for this great demonstrable truth going out into the arteries of human life, and I daily watch and pray to be mentally alert in supporting every idea in our church organization so wisely founded by our revered Leader, Mary Baker Eddy, to carry this message of healing to a weary world.

(Mrs.) RAY COX FLINT, Providence, R. I.

It is with a heart full of gratitude that I give this testimony of what Christian Science has done for me. It was not until I had exhausted all material means of which I knew, that I turned to Christian Science for help. I had suffered from tuberculosis for many years. I struggled along most of that time trying to do my work, and sometimes not able to work at all, until finally I had to give up completely. I went to a hospital and while there was examined by several physicians, and also had an X-ray picture taken of my lungs. What they told me certainly was not very encouraging.

I had several times been advised by friends to try Christian Science, but I always told them that although it might be all right for little things, I did not think it could do anything for a person in my condition. I felt that my time in this world was very short, and I was so full of fear that I was almost insane. I finally made up my mind that if Christian Science did not do me any good it certainly could not do me any harm, so decided to give it a trial. A friend gave me a copy of "Science and Health with Key to the Scrip-

immediately healed of the condition then existing. This

caused me to study "Science and Health with Key to the

Scriptures," and all the other writings of Mary Baker

Eddy, and a few months afterwards I was healed in five

treatments of a trouble for which the doctors said there

was no relief but in an operation. I am more than thank-

ful for the spiritual uplift which has come to me through

these and other healings, for the new meaning which my

Bible has for me, for the call to active service. My heart is

filled with gratitude to Mary Baker Eddy because she so

lived and studied the truth that she became the discoverer of

the truth that has been revealed to us, showing us how to

know God aright .-- W. Fred Gallagher, New York, N.Y.

every possible way. I first heard of it nearly six years ago,

and although at first I found its teaching very difficult to

grasp I had not read many lines of Science and Health be-

fore I was convinced that it was the truth which Jesus

taught. I think the chief obstacle to my progress was im-

patience. Instead of putting into practice the simple truths

I understood, I argued about much which I could not under-

stand. A Scientist friend pointed out to me that by putting

into practice what I understood I would gain further under-

standing. I tried very hard to do this and was most won-

derfully rewarded, for much which before had seemed to me

absurd and contradictory in Science and Health appeared

medicine regularly, but have taken none of any kind since

and have been in better health than ever before. Through

appreciation of the truth, knowing that God would guide

each step, I have taken positions which seemingly I have

been very unfitted for. I have known that God is infinite intelligence and that man, God's idea, reflects that intelligence,

that the answer to every question exists in Mind and that

Mind would unfold to man all that it was necessary for him to know. I have been able to fill each position successfully.

I have been healed of the sense of separation, worry for the

future, fear, lack, and many wrong conditions of thought.

Impatience, irritability, quick temper are yielding more

slowly, but I rejoice in the fact that they are yielding, and

our literature, church services, and testimony meetings. I

am very grateful to Mrs. Eddy and all the friends who so

lovingly and patiently helped me when the way seemed diffi-

cult. I thank God for all the blessings Christian Science

(Mrs.) GERTRUDE LINDSELL, London, England.

I have expressed my gratitude for Christian Science

many times at the Wednesday evening meetings, and in

order that I may do so before the world I am sending this

testimony to be published. Qver seven years ago I desired

to attend some church services regularly and have my hus-

band attend with me, and he chose the Christian Science

Christian Science has been a wonderful help to me in

(Mrs.) MINNIE TAUSIG, Los Angeles, Calif.

I have long wished to express my gratitude through the

Sentinel, for all that Christian Science has done for me and

those dear to me. It was nine years last December that

Christian Science found me, and began the work of regenera-

tion in my consciousness. It came to me in such a glorious

way, lifting me from the saddest phase of mortal existence,

when life, so called, had become unbearable. As I look back

upon it I still wonder at the power of Truth to work such

that time was practically the resurrection of the dead. Dur-

ing the nine years that have passed, there have been many

stones to remove from my path, yet I can truthfully say I am

glad that the stones were there, for in their removal I learned

many precious lessons. I am so grateful for all my physical

healings. Headaches, from which I suffered twenty-three

years, were healed, and there has not been the slightest

return. This was my first healing in Christian Science. I

have also been healed of chronic tonsillitis, varicose veins in

an aggravated form, blood poisoning, toothaches, burns, and

many other ills too numerous to mention. That for which

I am most grateful, however, is a better understanding of

God, for this is the keynote to harmony in every life. A

better understanding of God as Life, Truth, and Love, begins

at once a reform in thought, that continues until we become

I am grateful beyond words to our Father-Mother God,

but had been taught from childhood to believe that God had foreordained practically every act and motive of my life, and when certain conditions began to manifest themselves in connection with my own life, after all I had seen of sin and its results in my work, which had been to a great

extent among the poorer classes of the large cities, I determined that if all this were God's doing, then I wanted Him not.

At this time I had a complete physical and nervous breakdown, and was compelled to leave the seminary. I then tried to keep away from every religious influence, in which endeavor I succeeded fairly well until a trial came

which seemed to be sapping my very mentality.

Through the kindness of a friend, I was urged to try Christian Science, and in doing so found the God I had been looking for all my life-a true and living God, who

is Spirit and who is Life and Love and Truth—and was

[251]

of a Bible class for years and had attended church services

also, but after we were married he refused to attend any longer. We have a son and when he was about the age of seven I realized that he would begin to look to his father as an example. Shortly after I had talked with my husband

about this he bought the Christian Science textbook, "Sci-

church. I had attended five different churches during my life and loved them all. My husband and I were members

7-2 1

ence and Health with Key to the Scriptures" by Mrs. Eddy, and we began to attend the Christian Science church. During the first year of my study of Christian Science I was healed of neuralgia, and of rheumatism in my arm and hand which had caused much suffering at times for several years. Since then I have received too many blessings to enumerate, and can only say that my heart overflows with gratitude to our beloved Leader, Mary Baker Eddy, who revealed to the world the truth which Christ Jesus taught and demonstrated.

(Mrs.) Rose Yeomans, Chicago, Ill.

I wish to testify to a wonderful healing experienced several years ago through Christian Science. In 1896 I had a serious operation, which was performed by three physicians, after which they neglected to remove the silver wire with which the wounds were sewed. I went to one of the physicians repeatedly, requesting an examination and the removal of the wire. However, he did not comply with my request, but insisted that I had nervous pains, resulting from the operation. Several years later I consulted another physician, who examined me and declared that the wire was there. I sent for a specialist, who removed a piece of it, but after its removal I continued to suffer for about four or five years, unable to be up, to eat anything, or to do any work.

In this way the years passed by until a young woman came to my home who, seeing my suffering, inquired whether I had any faith in Christian Science. She brought me some books, and as I was unable to read, she read to me. Then I asked a practitioner to treat me, after which I felt as though I had been born anew. Some time later I suffered a relapse. The help of a practitioner was again sought, with the result that I was freed from all suffering. I now do all my own housework, and am as healthy and active as though I had never been ill and suffered so severely for eighteen years. I owe my freedom entirely to Christian Science and I am grateful to God and to our Leader, Mrs. Eddy, whose unself-ishness and love for humanity enabled her again to reveal to the world the healing truth as taught and demonstrated by Jesus.—(Mrs.) Wilhelmine Roden, Lübeck, Germany.

I would like to state what wonders Christian Science has done for my husband and myself, in the one short year we have been studying it. Before it came into our lives we had no God, but believed in Darwin's theory of evolution, having arrived at that conclusion after a fruitless investigation of different religious denominations. I cannot be thankful enough for the sense of peace, security, and health which has come to me through Christian Science. God's loving care has been so often experienced that I felt I must write my testimony.

We were traveling in Canada when my first demonstration was made. About seven o'clock one morning I was awakened by excruciating pains, and was in a cold perspiration. I immediately faced the argument of ptomaine poisoning. I awakened my husband who when he saw my condition thought I was passing away, but shook me and said, "Remember Science. Remember!" I said I would like to have a practitioner. He turned to see the time, and as he did so these words came to my thought: "These signs shall follow them that believe . . . if they drink any deadly thing, it shall not hurt them," and I immediately realized that nothing could affect God's child. Just then my husband turned to me and asked how I felt and I said, "I am perfectly all right;" and indeed I was. The pains and perspiration had disappeared and I was instantaneously healed.

That day I went about my work as usual, feeling perfectly well, and having no relapse.

Another instance of healing occurred when my husband's face broke out with an inflamed rash. We tried to overcome it ourselves by reading and putting into practice what we understood of Christian Science, but when on the second morning his face had become so swollen that his eyes were almost closed, we thought it best to consult a practitioner. At noon he was treated and by three o'clock the same day his face was as clear and normal as it had ever been. I know it was fear on our part which prevented us from seeing the unreality of the erroneous condition and overcoming it, but thanks to the understanding of a practitioner another beautiful proof of the power of Truth was given us.

For these wonderful instances of healing, and many more, I am thankful, but for having found spiritual contentment in some degree of understanding of God as Love I am more thankful. Before reading Christian Science, God seemed very remote indeed, now it is perfect peace to rest in the assurance that He is ever present, loving and guarding His children.

I am indeed grateful for the teachings of Christian Science and to Mrs. Eddy for her work for mankind.

(Mrs.) Edna Hitrig, Jersey City, N. J.

Prior to participating in the late war, in speaking of those who had enlisted I remarked that they who made good have the right to feel good; but how inexpressibly grateful I am to have found good, God, as revealed by Christian Science through the heavenly inspiration of our Leader, Mrs. Eddy. After the third battle of Ypres, when on sick leave in London, I was lovingly invited to attend a testimony meeting, and it came almost as a shock to find that heaven is here and now, and that those material conditions which seemed so dreadfully real were just a dream. A soldier's edition of Science and Health was handed to me and gratefully accepted.

A few weeks later came the privilege of demonstrating Christian Science, when the enemy launched his last and perhaps greatest offensive. There were many instances of Truth's sustaining power and the protection of divine Love. Finally I was wounded in both legs by a shell, but I clung to the truth as well as I knew how. Soon I was being cared for in an English hospital and was able to get in touch with Christian Scientists who had helped me before. My leg was very badly injured and the doctors wished to operate. At my request, however, they agreed to postpone the operation for a week. Christian Science treatment was asked for and given, and when the wounds were inspected the doctor was surprised to find the tendon covered with flesh, and remarked that it was wonderful. An operation obviously was unnec-I felt then as now that I could "run, and not be weary . . . walk, and not faint."

The profanity, drink, and tobacco habits, as well as selfish pride, have been overcome by this wonderful truth, and in gratitude to its Discoverer, Mrs. Eddy, I would with Paul "press toward the mark for the prize of the high calling of God in Christ Jesus."—Charles B. Burke, West Krugersdorp, Transvaal, South Africa.

٠

I feel prompted to write of the many blessings that have come to me since I began the study of Christian Science, which found me with health gone and faith in good shaken. To know God aright is truly health and peace, and Christian Science does give this knowledge. When it was first pre-

â

sented to me, it seemed such a sane, reasonable presentation of the truth about God that I began at once to try to prove its teaching.

Not having been considered very strong from childhood, I spent much time with books, the Bible claiming some of my attention, as I had always been interested in the wonderful works of Jesus. Some of my first proofs of the efficacy of Christian Science were painless dentistry and an instantaneous healing of a displacement, for which I had had an operation but without any benefit. Then constipation, nervousness, and some difficulty with my lungs disappeared; also many faults of character. I had a practical proof that God is the source of supply. All the depressing symptoms of the grip vanished with an hour's study of the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy.

While residing in one of the extreme southern states I seemed to become possessed with the fear that I would lose my mind. Through the loving work of a practitioner I was freed from this fear and learned as never before that the only Mind there is is that Mind "which was also in Christ Jesus." Christian Science also proved to be a blessing when my baby came; it banished all fear and there was almost a painless birth. Our little son has never had a day of sickness. I have laid aside glasses, after wearing them since childhood, and now have normal eyesight. The everyday problems enable me to prove the truth. I am so grateful to Mrs. Eddy for this Science which is truly Christian and to the loving practitioners who have helped me along the way. My desire is to imbibe more and more of the spirit of Christian Science while studying the letter, and to go forward lending a helping hand to others as others did to me.

I wish to express my gratitude for Christian Science and for the Christian Science periodicals. My appreciation of them began with the first Sentinel that was given to me. As I read it I saw that the writers of the articles had found what I had been seeking all my life,—an explanation of life, and answers to many of the questions I often asked myself, such as: What is God? What is the being I call myself? Where is heaven? Through the study of "Science and Health with Key to the Scriptures" by Mrs. Eddy, together with her other works, and with much help from the Christian Science periodicals, I, too, have found answers to my questions, and whereas I once believed in God, now I am beginning to know Him.

(Mrs.) Maude Fay Wilson, Melfort, Sask., Canada.

Although I appreciated the periodicals from the first, it was some time before I felt that I could afford to buy them, and when I did so it looked as if I should have to do without many things that seemed necessary, but by putting first things first and sending the twelve months' subscription, all needful things were added. I had been reading the periodicals for three years before I began to understand what they really are, and I then saw that it was not so much a question whether I had money to subscribe for them, as whether I read and understood them. I began to see that the Christian Science periodicals are the highest human concepts of divine ideas, emanating from God, Spirit; that they are in and of Spirit, and so need to be understood, apprehended, and received spiritually. I also understood for the first time what Jesus meant when he said, "For whosoever hath, to him shall be given, and he shall have more abundance: but whosoever hath not, from him shall be taken away even that he hath." I knew that as I learned to understand, to apprehend,

and to receive God's ideas, that I already had them, they were mine,—and more would be given, and that these ideas would take away, or replace, the false beliefs which I had seemed to have.

In the Church Manual (Art. VIII, Sect. 14) Mrs. Eddy says, "It shall be the privilege and duty of every member, who can afford it, to subscribe for the periodicals which are the organs of this Church." In reading these words recently, the word "duty" seemed to stand out above the rest, and I wondered why Mrs. Eddy used the word duty, which means, according to the dictionary, "that which one person owes to I had often thought of the "privilege" of subanother." scribing, but never of the "duty." In order to understand what Mrs. Eddy meant I turned to "The First Church of Christ, Scientist, and Miscellany" (p. 353) and read and pondered over the purpose and the mission of the different periodicals. Then I no longer wondered why Mrs. Eddy saw that it was a "duty." I was reminded also of what Mrs. Eddy has to say in Article VIII, Sect. 6, of the Manual: "It shall be the duty of every member of this Church to defend himself daily against aggressive mental suggestion, and not be made to forget nor to neglect his duty to God, to his Leader, and to mankind."

I am indeed grateful that I have the privilege, and also that I see the duty of subscribing to all the Christian Science periodicals, and so helping to spread abroad the knowledge of the truth which makes men free, the truth which cannot be lost, nor remain forever unseen. In this way I am sharing in the great work which must go on, until the words of the prophet shall come to pass, and "the earth shall be full of the knowledge of the Lord, as the waters cover the sea."

I am also grateful for all the physical benefits that I have received through the study of Christian Science. Weakness and weariness that at one time were constant companions are now a thing of the past. But physical benefits, however many and however great, are not to be compared with the peace and joy and happiness which come from a knowledge of God as ever present Love.—(Miss) E. ALICE TAYLOR, Patricroft, Lancashire, England.

Having received so many blessings in Christian Science I feel impelled to send in my testimony expressing my gratitude. I became interested in Christian Science a little more than nine years ago. At that time I was healed of the need for wearing glasses and of severe headaches, through the reading of the textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy. I was filled with gratitude for these healings as I had been in bondage for several years and suffered almost constantly. Once or twice since, the difficulty with the eyes returned but it was very quickly dispelled through the realization that sight is in Mind, not in matter, and can never become impaired. I have two children, and they do not know what medicine is. I am so thankful I have this truth to guide me in the raising of the children.

We have had many physical healings in our home, but like many others I am more grateful for the understanding that lifts thought above earth and its tribulations into the spiritually real. I am grateful for the privilege of church membership, and of being a teacher in the Sunday school; for class instruction, which is enabling me to work out my problems; for the Christian Science literature, and for the Lesson-Sermons. My heart goes out in gratitude to God and to Mrs. Eddy, who through her spirituality gave back to the world this new-old truth.

(Mrs.) Della D. Latch, Los Angeles, Calif.

Signs of the Times

["Signs of Progress"-The Christian Science Monitor, Boston, U.S.A., Oct. 26, 1920]

Throughout history, whatever has truly been good has been real and whatever has been bad has been ephemeral illusion. In other words, that which has constructively expressed the divine Mind has endured, whereas that which has been even suppositionally destructive has been reduced in the end to the nothingness which it always was. Of course the really constructive expression of divine Principle has ever been spiritual idea, quite apart from the theory of matter. So it is idea that has continued. Spiritual idea has never been affected by either so-called human recognition or lack of recognition. All the while, the immortal idea of Life has remained immortal idea, continuously unfolding because of its infinite source. The spirituality of the true universe has remained the fact, in spite of human hypotheses.

It is not surprising, then, that in all ages there have been signs of progress, glimpses of the true idea. To-day, through understanding of Christian Science, it is possible to see the more clearly what the better glimpses of the past have meant. Even though a man may not have himself known the full import of what he was reasoning out, the idea of which he got the slightest perception forever survives intact, through the time of ruin which comes to all sorts of mere human beliefs. Thorough comprehension of the immortal idea involves the experience of eternity as actually here and now. By knowing and practicing what the divine Mind knows, one finds what always has been true, and rejoices in every evidence of discernment of the truth that there ever has been.

Thus one sees the essential unity of the eternal age of spiritual unfoldment. Each glimpse of the true, spiritual idea is a glimpse of the Christ. As Mrs. Eddy says on page 333 of Science and Health, "Throughout all generations both before and after the Christian era, the Christ, as the spiritual idea,—the reflection of God,—has come with some measure of power and grace to all prepared to receive Christ, Truth. Abraham, Jacob, Moses, and the prophets caught glorious glimpses of the Messiah, or Christ, which baptized these seers in the divine nature, the essence of Love." In both the Old Testament and the New Testament, the genuine signs and wonders, which the soothsayers and the sorcerers tried in vain to counterfeit, represented just so much discernment of the eternal manifestation of Principle. Before such irresistible manifestation of the one cause, any spurious sense of things has to vanish.

The "signs of the times" to which Christ Jesus called the attention of the Pharisees and the Sadducees are just as important now as then. In fact, the true signs which indicate the spiritual facts of Principle are eternally the same in essence, though continuously unfolding in boundless variety because of the infinity of the one creative power. Every bit of reasoning as to the nature of true Life that ever has been good is still redounding to the blessing of all. In the eighteenth century of English literature, for instance, a period which is sometimes called in literary histories the "Age of Reason," there was much appreciation of some of the eternal facts. In the light of Christian Science, some of the religious declarations of that time appear even more remarkable today. Indeed, to-day the student of Christian Science brings to bear his own unfolding understanding of Principle on both history and current experience, thus learning something of the basic oneness of real activity.

Notice what Dr. Johnson said in one of his essays in "The Idler" in 1759: "Every man is obliged by the Supreme Master of the universe to improve all the opportunities of good which are afforded him, and to keep in continual activity such abilities as are bestowed upon him." The student of Christian Science, reading this sentence, knows that the man who is "obliged" by Principle to make use of all opportunity is not a mortal but the immortal expression of the divine Mind. That is, the real man cannot do otherwise than act in accord with the ever present opportunity to express infinite intelligence. The ability which is bestowed on this true man is not limited but unlimited. Because the divine cause invariably requires its effect to be in accord with it, the genuine, spiritual man is joyously keeping "in continual activity" his complete ability to manifest Principle.

Undoubtedly Dr. Johnson did not consciously mean all this by his reverent statement. In order to have intended the fullness of this meaning, he would have needed the revelation of Christian Science in just the way that Mrs. Eddy has given it to us for the present. The understanding of Christian Science, therefore, demonstrates the broadest possible significance of all that has ever constituted Christianity. The turning to the one Principle to-day, however, shows the essential unity of all that ever has been good. As Mrs. Eddy points out on page 271 of Science and Health, "Christ's Christianity is the chain of scientific being reappearing in all ages, maintaining its obvious correspondence with the Scriptures and uniting all periods in the design of God."

In other words, the understanding and practice of Christian Science in the twentieth century reveals the fundamental order of whatever has been genuine unfoldment of Truth. Many of the signs of progress in the present are, in some respects, the same as what seemed signs of progress in the past. If there is a real return to the immutable truth, which Abraham, Moses, the prophets, and Christ Jesus knew and practiced, this is just as actual progress as any development that seems new. The only real novelty lies in the perpetual unfoldment of the one infinite Life, which always has been the same in essence, in the nature of its existence, that could never be confined within mortal suppositions. The harmonious order of divine Life, understood in Christian Science, is unfailingly satisfying in its unity. So, on page 205 of "Miscellaneous Writings," Mrs. Eddy reiterates: "This order of Science is the chain of ages, which maintain their obvious correspondence, and unites all periods in the divine design."

[From the Los Angeles (Calif.) Examiner]

As if the high cost of living, the European tumult, and the world's industrial and social unrest were not enough, here comes a professor of medicine to pile another load upon the public back. He proposes that physicians, in addition to curing bodily ills, should look after their patients' political and social beliefs. In his own words:—

"By reason of his intimate and confidential relations with all classes in a community, the physician may administer not only to diseases of the body, but often can direct his patients in matters of public policy and antidote mistaken social theories."

A man comes to his doctor with a cold in his head. The physician, according to this professor, ought to ask him whether he is a Democrat or a Republican, whether he believes in a high or low tariff, and how he stands on the League of Nations. Should the patient turn out to be a Socialist it is the doctor's duty to point out to him the evils of his way. How the physicians themselves are going to learn just what the correct social theories are, the professor does not explain.

[On a Recent Interview with Thomas A. Edison]

After a life devoted to the study of the so-called forces of matter, the great inventor delivers himself of the following admissions, as reported in *The American Magazine*:—

"We don't know one-millionth of one per cent about anything! Why, we don't even know what water is, we don't know what light is. We don't know what gravitation is. We don't know what enables us to keep on our feet, to stand up. We don't know what electricity is. We don't know what heat is... We have a lot of hypotheses, but that's all."

Hypotheses are all that the study of matter; so called, can ever produce. It can never produce a demonstrable law. The reason for this Mrs. Eddy gives in "Science and Health with Key to the Scriptures," on page 124, where she says: "Adhesion, cohesion, and attraction are properties of Mind. They belong to divine Principle, and support the equipoise of that thought-force, which launched the earth in its orbit and said to the proud wave, 'Thus far and no farther.' Spirit is the life, substance, and continuity of all things. We tread on forces. Withdraw them, and creation must collapse. Human knowledge calls them forces of matter; but divine Science declares that they belong wholly to divine Mind, are inherent in this Mind, and so restores them to their rightful home and classification."

[From Inaugural Address of Rev. James A. Beck, D.D., Dean of Boston University School of Theology]

. . In a word, it seems to me that it is the business of the theological school to train leaders for the church who can speak with authority concerning religious truth and spiritual ideals. I hasten to admit that this definition is open to criticism. All persons who regard the minister as chiefly a priest to stand between God and man, or mainly a rector, or spiritual sovereign to rule over men, or primarily a shepherd solicitous for the welfare of dependent sheep, or mainly an administrator skilled in keeping the machinery of organized religion running smoothly, will protest against the undue exaltation of the preaching office implied in this statement. Others will object to it as medieval in its emphasis upon authority. Time was when the clergy might discipline kings and a Roman pontiff keep a German prince standing barefoot in the snow. But that day of ministerial power is long past and never can return for a generation which is restive under all assertive and dogmatic leadership.

Ideally the service rendered by the church will be as broad and varied as the total need of human life. Great versatility is required of the man within to direct intelligently the activities of his religious household. But primarily the leader's first business is to speak so as to refresh his guests, to interpret for them in living terms the spiritual ideals of the race until courage and strength shall come again for continued achievement. And while it may be, as some contend, that the seminary should train workers for special forms of religious service, its disciples must be designed mainly to prepare competent interpreters of Christian truth who can state their faith in terms that will compel the assent and cooperation of their hearers.

Moreover, the suggestion that the preacher should speak with authority in a democratic age does not savor of medievalism except to those who conceive power in only autocratic terms. There is an authority which is arbitrary, imposed upon the people from without, compelling obedience by an appeal to force. But there is another authority before which men bow, not because they must, but because the highest within them acknowledges its right to rule. This authority appears in the power of a great idea to commend itself to the best judgment of men. . . .

It is necessary, then, to inquire as to the sources of this inward power which will make it possible for the preacher to speak commandingly. It is easier to feel than to analyze it. Many things contribute to it, but it derives principally from three sources. The first of these consists of a passion for reality. The confusions and uncertainties of modern society are only the natural inheritance of a generation enamored of unreality. There is little disposition anywhere to face facts squarely. Indeed, it appears sometimes that we have a positive aversion to facts. In politics we deal with fictitious issues, in business and industry with inflated values, in education with superficial ideals, in religion with intellectual and even moral obliquity. It must be obvious that any hope which the world may have lies with that "saving remnant" who can see clearly and are unafraid. And society has a right to expect the theological school to enlarge this remnant, for if we cannot have reality in religion, I have no confidence to expect it anywhere. But if we may have it here, then we may hope to find it everywhere at last.

I know of no way to make the Bible real except to approach it thus in a scientific spirit, that is to say, in a spirit of simple truthfulness. . . . And the theological school will contribute not a little to the passion for reality by insisting that there must be no evasion of any fact which we meet in the field of Biblical study.

But a growing sense of reality can never be satisfied with religion as purely a subjective thing. . . . On all sides it is commonly assumed that some things can be industrially and politically right which are morally wrong. This double ethical control will ever be challenged by the man who is jealous for Jesus Christ. He will insist that one is Lord and Master in the field of ethics and that his authority is always and everywhere the same. Reality in religion will always make one feel that social sin is as certainly sin as wrong conduct on the part of an individual, and that Christ came to redeem the world from all sin, collective and personal alike.

4

[From an Editorial in the Pacific Christian Advocate]

It is distinctly unfair to the boys and girls in a Christian home to find week after week on the library table the daily paper, the trade journal, the woman's magazine, the country weekly, and the popular monthly, and never to be reminded by the presence of the Christian paper that religion has a place in daily life. A child raised under such auspices will never think of Christian service as a life career. The church will be to him an institution on the side, and religion a thing restricted to Thanksgiving, Christmas, and Easter. The only way in which to secure the greatly needed personnel for the continued and vigorous prosecution of Christian work at home and abroad is daily to remind the children in Christian homes of the developments taking place in the kingdom of God.

[Introduction to a Christian Science Lecture Given at Brookline, Mass.]

I would never think of introducing to you a Christian Science lecturer if I were not thoroughly convinced in my own mind that your attention is being drawn to a message of demonstrable value, a message able to meet in a most unusual way the deepest cravings of the human soul. Students of Christian Science who have not been content with a mere academic survey of its teachings, or attracted to it solely for sentimental purposes, will tell you that you are dealing here with the most important subject of modern times, because it is their conviction that this is the only substantial hope of the future, the only basis on which civilization is to go on and up.

[255]

We are facing a most extraordinary situation, in which every possible notion which the human mind has brought forth through the centuries is being tested to its very bottom and found, in many cases, frightfully wanting. The élite of the world to-day are literally soaked in that philosophy of relativity which prompted the irony with which Pilate asked Jesus, "What is truth?" The Roman governor, it seems reasonable to presume, was a good man, anxious to do justice to all, but so completely was he the victim of the belief that it is impossible for man to reach absolute conclusions on any matter because there were too many contradictory so-called truths, that he lacked that spirit of decision, that strength which alone a big ideal and a great faith confer, and therefore permitted what the Founder of Christian Science has called the greatest crime in human history.

My friends, Christian Science comes to you fraught with tremendous possibilities; it brings an entirely new sense of the world and an entirely new sense of man, which we hardly ever suspected before. This lecture is bound to bring fresh courage, bound to bring peremptory reasons for hope, faith in the good, charity, and self-sacrifice. There may be among us some who are morally and spiritually exhausted, whose trust in the human value is going to pieces. This lecture is given especially for them and we have the hope that they will go home with a new key to that peace "which passeth all understanding," that peace which is, after all, the only real strength of man, the only intelligent aim of our civilization.

[Sir Arthur Quiller-Couch as Quoted in Public Opinion, London]

If the kingdom of God, or anything correspondent to it, be within us . . . why that and that only can be the light by which you or I may hope to read the Universal: that, and that only, deserves the name of what is.

Let me recall a passage of Emerson: "It is remarkable" (says he) "that involuntarily we always read as superior beings. Universal history, the poets, the romances, do not in their stateliest pictures . . . anywhere make us feel that we intrude, that this is for better men; but rather it is true that in their grandest strokes we feel most at home. All that Shakespeare says of the king, yonder slip of a boy that reads in the corner feels to be true himself."

It is remarkable, as Emerson says; and yet, as we now see, quite simple. A learned man may patronize a less learned one; but the kingdom of God cannot patronize the kingdom of God. . . .

[The Literature That Has Justified the Prophets]

In an article in The Freeman a contemporary writer is spoken of as "indulging of late in a rather grim exultation over the discomfiture of the prophets of a spiritual awakening in American literature. From Emerson to Carl Sandburg, as he says," the writer in The Freeman continues, "there has been a long line of enthusiasts predicting, in Whitman's words, that 'a great original literature is sure to become the justification and reliance (in some respects the sole reliance) of American democracy,' and he points out that, after a hundred years of this brave assurance, nothing has been actually produced to justify it." Continuing gloomily, the writer of the article arrives at the great requirement which it is the concensus of opinion should be the distinguishing characteristic of the great original literature that the prophets foretold. It must be such as to produce an "aristocracy of the spirit," they all say, which shall create standards for men to measure themselves by and set up "signposts that prevent men from wandering off the highway and getting their feet entangled in quicksands. This," the article continues, "is what Whitman meant by his 'promulgation and belief in such a class or order—a new and greater literatus order . . . fit to cope with our occasions, lands, permeating the whole mass of American morality, taste, belief, breathing into it a new breath of life, giving it decision.' . . . 'The aristocracy of the spirit' (he quotes now from another writer) 'is the only aristocracy of the world worth having, for any man may enter it. But it can only be worth having and worth entering if it exacts the highest from itself. If it is to disregard, as it must, alien attributes such as wealth and popular esteem, it must replace these by titles more arduous. In order that it may have the strength to refuse to compromise without, it must refuse to compromise within. To wink at any defection from its own standards, to tolerate slovenly thought or meretricious art, to admit for one single moment that the republic of the spirit is a place of license because it is largely screened from the public eye, to forget that the rejection of the standard of the market place is justified only by the acceptance of a far sterner morality—is to have forfeited the claim to present respect and ultimate allegiance."

In all this repudiation of the modern prophets the Christian Scientist sees merely a condition such as confronted Christ Jesus when the prophecies concerning the coming of the Christ were not recognized in their fulfillment. "Having eyes ye see not," he was compelled to say of the scribes and Pharisees, who, because they failed to see what they had outlined to appear as the Christ, could not grasp the spiritual idea or behold its manifestation. To them the Christ never came. So to these bewailers of the failure of the prophecies concerning the "great original literature" with its redemptive qualities, that which they hoped to see has not appeared, because of the limits of their outlining. But to the ever swelling multitude of students of Christian Science, with its textbook, "Science and Health with Key to the Scriptures," and Mrs. Eddy's other writings, and the other Christian Science literature, the prophets "from Emerson to Carl Sandburg" have been more than justified and the great original literature which was predicted is already well on its way to being universally accepted not only as the reliance of American democracy but of the world.

[From Tarbell's Teachers' Guide for 1920]

...

The Swedish government investigated drink as regards efficiency in its army. A test was held. A squad of Swedish infantrymen were sent on the range for rifle practice. Out of a hundred shots they made thirty perfect hits. A half hour later the same marksmen were called upon to shoot again. All the men felt refreshed from the beer. They were confident of making a better record. This time they made only four hits out of a hundred shots. That day that squad of riflemen shot liquor out of the Swedish army. Also, it is being shot out of all the armies in the world, slowly but surely. And for one purpose—efficiency.

Japan prohibits liquor in her army and navy. When Admiral Togo was in this country an American officer asked him how he accounted for the remarkable success of the Japanese over the Russians. Admiral Togo replied: "The cause is not hard to find. They drink vodka."

[From Zion's Herald] Take for example, the subject of Christian doctrine. Very

often as many purely logical reasons can be given in criticism

of a doctrine as in support of it. There seems to be as much justification for rejecting the teaching as for accepting it. Which account of the matter is true? There is no other way

but to take account of the effect of these opposite teachings upon life itself. The presumption of truth is certainly in

represent efforts to walk along it.

favor of that doctrine which tends to bring us to our highest and best. The final test of good doctrine is to be found in its fruits—the difference it makes in life.

Consider, too, how valuable this method is in dealing with such subjects as literature, popular amusements, companionships, or social customs. As many reasons may be given for rejecting a book as for accepting it, or for indulging in certain forms of recreation as for refusing to indulge, or for forming as for breaking certain friendships. How shall one arrive at the truth of these matters? There is no way except to appeal to life and see what books, what amusements, and what companionships do most to enrich life. Whatever makes us cynical, whatever takes the edge off the conscience, whatever weakens faith and lessens piety is bad. On the contrary, the opposite of all these must be good.

[From The Living Church]

There is undoubtedly a danger in laying stress, as we often do, upon the social character of our religion. We cannot escape from the fact that Christianity cannot leaven a mass except by leavening separate individuals. . . .

Spirituality is a positive and not a negative quality. It is an impelling force first to be and then to do. There is always danger that it will be presented too vaguely; that it will lack definiteness. Being and doing cannot be separated in true spirituality.

Church Notices

Boston, Mass.—The First Church of Christ, Scientist. Sunday services, 10:45 a.m. and 7:30 p.m.; Sunday school, 10.45 a.m.; Wednesday evening meeting, 7:30 p.m., in the church edifice, Norway, Falmouth, and St. Paul Streets. The church is open to visitors Wednesdays and Fridays from 10 a.m. to 5 p.m.

Reading rooms: Little Building, corner of Tremont and Boylston Streets (fourth floor); open daily, except Sunday and Wednesday, from 9 a.m. to 9 p.m., and on Wednesday from 9 a.m. to 5 p.m. National Union Bank Building (seventh floor), 209 Washington Street, opposite old State House; open daily, except Sunday, from 9 a.m. to 5.30 p.m. Coolidge Corner Building, 1316 Beacon Street, Brookline; open daily, except Sunday, from 9 a.m. to 6 p.m.

From the Clerk of The Mother Church

Church Tenets.—The tenets of The First Church of Christ, Scientist,—The Mother Church,—printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to Charles E. Jarvis, Clerk, 236 Huntington Avenue, Boston 17, Massachusetts.

From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account,

the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address. Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to Edward L. Ripley, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

Announcements

From The Christian Science Publishing Society

New Morocco Bound Vest Pocket Edition of the Textbook

Announcement is made of the publication of a new, morocco bound, vest pocket edition of "Science and Health with Key to the Scriptures," by Mary Baker Eddy.

This small volume, 3 1-16 by 4 5-16 inches, the same in size as issued for soldiers and sailors during the war, is bound in black morocco, limp, leather lined cover, round corners, gilt edges. Price \$3.50 for single copy and when included in lots of twelve or more copies of Science and Health in any or all bindings, \$3.25 each.

Orders for this edition will be filled in rotation.

Vest Pocket Bible

The Bible, bound in morocco, uniform in style with the vest pocket edition of Science and Health, is now on sale at \$4.75 a copy. Order by number 08X. Reading room discount 10 per cent.

New Pamphlets

Advance information will in future be given two weeks before each new pamphlet is placed on sale. This will replace the former system of standing orders.

New Pamphlets in German

There is now on sale a new German pamphlet entitled "Ein stilles, sanftes Sausen" ("A still small voice") containing the following articles reprinted from the Christian Science periodicals with alternate pages in English: "'The secret place of the most High,'" "Never too Late for Healing," "Treatment," "Cause and Effect."

There is also on sale a new German pamphlet entitled Läuterung (Purification) containing the following articles reprinted from *The Christian Science Monitor* with alternate pages in English: "Lusting Against Lust," "The Lust of Money," "The Lust of Power," "Looking Ahead," "Sincerity."

Price of each of the above pamphlets 5 cents a copy. Reading room discount 20 per cent.

"Rudimental Divine Science" for the Blind In English Braille

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U.S.A.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U.S.A.

Articles and Testimonies

Available articles from Christian Scientists and good testimonies from those healed by Christian Science are always welcomed for consideration by the Editors. Manuscripts for publication in the Sentinel and Journal, whether articles, poems, or testimonies, and correspondence relating thereto, should not be addressed to individuals, but to the EDITORIAL DEPARTMENT, THE CHRISTIAN SCIENCE PUBLISHING SOCIETY, Boston 17, U.S.A.

出土体自己

Many letters of appreciation of The Christian Science Montron and other Christian Science activities are constantly being received. These letters express what these activities mean to different individuals in various occupations and pursuits. The favorable comment that has been received on those already published indicates that they are welcome and helpful; therefore others will be published under the above heading. One such letter follows:

WISH to state to you my great appreciation for sending me the issues of your paper containing the star maps, which have proved so useful to me that I cannot get along without them. I am of a scientific turn of mind, being especially fond of botany, astronomy, meteorology, and geology. I have been interested in astronomy for many years, studying it from books, sky maps and charts, and from the sky itself. In learning the constellations every map I have ever used has been unsatisfactory except that in THE CHRISTIAN SCIENCE Monitor which you send me. I have two planispheres, which have the advantage that they can be rotated to show the position of the heavens at any time, but their great disadvantage is that they are drawn so that the constellations, especially the southern, are considerably distorted, the horizon is not circular, and the distance from the east and west points of the horizon to the north is very much shorter than to the south. (The same is true of the map published in -Your maps, however, correct these disadvanwhich I subscribe.) tages; and by preserving them from month to month I have a succession of maps which show the sky at nearly all times, and I use them almost exclusively. Also your maps are clearer, more intelligible, and more neatly drawn, with less to confuse one, than are the other maps. The accompanying articles are splendid and trustworthy in all scientific details, and I have kept every one of them. I find your paper as a whole very interesting to read.

WORKS ON CHRISTIAN SCIENCE

Written by MARY BAKER EDDY, Discoverer and Founder

of Christian Science and Author of its Textbook

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. Cioth, one to eleven copies inclusive (cloth only), each §3.00; twelve or more, each §2.75. Ooze leather, vest pocket size, single copy \$3.00; twelve or more, each §2.75. Morocco, vest pocket size, single copy \$3.50; twelve or more, each §3.25. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy \$4.00; twelve or more, each \$3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$5.00; twelve or more, each \$4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book), single copy \$6.00; twelve or more, each \$5.75. Large Type Edition, designed especially for the use of First Readers. Large type (18-point) on Oxford India Bible paper, bound in leather. Size 8 by 1034 inches. Single copy \$7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

FRENCH TRANSLATION. Alternate pages of English and French. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morozco, one to five copies inclusive, \$5.50; six or more, each \$5.25. Orders for the French translation in lots of six or more may include both bindings.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each \$5.50; six or more, each \$5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, French, and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1890, with revisions and additions. Cloth, single copy \$2.25; twelve or more, each, \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; twelve or more, each \$3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, Oxford India Bible paper, single copy \$5.00; twelve or more, each \$4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 366 pages, containing articles published in *The Christian Science Journal* and *Sentinel*, subsequent to the compilation of Miscellaneous Writines, together with historical matter pertaining thereto. Cloth, single copy \$2.25; six or more, each \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; six or more, each \$3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy \$5.00; six or more, each \$4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy \$6.00; six or more, each \$5.50.

Christ and Christmas. An illustrated poem. Cloth, single copy \$3.00; six or more, each \$2.50. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Unity of Good and Other Writings. One volume, containing Unity of Good. Rudimental Divine Science, No and Yes. Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco. limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science versus Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy \$1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy \$2.00; six or more, each \$1.75.

paper, single copy \$2.00; six or more, each \$1.75.

German Translation. Alternate pages of English and German.
Cloth, single copy \$1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy \$1.00; six or more, each 75 cents.

Unity of Good. This book lays the ax at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy \$1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy \$1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, alias Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point, American Braille, and English Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Rudimental Divine Science and No and Yes. In one volume, French translation, with alternate pages of English, vest pocket size. Blue cloth, gray edges, single copy \$1.25; six or more, \$1.10; blue leather, gray edges, single copy \$2.00; six or more, \$1.75 each.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science versus Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy \$1.50; six or more, each \$1.15.

Christian Science versus Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy \$1.50; six or more, each \$1.25. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign. Address orders and make checks payable to

NUMBER 14

"Loving chords"

SAMUEL GREENWOOD

No one can view the disturbed condition of the world to-day and recognize its hidden cause, without realizing that the remedy must come from a higher than human source. Mortals have been striving from the beginning to overcome the effects of error with error, but have only succeeded in adding discord to discord, until the human mind is hopelessly out of tune. The very evident conclusion is, that what the world needs and must have before its discords can be harmonized is the spirit of the Christ; that is, not less preaching but better practice; not a setting aside of the letter but more of the love of God shed abroad in human hearts.

In her Message to The Mother Church for 1902 (p. 9) Mrs. Eddy writes, "Loving chords set discords in harmony." Would that we to whom these words are addressed open our hearts to their obvious appeal, and ponder their wonderful import, until the love they call for becomes the inspiration of our motives and acts, for therein lies the remedy for every disturbing situation. There is no section of Christendom that needs not the balm of love upon its wounds, and its gentle ministry to bring peace to its contentions and allay its fears. This message of our Leader comes like an echo of that voice which stilled the storm, and called forth the sleeping Lazarus from his tomb. If we accept her inspired leadership of this great movement, and would walk in the way she never ceased to point out, we shall be found expressing the harmonies of love, otherwise our protestations of loyalty to her ideals amount to nothing.

Many years ago a young man sat at a table in a public reading room, feeling somewhat disconsolate, when some one in an adjoining room struck a few chords of such exquisite melody that they fell upon his troubled sense like "the touch of an infinite calm." The impression was so deep and lasting that he seems to hear these chords again whenever the incident comes to mind. He never knew who played the instrument, but the music came to him as the human refrain of that diviner harmony whose tones are ever sounding to the ears that are listening for them.

Is not our greatest blessing to-day the privilege to send out loving chords to still the discords which seem so insistent around us,-not the chords of a material instrument, but of loving thought? Like the quality of mercy, the outgoing of loving thoughts "blesses him who gives and him who takes." Our own salvation depends upon them. We cannot reach heaven by any other road, nor accomplish spiritual good by any other means. It is the breath of Christian living. Pray as hard as we may, study as hard as we may, deny error and affirm the truth as frequently as we may, yet we shall not be helped forward a single degree on the way to understand God without a loving spirit. Paul said, "If any man have not the Spirit of Christ, he is none of his," and his words apply particularly to Christian Scientists, for they acknowledge the infinitude of divine Love to an extent which the ordinary religionist does not. Unless we some time positively feel and give out the love we talk about, we shall spiritually freeze, for the letter apart from the Spirit kills by its very coldness.

We cannot expect the world to waken to the coming of the Christ if it does not feel the quickening touch of Christlike love. Human organizations are helpful only as they promote the kingdom of heaven on earth, and unify the thoughts and affections of men. Mrs. Eddy writes on page 81 of "Retrospection and Introspection," "The letter of the law of God, separated from its spirit, tends to demoralize mortals, and must be corrected by a diviner sense of liberty and light." In this demoralized sense, bigotry and fanaticism are easily mistaken for fidelity to a righteous cause, and superstition bars the way to wholesome and consistent progress. Are we aware of the danger that threatens us on this point? It was an extravagantly zealous obedience to the letter of the Scriptures in a particular instance, without a redeeming touch of the spirit, that executed innocent persons as witches on the free soil of New England; and the same animus is at work to-day in the intolerance that penalizes another for having a conscience of his own. Such conditions are strongly suggestive of the Inquisition, and, under whatever pretext they are employed, are inimical to the spirit of Christianity and not to be classified with it. It is true that Christianity has prospered on persecution, but it has never been guilty of it.

It should be self-evident that discord among human beings can be harmonized only by heavenly concord, not by involving them in further discords. The motto chosen for The Christian Science Journal by its Founder is the familiar text beginning, "For the weapons of our warfare are not carnal," therefore the Christian Scientist is not justified in using carnal weapons in the attempt to correct error, or to show his own faith in divine Principle. We must prove the rightness of our position by the fruits of the Spirit, not by the works of the flesh, if we would be known as practical Christians. Jesus gave this simple test by which to discriminate between his true and his untrue followers, "By this shall all men know that ye are my disciples, if ye have love one to another;" and Paul afterwards defined the nature and mode of operation of that love in language too plain to be innocently misunderstood or misapplied.

The influence of Christian Science is not human but divine, and it operates only through a loving quality of thought. It has no part nor lot in the ways of the flesh. Then wherefore the destructive propaganda directed against the Christian Science periodicals, through inside agencies? Who or what is it that would rejoice at the downfall of the Christian Science movement, and that is silently urging on this campaign of destruction and division? What is it that is desirous of crippling the activities which Mrs. Eddy instituted, under divine guidance, for the enlightenment and liberation of mankind? Is it not time for Christian Scientists to awake to the identity of the secret mental influences which are at work, and to cease carrying out the designs of their worst enemies?

Let us earnestly consider the significance of the para-

Copyright, 1920, by The Christian Science Publishing Society, Falmouth and St. Paul Streets, Boston, Massachusetts. Entered at Boston post office as according matter. Acceptance for mailing at a special rate of postage provided for in section 1103, Act of October 3, 1917, authorized on July 11, 1918.

graph on page 213 of "The First Church of Christ, Scientist, and Miscellany," from which the following is taken: "The natural fruits of Christian Science Mind-healing are harmony, brotherly love, spiritual growth and activity. The malicious aim of perverted mind-power, or animal magnetism, is to paralyze good and give activity to evil. It starts factions and engenders envy and hatred, but as activity is by no means a right of evil and its emissaries, they ought not to be encouraged in it."

The real spirit behind our periodicals is not the motives or acts of any group of workers, it is the spirit of Christian Science, the spirit of our Leader's years of love and selfsacrifice in giving them birth, and the enemies of Christian Science cannot succeed in smothering it, nor can the conflict of human opinions succeed in wholly suppressing its activity and influence. Are we to go on fighting against God, in the delusion that we are doing Him service? Do we expect to demolish error with a club? Or by what rule have boycotts become the divine means of adjusting disputes? If we believe that certain persons are in their wrong places, which is the more Christian and scientific way,—to hate them out, or to love them into their right places? We are in a position to know that resentment and animosity bear no relation to the divine Spirit, and can impart no healing touch; then why indulge them, since we also know that the measure we mete will be measured to us again, whether it be of good or of evil.

It is apparent that our periodicals are the only organs we have, and therefore the best we have, and an organ does not cease to be an organ simply because it is temporarily disabled. If such a condition exists, it is an appeal for healing, not for destruction. For a human being to sever all connection with his organs on the plea that they are not in a healthy condition, and no longer represent his legitimate estate, would benefit no one but the undertaker. It has been established that voluntary starvation of one's organs means suicide, and such a course should not commend itself to right thinking people. Let us cultivate the get-together not the put-asunder spirit, or we shall not bring out "the natural fruits of Christian Science Mind-healing." Let us not become so absorbed with the clamor of the human dream that we neglect to look up and see the wondrous vision of Christian Science, and what it holds for mankind; nor so intent upon the discords around us that we forget to strike the "loving chords" that will set them in harmony.

The carnal mind has been saying as of old, "This is the heir: come, let us kill him, that the inheritance may be our's." And it has again attempted to crucify the Christ upon the cross of human personality, with the belief of personal good on the one hand, and the belief of personal evil on the other; and between these two thieves, false belief would extinguish the spiritual idea. But after the crucifixion came the resurrection; and we can rejoice in the assurance that the efforts of evil will fail, as they have failed in the past, and that our beloved cause will emerge triumphant from this ordeal, without even the prints of the nails wherewith to establish any connection between personality and Principle.

Destroying the False Concept

MARY H. CUMMINS

WHEN Christ Jesus said, "Forgive, and ye shall be forgiven," he gave utterance to a metaphysical law the meaning of which, however much it may have been understood by the spiritually illumined who heard him, had certainly been hidden from the world for centuries until Christian Science again brought it to light. To forgive in the generally accepted meaning of the word is simply to condone, and such an attitude of thought accomplishes little or nothing either for the forgiver or the one forgiven. When, however, through an understanding of Christian Science one comes to perceive something of the meaning of forgiveness, he sees that not alone is it the greatest thing he can do for his fellow man but also the greatest thing he can do for himself. To forgive simply means to destroy in human consciousness the false concept with regard to another, to see God's man as the only man, and just to the extent that one does this for his neighbor is he winning his own forgiveness.

It is quite impossible to bring out the true concept of man in one's own human experience while holding the wrong concept with regard to others, and yet is not this what we frequently try to do? Similarly, it is not possible to bring out the true concept for one individual successfully while holding the false concept of another. Not until we free the whole world in our thought, not until we refuse to accept the false concept with regard to any one, no matter how unideal he may seem to be, shall we know what complete freedom means, for "with what measure ye mete it shall be measured to you again."

Some of us have known what it is to work conscientiously for days, yea, even weeks or months, to obliterate the false concept in some degree for ourselves and thus bring about a desired healing, and all at once we have awakened to the fact that what we had to do was to obliterate it with regard to some one else, to see this other in his true selfhood as a child of God. It may not have been an easy thing to do, but it was the mount of true vision which we had to ascend before we could win our freedom. That this other may not as yet have awakened to the truth of being, that he may still be enshrouded by the Adam-dream, does not alter the situation in the least so far as we are concerned. Our part is to see the true concept, God's man, and in thus forgiving our brother we shall find our own forgiveness; for it is a fact that as we allow ourselves to hold our neighbor in the thralldom of false belief we are really holding not him but ourselves, and in order to release ourselves we must release him also, for thus only do we fulfill the law of Love.

In reading those wonderful verses in the one hundred and thirty-ninth psalm which depict so graphically the ever presence of God, we do not always realize that they refer also to man, for Mrs. Eddy says, on page 306 of "Science and Health with Key to the Scriptures," "But man cannot be separated for an instant from God, if man reflects God." So whether in the heaven of human aspiration or in the hell of human degradation it is ours to find the true man of God's creating, who is lovable as the Father is lovable, pure as the Father is pure, notwithstanding sense testimony to the contrary. That which the world sees and accepts, that which the individual himself perhaps sees and accepts, is merely the lie about man, and our refusal to indorse this and call it true may be the very first blow which will strike off the shackles of his enslavement and set him free.

How divine is this method of salvation! What a wonderful thing it is to learn that in seeing the true man metaphysically, as the Father's beloved son, we help to free all. No man can really work out his own salvation without helping to work out his neighbor's at the same time. Students of Christian Science have sometimes been accused by those who know nothing of Christian Science of selfishly devoting themselves to the working out of their own problems. Nothing could be farther from the truth. That to which the student of Christian Science has devoted himself is the working out of the world problem, and he well knows that only as he

ing them.

[265]

false and call it true. We should refuse to indorse anything

but the basis stated by Mrs. Eddy on page 259 of Science and

Health, where she says, "The Christlike understanding of

scientific being and divine healing includes a perfect Principle

and idea,-perfect God and perfect man,-as the basis of

thought and demonstration." Thus we place ourselves unre-

servedly on the side of Principle, to become co-laborers with

Christ, and to prove here and now, to some extent at least,

that the only man who ever existed is the beloved son in

Rejoicing Evermore

PERCY A. WALKER

With a song in my heart I greet the day

For God's dear love shines on my way:

could sing if it became necessary to take up a task such as

that undertaken by Shadrach, Meshach, and Abed-nego, that

of standing for Principle to the extent of passing through the

furnace, and facing the hostility of the king and court.

The solution is of course simple. To these three men whose

thoughts were filled with Truth and Love there was no fur-

nace through which they must pass. They perceived the

image and likeness of God and the working of Principle,

whereas the Babylonian, being a materialist and looking to

matter for life and intelligence, saw only what appeared to

him certain destruction. These exponents of Principle had

the Mind of Christ, that consciousness of good in which fear,

hate, resentment, malice, destructive criticism, or pride had

no place. Consequently, when they were thrown into the

furnace, the flames had nothing in them to feed upon and

they could sing and rejoice, for divine Love was surround-

things to the truth, the pillar of fire became a symbol of God,

of light and protection, enveloping them and forming a par-

tition between them and the Egyptians so that their enemies

could not penetrate it or even see them. To humble followers

of Truth making their stand for Principle to-day, "the pillar

of the cloud by day" and "the pillar of fire by night" are just

as available now as they were in the wilderness to the Is-

piercing the darkness of mortal mind and obliterating the

claims of error, for darkness is merely a negation, the seem-

ing absence of light. In the same way the belief of life in mat-

ter in whatever guise it presents itself, be it sickness, sin, sor-

row, poverty, hate, malice, or even death, is nothing but the

supposed absence of God, the belief that God is not omnip-

otent, omnipresent, omniscient. As soon as one realizes the

allness of God the error is cast into the unquenchable fire, but

man never was and never can be anywhere but in the arms of

divine Love, inwrapped with the tender, loving care of the

Christ, the healing Life and Truth. Mrs. Eddy says on page

565 of Science and Health, "This immaculate idea, repre-

sented first by man and, according to the Revelator, last by

woman, will baptize with fire; and the fiery baptism will

burn up the chaff of error with the fervent heat of Truth and

Love." Instead of Shadrach, Meshach, and Abed-nego be-

coming the victims of injustice, intolerance, and terrorism,

they were instrumental in showing to Nebuchadnezzar, the

so fulfilling the law of Christ.

belps to free the entire world can he free himself. As a

matter of fact the greatest thing he can do for the world is to

begin to work out his own salvation scientifically, for in this

way he is doing his part to destroy the sum total of evil, and

If our demonstrations drag let us stop and take a mental

survey and see if we are allowing the false concept of man to

lurk anywhere, for so long as there is a peg upon which the

false concept can hang it will stick there and torment not the

one we are holding the false concept of but ourselves. Ani-

mal magnetism is only too ready to supply us with such pegs, any number of them, in fact, and we may call them Mr. this

or Mrs. that or Miss somebody else, but they are merely

pegs upon which we are hanging the false concept of man,

and the sooner we knock them out and let the falsity slip

away the better and happier it will be for ourselves and all

concerned. We are not dealing with sin, disease, or death, or

with imperfect man; we are dealing with the lie which claims

that these things exist, and until we begin to deal with the lie

in its entirety, as well as with the phases of it which present

themselves to our individual attention from day to day, we

are not fulfilling Love's demand with regard to our fellow man.

ingly be insnared into accepting the false concept, and self-

righteousness is one of these. Self-righteousness is always

ready to deny the falsity for itself but not so ready to deny

it for another. The stand-aside-for-I-am-holier-than-thou

attitude of thought accepts the false concept and calls it some

person or set of persons. Humility, meekness, love, com-

passion—the Mind of Christ—know no such selectiveness;

it is as ready and glad to deny the falsity for another as for

itself, for it looks forward confidently and rejoicingly to the

time when we shall "all come in the unity of the faith, and of

the knowledge of the Son of God, unto a perfect man, unto

If this, then, be the demand upon us even with regard to

those who are still bound by the belief of life in matter, what

shall be said of the demand with regard to those who we

know are striving for a greater understanding of Life as

Spirit? What are we doing when we allow ourselves to dwell

the measure of the stature of the fulness of Christ."

Many and insidious are the ways in which we may seem-

doing we are only exploiting the false concept and calling it

upon the unideal in such a one, to hold this up to view and call the attention of others to it? Malpractice may not be a pleasant word for us to face, but we had much better face it

than allow ourselves to be used by it, even ignorantly. Let us

think of this the next time we are tempted to say or write that which emphasizes the unideal in our fellow worker, for in so

Years ago the writer read a book which had to do with the life of a young man who went as a missionary to the Fiji

Islands. In process of time his wife joined him there and entered with him into the work. After a few days' sojourn in her new environment she asked him this question: "What

kind of people are your coadjutors?" To which he replied, "They are the Lord's people." "Does that mean," she asked, "that you will not discuss them, even with me?" "That means," he replied, "that I cannot discuss them, dear,

even with you." Many times in later years has this brief dialogue recurred to thought and proved helpful. How beautiful it would be if when our opinion is asked with regard to a fellow worker our reply should be such as would gently and lov-

the real man. How greatly such an attitude would help to free everybody concerned. When we thus decline to provide the false concept with the prop of personality, we cease to perpetuate evil, for to perpetuate evil is merely to accept the

ingly detach thought from the false concept and center it upon

king, the spiritual idea, which resulted in his making the declaration, "There is no other God that can deliver after this sort." Let us watch, labor, and strive more faithfully each day to radiate the truth, thereby becoming worthy of the name of Christian Scientists, in order that in the time of trial and temptation we may absorb none of the error of sinful belief, but be able "to quench all the fiery darts of the wicked."

"Thy kingdom come"

HELEN T. BELFORD

THE great prayer which Jesus left the world should prove a constant source of help and inspiration; but unless people are on guard the words of the Lord's Prayer come trippingly on the tongue and the mechanically repeated phrases offer mortal mind an opportunity to wander and stray into many fields of thought. On page 16 of "Science and Health with Key to the Scriptures" Mrs. Eddy gives for each separate clause of the prayer the corresponding spiritual interpretation. In the study of these, one may find absolute Christian Science. Take for example the expression, "Thy kingdom come." Can anything be more clear, more convincing, more healing than the spiritual sense which Mrs. Eddy gives of these three words, "Thy kingdom is come; Thou art ever-present"?

The belief that good is something elusive at best and obtainable only by a lucky chance, or that only by dying can one find God, has imposed itself on the human race for so long that it has been accepted as truth. So universal has the acceptance been that poets and philosophers have attempted to immortalize this false belief about good. Pope writes, "Man never is but always to be blest," and all this in the face of the countless assurances found in the Bible of the everlasting now of God, good. "For he saith, I have heard thee in a time accepted, and in the day of salvation have I succoured thee: behold, now is the accepted time; behold, now is the day of salvation."

The twentieth century has witnessed the destruction, almost in the twinkling of an eye, of many of the material kingdoms of this world. So wholesale has been their elimination that the very word itself has lost much of its original meaning, standing for a seeming substance that proved to be but shadow. In the time of Jesus the word kingdom stood for the acme of mortal power; it represented the state where matter was raised to the *n*th degree. As the vehicle for conveying thought then was either by parable or descriptive story, it was most natural for Jesus to use the word even when referring to the reign of Spirit, for thus could people more readily realize the omnipotence of God, which Jesus desired to convey.

It will hardly be denied that when breathing the words, "Thy kingdom come," mortal man all unconsciously pleads for God's kingdom some day to come. A student of Christian Science utters the scientific interpretation, "Thy kingdom is come; Thou art ever-present," with a heart full of gratitude that, as he has applied the truth Christ Jesus taught, and as given again to the world in Science and Health, he has been able to understand the statement of the seventeenth chapter of Luke, "The kingdom of God cometh not with observation: neither shall they say, Lo here! or, lo there! for, behold, the kingdom of God is within you." Again, a king or ruler was supposed to be, through virtue of place, all-powerful; his word was not to be gainsaid; his kingdom was his stronghold where his law was supreme. A student of Christian Science replaces the material belief with the spiritual idea of kingdom. He knows it for the place—and there is but one place—where God's law is all-powerful, ever present, here and now. God's law means the law of good, the law of harmony, infinitely unfolding to those who are awake to note its unfoldment.

World conditions at this particular time seem unsettled, full of activities that threaten and menace. Anarchy and misrule would seem to impose their reign on men. Mortals, confused and disturbed,—even the wisest,—seem to hesitate, knowing not what path to take or which way to turn. Students of Christian Science can view with perfect equanimity the sense testimony that would endeavor to terrify and alarm them. They should and do know that right where there seems to be the reign of destruction and disorder, God's kingdom is. A full realization of this will keep them in perfect peace.

"Thou art ever-present." This last clause of the interpretation contains the alpha and omega of Science. This ever presence of God, good, seems almost too wonderful to be true to the student when he first begins to think about it. The meaning of ever present is as infinite as God. David voices it in a psalm of praise: "Whither shall I go from thy spirit? or whither shall I flee from thy presence? If I ascend up into heaven, thou art there: if I make my bed in hell, behold, thou art there. If I take the wings of the morning, and dwell in the uttermost parts of the sea; even there shall thy hand lead me, and thy right hand shall hold me. If I say, Surely the darkness shall cover me; even the night shall be light about me."

Glimpsing the realization of the ever presence of God gives a new meaning to all life. The weary mortal lifts up his head and the sky takes on a deeper blue, the myriad tints frost gives to autumn glow and radiate with the wonder of it. The hills seem benignly to show Mind's infinity and eternality. Mind fills all space, leaving no room for the counterfeit that would express its presence by every form of error that spells woe and disaster to man. So, when one says, "Thy kingdom come," and breathes its scientific interpretation, he gives the lie to all that mortal mind would have him believe of the manifold pitfalls that are lying in wait to trap him and destroy him, whether it be the germs so dear to material medicine or conditions of industry that would affect his supply. This prayer becomes, then, no mere selfish petition for blessings or personal benefits, but a scientific statement of truth, whose utterance blesses alike all mankind; it is knowing that man dwells "in the secret place of the most High," and that secret place is God's kingdom, where the law of good is the only law there is, and "of his kingdom there shall be no end."

Finding a Home

NINA GRANT

AT a time when much is being said about the difficulty of finding a home, and suggestions of fear and worry seem very insistent, the writer has been greatly helped through studying the meaning of home as revealed in Christian Science. On page 254 of the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy, we find these words, "Pilgrim on earth, thy home is heaven; stranger, thou art the guest of God." Could there be a message more fraught with tender encouragement, the love that reassures and comforts, when all around there seem to be doubt and uncertainty? Man's true home, then, is heaven, and in Science and Health (p. 587) we have a very definite statement of what heaven really is: "Harmony;

the reign of Spirit; government by divine Principle; spirituality; bliss; the atmosphere of Soul."

It can easily be seen that heaven, therefore home, is not a particular locality; it is a state of harmonious consciousness which can be attained anywhere, at any time, and is in fact now awaiting all who are willing to think rightly. If we would claim and prove for ourselves the harmony of true home we must cease from mentally outlining it as a material structure of bricks and mortar, which we are going to obtain for a certain amount of money, and we must seek it in the only way anything harmonious and lasting can ever be found, through correct thinking governed by divine Principle, which we learn in Christian Science is Love, God. This will mean that we shall admit as man's consciousness only the truth, seeing man and the universe as the image and likeness of God, wherein is no imperfection, no anger, strife, or materiality. Thus we shall begin to experience the joy and peace that accompany all true thinking, for we shall be realizing man's unity with God, and proving it in our daily living.

Every time we correct a false suggestion that depicts God as less than All, the only cause, and man as other than the perfect effect of this cause, we are taking a forward step into our house, the "house not built with hands" but of divine Love's building. The reign of Spirit in consciousness means that we let God, divine Love, govern our thoughts and actions; that we joyfully welcome every opportunity to express kindness, tenderness, the real sympathy that uplifts and strengthens and longs to share good with all. Thus we shall entertain angels in our home, our consciousness, and we shall find that the unwelcome visitants of discord and disease have vanished from sight, blotted out by the love that casts out fear and all the ills that go with it.

The student of Christian Science is sometimes confronted with an insidious suggestion which whispers that he will have greater harmony or do better work in certain surroundings or in the company of certain persons, thus tempting him to look for good in material places and persons, rather than to God, Spirit. We need to remember that because God, good, is All, good is ever present, perceived as easily in one place as in another; that man is God's image and likeness, and if we honestly and sincerely seek the true man everywhere, we shall never be separated from the expression of the true likeness. We shall, in fact, find it here and now in proportion as we judge not according to the testimony of the physical senses but according to what we know to be facts; namely, that a perfect spiritual creator could not create anything material or imperfect.

Christian Science teaches that God is Mind, the creator of ideas, and if we remember that man as Mind's idea has been eternally dwelling in Mind, that he has no being apart from reflecting or expressing this Mind, we shall never fear homelessness, nor experience it, for this right knowing unfolds to us the permanent and true sense of home, in place of the material and therefore temporary sense. This may not mean that we shall never change our present human sense of environment for a different one, but it does mean that wherever right activity demands our presence there we shall find the joy and peace and harmony that constitute home awaiting us, for man, reflecting God, is never separated from right ideas, which include beauty, purity, and love; and knowing this, he is able to demonstrate the presence of these qualities in harmonious surroundings. As the psalmist said, "Because thou hast made the Lord, which is my refuge, even the most High, thy habitation; there shall no evil befall thee, neither shall any plague come nigh thy dwelling." On page 578 of Science and Health Mrs. Eddy has given us the spiritual

sense of the twenty-third psalm, the last verse of which reads, "Surely goodness and mercy shall follow me all the days of my life; and I will dwell in the house [the consciousness] of [LOVE] for ever." There is now man's true dwelling place, and there he is the loved and honored guest of God.

God's Supremacy

F. MAUD BROWN

In writing a play an author is free to place his characters in whatever circumstances he may choose for them. Shakespeare provided for Prospero an enchanted island with Ariel and all his satellites waiting to serve him; Jacques he exiled to the forest of Arden; and to Portia he gave a home at Belmont, where she lived in the state befitting a great lady. Clearly an author may do exactly what he will with his own play because there is nothing to thwart his wishes, and, if we do not press the comparison too far, this illustration may help us to understand better God's supremacy in His realm, which is the whole universe.

In Christian Science we learn that God is divine Mind, and Mrs. Eddy has said in "Science and Health with Key to the Scriptures" (p. 469), "We can have but one Mind, if that one is infinite." Thus we see that in the whole of God's universe there is no other mind to oppose His will. The human author's freedom faintly shadows forth God's omnipotence. As God creates and governs the universe, so it is; and because God is absolute good all creation reflects His goodness. It is a comforting thought that no power exists to pervert what God has made or to rob us of His blessing.

Man created by God is the exact opposite of the puppets of a human author. The real man dwells always as idea in the infinite Mind, for there is nowhere else for him to be, and he expresses continually the activity, the intelligence, the loving-kindness of God, who is his Life. We can only begin to understand man's oneness with God as we learn step by step in our daily lives to obey the injunction of Paul, "Let this mind be in you, which was also in Christ Jesus."

[Written for the Sentinel]

The Shepherds

KATHLEEN ANNETTE SCAMMELL

HARK! The angels softly singing,
Making bright the night with praise—
Pæans through the darkness winging:
Joy and peace be, all thy days!

How the listening shepherds wonder, Wrapt with awe at heavenly sound; Sweetest vision! Long they ponder On its messages profound.

Through the years their flocks attending, Month by month with patient care, Now the glory God is sending Flows revealed through faithful prayer.

Jesus, Way-shower, comes to lighten Human misery and woe! May the world with welcome brighten! Come, to Bethlehem let us go.

Let us, with due homage spoken,
Teach the meaning of this birth—
Worship and revere this token
Of divinity on earth!

Capacity

THE world, which uses all words with extraordinary slovenliness, does a greater despite to genius than to most of them. To hear the man in the street speak, it might be imagined that genius grows on every apple tree, whereas it grows only in the garden of the Hesperides. That, surely, is only what a certain great writer was endeavoring to get said in the well-known line, "Soul discontented with capacity." Landor's philosophy, however, knew little enough of soul, except from a purely sensuous human standpoint. If he had understood that Soul was, in reality, a synonym for Spirit, and so for God or Principle, he would have known that capacity could be nothing except the reflection of Soul or Principle, and that as this capacity broadens into a fuller reflection of Principle, it becomes just all there is of genius. That is what Mrs. Eddy means in writing, on page 313 of Science and Health: "Jesus of Nazareth was the most scientific man that ever trod the globe. He plunged beneath the material surface of things, and found the spiritual cause." The genius of Jesus, in other words, lay in his perception of spiritual realities: the genius of a Plato or a Shakespeare exists in an almost innate realization of the fact that, in spite of the evidence of their physical senses, there is something to be learned outside the realm of matter.

The genius of Christ Jesus, then, was a purely spiritual faculty which enabled him, in teaching, to personify the belief of life in matter as a liar, and so to dismiss human fatherhood, to the Jews, in the phrase, "Ye are of your father the devil, and the lusts of your father ye will do. He was a murderer from the beginning, and abode not in the truth, because there is no truth in him. When he speaketh a lie, he speaketh of his own: for he is a liar, and the father of it." Jesus, in other words, was the first man to perceive the utter unreality of matter. This enabled him to give the overwhelming demonstrations of its unreality manifested in walking on the waters, feeding the multitude, and overcoming death. Plato showed his genius, while living a sensuous life, in struggling to evolve a theory of mental causation based on the human mind; Shakespeare, in a poetry, instinct with an unconscious Platonism, which could express itself in lines like,

We are such stuff As dreams are made on; and our little life Is rounded with a sleep.

True capacity, then, is the capacity of Soul, the appreciation of the unseen things of Spirit. Material capacity is displayed in the exercise of the human intellect, divorced from any realization of the fact that, as a great scholar translates Paul's wonderful saying to the church in Corinth, "The things we see now are reflections from a mirror which we have to make out as best we can, but then we shall see realities face to face." As, that is to say, the individual gains even a slight understanding of spiritual things, he realizes that material phenomena are not by any means just

what they appear to the human senses, and thus, as his human capacity is supplanted by spiritual capacity, he begins more and more to comprehend the reality of being, to see, as Paul puts it, face to face. How this process develops, Mrs. Eddy has made clear on page 128 of Science and Health: "The term Science, properly understood, refers only to the laws of God and to His government of the universe, inclusive of man. From this it follows that business men and cultured scholars have found that Christian Science enhances their endurance and mental powers, enlarges their perception of character, gives them acuteness and comprehensiveness and an ability to exceed their ordinary capacity." Thus the genius of Christian Science manifests itself in demonstration rather than theory, in works rather than in words.

A man's true capacity, then, is summed up in his ability to understand spiritual things; and, obviously, the greater this understanding grows, the more fully he becomes able to demonstrate the genius of Christian Science in healing the sick and repeating the other mighty works performed by Christ Jesus. Consequently, the only way in which to increase his spiritual capacity is for the individual to strive for the Mind that was in Christ Jesus. He must set to work to destroy all that is unlike Principle in human consciousness, and only in the degree in which he is successful in this for himself can he hope to be of any assistance to his neighbors. He must take up arms against every form of mental sensuality, since only as the carnal mind gives place to the Mind of Christ can he hope to see realities face to face, and until he begins to accomplish that end, it must be impossible for him to see the perfect man instead of his sick and sinful counterfeit, and so to heal the sick and the sinner as Christ Jesus healed them. "In healing the sick and sinning," Mrs. Eddy writes on page 141 of Science and Health, "Jesus elaborated the fact that the healing effect followed the understanding of the divine Principle and of the Christ-spirit which governed the corporeal Jesus. For this Principle there is no dynasty, no ecclesiastical monopoly. Its only crowned head is immortal sovereignty. Its only priest is the spiritualized man. The Bible declares that all believers are made 'kings and priests unto God.'"

The ability to heal scientifically is, then, the test of a man's spirituality, and this spirituality exists in the ratio of his capacity to understand Principle, and to live in obedience to it. As a man's spiritual capacity increases, however, so must his capacity to transact his daily affairs. He will become a better statesman, a better lawyer, a better business man, a better writer. Mrs. Eddy states this quite plainly not only in the passage already quoted, but on page 166 of "Miscellaneous Writings": "This spiritual idea, or Christ, entered into the minutiæ of the life of the personal Jesus. It made him an honest man, a good carpenter, and a good man, before it could make him the glorified." There are people in the world still mesmerized with the old theological belief that a man's capacity for the affairs of the world should decay in proportion to his spiritual growth. But, as long as it is a man's business to give advice as a lawyer, to guide the affairs of state, to preach sermons, or to make boxes, his work should be better and more intellectually done, because he has realized that his intellectual and mechanical capacity is subject not to any supposititious material law, but is the reflection of infinite Mind. A bad carpenter could scarcely have been a good healer, and it is to be suspected that Paul made as good tents as he wrote good philosophy.

In a world evolved by spiritual causation, it is obvious

that capacity, like everything else, must be spiritual. But a supposititious world of counterfeit, sensuous impressions can exist only by reason of the fact that there is a real spiritual world to be counterfeited, and because the counterfeit owes its supposititious existence to the reality. Therefore was it that the writer of the book of Job made the Lord answer out of the whirlwind: "Where wast thou when I laid the foundations of the earth? declare, if thou hast understanding. Who hath laid the measures thereof, if thou knowest? or who hath stretched the line upon it? Where-upon are the foundations thereof fastened? or who laid the corner stone thereof; when the morning stars sang together, and all the sons of God shouted for joy?"

FREDERICK DIXON.

The Work of the Practitioner

THE one who asks such a question as that in Jeremiah, "Why is my pain perpetual, and my wound incurable, which refuse the be healed?" needs simply to experience the calm and grateful sureness of Christ Jesus, when he said before there seemed to be any change in the case which he was considering: "Father, I thank thee that thou hast heard me. And I knew that thou hearest me always." He knew that the presence and power of Principle are immediate, even when the human senses testify to the contrary. Thus he could rejoice in all circumstances, because he understood health and happiness as spiritual activity, sustained by Principle and forever untouched by any supposition of matter. This understanding constituted his practice of Principle and made him a truly good practitioner.

Each one who turns to and relies on divine Principle is, to that extent, a practitioner of Christian Science. The very reliance on infinite Mind for all good is right practice and is undeniably effective. In other words, each one's work is simply to turn in the right direction. "Therefore turn thou to thy God: keep mercy and judgment, and wait on thy God continually," as we read in Hosea, has been the exhortation of religion from time immemorial. Christian Science, however, shows one not only the necessity for turning but how to turn. That is why Mrs. Eddy wrote "Science and Health with Key to the Scriptures," and her other works, that she might show in every possible way, with metaphysically scientific exactness, how each one may turn to Principle and prove healing through the turning.

Strictly speaking, there is but one practitioner, but one who practices perfectly, and this One is the divine Mind, the source of all real action. Even the slightest turning to this Mind, to this Principle, is beneficial, for Principle is ceaselessly operating as right activity to take the place of any suppositional limitations or errors. The instant one turns to the sunlight, one gets the benefit of the sunlight. One does not even have to have faith in the sunlight or to understand the sunlight in order to enjoy its radiance. As Mrs. Eddy says in "Miscellaneous Writings" (p. 33), "It has not proved impossible to heal those who, when they began treatment, had no faith whatever in the Science,—other than to place themselves under my care, and follow the directions given. Patients naturally gain confidence in Christian Science as they recognize the help they derive therefrom." Yet on page 4 she also writes: "It is often said, 'You must have a very strong will-power to heal,' or, 'It must require a great deal of faith to make your demonstrations.' When it is answered that there is no will-power required, and that something more than faith is necessary, we meet with an expression of incredulity. It is not alone the mission of Christian Science

to heal the sick, but to destroy sin in mortal thought. This work well done will elevate and purify the race. It cannot fail to do this if we devote our best energies to the work." It is, of course, the absolute understanding of Principle which heals both sin and sickness; but this understanding is essentially simple and is truly ever present because it inheres in the omnipresent divine Mind. The one Mind is ever available as the one thoroughly efficient practitioner to whom to turn.

What are humanly called practitioner and patient are merely two states of human thought turning together to the one Principle and its expression. In this turning, the worst phases of such states of human thought necessarily vanish in the presence of the true idea, and the result is an improved condition for all concerned. Of course that state of belief which has been improved already by the disappearance of its worst phases serves to show with constantly increasing helpfulness how the turning in the right direction can go on. Yet, in the last analysis, it is always God, the divine Mind, infinite Principle, that does the healing work. The whole credit belongs to the one intelligence.

If, in any case, healing has not seemed to come about, the fault always lies with the so-called mortal mind, which supposes itself to be the opposite of the one omnipresent divine Mind, though this true Mind is really all there is and ever operative. The remedy for this fault is neither self-condemnation nor condemnation of another. Instead, it is to turn the more prayerfully to Principle in order that the very supposition of mortal mind as a cause or influence in any way may subside before the glorious allness of spiritual perfection. Patient consecration must invariably bring relief. In fact, the quiet determination to turn wholly in the right direction inevitably leads one to seek exactly the right help and to find it as the actual consciousness of harmonious activity. When two, called practitioner and patient, are earnestly turning together to the one Principle and its spiritual idea, it is foolish to blame either the one or the other for any seeming inadequacy. By ceasing utterly any such blame-placing, and by resolving instead to prove here and now that the divine Mind satisfies, one finds the very sense of inadequacy vanishing before the manifest goodness of God.

As Mrs. Eddy says in "The First Church of Christ, Scientist, and Miscellany" (p. 161): "Lest human reason becloud spiritual understanding, say not in thy heart: Sickness is possible because one's thought and conduct do not afford a sufficient defence against it. Trust in God, and 'He shall direct thy paths." Instead of thinking, "Why cannot I be healed?" or, "I do not see why I cannot be healed," one needs to spend his time and effort in learning, knowing, and proving why the true healing is possible and sure here and now, in spite of any seeming. The fact is that the one "I," the great I AM, is already whole, and is manifest as perfectly harmonious spiritual man in the divine likeness. To accept this truth is to practice Christian Science and to demonstrate it satisfactorily throughout experience. This is the right understanding, which is more than faith and which unfolds through the simple turning to Principle.

GUSTAVUS S. PAINE.

POR every task and enterprise
That he has finished or begun,
The man who's really worldly wise
Will pray each day, "Thy will be done"!

Testimonies of Healing

Christian Science was presented to me when I needed it, but not knowing its efficacious power for good, I resisted it until the assuring statement was made, "Why, don't you know it is right for God's man to have success?" and then a desire to hear all about it was gratified. The financial problem confronting me was solved, acute indigestion brought on by worry over this problem was healed, and business success followed. Through the study of Christian Science I have learned to know God as divine Principle, in accordance with whose laws problems of all kinds have been worked out satisfactorily. Many demonstrations for myself, family, and others have proved the truth of Mrs. Eddy's words on page 17 of Science and Health, "For God is infinite, all-power, all Life, Truth, Love, over all, and All."

The Christian Science periodicals are of inestimable value to me, especially *The Christian Science Monitor*, and a day without it means the loss of a spiritual feast. Gratitude is expressed constantly for our dear Leader, Mrs. Eddy, for the revelation of the truth in Christian Science, and its blessings in our lives. For twelve years or more it has been my only physician, potent to heal, to purify, sustain, and uplift thought. The following statement from Science and Health (p. 495) has always been most helpful, "When the illusion of sickness or sin tempts you, cling steadfastly to God and His idea."

(Mrs.) MINNIE W. BURLEY, Los Angeles, Calif.

4

Having so many times received help from the testimonies in the *Journal* and *Sentinel* I desire to share with others some of the blessings received through Christian Science.

My first attendance at a Christian Science service was indeed not of my own accord, but to satisfy the rather persistent but loving requests of a member of my family. I am sure no one was ever more averse to Christian Science than was I, having on numerous occasions very vigorously and openly condemned it. Consequently, it was with no little reluctance that I finally consented to attend a Wednesday evening meeting. I shall never forget that first meeting. Its personnel, many of whom I knew to be people very prominent in the political, business, and social affairs of the community, so impressed me that I was forced to acknowledge that Christian Science must surely be something to be desired. This admission was, however, quickly overcome by my strong prejudicial attitude. I well remember how at the opening of the meeting I had no desire to hear the words read from the desk, but each one seemed especially for me, and in spite of my resistance they sank to the very depths of my thought, causing a seeming stir that surely made me "of all men most miserable."

As the meeting progressed, however, I somewhat relinquished my inimical attitude and found myself really becoming interested, and at the conclusion I was forced to admit that I had had an entirely wrong concept of the teachings of Christian Science. Although conceding this, I was not desirous of talking further on the subject, as I was quite sure I could never become reconciled to it and really had no intention of attending a second meeting. Nevertheless the next Wednesday evening found me again in attendance and soon the midweek meeting was looked forward to with anticipation, for the testimonies were to me certainly "glad tidings." I soon found myself reading the Christian Science textbook. Finally I became aware that certain discordant physical conditions were no longer manifesting themselves.

For several years I had suffered from stomach trouble, the attacks seeming to be due to eating certain foods and to eating anything, however small a particle, before retiring. It was not an uncommon occurrence upon awakening to be unable to get out of bed until certain so-called laws of materia medica had been adhered to. I now found myself eating what and when I pleased, with no ill effects. I was also soon able to lay aside glasses, which I had worn for some time and which had seemed indispensable in my work. These conclusive proofs of the omnipotence of God were followed by many others. Even then I was not sure but that the benefits to be received from Christian Science were confined to the physical. Little did I realize what was in store for me. All this time there had been a purifying process going on in thought, of which I was seemingly un-What a revelation when I awakened to the fact that I had been released from the state of moral degradation in which Christian Science found me. Old desires and habits had passed away and the very thought of them was extremely unpleasant.

I had been continually aware of what would be the ultimate of my habits and had on several occasions tried hard to overcome them, but with little success; the moral courage was lacking. What the human will had failed to do the still, small voice of Truth had accomplished. Then it was that I was able to comprehend the reason of my discomfiture at that first meeting; it was the still, small voice of Truth which was transforming my thought and routing the colossal evils that had intrenched themselves there.

Naturally I am very grateful for the physical healings, but for the moral regeneration experienced I am unable to express my gratitude in words; only those who have been blessed similarly can appreciate what is in my heart. For this rich legacy of our devout Leader, Mrs. Eddy, and for every activity of the Christian Science church I am certainly very grateful. In the Orient where multitudinous evils and mesmeric suggestions attack from every side, our literature is surely a "shield and buckler."

W. E. SPERRY, Shanghai, China.

4

One of the most wonderful and complete healings came to us when I was young in the study of Christian Science and had not much knowledge of the letter. One afternoon in October, 1913, I received a telephone message that my husband, while riding his motorcycle, had been struck by an automobile and had been taken, in an unconscious condition, to a hospital about ten miles from home. Right here my work in Science began. Not a shadow of fear entered my thought, being kept out not by repeating a great many words, but by confidence in the course I was about to pursue. A few questions were asked and, if the answers indicated any fear or doubt as to the outcome, these were immediately denied mentally. Arrangements were made for me to go to the hospital as quickly as possible, for the surgeons there were waiting for my consent to operate on the unconscious patient. Clinging steadfastly and calmly to the thought that God is never unconscious, neither could His idea be, I finally reached the hospital, where relatives and friends who had arrived before me were waiting in speechless anxiety, all influenced by the doctors' verdict. I passed by them quickly and went unattended to the ward to which my husband had been taken, sought out his bed, and found him fully conscious. He answered my few questions, and I shall never forget the authority with which I spoke.

I then sought the doctor in attendance and introduced

myself. Yes; they were waiting for my consent to operate, as the skull had been fractured. So clear was my realization of the truth and firm the mental denial of this verdict that I simply heard his words, without consenting to what they were intended to convey. I said that I would not consent, meaning that it would not be necessary, and expressed the wish to take him home with me. He asked me if I realized the seriousness of the case, and said that if I insisted on taking him home I must sign papers releasing the hospital from all responsibility. I consented to leave him there, but requested that I be notified of any change in his condition. No change occurred. On Thursday, the next visiting day, I went to see him and he was so much better I could have taken him home, but did not have proper clothing for him. On Saturday he came home with very little evidence of his experience. Whether the skull was really fractured or not I do not know, por do I care. I never said it was, but this I do know—that after a thorough examination by doctors and nurses, the decision was a fractured skull, which must be trepanned, for which operation they stood ready and anxious,

A little over two years ago our son, then ten years old, was stricken with a very severe form of neuritis. He suffered intense pain and the cords of his neck and shoulders were so contracted as to cause his head to be drawn very much to one side. After this condition was relieved his muscles became just as relaxed as they had been contracted. He lost all control of his body, the right hand hanging perfectly limp and helpless. He could neither think nor speak intelligently. Through the untiring efforts of a faithful practi-

tioner, he is now perfectly well and strong.

Another healing through Christian Science was the complete removal of a growth on my eyelid. For a number of years this white growth had been slowly developing; its progress was so slow as to be scarcely noticeable, and as it did not cause me any pain I gave it little thought, even as a blemish. About two years ago a friend, noticing this condition, asked what it was. Then for the first time it occurred to me that I was not doing right in disregarding it. Just one treatment was given and the blemish and treatment were dismissed from thought. I did not think of it again until several months later, when I became conscious of its absence. I do not know when or how it disappeared; that is, whether it went suddenly or by degrees. I am very grateful for this experience, not only for the removal of the growth, but because it proved to me that my understanding of the truth had been rightly applied.

I am deeply grateful for the privilege of following the teachings of our revered Leader, Mary Baker Eddy, in the way our Master taught.—(Mrs.) CHRISTINA EMERY, Yonkers, N. Y.

It is with much gratitude to God and to Mrs. Eddy that I give my testimony, trusting that some one may be benefited by it.

Fourteen years ago I was badly affected by rheumatism. After giving materia medica a thorough trial, without results, I found myself one day sitting alone in my room wondering what I could do next. In a few moments my neighbor came to my door to ask me how I was. I answered, "Very, very bad." Then she said to me, "Have you ever tried Christian Science?" I said, "No; what is it?" She said, "It is the work that Jesus Christ did when he was on earth." I said, "I am willing to try anything that will relieve me of these pains." She then told me of a practitioner who lived across the street from me. I went to see her. She was very patient with me and told me how good God is, how He loves His

children, and then asked me if I felt that I could trust myself to His care. She gave me one treatment that afternoon and when I left her I was in perfect health, walking with ease, and without any pain whatever.

My desire is that this testimony may come to the attention of others who are suffering, and that they, too, may come to divine Love and get rid of all their burdens. I am grateful for the healing and for the spiritual awakening that came to me.—(Miss) LAURA B. TANNER, Poilland, Ore.

4

I wish to express my gratitude for the healing that has come to me through Christian Science. Eight years ago while in despair over an illness, which resulted in an operation and had left me with the fear that I might never be strong again, I asked for help in Christian Science. In these dark hours the ray of light that first came to me was, "Ye shall know the truth, and the truth shall make you free."

After a few months I began the study of the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mrs. Eddy, and as this great truth unfolded to me, I was healed. Later when I passed through a great sorrow, this truth which Jesus taught centuries ago and which Mrs. Eddy rediscovered and gave to the world in her textbook, again sustained me. The light came to me in the darkest hour, and I was healed. I was instantaneously healed of influenza and chronic constipation. For eight years Science and Health has been my only physician. I thank God for Christian Science, which is healing all mankind.—(Mrs.) Helen I. Hocking, Pasadena, Calif.

٠

I should like to express my gratitude for Christian Science, and hope it may encourage some one as I have been encouraged a great many times by reading the testimonies of others.

I am very thankful to God, and to Mary Baker Eddy, who by her honest, earnest effort found the truth that Jesus taught would make us free, then revealed it to us through the textbook, "Science and Health with Key to the Scriptures." Through the understanding I have gained by reading it I have experienced many physical healings, including neuralgia, headaches, colds, rheumatism, and the fear that something disagreeable was about to happen to me. I have learned in Science that nothing disagreeable can happen to man as the image of God, and in exactly the same proportion that I conquer fear by holding to this thought I am freed from the disagreeable things which seem to happen.

When we apply the truth earnestly with the understanding gained from the study of the textbook, we have the remedy for every ill. I am very grateful for all the literature, for the Lesson-Sermons, the Wednesday evening meetings, and the lectures, and to all those who have helped meto understand Christian Science.

(Mrs.) PEARL E. CLAUDIN, Peoria, Ill.

*

I should like to express my deep gratitude to God for the blessings I have received through Christian Science. In 1916, while doing military service on the frontiers, I contracted a so-called incurable disease and had to undergo treatment in the hospital. However, the trouble kept reappearing, and each time I had to follow medical advice. At the beginning of 1919 it manifested itself again, but in a much more alarming way. I resolved to turn away from materia medica, and to try Christian Science, which was not entirely new to me, for my parents are Scientists and often

.

. . .

spoke of this wonderful truth, but up to that time I had felt no interest in it.

I called on a Scientist who gladly guided my first steps in this teaching. After reading "Science and Health with Key to the Scriptures" by Mary Baker Eddy for two weeks, I saw my condition improve, and had also lost all desire for liquor and tobacco. Three weeks later I was completely healed. On two occasions attacks of grip were overcome in two days.

The most striking demonstration I have had, however, is the one following an accident to my right eye. The eye having been hit, I immediately tried to realize the truth, but did not do so clearly enough, as about ten days later the eye began to be painful. I immediately did further work as taught in Christian Science, but as the condition grew worse and fear increased, I decided to ask a practitioner for help. She began treatment at once and in a short time I was much relieved. I still could not see with that eye, but with constant and faithful work I overcame the fear and at the same time recovered my sight.

I cannot find words with which to express my deep thankfulness to God, and to Mrs. Eddy for her beautiful revelation of the truth. I am especially grateful for the moral uplift which I have received since beginning the study of Christian Science.

WILLY SCHAUFELBERGER, Geneva, Switzerland.

4

I send this testimony to the Sentinel to express my gratitude, and to help some one who is seeking the truth as I was. While reading in one of the periodicals an article, "Count Your Blessings," I thought how grateful we ought to be that we know a little of Christian Science. As I pause and count my blessings I know it would take many pages to recount them all, for we have had many in our family during the last eight years. The first healing was that of my sister, who had had a nervous breakdown and St. Vitus's dance for over a year, and was helpless when a practitioner called the first time; on the second visit my sister was up, doing some embroidering. She was in the hospital and the doctors and nurses could not understand her case, it seemed so remarkable to them. One week she was a complete wreck, helpless as a baby, the next week she was up and doing fancywork. We said nothing, but just took her home from the hospital, and thanked God, for we knew it was God who had healed her. Her healing has been permanent.

My mother has been healed of burns, scalds, coughs, colds, sprained ankle, a smashed finger, and many other things. She has also been able, just through reading the Christian Science periodicals, to lay aside glasses which she had worn for over fifteen years. She is now able to do all the work about the house and yard. I was healed of severe sore throat which I seemed to have every little while, summer and winter. Three years ago I had a very severe attack and I asked for help from a practitioner, which was very lovingly given. In three days I was completely healed and have not had a sore throat since. Last summer I was spending a few days with friends out of town, and was saved from drowning when caught in an undertow while swimming. My mother, who was at home, did not know I was in danger, but felt the need for doing protective work, through which I was saved, although she did not know she was working for me.

A short time ago, one evening while at work, I was closing a large window, and it slipped and fell on my arm and hand. The pain was so severe that it brought the tears to my eyes. I stood still, declared the truth, and then got ready to go home, although the arm and hand pained me very much.

I continued declaring the truth and did not say anything to any one. The next morning I was able to help my mother get out a large washing and then go to work the rest of the day. I was healed. I have also been healed of sick headaches, from which I had suffered as long as I can remember. For this and many other healings which I have had I am grateful. I am very, very grateful for the overcoming of a very bad temper. As I study Christian Science, and know the truth, I become more kind and loving, and more considerate.

I am grateful that I have been able to subscribe for all the periodicals, for there is so much good in every one of them that we cannot afford to miss one. When problems confront us we have but to pick up "Science and Health with Key to the Scriptures" by Mrs. Eddy, or the Journal, Sentinel, Monitor, or the Lesson-Sermons, and we always find what we are looking for, and just what we need to help us solve our problem.

My heart is filled with love and gratitude to God, and to Mrs. Eddy for showing us the way. I am also grateful to the loving practitioner who was ever ready to help us to see the light.—(Miss) Belle Bartell, Milwaukee, Wisconsin.

4

Although I have only known of Christian Science for a little more than one year, I feel impelled to express my deep gratitude for all that it has done for me. I heard of it in a time of great need, when the wail of Job, "Oh that I knew where I might find him!" had been constantly with me for many months, and I seemed not to be able to find any response. Christian Science has healed me of very severe nervous headaches which I had had for a great many years. It has also healed me of very great night terrors, from which I had suffered for over thirty years and which tendency was considered by a specialist to be inherited and incurable. These attacks left me in a very exhausted condition, with weak heart action.

Christian Science has changed me from a semi-invalid into a healthy woman. Through a sudden realization of the truth of the words, "They shall run, and not be weary; and they shall walk, and not faint," I am now able to walk more than I have ever done in my life and to stand any ordinary or even excessive exertion without fatigue. I am especially grateful for this healing, as I had been told by a London doctor that I must make up my mind that I could never be as strong as other people and must always rest a great deal and avoid getting overtired. There are many other benefits and healings that I have received through Christian Science and for them all I am deeply grateful, also for the loving help I have received along the way. Above everything, I am grateful for Christian Science as a demonstrable religion, and to Mrs. Eddy for teaching me to know God as divine Principle, which has enabled me to find a satisfying response to Job's desire in the words of Paul, which Mrs. Eddy quotes on page 304 of Science and Health, "Neither death, nor life, . . . nor things present, nor things to come, nor height, nor depth, nor any other creature, shall be able to separate us from the love of God."

(Mrs.) GLADYS O'CONNOR, Southsea, Hants, England.

4

I wish to express my gratitude for Christian Science. The application of the truth as taught in Christian Science has healed many diseases in our family, has equalized demand and supply and brought such happiness into our lives as was never before experienced.

Because of the wonderful change Christian Science had made in my life, a sister began its study, and her two chil-

rapid and permanent.

dren were sent to the Sunday school of The Mother Church.

During the following winter her little girl, aged seven, mani-

fested what materia medica designated as pneumonia. The

father was not interested in Science although willing that

his children should attend the Sunday school. A physician

was called and pronounced the case a very severe one, both

lungs badly congested, and the fever high. On the fourth

day the child seemed to be much worse and the physician

said it would be from seven to eleven days before the crisis

was reached and that she was a very sick child. After he

had gone the mother said, speaking more to herself than for

any one to hear, "I would like to call a practitioner." In-

the house while the mother went across the street to use a

neighbor's telephone, but the little girl's "Do, mother" was

too imperative to be resisted. Twenty minutes after the

arrival of the practitioner the child fell into a long and

quiet sleep, from which she awakened much improved.

When the physician called the next morning he was greatly

puzzled by her condition, declaring both lungs entirely free

from congestion, and the fever gone. Her recovery was

This is but one of the many reasons why we are grateful

to God, whom we have learned to know through Christian

Science, grateful to Christ Jesus the Way-shower, and

work as usual.

him to rely on God alone, and to know that He is omnipotent and omnipresent and that we are never for an in-

stant without His protecting care. Very recently I had another proof. My finger was caught in the clothes wringer and the nail completely torn off. I stopped only long enough

to bandage it in order to keep it clean and went on with my work, with no ill effects whatever, and a new nail replaced the old one in a very short time. About three weeks ago my husband experienced an instantaneous healing. He complained of feeling ill and had a very high fever, with

evidence of influenza. I read the Lesson-Sermon to him and repeated the ninety-first psalm. While I was reading he fell asleep and when he awoke, about an hour later, the fever had entirely left, and the following day he went to

It would require too much space if I were to tell of the many, many demonstrations we have had, but where there was formerly discord there is now harmony, and lack has been replaced by plenty. In fact, every need is met when Science is rightly applied. For the better understanding I

am gaining of the Bible I am grateful. My sincere desire is to live the life of a true Christian Scientist, to have more of that Mind "which was also in Christ Jesus."

I am thankful to God, the giver of all good, and deeply grateful to Mrs. Eddy for her unselfish and untiring efforts in rediscovering the truth and giving it to the world to free all mankind.—(Mrs.) Anna E. Juerling, St. Louis, Mo.

I wish to verify my wife's testimony in regard to my healing, which was instantaneous, and the help we both have received many times through the application of the truth as taught in Christian Science.—WILLIAM JUERLING.

With a heart filled with thankfulness to God for the truth as taught and demonstrated by Jesus, I can again voice my praise and thanks for the power of Truth over all evilsin, sickness, and death. My first healing, which was of appendicitis, in 1912, convinced me that "with God all things are possible." As Mrs. Eddy says in "Retrospection and Introspection" (p. 60), "Science saith to all manner of disease, 'Know that God is all-power and all-presence, and there is nothing beside Him;' and the sick are healed." In my first experience I was healed after all material remedies had failed. Not so the next time, for I knew that God is the only healer, and needed and wanted only His help. I realized that only the omnipotent God could possibly help me in this case. I was paralyzed, could not speak a word, my entire right side was helpless. My brain was also affected. It was only another opportunity to prove God's allness and the promise, "He shall call upon me, and I will answer him:

I will be with him in trouble; I will deliver him." This healing has seemed slow, but there are no regrets, for it has been three years more of spiritual thinking, gaining understanding and wisdom, -God's most precious gifts. I am so glad to be able to make our own demonstrations, so thankful for the good this blessed truth brings to humanity. I am grateful for our churches and literature, am grateful to all who are helping to establish the reign of peace and harmony on earth. I am grateful to God, to Christ Jesus, and to our dear Leader, Mary Baker Eddy.

(Mrs.) EMILY WOOLEY, Graham Station, Calif.

When I first heard of Christian Science I had come to the end of my resources. Physicians had repeatedly told me my trouble was incurable because it was inherited from my mother. I had never, since my earliest childhood, known what it was to be entirely without pain in my head, which resulted in other suffering and much hindrance to my daily duties. At this particular time I had had hay fever for the third time, and during sleepless nights I asked myself if God does indeed send afflictions, as I had been told, to purify His children. The name Christian Science had a restful sound. and I decided to try it although I did not know at all what it was. I sought the help of a practitioner, who assured me that God is the healer of all our diseases. My healing was complete. It is some years since this healing occurred, and I have not had the slightest return of either trouble.

Through the study of Christian Science I have learned to turn to the divine Mind with every problem, whether mental, physical, or financial. For the spiritually uplifted thought gained by knowing God as the only healer, and by realizing His constant care and protection, I owe never ending gratitude to Mrs. Eddy, who says in "Miscellaneous Writings" (p. 206): "Good is my God, and my God is good. Love is my God, and my God is Love."-(Mrs.) ANNA KROUGH, Minneapolis, Minn.

Signs of the Times

I"Fluxation"—The Christian Science Monitor, Boston, U.S.A., Oct. 30, 1920]

The dictionary definition of the word "fluxation" is: "The act of flowing or passing away." The scientific or real meaning of the word is given in the Revelation of John where we read, "And he that sat upon the throne said, Behold, I make all things new." Throughout all the activities of the world of to-day, in religion, in politics, in labor, in society, fluxation is the term which can most truly be

applied. Then, as revelation is the perception of eternal Truth, it must be God who is making all things new.

One must not, however, get confused by this picture from Revelation, which is but one instance of the imagery of Eastern figurative language. God is not a superman looking on at a material world of mortals, and improving His own creation by making all things new. God is divine Mind, and with Mind the process of making new is a purely mental process through which minds many are expelled before the understanding of the omnipresence of the one Mind.

The present "making anew" is explained by Mrs. Eddy in the Preface to "Science and Health with Key to the Scriptures," where we read, page vii, "The time for thinkers has come." Before the light of Christian Science was shed on the world, Christendom had very generally accepted an anthropomorphic or manlike concept of Deity. This was partly due to the fact that the Bible is an Eastern book written in a symbolic style quite unfamiliar to the Western mind, and partly to the great effect of the literature and art of the earlier centuries. This concept of a manlike God did not bear much investigation, in fact it was not supposed to be wise to inquire too closely into divine things. Until the advent of Protestantism the Christian world was practically undivided, and in the Protestant belief itself the main divisions have been about forms and ceremonies and questions of church government. No such revolutionary religious teaching as Christian Science has come to the world since the days when Jesus, at the well of Samaria, taught, "God is a Spirit: and they that worship him must worship him in spirit and in truth." When Mrs. Eddy wrote, "The time for thinkers has come," she had perceived that the peace of the world is the peace of ignorance that God, Spirit, is Mind, and that this Mind is ever making all things new through destruction of ignorance. She perceived that the world was, in a degree, ready to waken, and so the time for thinkers had

The less God, Spirit, Mind, is understood, the more easily can mortals be persuaded to rest peacefully on the thinking of others, and the awakening from the ideal of autocracy, where one man or one group does all the thinking, is bound to be heralded by the breaking up of this false sense of peace. Recognizing this, Jesus, long ago, announced his mission by saying, "Think not that I am come to send peace on earth: I came not to send peace, but a sword."

Thinking, of course, is not necessarily immediately correct thinking. It is never found in human experience that any one will immediately do anything correctly. By a process of practice he has to overcome his own fears and awake to the realization of the possibility of his accomplishing the task. It is not otherwise when the divine is displacing the human in understanding. First a man begins with misunderstanding, he has begun to think, he has awakened from the apathy of ignorance, but he has not yet learned to think correctly because he is afraid he cannot, and his fear is the cause of his misunderstanding. This is the state in which the teachings of Jesus appear as a sword, mowing down the wrong

thoughts in order that the thinkers may arrive at truth. This is the state of fluxation in which all things are made new. This is largely the present world problem, and it is necessary to see it as such in order to perceive the method of working out the solution. Christian Science alone contains this solution, for it teaches men to think correctly, that is, to understand God, Mind. In proportion as a man understands God-and God is Mind-his understanding is divine and his thinking becomes in the same ratio the reflection of the divine Mind. It is in order to arrive at this correct thinking that it becomes necessary to get rid of ignorance and fear. Christian Science thus classifies ignorance and fear as the so-called mortal or human mind, the cause and result of sense testimony, the mesmerism of misunderstanding, and shows how this may be proved untrue through the practice of divine understanding.

When misunderstanding seems most active one may feel reason for despair, but this reason is based on sense testimony. In reality it is the dawning of spiritual understanding which is revealing the misunderstanding in the process of destroying it. Fluxation, therefore, in a material world is not to be deplored but is to be looked upon as the activity of that sword of spiritual knowledge which was brought by Christ Jesus. The very possibility of misunderstanding predicates a truth which the misunderstanding is about. Christian Science shows that if there is a truth it must always have been true and must be true now. Thus the truth is the reality, the misunderstanding the unreality. It is therefore clearly of great practical importance invariably to take the side of Truth and never argue for misunderstanding or error. In Science and Health (p. 153) we read, "Neither sympathy nor society should ever tempt us to cherish error in any form, and certainly we should not be error's advocate." And again, on page 385, "You say that you have not slept well or have overeaten. You are a law unto yourself. Saying this and believing it, you will suffer in proportion to your belief and fear." Fluxation, therefore, can only be directed aright by steadfastly holding to scientific truth or divine understanding even though this necessitates denying the senses. Read in the light of Christian Science the Bible is the chart of right activity, but neither the Bible nor Science and Health can be correctly read through the mesmerism of the statement, "I cannot understand." The realization that divine understanding is the perception of Truth and is man's birthright, followed by the honest endeavor to grow in spiritual knowledge, will eliminate fear and destroy ignorance. Then error will have flowed or passed away, and given place to the truth.

["The Thought of God"-From Appleton (Wis.) Post-Crescent]

The thought of God is one which everybody has. We may not give God the same attributes nor call Him by the same name. We may not always believe that the thought has an answering reality, but there are few so crude and untaught but have moments when across the field of their mental vision there drifts the thought of God. Where does the thought come from? The race seems always to have had it. You can go back far enough to get behind some things, but you cannot go back far enough to find a world without the thought of God. The race started with it. Almost if not quite the first act of conscious being was a recognition of man's responsibility to the supreme power that rules the world.

Was it invented? In the annals of the race we have preserved the names of many of the sages and philosophers and statesmen and poets and pioneers and history makers and world builders, but you will search in vain for the name of the

man who invented the thought of God. Is it a superstition? If so, some of the cleverest people in the world have embraced it. The people who believe in God are not all fools and mental incompetents. If it be a superstition, what lends plausibility to the thought? It has lasted too long to be a lie. Is it an evolution? If so, from what has it been evolved? It was full-grown when first seen. It is not the kind of thought that is produced so much as the kind that produces. . . .

If, then, it is a thought that every one has, that the race has always had, if it is not an invention nor a superstition nor an evolution, where did the thought of God come from? The most plausible explanation is that it has come as every other high, straight, true thought has come-from reality. Back of the thought of God is the fact of God. Men have thought God because God is.

[From The Congregationalist and Advance]

... If the democratic nations of the earth have not at the moment available to their command "supermen," they must advance in the art of self-government. They must learn to keep themselves steady, self-controlled, clear-headed, rightminded, so that as many members as possible of the body politic, through their personal lives and activities, shall be contributing to the stability and prosperity of the nation and of all peoples. In the last two decades it has been the fashion to put propositions "up to" Roosevelt or to Wilson, or to some governor or premier, when those who submit these problems should be having an active and perhaps determining part in their solution. No man at the top can alter unchanging laws. No government can assume for its citizens the duty of the individual to labor, to save, to give, to serve, to make the citizen's full contribution to his nation and to

The other lesson is that if democracy has no plethora of great men, it must utilize those who through the traditional and orderly processes employed by free peoples rise to the top and are intrusted with power such as kings and emperors once wielded. As a son reveals the influence of the home in which he was reared, as a minister is largely what his parish makes him, so the President, the congressman, the governor, gains or suffers in proportion to the amount of active and genuine cooperation and confidence, or the lack of them, exhibited by those who put him in his office.

[British Opinion on the Mayflower Celebration as Reported in Public Opinion, London, England]

The Rev. Charles E. Raven, speaking in Westminster Abbey, said: "Here in this mother church of the communion from whose tyranny they [the Pilgrims] went into their voluntary exile, we, just three centuries later, are met to glorify God for their going, to commemorate before Him the wonder of their achievement, and to draw from their example whatever we can of heroism and sacrifice. For it is the triumph of these pioneers of religious liberty not only to have bequeathed their own spirit to their descendants and successors in the great land in which they found refuge, but also, like Greece of old, to have conquered their conquerors. . . . In their own day, like all prophets, they were rewarded with stones; now three great nations unite to honor their sepulchers, Great Britain and Holland and the United States; the Episcopal and the Free Churches can join without reserve in tribute to their memory."

"The Prime Minister . . . says: 'The Mayflower celebrations recall one of the most moving episodes in British annals. The measure of human progress is determined by the high faith and ennobling purpose of its pioneers. By the

alchemy of faith the Pilgrim Fathers transformed their experiences and sufferings into a great adventure. Its history and theirs will ever be a source of pride and inspiration to religious leaders in every land."

[From The Freeman]

. . . The French Deputy, André Paisant, in opposing discrimination against foreign workers in France . . . was wise enough to see that laws preventing the movements of persons or of merchandise across international boundaries cut both ways. In noting the exchange of laborers between countries he said, "We have need of each other. We give and receive. France needs economic expansion. After so many lost years she ought to throw her intelligence and her products on the world's market. It would be folly to choose such an hour jealously to close her frontiers." Each nation has its characteristic talents and serves as a school for the Their diversity binds them together in a unity "which can do more," said M. Paisant, "for the peace of the world than all of the armies combined, and humanity will find its equilibrium and harmony only when on wideopen frontiers men may pass freely over all roads, taking to each country and bringing back from it whatever may contribute to the well-being of the world."

Untroduction to a Christian Science Lecture in Hartford, Conn. 1

I think it may be said that there is to-day a universally increasing desire to know the truth about all things, that mankind is approaching this task with a more open mind, that such hindrances to progress as ignorance, pride, prejudice, and outgrown tradition are less in evidence, and that men and women are consequently reaching more intelligent conclusions. But Pilate's question, "What is truth?" is still unanswered in the inquiring heart of many a sincere seeker who will not be satisfied with half truths but must know the whole and final answer. I assume there are many such seekers in this audience to-night. To you and to all other inquirers we can gratefully say that Christian Science has completely answered that question and proved it in untold numbers of instances where its teachings have been applied. Speaking of this Mrs. Eddy has written in "Science and Health with Key to the Scriptures" (p. 149), "To-day there is hardly a city, village, or hamlet, in which are not to be found living witnesses and monuments to the virtue and power of Truth, as applied through this Christian system of healing disease."

[From New Brunswick (N. J.) Home News]

An Episcopal clergyman of Cleveland, passing his vacation in the East, said recently that the Christian Science church is growing rapidly all through the West. And a New York man, who is not a Christian Scientist, wrote to a Newark friend last week: "I have been going around Sundays to different churches this summer and have found a handful assembled at the various services, but at Christian Science meetings hardly a seat to be had, and during the week, on Wednesday evenings, just the same. How shall we account for this?"

The above inquiry is answered as follows by the Christian Science Committee on Publication for the State of New Jersey in the Newark (New Jersey) Call:-

"The same question has been asked by many others, and seems to be of general interest, hence I am emboldened to ask space for its answer.

"Christian Scientists believe, and are convinced, that the

- 1

Word of God, rightly declared and understood, brings healing to all who meekly and gladly 'hear what the Spirit saith unto the churches.' They also have living and abiding faith, based on demonstration, that every Christian Science church service is a means of healing for all who are humbly seeking to know God aright. Consequently Christian Scientists attend all their church services, not as a duty or a task, but as a joyous opportunity. They look forward eagerly and gladly to each service as a further step toward the knowledge of 'the kingdom of our God, and the power of his Christ.' Jesus declared, 'And this is life eternal, that they might know thee the only true God, and Jesus Christ, whom thou hast sent.' Christian Scientists are seeking, therefore, a present demonstrable knowledge of 'life eternal,' and also to manifest and express their gratitude and gladness for ever increasing proofs that God's will is 'done in earth, as it is in heaven.' They are also impelled to go gladly to each one of their services that they may aid in imparting to others the healing gospel by which they themselves have been so abundantly blessed."

[Business Without Fear]

Recently one of the world's great rubber concerns printed upon the front cover of its principal "house organ" an article written by B. C. Forbes for the Philadelphia Public Ledger, that dealt with business readjustment in the United States. The following is an extract: "A reader sends this Biblical sentence, which he commends to American business men at this time: 'For God hath not given us the spirit of fear; but of power, and of love, and of a sound mind.' Let America cast out the 'spirit of fear' and bring to bear upon the different transition problems now being grappled with a 'sound mind,' and it will be found that the troubles we are now suffering were but a necessary chastisement to fit us for the work that lies ahead of us, a work of infinite importance to the well-being not only of the people of this country but the whole world." That this great corporation with offices all over the world should have deemed the article so important, and that such expressions should find their way into the press is still another sign that the public is awakening to what are the real factors in business.

[Whisky to Be Stricken from the Supply List of the Medical Department of the United States Navy]

A recent order issued by the Surgeon-General of the United States Navy is highly significant of the attitude of the Navy Department toward the enforcement of prohibition. Drunkenness among the sailors both in times of peace and of war has always been more or less of a problem for this department, so that it is not surprising to find strenuous efforts and stringent methods being used to prevent it by those in authority. That which is significant is the positiveness with which the naval medical officers declare that whisky is not necessary for medicinal purposes. Although they modify this with an "except in rare cases," they propose to use in these rare cases only ethyl alcohol. The Naval Department also states that alcohol used aboard ships for other than medicinal purposes is being denatured by the addition to it of certain substances which make it undrinkable and that the containers are being plainly labeled "Poisonous." In the Surgeon-General's order he says:-

"Only in cases of extreme emergency will the purchase of intoxicating liquors be permitted, and each purchase shall be made the subject of a special report to the bureau, stating clearly the circumstances that necessitated such a purchase.

"No further use of whisky will be made from naval medical supply depots except hospitals, and when the supply now on hand at the supply depots has become exhausted, no further purchases will be made and whisky will be stricken from the supply table of the medical department of the navy.

"When whisky is no longer available and a medical officer deems alcoholic stimulation absolutely essential for the preservation of human life, the ethyl alcohol obtainable from supply officers may be prescribed and used in such vehicle as the individual cases demand."

[Are the Ethics Taught by Christ Jesus Applicable to Present and Future Ages?]

The remarks of the Reverend R. J. Campbell, speaking at the Church Congress at Southend, are summarized in The London Times in part as follows:—

"It was often insisted that our Lord did not teach a complete ethic . . . that he could not have foreseen the new and complicated moral obligations thrust upon us by modern industrialism and the far-reaching potentialities of international democracy. There were those apparently who could find more in Aristotle than in Christ for the regulation of citizenship and an adequate understanding of its responsibilities. But before admitting this, it was requisite to ask ourselves how far modern economics and the relation of employer and employed represented a transitory stage in human development, and whether they were likely to be superseded by something which relegated material self-interest to the background and stressed another motive of action than the mere desire to accumulate.

"'I will hazard the suggestion,' he said, 'that the future will show a great change in these respects, a change so tremendous as to be almost inconceivable to our generation. Society cannot long continue as at present organized; there are mighty forces at work to bring about its disruption and reintegration on other lines. . . . Will our thoughts always continue to center round questions of what we shall eat and what we shall drink and wherewithal we shall be clothed, or can we be set comparatively free from the contemplation of these things to address ourselves to the more fundamental problem of the kind of manhood that is best worth cultivating? Dimly we can discern a new world struggling to the birth wherein shall be none of the present occasions of bitter strife and mutual antagonism, nothing to make wars about, a world wherein production shall be easier and vastly more abundant, and the passion of acquisitiveness be unknown because without point or meaning."

[From The Living Church]

The most heathen province in the world is not found in China or Africa but in the great field of international relationships. This mighty realm of diplomacy, this great province of international relationships, is further removed from Christianity than the most heathen province in the most heathen country in the world. It has scarcely been touched by Christianity. Pagan ideals and pagan forces prevail here. . . . A great Scotch preacher in a sermon on "The War and the Sin of the World" says, "The war was brought on by the sin of a Christendom which has limited Christ's authority to private occasions and has excluded it in social and public affairs."

[From "Universities and Social Progress"—by J. L. Stocks in The Pilgrim]

It is only recently, after great provocation and with much reluctance, that society has brought itself to take any responsibility whatever in the matter of education. . . . And when society assumed responsibility for education, it con-

fined itself at first to the elementary stages and only very gradually and tentatively widened its sphere of operation. There is still no university which is formally owned by the [British] nation and administered by its servants in its name. . . . We must put aside our skepticism and our timidity, and frankly adopt a definite and simple idea. We must nationalize our universities and establish free university education, as we have already established free elementary (and to some extent secondary) education. . . . We must open the universities to educational promise and nothing else, and accustom ourselves to the notion that there is one thing that money will not buy, namely, education beyond a certain age for boys not fit to profit by it. This and nothing less, it seems to me, is the program demanded by the times in which we live. ... The adoption of this solution would of course involve the abolition of the distinction between scholar and commoner. It would also involve considerable expenditure on grants to students from public funds. But the cost is a mere detail, and with details I do not propose here to deal. It is with the question of principle, of justice, that I am alone concerned. I want to know whether this principle seems to others as plain as it seems to me. If so, let us go to work to realize it.

[From The Independent]

If one hydrogen atom weighs 1.008 how much will four of them weigh? From what we have been taught in school we should answer 4.032, but it seems that this is wrong. For four hydrogen atoms go to make up one atom of helium and that weighs just four and no more. So Professor Eddington of Cambridge University told the British Association for the Advancement of Science at the recent Cardiff meeting. Here is a loss of weight of one part in 123, yet no matter has escaped in the process. All that has escaped is heat or electricity, in short, radiant energy, mere waves in ether—if there is any ether. This looks like experimental proof that matter and energy are the same or at least incontrovertible.

[From The Christian Science Monitor]

When education is presented to the child in a way that causes him to love to think, and to think on those phases of life which are most important, truly that education should be commended. An educator recently defined education as a "challenge to the boys and girls to master problems, and to resolve to continue to master problems throughout the future." This definition should be heralded abroad, for there has been altogether too much looking upon education in the light of being "compulsory." Many children have resented being driven to school, whereas if the emphasis had been placed upon the joy and zest of thinking something through to achievement, these very children might have come to prize schooling as their golden opportunity, as a great privilege. Surely that word "challenge" affords a very desirable interpretation of what education should be made to be in the eyes of children, of parents, and of every one.

[From "The Prison as an Asset"-by Spencer Miller, Jr., in The Survey]

The report of the Prison Survey Committee of New York State, which has just been made public will be the subject of a comprehensive legislative program to be presented at the next session of the state legislature. If evident need was the moving cause of legislative action, the program, as outlined, of turning the prison department of the state from a liability into an asset would certainly not fail of favorable action. What distinguishes the report as a whole is the fact that for

the first time the prison problem of a state is approached as an educational problem. More than half of the report . . . is devoted to vocational and educational training. . . . In the words of the committee, "The main purpose of the committee, in all its investigations and recommendations, is the creation and development of incentive to right living." This positive point of view is emphasized the more when it is pointed out that, throughout the entire report, there is hardly a mention of punishment either as a word or as a method of prison administration. It is a far cry from the prison as a place of punishment to the prison as a center of educational training.

[From "Compromise in Religion"-in The Contemporary Review]

Nor should we forget such people as the Anabaptist peasant Hans Ber of Alten-Erlangen, of whom Professor Lindsay wrote in his "History of the Reformation." "He rose from his bed one night and suddenly began to put on his clothes. 'Whither goest thou?' asked his poor wife. 'I know not, God knoweth,' he answered. 'What evil have I done thee? Stay and help me to bring up my children.' 'Dear wife,' he answered, 'trouble me not with the things of time. I must away, that I may learn the will of the Lord." Here we have the case of a man who . . . had, unconsciously to himself, come to think of communion with God as an experience out of relation to the lives of those around him. . . . And in every age there have been those who have mistaken the ignis fatuus which exhales from an unteachable mind for the serene light of the Holy Spirit. . . . There must be what we call "give and take." Yet, even so, the problem is to find a justification for either side yielding what it holds to be good. The solution of this problem is the principle—no surrender of good unless in order to receive better. When this is clearly recognized, the next step is to discover a method by which we may operate.

For the church and the Christian that method must be found in Christ. We begin with the historic Jesus. Now any close study of the gospels shows us that our Lord had no incoherent mind. There was a unity in his thinking. It had that quality of greatness which coalesces all the levels of depth. Nor have men ever been able to convict him of any schism between conscience and conduct, showing at any point of his nature separation from the Father. On the contrary, that tremendous zeal for God, which his disciples discerned in him, revealed a ceaseless flow of the spirit of the Father into his manhood.

[Changing Theories of Philosophers Concerning Mind and Matter]

The disintegration of the belief that the human mind can be considered apart from matter is becoming increasingly evident. C. E. M. Joad, writing in *The Nation* on the recent meeting of the Oxford Congress of Philosophy, remarks that philosophy is becoming more and more barren and is obviously losing ground to psychology, meanwhile:

"The province of psychology itself is threatened by the allencroaching advances of physics," he says, and continues:
"Mr. Russell develops a thesis which asserts that the fundamental stuff of the universe consists of collections of particulars, conceived after the manner of the physicists, except
that they are neither material nor mental in substance, but
of a neutral make-up. These particulars may be arranged in
different groupings. In one grouping they appear as mind,
and form the subject matter of psychology; in another as
matter, when they become the subject matter of physics.
But since they are the same particulars arranged differently
in both groupings, the laws which govern their movements

are the same. Instead, therefore, of two different sciences, psychology and physics, we have one science which consists of the study of the laws governing the grouping of particulars. Thus philosophy passes by way of psychology into physics, and the gulfs separating these branches of knowledge, once regarded as distinct, are in a fair way to be bridged.'

In brief, then, the only difference between what is called mind and what is called matter is in the arrangement of some exceedingly vague and difficult-to-imagine bodies which are "neither material nor mental in substance." It is interesting to compare this conclusion with the statements of Mrs. Eddy in "Science and Health with Key to the Scriptures": "Matter and mortal mind are but different strata of human belief. The grosser substratum is named matter or body; the more ethereal is called mind. This so-called mind and body is the illusion called a mortal, a mind in matter. In reality and in Science, both strata, mortal mind and mortal body, are false representatives of man."

The congress which had listened to this new theory had a discussion on "The Relation between Religion and Ethics," which, says Mr. Joad, "was remarkable for the fact that all the symposiasts, except one, took the view that morality was both meaningless and impracticable unless founded on the belief of an omnipotent Deity."

Church Notices

BOSTON, MASS.—The First Church of Christ, Scientist. Sunday services, 10:45 a.m. and 7:30 p.m.; Sunday school, 10.45 a.m.; Wednesday evening meeting, 7:30 p.m., in the church edifice, Norway, Falmouth, and St. Paul Streets. The church is open to visitors Wednesdays and Fridays from 10 a.m. to 5 p.m.

Reading rooms: Little Building, corner of Tremont and Boylston Streets (fourth floor); open daily, except Sunday and Wednesday, from 9 a.m. to 9 p.m., and on Wednesday from 9 a.m. to 5 p.m. National Union Bank Building (seventh floor), 209 Washington Street, opposite old State House; open daily, except Sunday, from 9 a.m. to 5.30 p.m. Coolidge Corner Building, 1316 Beacon Street, Brookline; open daily, except Sunday, from 9 a.m. to 6 p.m.

From the Clerk of The Mother Church

CHURCH TENETS.—The tenets of The First Church of Christ, Scientist,-The Mother Church,-printed on folded sheet for use of the branch Churches of Christ, Scientist, with space for printing their authorized forms of application for membership or extracts from their by-laws, can be had at seventy-five cents a hundred. Orders will not be taken for less than one hundred and postage stamps should not be sent in payment.

Correspondence relative to the tenets or to membership with The Mother Church should be sent to CHARLES E. Jarvis, Clerk, 236 Huntington Avenue, Boston 17, Massachusetts.

From the Church Treasurer

PER CAPITA TAX.—The annual per capita tax for which the Manual provides is due from members of The Mother Church June 1, but may be paid at any time during the year. The per capita tax of those who unite with the church in November is reckoned from the preceding June, for that is the beginning of the church year. If a remittance for church dues exceeds the amount required to balance one's account, the surplus will be credited for the current year, unless otherwise directed by the sender.

Please remit by postal or express money order, bank draft, or check. Do not send paper money through the mail unless registered.

Please advise promptly of any change in name or address. Per capita taxes and contributions to the Real Estate Fund and to The Christian Science Benevolent Association Fund should be sent to EDWARD L. RIPLEY, Treasurer, 236 Huntington Avenue, Boston 17, Massachusetts.

Announcements

*** * ***

From The Christian Science Publishing Society

New Morocco Bound Vest Pocket Edition of the Textbook

Announcement is made of the publication of a new, morocco bound, vest pocket edition of "Science and Health with Key to the Scriptures," by Mary Baker Eddy.

This small volume, 3 1-16 by 4 5-16 inches, the same in size as issued for soldiers and sailors during the war, is bound in black morocco, limp, leather lined cover, round corners, gilt edges. Price \$3.50 for single copy and when included in lots of twelve or more copies of Science and Health in any or all bindings, \$3.25 each.

Orders for this edition will be filled in rotation.

Vest Pocket Bible

The Bible, bound in morocco, uniform in style with the vest pocket edition of Science and Health, is now on sale at \$4.75 a copy. Order by number 08X. Reading room discount 10 per cent.

New Pamphlets

Advance information will in future be given two weeks before each new pamphlet is placed on sale. This will replace the former system of standing orders.

New Pamphlets in German

There is now on sale a new German pamphlet entitled "Ein stilles, sanftes Sausen" ("A still small voice") containing the following articles reprinted from the Christian Science periodicals with alternate pages in English: "The secret place of the most High," "Never too Late for Healing," "Treatment," "Cause and Effect."

There is also on sale a new German pamphlet entitled Läuterung (Purification) containing the following articles reprinted from The Christian Science Monitor with alternate pages in English: "Lusting Against Lust," "The Lust of Money," "The Lust of Power," "Looking Ahead," "Sincerity."

Price of each of the above pamphlets 5 cents a copy. Reading room discount 20 per cent.

"Rudimental Divine Science" for the Blind In English Braille

Orders for the above-named book from reading rooms in Great Britain should now be sent direct to The Christian Science Publishing Society, Boston 17, U.S.A.

Orders for, and correspondence relating to, the publications announced herein should be addressed to The Christian Science Publishing Society, Boston 17, U.S.A.

+ + + Articles and Testimonies

Available articles from Christian Scientists and good testimonies from those healed by Christian Science are always welcomed for consideration by the Editors. Manuscripts for publication in the Sentinel and Journal, whether articles, poems, or testimonies, and correspondence relating thereto, should not be addressed to individuals, but to the EDITORIAL DEPARTMENT, THE CHRISTIAN SCIENCE PUB-LISHING SOCIETY, Boston 17, U.S.A.

Letters of Appreciation

10:

EX:

1:

...

112

St.

137

Many letters of appreciation of The Christian Science Monitor and other Christian Science activities are constantly being received. These letters express what these activities mean to different individuals in various occupations and pursuits. The favorable comment that has been received on those already published indicates that they are welcome and helpful; therefore others will be published under the above heading. Extracts from such letters follow:

I CONSIDER THE CHRISTIAN SCIENCE MONITOR the best paper in the United States of America. It is so full of real news and so absolutely clean, that one cannot help but admire it. I wish it were in every home in the land; then the thought of the people would be filled with the truth about world conditions, thereby helping to establish the brotherhood of man.

PLEASE send me THE CHRISTIAN SCIENCE MONITOR for six months. I cannot tell you how much I missed it while traveling through the country the past two months.

THE CHRISTIAN SCIENCE MONITOR is fast becoming a friend of our once antagonistic family. The Children's Page helps to brighten the lives of a number of neighboring children, who otherwise would lack much wholesome food for thought. My manifold book is waxing fat with treasure,—gems of poetry and art,—all from the Monitor and invaluable to me.

HAVE just returned from a year's stay in Europe and shall be glad to read THE CHRISTIAN SCIENCE MONITOR again. It is a pleasure for me to testify to its excellent information, discretion, and courage, and to its importance as a world newspaper in our present crucial times. I am not a Christian Scientist.

WORKS ON CHRISTIAN SCIENCE

Written by MARY BAKER EDDY, Discoverer and Founder

of Christian Science and Author of its Textbook

Science and Health with Key to the Scriptures. In one volume, 700 pages. The original, standard, and only textbook on Christian Science Mind-healing. Cloth, one to eleven copies inclusive (cloth only), each \$3.00; twelve or more, each \$2.75. Ooze leather, vest pocket size, single copy \$3.00; twelve or more, each \$2.75. Morocco, vest pocket size, single copy \$3.50; twelve or more, each \$3.25. Full leather, stiff, beveled boards, gilt edges, same paper as in cloth binding, single copy \$4.00; twelve or more, each \$3.75. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$5.00; twelve or more, each \$4.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, silk sewed, heavy Oxford India Bible paper (wide margins, large-sized book), single copy \$6.00; twelve or more, each \$5.75. Large Type Edition, designed especially for the use of First Readers. Large type (18-point) on Oxford India Bible paper, bound in leather. Size 8 by 1034 inches. Single copy \$7.50, with a discount of 25 cents each when included in an order for twelve or more copies of Science and Health, and in any or all of the different bindings.

FRENCH TRANSLATION. Alternate pages of English and French. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, \$5.50; six or more, each \$5.25. Orders for the French translation in lots of six or more may include both bindings.

GERMAN TRANSLATION. Alternate pages of English and German. Cloth, one to five copies inclusive, each \$3.50; six or more, each \$3.25. Pocket edition, printed on Oxford India Bible paper. Morocco, one to five copies inclusive, each \$5.50; six or more, each \$5.25. Orders for the German translation in lots of six or more may include both bindings.

Orders for Science and Health in lots of twelve or more at quantity prices may include English, French, and German editions, and different styles of binding.

Miscellaneous Writings. A book of 471 pages, containing articles published in *The Christian Science Journal* from 1883 to 1896, with revisions and additions. Cloth, single copy \$2.25; twelve or more, each, \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; twelve or more, each \$3.75. Levant, divinity circuit, leather lined to edge, round corners, gilt edges, siik sewed, Oxford India Bible paper, single copy \$5.00; twelve or more, each \$4.75. Orders for Miscellaneous Writings in lots of twelve or more may include any or all of the different styles of binding. No discount will be allowed on orders for twelve books which include both Science and Health and Miscellaneous Writings.

The First Church of Christ, Scientist, and Miscellany. A book of 366 pages, containing articles published in *The Christian Science Journal* and *Science*, subsequent to the compilation of Miscellaneous Writings, together with historical matter pertaining thereto. Cloth, single copy \$2.25; six or more, each \$2.00. Morocco, limp, round corners, gilt edges, Oxford India Bible paper, convenient for pocket, single copy \$4.00; six or more, each \$3.75. Orders for six or more may include the two styles of binding.

Concordance to Science and Health. This work contains about eighty thousand references (more than ten thousand words being indexed), also an index to the Marginal Headings, and a list of the Scriptural Quotations in Science and Health. 611 pages, stiff morocco cover, single copy \$5.00; six or more, each \$4.50.

Concordance to Mrs. Eddy's Published Writings Other Than Science and Health. It contains 1103 pages, and is published only in Bible paper edition, with stiff morocco cover. Single copy \$6.00; six or more, each \$5.50.

Christ and Christmas. An illustrated poem. Cloth, single copy \$3.00; six or more, each \$2.50. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Unity of Good and Other Writings. One volume, containing Unity of Good, Rudimental Divine Science, No and Yes, Retrospection and Introspection; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Christian Healing and Other Writings. One volume, containing Christian Healing, The People's Idea of God, Pulpit and Press, Christian Science versus Pantheism, Messages of 1900, 1901, 1902; uniform in style with the pocket edition of Science and Health. Morocco, limp, round corners, gilt edges, heavy Oxford India Bible paper, single copy \$3.50; six or more, each \$3.25.

Church Manual. Containing the By-laws of The Mother Church. Cloth, single copy \$1.00; six or more, each 75 cents. Pocket edition, morocco, limp, round corners, gilt edges, Oxford India Bible paper, single copy \$2.00; six or more, each \$1.75.

German Translation. Alternate pages of English and German. Cloth, single copy \$1.00; six or more, each 75 cents.

Retrospection and Introspection. A biographical sketch of the author; the way she was led to the discovery of Christian Science; its fundamental idea and growth. Library edition, cloth, 95 pages, single copy \$1.00; six or more, each 75 cents.

Unity of Good. This book lays the ax at the root of error, elucidating and enforcing practical Christian Science, thus affording invaluable directions for all true Scientists. Library edition, cloth, marbled edges, 64 pages, single copy 60 cents; six or more, each 45 cents. Pocket edition, leather covers, single copy \$1.00; six or more, each 75 cents.

Pulpit and Press. A unique work, of importance in the history and to the readers of Christian Science; containing the message or sermon written for the dedicatory service of The Mother Church, January 6, 1895, and scintillations from the press of that occasion. Library edition, cloth, 90 pages, single copy \$1.00; six or more, each 75 cents.

Rudimental Divine Science. A brief and concise statement of Divine Science, alias Christian Science, in the form of questions and answers. Pebbled cloth covers, gilt top, 17 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 50 cents; six or more, each 35 cents.

PRINTED in the New York point, American Braille, and English Braille systems of type for the use of the blind, single copy 50 cents; six or more, each 40 cents.

No and Yes. A brief statement of very important points in Christian Science. Pebbled cloth covers, 46 pages, single copy 32 cents; six or more, each 25 cents. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Rudimental Divine Science and No and Yes. In one volume, French translation, with alternate pages of English, vest pocket size. Blue cloth, gray edges, single copy \$1.25; six or more, \$1.10; blue leather, gray edges, single copy \$2.00; six or more, \$1.75 each.

Messages to The Mother Church. Including in one volume, 94 pages, Christian Science versus Pantheism, and the Messages of 1900, 1901, and 1902. Library edition, cloth, marbled edges, single copy \$1.50; six or more, each \$1.15.

Christian Science versus Pantheism. The Pastor Emeritus' Message delivered at the Communion Season in The Mother Church in Boston, June, 1898. A clear and strong refutation of the charge that Christian Scientists are pantheists. Pebbled cloth covers, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1900. Paper covers, deckled edges, 15 pages, single copy 25 cents; six or more, each 20 cents.

Message to The Mother Church, June, 1901. Paper covers, deckled edges, 35 pages, single copy 50 cents; six or more, each 38 cents.

Message to The Mother Church, June, 1902. Paper covers, deckled edges, 20 pages, single copy 50 cents; six or more, each 38 cents.

Christian Healing, and The People's Idea of God. Two sermons in one volume, 36 pages. Library edition, cloth, marbled edges, single copy 55 cents; six or more, each 45 cents.

Christian Healing. A sermon delivered in Boston. Paper covers, 20 pages, single copy 20 cents; six or more, each 17 cents.

The People's Idea of God. A sermon delivered in Boston. Paper covers, 14 pages, single copy 20 cents; six or more, each 17 cents.

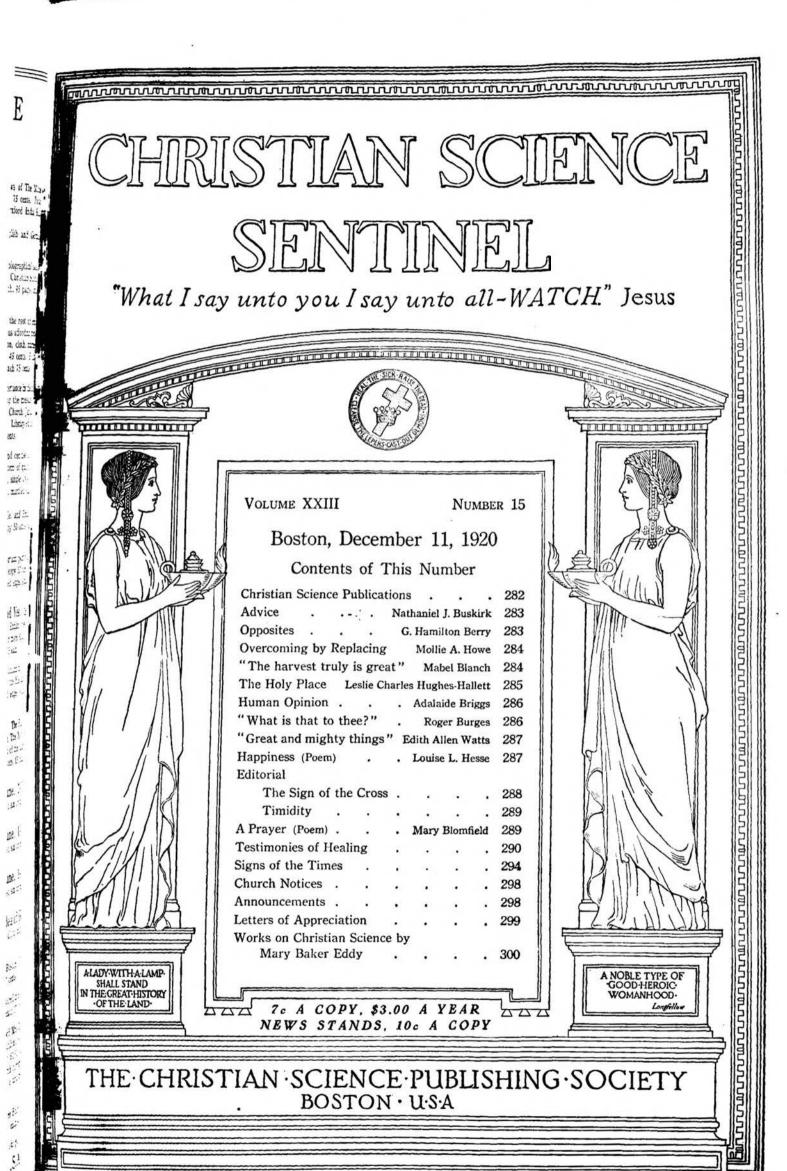

Poems. This volume of 79 pages includes all of Mrs. Eddy's hymns, also her earlier poems which appeared in various publications from forty to sixty years ago. Specially bound. Single copy \$1.50; six or more, each \$1.25. Published also in morocco, limp, round corners, gilt edges, uniform in style with the pocket edition of Science and Health. Single copy \$3.00; six or more, each \$2.75.

Feed My Sheep. Solo. Words by Mary Baker Eddy, music by Lyman F. Brackett. Single copy 50 cents; six or more, each 40 cents.

The foregoing prices cover all charges for express or postage on shipments either domestic or foreign. Address orders and make checks payable to

Christian Science Literature

"Science and Health with Key to the Scriptures" and all other published writings of Mary Baker Eddy are listed on the outside back cover page of this Sentinel.

Christian Science Sentinel

Established, 1898, by Mary Baker Eddy. Published weekly, containing articles, editorials, and special current information regarding the Christian Science movement, also testimonies of healing. Subscription price, payable in advance, postpaid, to all countries: One year, \$3.00; six months, \$1.50; three months, 75 cents; single copy, 7 cents.

The Christian Science Journal

Founded, 1883, by Mary Baker Eddy. This monthly magazine is an official organ of The First Church of Christ, Scientist, in Boston, Massachusetts, Contains articles, editorials, and testimonies of healing, a directory of Christian Science Churches, Societies, and Reading Rooms; also in the January, April, July, and October issues a list of Christian Science Practitioners and Nurses. Subscription price, payable in advance, postpaid to all countries: One year, \$3.00; six months, \$1.50; three months, 75 cents; single copy, 30 cents.

The Christian Science Quarterly

Founded, 1890, by Mary Baker Eddy. Published January, April, July, and October. Contains the Lesson-Sermons which are read at the Sunday services throughout the year in all the Christian Science churches. Printed in English, English-Dutch, and English-German. English edition published also in vest pocket size. Subscription price, payable in advance, postpaid, to all countries: One year, \$1.00; single copy, 25 cents.

The Christian Science Monitor

An International Daily Newspaper. Founded, 1908, by Mary Baker Eddy. Daily, except Sundays. Its own world-wide news service is supplemented by the service of the Associated Press and of the United Press Association. Complete in its departments; unique in its Home Forum page. Full page of editorials dealing truthfully and fearlessly with vital questions of the day. Subscription price, payable in advance, postpaid to all countries: One year, \$9.00; six months, \$4.50; three months, \$2.25; one month, 75 cents; single conv. 3 cents copy, 3 cents.

Le Héraut de Christian Science

Established, 1918. A periodical published monthly in French, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, postpaid to all countries: One year, \$2.00; six months, \$1.00; three months 50 cents; single copy, 20 cents.

Der Herold der Christian Science

Authorized, 1903, by Mary Baker Eddy. A periodical published monthly in German, with alternate pages in English, containing articles and editorials on Christian Science, and testimonies of healing. Subscription price, payable in advance, postpaid to all countries: One year, \$2.00; six months, \$1.00; three months, 50 cents; single copy, 20 cents.

Subscriptions will begin with the next issue after the receipt of the order: Information regarding bound volumes of the weekly and monthly periodicals will be given upon request.

NUMBER 15

Advice

NATHANIEL J. BUSKIRK

THE need for accurate advice and unfailing direction in the working out of the problems common to human experience is seen by students of Christian Science to be imperious and universal in its scope. When an individual is confronted with the rock-ribbed obstacle of some so-called personal problem, which seems to baffle the understanding, naturally the person begins to cast about mentally for a stable source of advice and information, to which he can go with assurance that the answer to his mental query will be unerring.

To the mortal, baffled and perplexed by the wide diversity of human opinions as regards his particular problem and the correct manner in which it should be solved, the query arises from the heart, which borders upon a wail of despair, "Oh that I knew where I might find him!" as voiced by Job of old. In other words, where is there an unfailing source of unerring direction and infinite protection to be found? That such a source exists, we are assured by the glowing promises of the Bible as to God's guidance and protection for His own. It becomes more and more evident with the unfolding of life experience that this source must exist somewhere apart from and above and beyond mere human counsel and advice, for have we not all taken our seemingly most perplexing problems to intimate friends for their guidance, and found that the way which we should take under the particular circumstances was still not perfectly clear? Such experiences prove unmistakably that the guiding power of God is wholly apart from mere human premises and opinions. On page 454 of "Science and Health with Key to the Scriptures" Mrs. Eddy says: "Love inspires, illumines, designates, and leads the way. Right motives give pinions to thought, and strength and freedom to speech and action." Cannot these statements of truth be properly taken as admonitions to all to seek to discern through spiritual understanding, instead of from human personality, the exact way to take? ask for advice from human personality, how many times does the person to whom the inquiry is addressed know all of the facts and the innermost sacred desires of the heart? Surely very seldom. Therefore not knowing all the facts, how can any person render a perfectly intelligent judgment? Yet is this not precisely what we are trying daily to do, and expecting others to do,-that is, to decide momentous problems correctly without being in full possession of the facts? What would we think of the consistency of the judge of a court who would hand down a decision in a case without taking into consideration all of the facts? The attempt to decide momentous issues of individuals and nations from ex parte knowledge has resulted and will result in dire consequences.

In the relation of God to His idea, the idea is responsible to God alone for its motives and aims, which means that we are not divinely bound to solve our life problems in the way which might seem best to others. This freedom of initiative should not be construed to mean, however, that we are at liberty to use our own willful pleasure in the solving of our

problems, but means that when an individual has as his life motive the manifesting of God, good, he has the divine right to take the course which seems the best to his highest understanding of good, irrespective of the divergent and conflicting opinions of mortals. It has been said, and said with propriety, that a man's conception of God can be no higher than his conception of good, but it should be at least always that high. Our present perception of spiritual Truth may not be the absolute, yet if each person will consistently follow the leadings of his highest sense of good, what a wonderful amount of good would be bestowed upon humanity. We cannot if we wish take the second step before the first, inasmuch as Christian Science is a perfectly orderly demonstrable Science, which must develop its proofs with mathematical accuracy from the more simple demonstration to the more complex.

Among the leading statesmen of the world there is seen an international policy growing and gaining favor, to the effect that each nation, great or insignificant, should be accorded the right to determine its own destiny, untrammeled and unhindered by other nations. It is recognized by the advocates of this policy that undoubtedly mistakes would be made by the different nations if left to their own initiative in the working out of their own ends; yet it is the conviction of the upholders of this policy of international freedom that the evil inuring from this source would be small in comparison with the dire consequences of one nation imposing its policies upon another, with no regard to the differences in the conditions of the two nations. This aforesaid basis, it seems, may be applied to equal advantage between individuals, as well as nations, and if followed consistently we shall not find ourselves unduly concerned in the way in which the "other person" is endeavoring to work out his problem, nor will we be seeking to ascertain how the "other person" thinks we should work out our problem, but each will seek to learn directly and not indirectly from divine Mind just what to do.

Opposites

G. HAMILTON BERRY

THE teaching of Christian Science is in direct opposition to the evidence of the material senses. Now the opposite of truth is a lie, and that material sense testimony is not the truth can be easily understood by any one who will pause for a moment to realize that the sun does not rise in the east and travel round a stationary globe, neither do railway lines meet at the horizon as they appear to do. As a matter of fact, all the evidence of the material universe is based on a lie, and being a lie, must eventually be exposed and vanish into its native nothingness. This lie or false belief is that there is an evil mind or counterfeit of Principle, claiming to be a creator, claiming to produce a material man and to control the destiny of individual men and nations.

The process of exposure is revealed throughout the Bible, but culminates in the piercing denunciation of Jesus the Christ: "Ye are of your father the devil, and the lusts of

Copyright, 1920, by The Christian Science Publishing Society, Falmouth and St. Paul Streets, Boston, Massachusetts. Entered at Boston post office as accord-class matter. Acceptance for mailing at a special rate of postage provided for in section 1103, Act of October 3, 1917, authorized on July 11, 1918.

your father ye will do. He was a murderer from the beginning, and abode not in the truth, because there is no truth in him. When he speaketh a lie, he speaketh of his own: for he is a liar, and the father of it." Similarly in this present age, Mrs. Eddy has restated in her book, "Science and Health with Key to the Scriptures," the all-inclusiveness of God, good, and the consequent nothingness of any opposite manifestation, however real it may seem. In this connection pages 96 and 97 of this wonderful volume will repay careful study by the earnest student of Christian Science. From these two pages in particular, it is plain that this process of exposure is even now taking place. The irresistible force of Principle, Truth, is uncovering the last hiding places of error, whose helpless scream assumes new phases as its final destruction takes place. This period will be of longer or shorter duration according to the consecration or complacency of each individual to whom the message of Truth to this age has come.

The mirror of mortal mind reflects nothing but discord; strikes, murder, war, unrest, famine, want, and woe seem to be everywhere present, and to those uninstructed in Christian Science the outlook seems black indeed. It is of course just here that a knowledge of this demonstrable Science is of the greatest value to the student who is steadfastly trying to apply its teachings in his daily life, as it enables him to rejoice in the fact that God, divine Love, is everywhere present, and that man, the image and likeness of perfect Love, knows nothing unlike harmony. He knows the opposite of what sense testimony would present as real, and holds unfalteringly to the eternal facts as revealed in Principle, namely, the actual ever presence of harmony, continuity, life, peace, and abundance, because God, good, fills all space, has all power, and never created anything unlike good.

Whenever a claim of mortal mind comes up for recognition, we can unfailingly turn to its opposite, reject the lie, and rejoice in the knowing of the truth which sets free. No lie can come up for acceptance that cannot be obliterated by Truth; and since Principle is infinite, in this infinitude will always be found the correct statement or opposite of any falsity. As Mrs. Eddy says on page 260 of Science and Health: "If we look to the body for pleasure, we find pain; for Life, we find death; for Truth, we find error; for Spirit, we find its opposite, matter. Now reverse this action. Look away from the body into Truth and Love, the Principle of all happiness, harmony, and immortality. Hold thought stead-fastly to the enduring, the good, and the true, and you will bring these into your experience proportionably to their occupancy of your thoughts."

Overcoming by Replacing

MOLLIE A. HOWE

A PATIENT once said to a Christian Science practitioner to whom he had gone for help on a certain problem, "I have worked and worked, but have not seemed to be able to overcome the difficulty." It occurred to the practitioner that it might be well to inquire a little into the method of work referred to, and the reply came: "Why, I said, This is not true, this is not real, it cannot hurt me, and so on." On a little further inquiry it developed that the student seeking help had simply denied the error that seemed to be confronting him, with no thought or effort on his part of replacing it with the fact or truth concerning the specific error.

The question was immediately asked of this student, "How soon would the belief of two plus two equals five be healed by keeping your gaze fixed on the blackboard picture

of this false conclusion, and declaring at the same time, It is not true, it is not real, it cannot hurt the problem,—without recognizing that right where the claim of the five seemed to be, only one thing could exist as the result of two plus two, namely, four?" Mrs. Eddy tells us on page 151 of Science and Health, "All that really exists is the divine Mind and its idea, and in this Mind the entire being is found harmonious and eternal. The straight and narrow way is to see and acknowledge this fact, yield to this power, and follow the leadings of truth."

It is obvious that when the simple procedure of seeing and acknowledging the fact, instead of merely denying the error was clearly discerned by the student, he was healed, for he recognized that the physical claim of inharmony (the five of two plus two) never existed in consciousness, and the way to demonstrate this in experience was not to spend his time in denials of error alone, but in knowing the truth, as Jesus said; and we would do well to preface the text that every student of Christian Science loves, as the Master did when he said, "If ye continue in my word, then are ye my disciples indeed; and ye shall know the truth, and the truth shall make you free." For it is plain that the "continue in my word" does not imply the simple negativing of error, but the recognition and affirmation as well of the truth, in other words, knowing it.

On page 418 of Science and Health Mrs. Eddy again says: "Truth is affirmative, and confers harmony. All metaphysical logic is inspired by this simple rule of Truth, which governs all reality." Right here the young student of Christian Science may ask, "How am I to know the fact concerning physical inharmony or disease?" Again we turn to our textbook, "Science and Health with Key to the Scriptures," and on page 129 we find these words: "If you wish to know the spiritual fact, you can discover it by reversing the material fable, be the fable pro or con,—be it in accord with your preconceptions or utterly contrary to them." So step by step the earnest seeker for the truth will find in the Bible, together with Science and Health and Mrs. Eddy's other writings, an answer to every problem that may seem to confront him, and a joy in solving each problem. His every effort in this right direction will result in progress and unfoldment, for he is bound to prove through each experience that there is nothing to obscure God and His idea.

"The harvest truly is great"

MABEL BLANCH

CHRISTIAN SCIENCE is the true source of help to every one who is seeking a rule by means of which one may demonstrate a life in accord with that of the Master. It does not matter what profession one is following,—whether it be as a master or student,—if success is to be gained it must be realized that nothing can be accomplished through human will or human intellect, but that it is the divine intelligence alone which is responsible for all true progress.

Jesus, after healing the sick man at the pool of Bethesda, declared, "The Son can do nothing of himself, but what he seeth the Father do: for what things soever he doeth, these also doeth the Son likewise;" and on page 588 of "Science and Health with Key to the Scriptures" Mrs. Eddy gives the following definition: "INTELLIGENCE. Substance; self-existent and eternal Mind; that which is never unconscious nor limited." Wherever one is, therefore, he can be realizing that he is capable of performing all things through the intelligence which the Father gives to him, because this intelligence is unlimited.

The writer proved this wonderful truth to be of ines-

timable value through her college course, and a clearer reali-

zation was gained that the only true intelligence or education

is that which is derived from God "of whom are all things."

Before entering upon the college course, two phases of error

arose which prevented her from accepting the career which

had lovingly been provided and from realizing the fact that

by viewing the problems from the standpoint of Truth she

was being given the opportunity of demonstrating the all-

The first of these was a very great reluctance to give up

a seeming independence, the abandonment of which would,

she thought, entail the postponement of a long cherished

desire to be a help to others in Christian Science and to

demonstrate its healing power. But this fear was to a very great extent overcome by a practitioner before whom the

problem had been laid, who lovingly pointed out that in

whatever profession one is engaged, whether scholastic, man-

ual, or office work, it is God on whom one must rely, and in

whatever environment one may find himself there is nothing

to prevent one from being about the "Father's business" at

all times. The talk ended by the practitioner further point-

ing out that if the student were earnestly seeking opportuni-

ties to help others as she had been helped, divine Love would

provide those opportunities. The student was, therefore,

able to begin her college career knowing that everything, if

done "to the glory of God," would be accomplished satisfac-

torily, and it was not long before innumerable ways were

opened for the declaration of the truth to be made in helping

The second erroneous claim which sought to send up

"a mist" to prevent the student from seeing man in the

image and likeness of God was that of a belief in the lack of

intelligence. Because the world of scholastic studies had

been left for several years, the insidious belief tried to gain

power that there would be difficulty in returning to study

and much time would be lost in having to cover again old

ground; also, that to assimilate learning would be much

harder than in previous school days. The correction of this

material view was effected by the realization that as man is

here and now the reflection of his Father-Mother God, it

must follow that he is reflecting the allness of Mind; so that

when seeming difficulties arose in connection with the ordi-

nary studies, they vanished when the truth was faithfully

applied and the mental work done to know that man must

continually show forth the allness, intelligence, and might of God, and that nothing exists which can hinder or stop this

barmonious manifestation. Both these fears were then com-

pletely overcome by the truth as explained by Mrs. Eddy in

her wonderful textbook, "Science and Health with Key to the

power of Christian Science in another sphere.

Scriptures," and the student found that just in proportion as she was willing and ready to "make channels for the streams

of love," as a hymn in the Christian Science Hymnal (No. 86) so aptly admonishes, so the occasions arose for her to be in an

increasing measure about the "Father's business," without

neglect of her ordinary studies.

In a third way was the healing power of Christian Sci-

ence proved to be an ever present help as regards the activities of college life, and that was in the overcoming of the

belief of lack of time. At first there was a great sense of

which to accomplish all the tasks which each day brought;

Spirit" must be put first, and as this was done time was given

weariness and rush because there appeared to be no time in

but by working on this phase of error as we are taught to do in Christian Science the trouble was met and destroyed. It had to be clearly realized, however, that "the things of the

[285]

Realizing this, we have in fact entered into the "holy

to be shown, how to help leaven the lump of materiality, and students of this wonderful, practical, new-old religion may feel themselves privileged to carry this leaven into the world of university life and thus help others to see and experience the benefits of the true education of Spirit. Jesus said when he sent out the seventy disciples, "The harvest truly is great, but the labourers are few: pray ye therefore the Lord of the

for each activity to be dealt with in the right order at the right

time, thus eliminating all sense of confusion and inharmony.

Christian Science shows every one who earnestly desires

harvest, that he would send forth labourers into his harvest." Therefore, as Christian Scientists take their places in the world's activities and realize that they are privileged to be laborers in this mighty harvest field, performing each act to the

glory of God, so will each receive the hallowed commendation, "Blessed are the eyes which see the things that ye see."

The Holy Place

LESLIE CHARLES HUGHES-HALLETT

IN the fifteenth verse of the twenty-fourth chapter of Mat-thew's gospel we find these words: "When ye therefore shall see the abomination of desolation, spoken of by Daniel the prophet, stand in the holy place, (whoso readeth, let him understand)." Here is a direct command given by Jesus at a time when he was telling his disciples of the final phases of error which would rise to the surface to be eventually destroyed by the omnipotence of Truth. This direct command is for us to-day every whit as much as it was for those fishermen nearly two thousand years ago. Surely nothing could more nearly approximate to the "abomination of desolation" than the state of the world during these latter years. On every hand one is met by mortal mind arguments that "the world is upside down," "civilization is shaken to the roots," "disease is rampant," and the like. To mortal sense these things appear as very evident facts, and unless one understands and follows implicitly Jesus' commands, one is apt to be overwhelmed by a sense of impending calamity. Now, just what is the meaning of those words, "stand in the holy place"? Obviously, before we can "stand in the holy place" it is necessary for us to be sure that we have entered into that place. Mrs. Eddy says that "to discern the rhythm of Spirit and to be holy, thought must be purely spiritual" (Science and Health, p. 510). By deduction, therefore, the holy place to which Jesus referred was a state of spiritual consciousness, a realization of the omnipotence and om-

nipresence of God, good. In order to enter into this holy place, we must indeed come out from the world and be separate. We must enter first into our closet, but not in any material sense. Mrs. Eddy tells us (Science and Health, p. 15): "We must close the lips and silence the material senses. In the quiet sanctuary of earnest longings, we must deny sin and plead God's allness." In other words, we must realize that the sense world of matter, which tries so hard to intrude into our thoughts, is nothing but a lie and hence a negation of Truth. "God saw every thing that he had made, and, behold, it was very good." The evidences of discordant disease presented by the material senses are anything but good, and any admission that they are true is idolatry, for are we not then believing in another creator? If these things are not true, then they have no reality and therefore have no power. We cannot really fear them, for one cannot fear anything that does not exist; in fact, whatever one seems to fear is not real, for all reality is created by

God, good, and everything that He made "was very good."

place," and we are in a position to follow out the remainder of our Master's command, that is to "stand." This standing means that one is to be steadfast in the spiritual consciousness of good. To do this one does not have to give up one's daily occupations, "for in him we live, and move, and have our being." If we stand always in this holy place into which we have entered, we shall be able to go about our daily tasks with that "peace of God, which passeth all understanding," and no arguments of mortal mind that disaster is impending will touch us. Oh, what a glorious thing to know that in the face of every seeming discord Christ, Truth, is always available. "Come unto me, all ye that labour and are heavy laden, and I will give you rest." What more could we ask? What more could we want? "When ye therefore shall see the abomination of desolation, spoken of by Daniel the prophet, stand in the holy place."

Human Opinion

ADALAIDE BRIGGS

WEBSTER'S dictionary defines opinion as a notion or belief stronger than impression, less strong than positive knowledge. Human opinion, then, would be the notion or belief of the mortal or human being. Spiritual understanding is positive, true knowledge. Often when the truth comes so clearly we feel when it is expressed that all must see it, but it is met by mortal mind density as human opinion or intellectuality. Mrs. Eddy says in her article, "Pond and Purpose" (Miscellaneous Writings, p. 206), "Growth is governed by intelligence; by the active, all-wise, law-creating, law-disciplining, law-abiding Principle, God." Also on the same page she says, "Your growth will be rapid, if you love good supremely, and understand and obey the Way-shower, who, going before you, has scaled the steep ascent of Christian Science, stands upon the mount of holiness, the dwellingplace of our God, and bathes in the baptismal font of eternal Love."

Now if we have done our mental work carefully, until the understanding and inspiration come to act, then as we give out this truth, how can it be human opinion? It is not the years one studies Science, but the desire and motive with which one studies, that gain true understanding. If the desire is only to find some way to ease the human path with as little annoyance to self as possible, that is not true desire; but if the motive is to help on the world's salvation, not counting the cost to self, then as we meet in the way, with desires pure and true, we know each other rightly and we know that the truth is not human opinions.

The pure in heart shall see God, good. As with the individual so with any group of people. We may give the credit for seeming discord to some power of evil, some other authority, and by that very wrong thinking open the only way there is for evil to operate. But he whose thinking is pure knows that there is no evil power to operate or to be manifested in his experience, since good is omnipotent and omnipresent, and he is proving this by obeying the Golden Rule, "Whatsoever ye would that men should do to you, do ye even so to them."

Error is inconsistent, illusive, and one may easily seem to be deceived, but we are either obeying the truth or we are obeying error. Mrs. Eddy says, "The only incentive of a mistaken sense is malicious animal magnetism,—the name of all evil,—and this must be understood" (Miscellany, p. 357). But if honest in his purpose the student of Christian Science soon learns the nothingness of animal magnetism and rejoices in the knowledge of its powerlessness to hinder the recognition of and obedience to Truth.

"What is that to thee?"

ROGER BURGES

THIS quotation from the gospel of John, "What is that to thee? follow thou me," is sufficiently well known to excuse any attempt herein to comment upon it as originally given by Jesus. It is the purpose of this article, on the contrary, to put forward some views on its application to the present,—the all-important now. It is assumed that there is no one in the world to-day who has not found it necessary on some occasion to take sides on some question more or less important. It is a fact, perhaps more fortunate than the majority are willing to understand, that the present day affords any number of opportunities to take sides in controversies social, political, and religious. What is unfortunate is that so many of us, in deciding which side to take, are apt to run down the other side to the full extent of our ability,—by deed, when that is possible, and by word and thought.

In "Science and Health with Key to the Scriptures" our Leader has included many prophecies of the effect of the thought of Christian Scientists on the problems of world regeneration, and it would appear desirable, therefore, to make a thorough examination of our thoughts, see what they are, where they are leading us, and what effect they are likely to have upon the world. Mrs. Eddy often refers to our path toward perfection as a "course," and on page 268 of her "Miscellaneous Writings" she says, "The Christian Scientist keeps straight to the course." The complete Christian Scientist, yes: the student of Christian Science? Well, probably not, as the following simile may make clear.

A ship's course is sometimes spoken of as her track from one place to another. Leaving out of consideration the many intricacies of navigation whose application to the problem need not be developed here, there is, of course, only one best, exact, and true track between these two points, and it is the object of every ship which has to steer that course to keep as close as possible to that track. It is a fact, however, that no means of doing so exactly has yet been found. No matter who is the helmsman or how perfect the steering appliances or how calm the sea, the ship's course works out like a waved line which constantly crosses and recrosses the true track. A good helmsman will keep closer to the true track than will an indifferent one, but the perfect helmsman has yet to be found.

We see, therefore, that, while all the ships steering a given course are trying to keep on the true track, it is only momentarily that any two of them can be expected to be exactly on the same or parallel courses, and maybe none will be on the true one. If two of them diverge even a small amount on opposite sides, the error of each one from the point of view of the other will appear to be doubled; the remedy is only to be found by observation of the compass, when each ship's own error will be made clear. It seems unnecessary further to develop this simile, except to add that each helmsman must look to his own compass and steering apparatus, because he cannot conveniently look at the other man's.

"What is that to thee?" When we find that we seemingly cannot avoid taking one side or another in one of the many controversies which rend the world to-day, it is surely advisable for each and every one of us to admit the good intentions of the individual who appears to be erring on the side opposite to one's self, and to measure the accuracy of one's own course by observation of the compass,—the Bible and "Science and Health with Key to the Scriptures," remembering that the helmsman's view of his compass and steering appliance is peculiar to himself, and cannot be seen by the man in the other ship. "Follow thou me." This all

of silver."

of His answer. As one discerns the spiritual opposite of ma-

teriality, or his true being, he perceives that it is in rapport

with God, for it is spiritual, and God is Spirit; and thus is

communion between God and man not only possible but in-

evitable. The discernment of true being would destroy for-

ever the personal sense of one's self, and with such an influx

of light concerning his impersonal individuality, as the image

of an impersonal God, the winding sheets of false, human be-

liefs must be removed; and these whilom bonds once cast

aside, the understanding would follow that man is free to use

the key of Truth that unlocks to him the paradisaical gates.

With this freedom comes the realization that great and

mighty things are being revealed day by day through the

understanding of God, as taught in Christian Science. Thus

it is that one learns how to call unto Him and why He answers

and communicates to man His mighty verities. A further

step compels a willingness to communicate to others the bless-

ings gained from these inspired revelations; and though one

may not have the tongue of an orator nor the pen of a ready

writer, yet we have Paul's word for it that "if there be first a

willing mind, it is accepted according to that a man hath, and not according to what he hath not." The sincere word of

testimony, spoken or written, in acknowledgment of revealed

blessings, is always fitting, like "apples of gold in pictures

great and mighty things which God showed unto the ancient

worthies, unto Christ Jesus and his disciples, and all who have

followed in his steps! And what the world owes to-day

to Mrs. Eddy's vision of the truth, and to her consecrated

effort in presenting it, through her writings, to waiting hearts!

One can know but little of the vast fruitage that may be har-

vested as a result of his written or spoken word, as he tells

of the wonders God hath revealed to him. And since each

of these revealings is the truth, it is not for the individual

alone, but meant to bless all mankind. Gradually it dawns

upon the thought that the only wonders of God which can

be shown to man are divine ideas, whose substance is Mind.

These ideas are objectified in the universe, and of such Mrs.

Eddy writes on page 109 of Science and Health, "When a

new spiritual idea is borne to earth, the prophetic Scripture

of Isaiah is renewedly fulfilled: 'Unto us a child is born, ...

[Written for the Sentinel]

Happiness

LOUISE L. HESSE

The bonds, before they've learned to bless

The very circumstance which bound them so.

Or yet her blossoms, or her leaves anew.

HAST ever longed to show mankind The way to happiness?

Try not to urge them to unbind

Then, only, can they see the goal,

The tree cannot send forth her fruit,

Has been fulfilled in season due.

Until each step which goes before

And strive for better things.

ALL unto me, and I will answer thee, and shew thee

Call unto hie, and a mind thou knowest not."

While yet incarcerated in the prison court, by order of

Zedekiah, king of Judah, the prophet Jeremiah found such

spiritual freedom in communion with God that utterance

was given to some of the most inspired and inspiring state-

ments of prophecy contained in the Bible. The above quo-

tation, found in the thirty-third chapter of his book, is a fair

example of the scope of his vision. And, in fact, a careful

study of the entire chapter brings to light promises of exceed-

ing comfort and joy; promises of healing and "abundance

of peace;" the liberation of captives; purifying from all in-

iquity; also the performance of promised good to Israel, in

How the narrow walls of his dungeon must have vanished

from sight, as the prophet beheld with true vision the actuali-

ties of Spirit, the government of good, confirmed centuries

later by Christ Jesus and his apostles! Again, centuries

later, the Jeremian visions were confirmed by Mary Baker Eddy, in the teachings of Christian Science, concerning whose

Biblical foundation she writes, on page 269 of Science and

Health: "The testimony of the material senses is neither abso-

lute nor divine. I therefore plant myself unreservedly on

the teachings of Jesus, of his apostles, of the prophets, and

on the testimony of the Science of Mind. Other foundations

there are none." What "great and mighty things" patri-

archs and prophets were permitted to witness, as they com-

muned with God! These revelations of a day long gone by

have continued down the ages; and to-day the great and

mighty things are for all who call unto Him, for, as Paul

writes to the Romans, "the same Lord over all is rich unto

But one may say, "How can I call unto God? And why

the appearance of "the Branch of righteousness."

The Sign of the Cross

It is said that the Emperor Constantine, after his conversion to Christianity, adopted as his motto the words, in hoc signo vinces, by this sign you conquer. The sign to which Constantine referred was the cross, and Constantine, whether he understood it or not, had the authority of the Bible on his side in choosing his motto. Jesus of Nazareth, having inquired from the disciples who the people said that he was, and having been told by Peter that, whatever the imagination of the crowd might depict him as, he was to his followers "the Christ of God," went on to explain that the only way in which any of those who had accepted his teaching could show their understanding of this would be by striving for the Mind of Christ, or as he then put it, by learning to "deny himself, and take up his cross daily, and follow me." These words, of course, made it perfectly clear that Jesus was not referring to the physical cross he would one day carry up the hill at Calvary. For it is obvious that it would be impossible for any man to do this daily. What he was referring to was that self-denial which contains the repudiation of the evidence of the senses, and constitutes the claim which Jesus made for all of his disciples, at all times, to the sonship of God, Principle.

Never once did Jesus claim, according to the Greek text of the Bible, that he was the only son of God. He spoke of "my Father, and your Father," and he taught the disciples to pray to "our Father which art in heaven." But nobody knew so well as he that the physical man was not the son of God. In uncompromising language he denounced this physical man as having for his father the devil, in other words evil. Consequently, when he insisted that the only way to follow in his footsteps, as the Christ, was for the disciple to deny himself daily, he simply meant that everybody aspiring to be a Christian must daily deny the reality of his own materiality, and must take up the cross which this denial insured, and so follow in his footsteps as he had walked in the narrow way that leadeth to eternal life.

No man knew better than Jesus what this entailed. In the wilderness he fought the battle with the lusts of the flesh, and one after another had seen the efforts of evil to mesmerize him into a belief, first in material sustenance, second into the sensualism of vain glory, and third into the passion of power, fail before his understanding of Principle. Therefore, when he told his disciples to take up their cross daily, he knew perfectly well what the struggle with the flesh was, a struggle of which Paul was one day to express the bitterness when he exclaimed, "For the good that I would I do not: but the evil which I would not, that I do." This struggle is simply the struggle with the belief of pleasure in matter, for every one is willing enough to take up arms against pain in matter, or material inharmony of any description.

Pleasure in matter claims to make man its captive, and it is because of this that the fight is daily, and that the fight is typified in the carrying of the cross. "With your own wrists manacled," Mrs. Eddy writes on page 449 of Science and

Health, "it is hard to break another's chains." Jesus knew this perfectly. "For their sakes I sanctify myself," he said in his last great prayer, "that they also might be sanctified through the truth." He knew that to deny sickness, sin, and matter for others a man must have begun to realize the nothingness of sin, sickness, and matter for himself. Therefore, it was natural that he should declare, "Greater love hath no man than this, that a man lay down his life for his friends." Now, in the Greek of the New Testament, life is soul, and soul means the material instinct of life in matter. Therefore, Jesus was declaring that the greatest love which any man could show his neighbors was to rid himself of his own sensuality, so as to be able to help them. In other words, as Mrs. Eddy points out, that he should break the manacles of sin on his own wrists before he could expect to break the manacles of his neighbors.

The cross, then, which every follower of Christ Jesus has to carry is the world's hatred of Truth, the world's determination to cling to the fleshpots of matter, the world's fury with anybody who attempts to disturb it in its sensual dream. "The real cross, which Jesus bore up the hill of grief," Mrs. Eddy writes on page 50 of Science and Health, "was the world's hatred of Truth and Love." It is this hatred of Truth and Love which develops in every sensuous thought and action of the man who engages in the struggle with matter. And thus in the daily struggle against the temptation to believe in the mesmerism of matter, the individual does lift the cross of the world's hatred of Truth and Love. In this way the cross becomes naturally the sign by which a man conquers. And this was surely what Paul had in his mind, in writing to the Corinthians, "For the Jews require a sign, and the Greeks seek after wisdom: but we preach Christ crucified, unto the Jews a stumblingblock, and unto the Greeks foolishness." The only sign, then, which Paul was prepared to offer to the materiality of the Jews, was the cross of Christ, just as the only evidence he was prepared to offer to the intellectual subtlety of the Greeks was this same cross, a stumblingblock undoubtedly to the Jews who remembered the story of the crucifixion, and foolishness indeed to the Greeks fighting their daily dialectic battles on Mars' Hill.

The Jews and the Greeks both rejected the cross, because they were extreme materialists, and so entirely incapable of understanding the spiritual lesson of the cross. To them it was merely the type of the death of a felon. The metaphysical reasoning of the Sermon on the Mount was a thing entirely beyond them, owing to the grossness of their material conceptions. For this reason metaphysics have always been a red flag to the sensualist, and a target for his attack. The mental discipline necessary to master them is repugnant to him from the very fact that it means that he must come out of his dream of the senses and his mists of theology in an effort to comprehend God, not as the Jew's tribal Jehovah, or as the human mentality of the philosophical Greek, but as divine Principle, Principle which knows nothing of the physical materiality of the Jew or the mental materiality of the Greek, but the effort to understand which must be made through the daily assumption of the cross in the laying down of the passions of the flesh and the vanities of the human mind.

Whatever, then, the Emperor Constantine saw in the sign of the cross, he was perfectly right in his deduction. It is in a man's understanding of the sign of the cross, the sign or proof, that is to say, of the unreality of matter and of his spiritual fatherhood, that he conquers. "The cross is the central emblem of history," Mrs. Eddy says on pages 238 and 239 of Science and Health. "It is the lodestar in the

demonstration of Christian healing,—the demonstration by which sin and sickness are destroyed." Now, as the only way in which sin and sickness can be destroyed is through an understanding of Principle; and as the only way by which this understanding can be attained is the individual's daily effort to overcome his own sensuality, it is perfectly clear that the cross is the sign of this overcoming to the human race. But, to comprehend what all this means, the cross must be understood for what it is, the struggle against the world's hatred of Truth and Love. FREDERICK DIXON.

Timidity

It is remarkable how many words there are in the English language to denote various states and stages of fear. Timid, shy, alarmed, frightened, terrified, doubtful, anxious, afraid, and many other more or less familiar adjectives are used to describe the condition of one who believes in some other power than Principle. On page 410 of Science and Health Mrs. Eddy says, however, "Christian scientific practice begins with Christ's keynote of harmony, 'Be not afraid!'" "Always begin your treatment by allaying the fear of patients," she advises on the following page. Sureness that the divine Mind governs man is, of course, all that will ever take the place of any form of fear or timidity. The sureness that God is, "and that he is a rewarder of them that diligently seek him," is, therefore, the starting point for all right work.

If one has seemed too timid to reason very thoroughly for himself or to come to his own decisions, the first point to reason about and decide is how one really knows that God exists. Too many people have either taken God for granted or left Him out of account. Asked to state any proof of the existence of God, or divine Principle, people of either sort may turn attention to the wonders of the physical universe and postulate some creator for them. Yet the evidence of the physical senses is so often mistaken that it will be readily granted that many of these so-called wonders may be wholly illusory. In any case, the creator of mere matter would have to be material; and on such a basis one could never succeed in setting up more than a hypothesis of a mechanistic universe. That is just what the physicists are trying to do. In their attempts they succeed, however, only in arriving at the conclusion that all there is to matter is a concept of some kind of a supposed mind and thus admitting the unreality of matter. The mind which they suppose, is, in fact, simply what Christian Science calls mortal mind, or, in other words, not true Mind at all, not an entity, not the provable reality which is the cause for immortal living.

When, on the other hand, the one who is perhaps timidly seeking the proof of God's existence and availability is told that God's healing goodness manifest to man is the proof, such a one may possibly question still further as to whether such healing goodness has yet been experienced. The doubting one needs a positive foundation from his own standpoint and quite apart from any human evidences. Just to be alive is really a demonstration of the existence of the animating creator. There must be some cause for living, and, since conscious living is not dependent, in the last analysis, on the physical senses in any way, the true cause must be entirely separate from supposed sense testimony. It is the very being conscious that is fundamental to conscious living. The being alive proves the existence of Life, or, to put it in other words, the being conscious proves the existence of causative Mind. This provable Mind actually is the cause of all real living or experience.

In individual reasoning, one can, of course, see this

spiritual truth even more satisfactorily than it can be stated in human words on paper. The fact itself is the basic surety to take the place of any sense of timidity or fear. When one fully knows that there is one Mind, spiritual and not mechanistic, as the only producing or influencing power, one is going forward with joy. The understanding of this basis applies definitely to whatever would argue the opposite, and silences such false argument with the specific truth. By beginning one's reasoning in any case with the positive surety of the divine Mind's presence, one leaves no room for a trace of timidity or fear. The remedy for timidity is, therefore, to persist in knowing that Mind is omnipresent and ever expressed as exactly the right idea to replace any belief in limitation. The understanding that God, infinite Mind, divine Principle, actually exists as the cause for true, spiritual living is for all to prove for themselves.

With this sure foundation for reasoning in Christian Science, one cannot possibly be intimidated by any suggestion of evil nor by the belief that some one else should arrange and command one's course of action. Opposition to Christian Science, for instance, cannot interfere with Mind's immanence. Seeming opposition to one's way of studying and practicing Christian Science, moreover, cannot obstruct in the slightest the progress of the one who understands that God, divine Mind, is the sole cause. It is good just to know the presence of true Mind. Really to know this, and not to

take it for granted, is a sure defense.

The beginner in the study of Christian Science is encouraged when he realizes that many others before him have overcome all sorts of timidity and fear through steadfastness on the basis of Mind and its harmonious activity. Of Mary Baker Eddy herself, the Discoverer and Founder of Christian Science, we read in her own words, on page 17 of "Rudimental Divine Science," "The Discoverer of this Science could tell you of timidity, of self-distrust, of friendlessness, toil, agonies, and victories under which she needed miraculous vision to sustain her, when taking the first footsteps in this Science." The very gladness that man expresses Mind, and that Mind manifests itself as right idea, right activity, is the diligent seeking and knowing that insures the reward of health, strength, and success of every sort. Through this rejoicing, one proves what God's healing goodness is and why it has never been in reality obscured. Thus one is demonstrating, by living, the truth that the divine Mind never has given so-called mortal mind any opportunity whatever to be more than utter nothingness, of which it would be foolish to be afraid. GUSTAVUS S. PAINE.

[Written for the Sentinel]

A Prayer

MARY BLOMFIELD

IN the hearts of the children of men, O God, be Thou present in power, To comfort, to hold Thine own in this hour.

Constant in love, In life, be Thou here, Saving Thine own In consciousness clear.

Thou art, and none other. Thy love in every place We see and adore Till, the final oneness knowing, We see Thee face to face.

Testimonies of Healing

It was during the summer of 1911, while visiting friends in the country, that I decided to try Christian Science treatment for inflammatory rheumatism. I had had two acute attacks and after the last one the doctor told me I would have one every two years until I became helpless; that the medicine was then affecting my heart. I had suffered from rheumatism for fifteen years at this time and was very lame, especially during the stormy winter weather. Not being acquainted with any Christian Scientist, I wrote to a Christian Science church in the city where I then lived, and was answered so lovingly by the clerk that I determined to take treatment at once. I was entirely healed in four treatments. In September, 1919, I had a nervous breakdown which seemingly affected my heart quite seriously. On November 10 I returned to business, and have not since lost one day on account of ill health.

What I am most grateful for is the overcoming of resentment, and for the spiritual uplift and growth following. All that I am and have I owe to Christian Science, and feel that I can only express my gratitude to God, to Mrs. Eddy, and to the practitioner and friends for all their loving help by living worthy of the name "Christian Scientist."

(Miss) CARLOTTA E. JAYNE, Yonkers, N. Y.

4

In attempting to write a Christian Science testimony, experiences, enduring proofs of the works of Christian Science, come to me out of the past, each equally beautiful and conclusive. There are two things deeply engraved on the thought of all Christian Scientists who have sought this Science for healing purposes: the first, when they first sought and received healing from another, and the second, when they first proved for themselves the efficacy of this scientific method of healing.

Twenty-three years ago I first heard of Christian Science. I had never been considered strong, had always suffered from severe colds and sore throat, then I met with an accident, and for about five years suffered incessantly. I could not eat or sleep. One of Chicago's leading physicians diagnosed my trouble as a severe form of stomach trouble termed nervous dyspepsia with nervous prostration, spinal irritation, and other diseases supposed to follow a nervous shock. He also said I would never be anything but a nervous wreck

Some years before this two sisters had passed on, and later my only brother. I was only sixteen when my brother left us. All night I had knelt pleading with God to save his life, and in the morning I said, "God does not answer prayer;" and from that hour I could not pray. Together my mother and I had prayed for the others, and now she prayed for me. I wondered how she could continue to pray to a God who never acknowledged He had heard her, and when she said, "Child, why don't you pray?" I turned my face away; I could not tell her all I was thinking. I knew it would grieve her, and was she not suffering enough on my account?

I was then taking three kinds of medicine, and every other remedy which my mother could hear of had to be given a trial. Electrical treatment had also been resorted to and abandoned as useless. I was taking only toasted crackers and hot water and very little of that, as food caused intense suffering. Added to all of this was the constant dread of something about to happen. One day another sister, who had been away from home, came and told my

mother of her wonderful healing. An old trouble of long standing had been healed in one Christian Science treatment. There had been a misunderstanding, and she and I had been estranged, yet Love had sent her home to tell mother to have Christian Science treatment for me. Mother was overjoyed to tell me. I tried to laugh it away as some new fad, but she pleaded, "Try it for my sake," and for her sake and without the least particle of faith in it, I received my first Christian Science treatment. If I had expected any laying on of hands, any rigid rules laid down for me to follow, I was disappointed; nothing of the sort occurred. A few tender, encouraging words, and then for a short time the practitioner sat down beside me in silence. She handed me a book to read, but I could not read it at first because I was suffering, and besides, I was earnestly engaged in watching her to see what she intended to do next. A radiant smile, a few reassuring words, and that was all. I thought she was very unsympathetic; she did not encourage me to recite my troubles nor inquire about symptoms as I thought she should. I remembered but one thing, in fact I have never forgotten it; she said, "Nothing can hurt you; you are God's child." Over and over again I repeated those words.

That evening I ate a hearty dinner, retired early, and slept until seven o'clock the next morning. This was a most wonderful experience, for I had not enjoyed such peaceful rest for nearly five years. My mother was standing by my bedside when I awakened and she said, "You have slept all night." She had come to my room several times during the night, for I was so quiet she feared something had happened as a result of eating so heartily. Tears of joy were streaming down her face as she said, "Child, surely this is of God," and I said, "Yes; no human power has done this." I felt like a new creature, so rested and refreshed. As soon as possible I went to the practitioner and asked, "What did you do? My mother has been praying for me for years; you have prayed for me once and I am well." She answered, "Your mother has been imploring God to make you well, to do what He had already done; my prayer was the understanding of the truth, and that has set you free." Then she told me about the little book, "Science and Health with Key to the Scriptures" by Mrs. Eddy, and that Mrs. Eddy had found all that she taught in the Bible, that if I would learn to cast out evils and heal the sick I must study these two books. I procured a copy of Science and Health, but did not read the Bible for some time. I had never understood the Bible and I was so happy when I read Science and Health I actually feared I would find something contradictory in the Bible, something that would bring back the old fears; then one day I found in Science and Health a reference which impelled me to read the Bible. I read nearly all night, and as I read I thanked God that one had been found who was pure and unselfish enough to give to the world the key which unlocked for mortals the hidden treasures of Truth contained in this holy Book. The Bible had not changed, but my concept of it had, and for this I owe Christian Science unbounded gratitude. How many times when danger threatened have I opened its sacred pages and there found peace, strength, and courage to go on; proving its promises to be true.

I wish to relate my first experience in proving for myself that reading Science and Health heals suffering. Shortly after my healing I had some dental work done. I had been in the chair over two hours, and when I reached home I rushed to my room and threw myself on the bed. My sister called me for luncheon, but on seeing my condition she said, "Why don't you read Science and Health?" I arose and

tried to read. At first it seemed impossible: then the suffering grew less and less until finally all pain ceased and in about half an hour I was eating my luncheon. For release from physical suffering I am truly grateful, but how can I express what I feel for the greatest blessing—the learning to know all things spiritually; the broader outlook which teaches me to love all things which God has created, thus knowing there is nothing in all the wide world to fear, since overcoming, in a degree, of selfish ways and that I am learning to let the divine overcome the human. Looking back over the years which have passed since first this bread "which cometh down from heaven" was broken for me, I can find no resemblance in myself to that fearful, heart-sick, weary girl who wonderingly received her first Christian Science treatment. I rejoice in progress made and know the way will grow still brighter, for nothing can rob God's child of the fruits of righteousness-right thinking. "And the work of righteousness shall be peace; and the effect of righteousness quietness and assurance for ever."

(Mrs.) Anna Sunderman, Mt. Greenwood, Ill.

When I turned to Christian Science, twelve years ago, it was not for physical healing. A friend explained to me in a simple way the truth as taught in "Science and Health with Key to the Scriptures" by Mrs. Eddy. I said, "That is what I want; that is practical." Needless to state, from that time all my supposed troubles have been handled from the standpoint of Principle. Stomach trouble, for which medical aid had been applied for thirty years and every supposed remedy taken, but without avail, was overcome through Christian Science, and there has been no return of it. The desire for smoking left me shortly after I became interested in Christian Science, and the smell of tobacco in any form is disagreeable to me now. Being a commercial traveler and away from home much of the time, a realization of the all-presence of God brings companionship, and though seemingly alone, I am not alone, but in His presence always, and to commune with Him is my highest concept of heaven.

When traveling by automobile over steep mountain roads, fear, which sometimes creeps in, is quickly overcome with the knowledge that God is omnipresent, and that Mind

I am trying to express my gratitude by living in harmony with the teachings of Jesus, which Mrs. Eddy has reestablished. For those messengers of Truth and Love, the Journal, Sentinel, and Monitor, I have the deepest appreciation, and consider it a privilege to pass them along to some weary wanderer, knowing that thousands have found rest and peace from their inspired pages.

JOHN S. BROWN, Watsonville, Calif.

I realize that now is the time to express the gratitude that wells up in my heart for the loving help received through Christian Science. I had been under medical treatment for fifteen years and was growing worse every year. When the thought of leaving my young son to the care of others came to me I turned to God in prayer as I had never done before. I asked the question, "Why can I not be healed in the way Jesus healed?" I pondered this question, with the mental picture of the woman who pressed Jesus in the crowd and touched the hem of his garment, until that one desire was ever with me and was, in itself, a constant prayer.

I grew better through this desire, and it was while away from home that I was guided to a piece of literature, the Christian Science Sentinel, in which I found the answer to my prayer. I studied and absorbed the truth found there and finally sent for "Science and Health with Key to the Scriptures" by Mrs. Eddy, and when I read its loving, healing message I lost all sense of discord and pain, and found joy and peace in their stead. Not quite satisfied that I had done He, Love, is All, and all is His. I am grateful, too, for the call, I talked with a practitioner, and after one week's treatment I was healed completely. My experience at the time of the healing has been to me the most sacred moment of my life. It came in the quiet of night, like a still, small voice, in the words, "Be still, and know that I am God." I listened, followed, and arose in some measure out of material beliefs and was so uplifted that I caught a glimpse of "a new heaven and a new earth" described by John in Revelation.

> Neighbors and friends marveled at the great change, but for months I kept my counsel, and at last I was able to tell them it was Truth's healing power. I sought the church services, and since then have been able to bring help to

The new life I was trying to live was not understood at first, and I was disappointed when some of my dearest friends did not at once accept the healing truth I had learned of through Christian Science. I then learned, however, and am still learning, not to assume responsibility for others, but to be a better and more grateful Christian Scientist each day, and to let my life bear convincing witness to the truth,-but ready at all times to share the message with those who wish to hear.

With loving gratitude I give my testimony for the help received through our Leader's writings and the periodicals which she has given us.

(Mrs.) Nellie Archer Aley, Orono, Me.

Christian Science has been indeed the answer to my deep desires. About ten years ago Christian Science came to my notice, and it found me a most miserable creature, filled with superstition and fear; but with it all, there was a longing to know God better and to serve Him with my whole This longing seemed to get stronger and stronger. Later I went to work in a practitioner's home, knowing nothing of Science, however, as I had been brought up in the Baptist faith. One day, when the way seemed dark and I was unusually depressed, I was working around the desk of the practitioner and struck one of his books, as if by accident. It opened to page 66, and the book was "Science and Health with Key to the Scriptures" by Mary Baker Eddy. I felt impelled to read the following: "Trials teach mortals not to lean on a material staff,-a broken reed, which pierces the heart. We do not half remember this in the sunshine of joy and prosperity. Sorrow is salutary. Through great tribulation we enter the kingdom."

The truth contained in these words seemed to throw a great light in my path. I became interested in reading the book, and from that time on I have been fully at one with the wonderful teachings of Christian Science. I have had help through its practice in every way, and feel that I am an entirely different being from the one who read those first light-giving and life-giving words, ten years ago.

Among the various healings that have come to me through the operation of Christian Science was that of heart trouble. The doctor had told my mother that I was in such a condition that I might die at any moment, and that I must not by any means do any more work of any kind. One

morning I was so ill that I could not go to work, but after an hour's visit with a practitioner, I felt perfectly free and went about my work, and have never since felt any trace of the claim. Another valuable experience was the overcoming of the fear of criticism, and an extreme sensitiveness to crowds. But one night at a Christian Science service in a large church the healing thought came to me, "Why, God fills all space, and is all that is here, and His thought is kind and loving." I was free at once, and have never since been troubled with what was to me so great a cross.

During the epidemic of influenza I was stricken down very suddenly, and according to human belief, seriously, and had reached the stage where speech had gone from me, when the practitioner entered my room. The claim was such that I had been mesmerized into great fear, and my family thought that the end was at hand. But after the practitioner had voiced many statements of the healing truths of Science, all fear departed, and I became able to express my gratitude, and my recovery was immediate. I am indeed grateful to God and to Mrs. Eddy for the many blessings that have come into my life through this new-old truth.

(Mrs.) Anna Harvey Cosby, Chicago, Ill.

4

I am very thankful indeed for the inspiration, strength, and comfort which Christian Science is to me. It was so glorious to find that one could begin to know God here and now, and could really have His guidance and love now. Another joy was to know that all are God's children. To know that God is the only power is more comforting than words can express, and the strength to accomplish is steadily growing with my understanding that God is the inexhaustible source, and that any mistaken sense is powerless to rob me of that strength. Neuralgic headaches of great severity have faded into their native nothingness, together with many bodily discomforts and pains. Also many secret fears have been dispelled.

I am deeply grateful for being enabled through Christian Science to work mentally for the uplift of mankind. I cannot express the gratitude I feel to Mrs. Eddy and to the dear friends and practitioners who have lovingly helped me, also for the Christian Science literature, and for class instruction.

(Miss) Effie Mann, London, England.

*

I sometimes wonder if we are expressing enough thankfulness to God, to Mrs. Eddy, the Discoverer and Founder of Christian Science, and to all those who lovingly help us out of our blind beliefs and bring us to the realization that man is made in God's image and likeness, when we withhold from the world a testimony of gratitude.

After being a semi-invalid for many years, suffering with what is termed glandular tuberculosis, I was induced to try Christian Science. Being worn out and thoroughly discouraged with having to undergo one operation after another, I finally consented to go to a practitioner for help, and notwithstanding the fact that I had been told there was no cure for me except to have these glands removed, I was healed in one week. This blessing came to me sixteen years ago and I have never had a return of the trouble, and am now in perfect health, due entirely to the understanding and application of Christian Science. This was my first experience in the healing power of Christian Science. During the following years of study and application of its teachings I have received many more blessings, physical, mental, and

financial.

I hope that this testimony of gratitude will help some one who is struggling under a belief of dis-ease, to come into the true state of health and harmony as I have done. Mrs. Eddy tells us on page 79 of Science and Health that "giving does not impoverish us in the service of our Maker, neither does withholding enrich us." Knowing this, I wonder how I could have been so many years in expressing my gratitude for what Christian Science has done for me.

(Miss) ELVA APPERSON, Portland, Ore.

4

My first healing through Christian Science was of scarlet fever. After I had been ill about half a day, our regular doctor examined me and found I had all the symptoms of that disease. He prescribed medicine, and told my mother that I would break out the next morning with scarlet fever rash, after which he would "report the case." My mother, who had suffered greatly for five years and was being healed through Christian Science, telephoned a practitioner immediately. He gave me absent treatment through the night. When the doctor called the next morning, he was surprised, as were my parents, to find me well.

Five years later, I was healed of constipation. This ailment had become chronic with me, and occasionally I took medicines for it. One winter while away from home I had an acute attack which I did not seem able to overcome through my own efforts in Christian Science. After a week I went home discouraged and asked my mother to help me. In a few hours I was completely normal again, and for five years had no further trouble from that source. Within the last year the condition returned, only to leave me when I gave up reliance on hygiene.

Christian Science is teaching me how to overcome many forms of self-love, how to find happiness apart from time, circumstances, or matter, and how to glorify God.

RICHARD BUEL, New York City.

4

That "man's extremity is God's opportunity" was proved in my case. My husband had asked me to try Christian Science, and I did take a few treatments to please him, but I was not ready to give up the old way until August, 1917, and since then have not used any material remedies.

I know that this Science does meet every need when properly applied. In our family of five many demonstrations have been made, including the healing of influenza, sores, biliousness, and mental disability. I had an instantaneous healing of pneumonia, with the loving help of a practitioner. The last two babies were born under Christian Science treatment, and all material laws that had been held over me were overcome. For years I was unable to do my housework, but I do it all now, and enjoy it.

We are very grateful to those who have so lovingly helped us, also for the periodicals, which we feel we could not do without, and I do feel so thankful to God that He gave to us, through that noble woman, Mary Baker Eddy, the truth that makes us free.—(Mrs.) WINNIE M. McCoy, Douglas, Arizona.

I wish to express my gratitude for all that Christian Science has done for me and for our family. Six years ago I read "Science and Health with Key to the Scriptures" by Mrs. Eddy, for the first time, and though I then felt I could not understand the book, I can now recall many instances of protection, and several healings that came during the three months that the book was in our home. After the book

was returned to the one who lent it to us I often had a desire

to read it again and wondered why, when I did not under-

stand it, I should feel so. Nearly a year later, when

my husband asked what I would like as a gift, it came to me

forcefully that to own a copy of Science and Health would

be all I could desire, and I told him so. Several days later

he handed me a copy and I began to read it again. This

time I found here and there lines that I could understand,

where before all I seemed to understand was that God is

Love. Love was what I had always wanted to know as God
